Water your GREENS & FAIRWAYS the easy way with the PARKAMATIC TRAVELLING SPRINKLER from P A R K E R

The Parkamatic has been designed to provide a completely automatic method of high speed, efficient and even watering at pressures of 40lb p.s.i. over Greens and Fairways.

No staking wires or other elaborate preparations are necessary. Hose pipe is simply laid out straight or in curves, on a pre-determined course and the Parkamatic will do the rest.

The machine travels 140ft per hour pulling \( \frac{3}{4} \) in hose pipe.

Tee Shots

WITH COSTS INCREASING and land no more easy to come by, many local authorities are turning to Par 3 courses as potential satisfaction for the demand for golf. Corby in Northants has started work, East Grinstead is planning, Woking is thinking on these lines. Rather like driving ranges, the solution is only a temporary one. Before long, those who have started golf this way are looking around for the full scale article.

Further details of the First British Turfgrass Symposium at Ipswich are that the date will be 4th October and speakers will include leading specialists on irrigation, drainage, research, and related topics. Application forms for registration will appear in our next issue: meanwhile, keep this date free.

Tom Mascaro, whose article on Aeration appeared in our July issue, will be one of the speakers at the Conference in October. He is director of Product and Market Development of Hahn’s Westpoint Division. Hahn, as most greenkeepers will know already, is the company with which Ransomes, Sims & Jefferies Ltd., are associated, selling their products on a world-wide basis under the Ransomes-Hahn label.

We have received details of a proposed training course in Greenkeeping and Groundsmanship to be arranged in Northumberland and Durham. It will provide college-based tuition and practical work, combined with on-the-job training which will be obtained by trainees working under the supervision of experienced greenkeepers and groundsmen at golf clubs and athletic grounds.

Mr E. L. King, Assistant Regional Controller of the Department of Employment in Gallowgate, Newcastle-upon-Tyne, NE1 4TP, is the man behind the scheme and it is to be hoped that greenkeepers and golf clubs will support him to the full when he is able to launch it.

Clevedon is well sign-posted off the M5 west of Bristol. Hope to see you there in August.

Efforts to track down the leaks in the mailing list are slowly bringing results. We hope to have a new list and new printers in two months time. Even the Editor missed his copy for a time.
Environmental grass. Grass to bring out the best of modern planning on motorways, golf courses, sports grounds. Or a fresh, new look to reclaimed waste ground, open-cast sites, and spoil heaps.

Environmental grass. Grown from Twyfords seed mixtures. Purpose bred for minimum maintenance, dense ground cover, greater persistence, yet with rapid establishment.

Please send me further details of specially bred grasses for the environment

The British Golf Greenkeeper
A.G.M. Clevedon Golf Club, Clevedon, Somerset

NOTICE IS HEREBY GIVEN that the fifty-sixth Annual General Meeting of the British Golf Greenkeepers' Association will be held at Clevedon Golf Club, on Monday 13th August at 2.30 p.m. Notice of resolutions must be sent in writing to the Hon. Secretary TWENTY-ONE DAYS before the date of the meeting. Under Rule 29, proxies may be voted at all general meetings. A Form of Proxy may be obtained from the Hon. Secretary and returned not later than the first post of Wednesday 8th August.

Annual Tournament
The fifty-sixth Annual Tournament will be held at Clevedon Golf Club on Monday, Tuesday and Wednesday, 13th, 14th and 15th August 1973. Entry Forms appeared in the June Journal.

Programme
Monday 13th August: Morning – 18 holes Stableford; Afternoon – Annual General Meeting 2.30 p.m.
Tuesday 14th August – 36 hole Medal; News of the World Cup (Scratch) Senior Division (plus to 11); Junior Division (12 to 24); the Jubilee Cup (Team Prize off Handicap); ‘The Coming of Age’ Cup.
Wednesday 15th August: Morning – 18 hole Medal; Afternoon – Prize distribution 3 p.m.

Handicaps
Section secretaries will be asked to verify the handicaps of all competitors from their records before the tournament. All handicaps must be based on the National Golf Union's handicapping system.

Executive Committee
A meeting of the Executive Committee will be held at Clevedon Golf Club on Sunday 12th August, 1973 at approximately 5.30 p.m.

