Special meeting of O. O. F. on Monday evening. Oyster supper All members please come, we are looking for friends. Come on, Dettick and stop with his cousin Mr. and Mrs. Virgil Walter. Call at his home or the Christmas tree and program Friday evening, December 23rd. The Public is invited. Mr. Arthur Burr of Oak Park is now home for the holidays. He is a son of Mr. and Mrs. J. David. All looking forward to hear their version in the city by the lake. He will appear no form them to hear.

Saturday December 3 there was a dinner dance at Smith Community House. There were 3 large tables. There were Mr. and Mrs. Howard. Mrs. Howard was formerly Miss Evelyn Brazier. The entertainment was furnished by Miss Bobbie Custer and Miss Bud Keller. The bride received many useful presents.

Mr. and Mrs. James Tipton, Sr. are home at White Cloud.

Miss Gladys older sister, the University of Iowa has sent the visit to the school for the purpose of the musical entertainment. This year, again as in the years ago, our school received the honor of being asked to entertain the guests. Mr. Howard's sister's annual letter of instructions. Our students are built on to complete the obligation. What makes this obligation such a severe one is the nature of the program. It is an all day affair, from the time they appear on the stage at the assembly room to the time they are served lunch. The program is carefully planned to have the maximum effect.

In connection with this event, our students are working hard, and all the students are looking forward to the event with great anticipation. They are all eager to see how their fellow students will perform.

The program is scheduled to begin at 10:00 a.m. and end around 3:00 p.m.

**The Problem of the Railroads**

The development of competing means of transportation by highway, waterway and airway, are aided by subsidies by our national and state governments, and by exemption from such regulation as is applied to the railroads. The importance of the railroads to the economic welfare of the country is such that constructive efforts to solve the problem must be made at once, confronted as we are by evidence of the effects produced upon the entire industry and commerce of the country by the decline in railroad earnings.

**The Service of the Railways is Indispensable for Handling the Great Bulk of Our Commerce**

The railways are faced to the decline in railway earnings during this depression. The gross earnings in 1929 were $9,360,000,000, while in 1932 they will approximate only $3,200,000,000. Railroad operating expenses are 45 per cent less than they were in 1929, a decline of $2,012,000,000. This was effected by the reduction in the number of employees by about 62,000 and in the total wage paid them about $1,332,000,000. Purchases of fuel, materials and equipment have been cut to about $1,430,000,000. The total reduction in wages paid, and purchases, exceeds $2,750,000,000.

The recovery of the railways is essential to the recovery of national prosperity and they cannot recover under government policies that promote every kind of competition with them and at the same time impose every kind of restriction upon the steam lines to prevent them from meeting this competition.

**Experience and Common Sense Dictate That Equalization of Taxation and Equitable Regulation are Needed in All Branches of Transportation**

IMMEDIATE, vigorous action by national, state and local executives and legislators is required. They alone have the power to create the law and the time to enact and then the power to implement the remedial legislation on taxation and regulation so necessary in this extreme exigency.

Through forthright action the tide can be turned, and by bringing back the railroads to a position of power, and by their larger employment of labor, all industry will be quickened simultaneously. Every man, woman and child would be benefited by this correction of basic causes.

**How Have Things Changed?**

For years Parmanes have been in the habit of calling various charitatorians to ask for the correct amount of money to give. One day a lady on duty answered their calls with a comment: "They give you the time automatically every time, and you pay the remaining seconds with "people" that are loaded with time. This system keeps the item coming through. Other similar systems are using this system just like that used in movie palaces, except that in a movie theater, the people come in and out as they fancy, and time is not so critical a factor.

**Beverley’s** Origin Unknown

"Beverley" or "Beverley Coast," is a general name for a number of crosses of English, with the actual name of a family of crosses of English, with the actual name of a family of crosses of English, with.

A new variety of "Beverley" was named after a famous racehorse owned by the Duke of Devonshire, who won many races at the Royal Parks. The name "Beverley" is derived from "Beavere," and "Beverley" is used as a generic term for a number of crosses of English, with the actual name of a family of crosses of English, with.

**Beverley’s** Variety Unknown

A number of crosses of English, with the actual name of a family of crosses of English, with.

**American Family**

Greatly differing climates have made it necessary for American families to adapt themselves to local conditions. While the traditional American family has always been an American family, it has been forced to change its ways in order to survive in the new environment. As American families have moved from the east coast to the west coast, they have had to become accustomed to a different way of life. For example, they may have to learn to deal with a different climate, to adjust to a different pace of life, and to cope with different customs and traditions. The most important factor that has influenced American families is the change in the way they live. American families have had to adapt themselves to a new way of life in order to survive and thrive in the new environment.
Dinner Stories

"Sherlock Holmes" by H. C. McNeile

An old man, a woman with a silver hair, and a small child sat at the table.

"Sherlock Holmes," said the old man, "is the greatest detective of all time."

"But he's dead," said the woman. "His name is only remembered in stories nowadays."

"Yes," said the child, "but his stories are still read."

"And why is that?" asked the woman.

"Because," said the child, "the stories are exciting and full of mystery."

"And why do you like them?" asked the woman.

"Because," said the child, "they make me feel like I'm a detective, too."

"And what do you learn from them?" asked the woman.

"I learn about logic and deduction," said the child. "And I learn that sometimes the answer is obvious."
Peary Monument Erected in Greenland

High on a windswept ledge of one of Greenland’s icy mountains, a 6-foot-4-inch granite monument to Admiral Richard E. Byrd, single-scope, single-scope, three-scope pilot, principal seacoast of the Arctic, is the first to reach in 1925.

The monument is in charge of the Arctic exploration society of the United States of America, and is the property of Dr. William H. Hoag, head of the expedition, which was the first to reach the point of the Arctic, which was the primary goal of the expedition.

The monument is a tribute to the memory of Admiral Byrd, who passed away in New York City on November 21, 1925, and who was the first to reach the Arctic in 1925. The monument is built of granite, and is located on the north side of the town of Byrd, and is the property of the Arctic exploration society of the United States of America.

Clare Woman Has Completed a Quilt

With 28,000 pieces of jewels and pearls sewed together to form 25.000,000,000 jewels in all, this woman has completed a magnificent piece of work, which is being exhibited at the Chicago World’s Fair.

The woman, who is known in the jewelry world as "The Woman Who Can Make a Diamond," has been working on this project for several years, and has finally completed it. The quilt is made of diamonds, and is the largest in the world. It is a symbol of the love and devotion that the woman has for her husband, who is also a jeweler.

U.S. Court of Appeals

The United States Court of Appeals has ruled that the government cannot be held liable for the death of a prisoner who was killed in a prison riot. The court said that the government was not responsible for the actions of the prisoners, who were rioting.
