MASH FEEDING

The very idea of a mash meal for the turkey is a novelty today but a very popular one with the holiday turkey. Let us emphasize that mash meal be placed on the turkey's breast, that it must be moist and brown and dots are not total. Expert on world's best turkey, and makes a great raisin. It is wet with milk it may still fail to improve in digestion and foreign markets. A much better means of preparing this food is to be in a mash as long as you will, but they will not be most sought after. Fast foods are greatly to be praised. mash for the turkey is very much expensive. The really important thing is to have a light and mellow flavor. If not, mash meal is a great success.
**Grim Wreckage of Stunting Plane in Which Three Died**

The accident occurred near Snow Mountain, Adjacent to the ruins of the old mining camp of the same name. One of the victims was identified as a pilot, the other two were passengers. The plane appeared to have been attempting to land in a snowstorm.

**ARCHERS MATCH**

Bows With Guns For Color Hunt

Bob Robol, shooting big bows and steel tipped arrows at galloping deer are having a "duel" with their quarry at the Blueberry Park. With the smoke rising from the bowstrings, the archer's skill is on display as he strives to hit the elusive target of archery.

**Acidotes Production**

Announcement was recently made in Mt. Pleasant of phenominal results from the application of acid tot neutralizing wells. The Skymark No. 3 of Roadhouse Bridal in Section 11, Grounds, was treated from a sinkhole dripping to 633 barrels daily. The Jenno-Woodwell No. 1, a fan at 508 feet treated from at 68 barrels a day. The total production of the treated wells is about 1,000 barrels a day.

**MORE CAMPS GO INTO STATE PARKS**

While there was a slight drop in the number of visitors at Michigan's state parks in the 1930s, the number of campers increased, it is shown by a report issued by the parks division of the department of conservation. The report shows 1,413,947 visitors to the state parks in 1931. The number of campers was 122,765, an increase of 123,163 over 1930. Forty states, the Philippines, and Canada were represented among the visitors.

**Michigan Water Yield**

The report shows that about 40,000 tons of commercial fish were taken from Michigan waters during the calendar year of 1931. The total number of fish caught was 137,245. The fish catch averaged 4.5 pounds per person.

**Rock Canyon Leads in Forest Fires**

With cold and wet weather enticing视察ons are possible that Michigan will have more forest fires this season than in the past. The season's first fire in the Rock Canyon region was reported near the town of Rock City.

**Seek Gas Franchises**

Natural gas franchise proposals have been presented to the present city council by two companies. The proposals were presented by H. W. Miller and J. P. Miller, of the Miller Gas Company, for a company to be set up later in the year.

Historic Spots in Ohio Marked for Posternity

Recombination, Guildford and Fort Catherine, two of the leading historical spots in Ohio, are to be marked by national monuments, as a result of a $5000 appropriation under the Recombination Act.

dated March 7, 1925.

Ohio's largest sheep show opens at Granville.

C. A. HAWKINS, Granville, Ohio, in charge of the show, reported that the weather has been favorable for the sheep, and that the quality of the animals has been excellent.

The sheep show is sponsored by the Granville Agricultural Society, and is open to all exhibitors.

The show will continue until March 10th.

"Bulldog" Bills

The editor of Playboys says that after the bills are passed into law, the public will be required to pay a tax on the sale of tobacco in the United States.

The tax will be paid by the manufacturer, and will be levied at the rate of one cent per pound on all tobacco sold.

The tax will be collected at the point of production, and will be remitted to the government by the manufacturer.

The tax will be used to support the national health and education programs.

The tax will be levied on all tobacco products, including cigarettes, pipes, and cigars.

The tax will be effective immediately upon its enactment.

The tax will be collected by the government through a system of invoices and declarations.

The tax will be used to support the national health and education programs.

SKELETON OF ICE AGE WOMAN DISCOVERED

More than 50 papers describing a wide variety of subjects from many fields were presented during the annual fall meeting of the American Association of University Professors in Science in Washington, D.C. Among these were findings of a human skeleton discovered at Minnesota Valley National Park near Washington, D.C., that is the oldest human skeleton in North America. The skeleton was found in a cave that had been heavily used by prehistoric Indians for centuries. The site is located near the Potomac River, which flows through the park.

The skeleton consists of a series of bones, including the skull, spine, and ribs. The bones are relatively complete, and the skeleton appears to be that of a young woman. The bones are well-preserved, and the structure of the skeleton is similar to that of modern humans. The age of the skeleton is estimated to be between 10,000 and 20,000 years old, based on the dating of the bones.

The findings of this study are significant because they provide new insights into the history of human migration into North America. The discovery of this skeleton supports the theory that humans first migrated to North America from Asia via the Bering Strait land bridge, which existed during the last ice age. The presence of this skeleton in the southwestern United States suggests that humans may have arrived in the region earlier than previously thought.

The skeleton will be housed at the Smithsonian Institution in Washington, D.C., where it will be studied further by experts in the field. The findings of this study will be published in a forthcoming issue of the journal Nature.

Velvet for Afternoon Wear

By A. H. B. CHAPMAN

Do you often wish a chilly day could be more agreeable? The solution is simple: wear velvet for afternoon wear! Velvet is a soft, luxurious fabric that will keep you warm and cozy on cold days.

Felt and Net Puffing

For an unusual look, try a net puffing instead of the usual felt one. Take a piece of net, cut it into the shape of a flower, and attach it to the top of your hat. It will add a touch of elegance to your outfit.

Apple Chocolate Pudding

This recipe is perfect for a fall day. It combines the sweetness of apples with the rich flavor of chocolate. The pudding is easy to make and will be a hit at any party.

New York—Whether your men go or whether they don't, you'll need this recipe. It's a simple, no-fuss dessert that will satisfy even the pickiest palate.

Your Good Health

By CLAUD NORTH CHRISSMAN, M.D.

A recent outbreak of the dread influenza in certain public schools has caused much anxiety among school administrators. While the virus is highly contagious, there are several measures that can be taken to prevent its spread.

The key to preventing the spread of influenza is to maintain good hygiene habits. This includes regular handwashing, covering the mouth and nose when coughing or sneezing, and avoiding close contact with sick individuals.

In addition, school administrators can take steps to minimize the spread of the virus. These include providing proper ventilation, cleaning and disinfecting surfaces, and promoting good health practices among students and staff.

By following these guidelines, schools can help prevent the spread of influenza and protect the health and well-being of their students and staff.

WEEK OF DECEMBER 4

In the way of her business, the wife comes in
far ahead in volume and turns us with our predictions that should be
full of laughter. She tells them to the way they work
some incredible people believe
the foundation of fact.

The conclusions of the weather, however, will
most in relation to the
Earth. The accompanying chart
products in the workng during the date of the
present

For the week beginning December 4, 1927, the weather will be mostly sunny in the
area and Mercury all playing their part in
the atmosphere. We may look forward to
dryness for the next two weeks. It will start
around the 17th and may continue until
the end of the month.

The next three weeks will be quite
favorable for agriculture.

The 5th of December, Saturday, will be
the day to look forward to in the
region. The weather will be mild and
suitable for outdoor activities.

The 10th of December, Thursday, will
be the day to be cautious of
the weather. There may be a
chance of rain or snow.

The 15th of December, Tuesday, will
be the day to expect
high winds and cold temperatures.

The 20th of December, Sunday, will
be the day to enjoy
the weather.

The Heavy black line just above
the time line in the chart represents the
influence of the period on
the weather.

This chart is based on
data collected during the
year and will be
updated on a regular basis.

SUMMARY OF THE WEEK

The weather for the week of December 4, 1927, will be generally
favorable for outdoor activities.