Trophies
May I remind all holders of trophies from last year's tournament who are not taking part this year, to ensure that these are returned to the Clevedon Golf Club, Clevedon, Somerset, before Saturday 11th August, 1973.

Annual Draw
May I remind members that all counterfoils and moneys should be returned to their Section secretary and not to me.
Make a date for...
THE INSTITUTE OF GROUNDSMANSHIP INTERNATIONAL EXHIBITION 1973
to be held at the
University of London Athletic Ground
MOTSPUR PARK, NEW MALDEN, SURREY
on the 18th, 19th, & 20th of September

Everything that is needed for the Lawn, Sports Ground, Playing Field, Leisure Area and Golf Course, will be on show at this important Exhibition.

If your interest is in these areas, then Motspur Park is the place to see and discuss the latest in Mowing Equipment, Aerating Machines, Rollers, Distributors, Tractors, Power Units, Power Saws, Watering Equipment, Spraying Machines, Markers, Nets, Seeds, Fertilisers, Chemicals. In fact, all you need to maintain your professional standards, in one place at one time.

Write the dates in your diary now—times between 10 a.m. and 6 p.m. It's easy to find, close to the New Malden Roundabout on the A3 Portsmouth Road, or direct by train from Waterloo.

Further details from
The Institute of Groundsmanship,
108a Chessington Road, West Ewell, Surrey. 01-393 8027

A TREND IN OUR GOLF COURSE profession is perturbing me; this month I would like to expound on it. I may be mistaken, but I think I see our golf course superintendent’s profession turning from its true direction. I am speaking of the recent trend of green superintendents slowly encroaching on the field of managership and away from our true profession of greenkeeping. This situation, I believe, has developed from the managers becoming general managers and taking charge of the whole clubhouse-and-grounds operation. As a result of their yet unproven venture, we have become panicky and think that by acquiring new titles and certificates, by attending bookkeeping and finance seminars, and urgently seeking further clubhouse property responsibilities, the situation will change.

I don’t think so. A Golf Course Superintendent is a Golf Course Superintendent, and a Manager is a Manager, and the only way this fact will change is if you wish to change your profession completely. If that’s what you want, go ahead, but do it full turn, please. Do not play games – you’re only fooling yourself.

In my case there is no conflict. I know what I want to be – a good greenkeeper and nothing else. I’ll be happy with that title, because, you see, I know something else – call it a basic managerial premise, if you wish. That is, unless the golf course superintendent is in complete charge of all and total bookkeeping, and unless all money passes through his office, he can never be top dog or in full control at the club: at least not in the eyes of the board members. This fact is as sure and true as the fact that the golf professional will always be the glamour man at the country club no matter how many double knits you own or how well you groom the grass.

Clouding up our true identity by seeking out extra jobs and taking more responsibility for a little more money has nothing to do with our real profession and skill of growing and manicuring grass. This is futile hypocrisy. General managership is not our business. The managers who have taken over completely and are now total general managers have sold down the river their true responsibility to the club. They have taken on too many responsibilities and have gone into fields that they know nothing about. Let’s not play their ambitious game. As in the past top clubs will learn that it’s not going to work, and there really is no money saved.

Let me be absolutely blunt. Become a manager or stay a golf course superintendent, but whatever, be true to yourself – you can’t be superb at both jobs. Declare your hand. Don’t get into a mixed-up ball game unless you want to change jobs every few years as some general managers are doing. The wise ones (and we have a few outstanding ones in the Chicago area) work with us, cooperate with us, communicate and coordinate with us, and they are smart enough to keep out of our areas or responsibility – something they know nothing about. That’s the way it should be.

I would like to say something else. I am not, nor is anybody else, impressed by greenkeepers calling themselves property managers, golf engineers, turf managers and other nonsensical names. Golf or green superintendents – yes, greenkeepers – lovely, ‘grass growers’ or ‘grass farmers’ is fine with me. I know what I am and I make good money at it. I don’t need to seek extra ‘janitorial’ jobs around the clubhouse to tarnish my true professional image. My direct responsibility is the golf course and that load is heavy enough.

The British Golf Greenkeeper
for me. And please don't give me that old business about shrinking my duty as a breadwinner, or not being able to take on extra responsibility, or not trying to uplift our profession. I take on more responsibility and I am more involved with exciting things than I know what to do with—for my family and for the image of my profession. And I know many of you are the same. Long ago I could have become manager, but that's not my forte. I am a GREENKEEPER, and in this field of endeavour I strive for perfection.

