WATERS CLOSED TO MUSSEL FISHING

The following waters have been closed to mussel fishing by the department of conservation, as follows:

Grand River. Down from the west limit of the village of Lyons to Cleveland street bridge in city of Grand Rapids.

Kalamazoo River. From Coon dam on or near the west line of Marshall township to the mouth of the river.

This extraordinary news picture which appeared in Paris on Dec. 12th was at one time erroneously a report that.

KES WOULD REAR 100,000 FINGERS

A resolution stating that the state conservation department fermities places in rear to state game farms and release more than 100,000 rainbow trout in the season of 1928 was adopted by the board of game presidents of the Michigan division of the National Wildfowl League at its monthly meeting.

The resolution is based on the rapid increase of rainbow in Michigan in recent years and on the disfoundation of the state's duckery as a result of the unseasonable weather of the past two hunting seasons.

The state game farms are in the process of establishing new state fermities, in order to increase the number of fish available for future hunting seasons.

STATE FAIR TO BE HELD FROM Sept. 4 TO 10

Organizers of the state agricultural committees have announced that the 1930 Michigan State Fair will be held at the fairgrounds in Jackson on Sept. 4 to 10.

The fair is expected to attract a large number of visitors from all over the state and beyond, providing a platform for showcasing the state's agricultural progress.

E. W. F. Park, President

G. W. Onczyk, Treasurer

The group has been meeting for 10 years and continues to promote gardening in the area.

Kennedy district's C. M. C. T. quota is already 190 per cent full, according to Col. Dan Bogar, who is responsible for quotas in the district. This means that all available capacity, including the entire district, and only 20 cars, which is a part of the Kalamazoo area, will be granted to advertisers in this district.

In spite of the fact that the quota was exceeded, advertisers in this area have not had to sign the authorized order and the Kalamazoo quota will be assigned to the advertisers in the district. The quota is expected to be assigned in the same order as the previous year, but the excess of the quota that has already been assigned will be carried over for use in the next year.

Due to the uncertainty which exists in the area regarding when the quota will be filled, some advertisers are finding it difficult to plan their advertising budgets. This is expected to be less of a problem as the quotas assigned for the next year are expected to remain consistent with the previous year's levels.

A Landmark Event

No. Did you ever hear the story about how the first day of school was once a woman's first day of school? And if you think about it, you would have to say that you would have to say, "Yes, I would.

—The 1st School

Calhoun Building Jobs $2,000,000 For 1930

While the construction business of Michigan has been experiencing a difficult year, with building permits totaling $2,000,000 in 1929, that of Calhoun county was much slower, totaling only $400,000, according to a report made by the building department.

The year 1930 was much better for the county, with Total of the State, 69 per cent.

More Predatory Animal Control Headquarters

Headquarters of predatory animal control will be established in Baraboo, it has been announced by the Department of Agriculture. The establishment of a predatory animal control in Michigan is expected to reduce the number of animals that are harmful to livestock and wildlife.

Dutch Pure Maple Syrup $1.50 per gallon

Pure Maple Syrup, a favorite for breakfast, can be bought at a fraction of the price if you use pure maple syrup.

In Your Next Cake

Use C & K Baking Powder and notice the fine texture and large volume.

Because of its high leavening strength you use less and still get perfect results using the C & K Baking Powder.
Lebanon Receiving French President
He Will Speak

Lebanon has received President Charles de Gaulle of France for a four-day visit. The French President is expected to discuss various issues with the Lebanese leadership, including political and economic matters.

Off to Bermuda

New York City has welcomed the departure of Thomas See, the president of Bermuda. Mr. See was expected to attend a meeting of the Atlantic council in New York. The Bermudian government had previously invited him to attend the conference as a guest speaker.

Onion Areceps Being Developed in Germany

Professor O. H. S. von Kloss, of the University of Berlin, has announced the development of a new variety of onion, the German onion, which is believed to be resistant to onion yellow mosaic virus. This virus has been a major problem in onion production in Germany for several years.

4,309 Mallard Ducks

Although 4,309 mallard ducks were released at the state game farm at Madison, New York, by the state Fish and Game department, the hunters would not be able to balance their budget before they can eat for free?” asked a beginner in Big Tree, New York.

BALANCED FEEDS

"If provided with hoppers containing only the proper balanced feeds, about three-quarters of a cupful, or 3.25 cans of casein for birds, will maintain the body weight of an average adult mallard hen for two or two-and-a-half months to make an instant balance for the number of birds we have in the field," said Mr. D. D. Smith, Waterfowl manager, Madison.

"Due to all the ducks being wild, they will have to run nests several weeks near where they were raised. It is hoped that the results are on the wing and breed."

The experiment is also designed to make it easier to remove the eyes of young ducks from the nests of the gams farm, and we can then remove the eggs from the parasites before release, which will result in the production of the right kinds of proportions for future hunting.

Lebanon has received President Charles de Gaulle of France for a four-day visit. The French President is expected to discuss various issues with the Lebanese leadership, including political and economic matters.

The great winch, U.S.S. Akron is pictured maneuvering to a landing in the harbor which is built in Brooklyn, New York, as the western base for the Akron and Akron, new underwater cable, thus enabling it to transport electrical current to the state of New York.
CHAPTER LI

The darkness, the wind, the waves had all combined to make an Foil and, as though they had been compelled to change their course, the bridge was turned towards the shore. The wind was blowing heavily, and the waves were rolling loudly against the shore. The bridge was shaking and trembling. It seemed to be an endless journey.

The bridge kept on moving, and the wind seemed to be growing stronger. The waves were crashing against the shore, and the bridge was swaying violently. It seemed as if it would never stop.

The darkness continued, and the wind kept on blowing. The waves were rising higher and higher, and the bridge was going faster and faster. It was a frightening experience.

The bridge finally reached its destination, and the darkness ended. The wind died down, and the waves stopped crashing against the shore. The bridge was no longer moving, and it was calm.

As the darkness and wind subsided, the bridge began to shake and tremble again. The wind was blowing heavily, and the waves were rolling loudly against the shore. The bridge was shaking and trembling.

The bridge continued to move, and the wind seemed to be growing stronger. The waves were crashing against the shore, and the bridge was swaying violently. It seemed as if it would never stop.

ANCIENTS HAD FILING SYSTEM, FINDS REVEAL

Rows of metal filing drawers in a modern office have an ancient ancestor in the archives of notaries, a useful system of tiny booklets of vellum, values, folds, that enabled the ancient notaries to file and retrieve documents in a jiffy.

The discovery is only one of many made on the site of an ancient house in the tomb of the joint expedition of the University of Michigan and the University of Pennsylvania. The notaries were part of the royal administration, and their duties were as varied as those of a modern notary. They were responsible for keeping records, legal documents, and other important papers. The discovery of these filing systems is a testament to the efficiency and organization of the ancient notaries, who were able to quickly locate and retrieve documents as needed.
