SHOW DROP IN CONVICTS

With zero-tolerance streams open to spearing on riverine sections, the number of violations of spearing laws was significantly lower than in previous years. This could contribute to increased fish populations in the future.

POULTRY

CHICK AND EGGS SHOW PLANNED AT COLLEGE

Plants have been established to have the egg show and the chick show here for the first time at Michigan State College on the same dates and the same location. The egg show is scheduled for May 17, 18, 19, 20. The chick show is the following day, the 18th. The shows will be on the west end of the campus.

A MANAGEMENT SCHEDULE

A number of feeding, brooding, and rearing practices will be indicated for the chickens. These practices will be varied by various experiments that will be conducted and be supplemented by the standard feeding formulas that are published by the State Board of Agriculture. All of these will be available for review during the show.

A new item to the program this year is the list of poultry clubs which will be available for download on the college website. The list includes the name and contact information of each club.

New Gasoline Railway Coach with Rubber Tires

A gasoline powered railway coach, capable of speeds up to 100 miles per hour and equipped with a pneumatic railroad tie for easy riding, is to be used in Akron during a test run through Ohio. It is the first to be manufactured in the United States.

Insect Pests—Indications of Unusual Activity This Season

Insect pests threaten damages in many parts of the country, especially in the Great Plains region, which suffered from severe drought this past year. Two hot, dry summers provided ideal conditions for the growth and multiplication of these pests, and a mild winter permitted a high survival of the pests throughout the winter.

The Hayfield fly and chalk mark borer, two of the most destructive pests, have been on the increase in many parts of the East Central States. This year, in Kansas, they have caused severe losses in corn. The corn borers have also been a problem in the eastern United States, where they have caused heavy losses in wheat and other crops.

The situation is so serious that the United States Department of Agriculture is sending out kits to farmers in the affected areas. The kits contain information on how to control the pests, as well as instructions on how to identify them.

A New Star

Ella B. Dabney, a native of the New York City stage, is the latest to run in films and to be seen in Hollywood upon her arrival in California. She was star of a recent play, and people say she is to star in a new, large film deal.

Pretty Girl Becomes Acting Governor

Introducing the Mechanical Engineer

The selection of high grade seed potatoes and an inexpensive treatment of this disease will control several of the most important diseases of Michigan potato growers and will aid farmers in this state to produce the greatest yield of high quality potatoes at a reasonable rate of return. The disease known as blight is one of the most serious pests in the potato industry today. It is caused by a fungus which attacks the leaves and stems of the potato plant, and it is spread by风雨, insects, and birds.

Yates suggests that the disease is not caused by the weather, but by the disease-damaged potatoes which have been planted. He advises that farmers should use only healthy, disease-free seed potatoes, and that they should destroy all infected plants as soon as possible.

Cantlewood Sugar Plant | Will Not Be Closed

This is the number of acres planted in the field, and the acres planted in the field of a given crop. The crop planted in the field is the number of acres that were planted in the field. The crop planted in the field is the number of acres that were planted in the field of a given crop.

Eating the Mechanical Engineer

Mrs. Helen Wilcock Moody, America's most noted housewife, is to hold a new position at the United States Department of Agriculture. She will be in charge of the Women's Division, which is responsible for the promotion and support of women's agricultural education and training programs.
To meet the demand for this extraordinary offer we are continuing the coupon book sale for the balance of the month. These special Coupon Books contain twenty one-ounce coupons. The books sell for three dollars, 15c per quart.

In buying Penn-Dixy Coupon books you sacrifice nothing. You get station service on a quart or two or a complete change of oil. The same free draining and relifting service goes with coupons as with a cash purchase.

Also give you the grade and quality of oil recommended for your particular make and model of car at the season of the year when coupons are presented.

Old Clipper Records

Splendid Records Made by Old Clipper Records

The clipping office of the Chicago Tribune was requested by the Chicago Tribune to submit a list of records made by Old Clipper Records and for which the price was paid. The following list was submitted:

The Chicago Tribune.

Mr. Thomas B. Sloan, manager of Old Clipper Records, was interviewed by the Chicago Tribune for the purpose of securing information regarding the records made by Old Clipper Records. Mr. Sloan stated that Old Clipper Records had made more records than any other company in the world and that they were the only company to make records that were guaranteed for the lifetime of the record.

Old Clipper Records have been in operation for over twenty years and have made over one million records. The company has a large plant and employs over one hundred people.

MAD LAUGHTER

A THRILLING ADVENTURE IN RHODESIA

By JAMES BURTON

CHAP...
Who has the right to be at home? Is it the parent, or the partner, or the person who shares the room? Is it the person who pays the rent, or the person who occupies the space? Is it the person who has the legal right to reside there, or the person who has the emotional connection to the place? These questions are not just about property rights, but about the right to have a safe and secure space to call home. How do we define home? Is it a physical space, or is it a feeling? How do we protect the right to have a home? These questions are not just about the right to have a home, but about the right to have a safe and secure space to call home. How do we define home? Is it a physical space, or is it a feeling? How do we protect the right to have a home? These questions are not just about the right to have a home, but about the right to have a safe and secure space to call home.
