

**SUPER SUCKER — a heavy duty  
hovering vacuum sweeper**

This is a new idea. It combines the principles of the hovercraft and the vacuum cleaner.

Super Sucker gulps leaves, grass cuttings and litter — over difficult obstacles like kerbs and root outcrops — even in wet conditions because of its unique blow suck action.

The *Blow Action*, air that escapes at the front of the skirt lifts each blade of grass and particle of debris from underneath and then the *Suck Action* takes over and whips the material

through the intake nozzle and into the 22-cubic-foot load chamber.

Super Sucker is a hovercraft and cannot damage the ground surface. Because it works by air flow alone there are no brushes to abrade the surface. In fact there is only one moving part — the fan — so maintenance is no problem.

The entire Super Sucker unit can be removed in one piece when the basic hovercraft is required to transport other materials.

One other important point — because all the machinery is totally enclosed Super Sucker is very quiet.