There is something else I must tell you that is in me (and unless you have a touch of the same, you might as well become a manager or go into something else). I would miss the soft warm rains that fall on the turf that I grow. I would miss the white snow that covers the golf course in late fall for the first time, melts, and then softly comes again. I would truly miss all the challenges of nature that go with my profession. The hot sun of summer heat and the salty sweat of humidity on my brow. I would miss the pleasure of admiring turf manicured and maintained under both good and adverse conditions and knowing that I had a hand in keeping the verdant picture that way. But of course there would be other things, also, soothing the frustrations of working with nature. I would miss her many gifts to us greenkeepers, the trees changing in the seasons and the flowering shrubs in spring. I would miss the daisies and other wild flowers hiding from our mowers next to the majestic elms, and I would miss the pheasants calling to their mates in early morning. I know I would miss the honest faces of commercial friends calling on me and old greenkeepers advising me. But most of all I would miss getting up each early morning and playing the endless chess game of man against nature, or perhaps more truthfully, trying to work with her and relishing the achievement and, oh, the satisfaction and the pleasure that comes once in a while each season when just for a short time I have won the battle.

Reprinted with the Author's permission from the September 1972 issue of The Bull Sheet (Official Bulletin, Midwest Association of Golf Course Superintendents), Voykin is President of that Association.
GREEN GRASS GROWS ALL AROUND

Anyone can show you lush green grass — on someone else’s course. RainBird sprinkler features let you grow your own.

* The highest pop (2½ in). Grass cannot distort the distribution pattern so there is uniform application.
* Nozzle features ensure a tight, wind-resistant stream for longer throw plus efficient close-in watering.
* Positive retraction spring prevents head sticking up.
* Positive seals ensure maximum pressure through nozzles, and ease servicing.

Progress in Perennial Ryegrass Breeding

by Dr John Hendrix, Plant Breeder, NVH Mommersteeg, Vlijmen, Holland

WITH PERENNIAL RYEGRASS having well over half the British market for sports and amenity grass seeds, one would have expected plant breeders to devote much effort to producing improved varieties of this species. But, until recently, this was not the case.

The reasons are twofold; firstly, certain pasture varieties such as Lamora and S23 which were originally bred for agricultural use have proved themselves to be valuable turfgrass varieties; secondly, sports and amenity turf mixtures (on which there are no statutory controls) have provided an overflow outlet for commercial ryegrass strains and agricultural hay-type varieties in years when these have been overproduced. Consequently – and regrettably – it is possible to see in many turf seed mixtures today a high percentage of ryegrass varieties which have been selected by plant breeders to produce bulky erect-growing foliage intended for farm, hay and silage crops, for example Verna, Ruanui, S24 and S321. These varieties are ideal for the purpose for which they were intended but have no place in sports turf mixtures.

As I have mentioned, the agricultural pasture ryegrass varieties have several characteristics useful in sports turf, notably a high tillering capacity, dense prostrate growth and good resistance to wear. However, they also show some that are less desirable, as their breeders were not concerned with colour, texture, ease of mowing or turf growth-pattern. These are irrelevant features of a grazing pasture where heavy yields and persistency are the main considerations; therefore no selection was done to incorporate the beneficial features of these characteristics in those varieties.

In formulating our breeding programme we had to ask ourselves just what were the desirable features for perennial ryegrass? Many of these individual characteristics are fairly obvious, such as good colour, fineness of leaf, few seed heads, easily-mown turf and disease resistance. However, on looking more deeply into the practical use of ryegrass in sports turf swards it became clear that there were really two different roles that ryegrass has to perform: the first on Winter games areas like football and hockey pitches, the second on Summer turf areas such as tennis courts. Some turf is in both categories, for example that of general playing fields, but it should be remembered that these dual or multi-purpose areas sustain greatest damage during the Winter months when conditions are at their worst.

We therefore decided that in the first instance a new variety would have to cope with the problems of Winter games areas, notably, heavy wear under cold, wet conditions. To fulfil this requirement a grass was required not only to withstand heavy wear but also to have the ability to recover from turf damage during the Autumn-to-Spring period. To achieve this, the variety had to tiller and grow late into the Autumn and as early in the Spring as possible, simply because a plant that is dormant during this period has no chance of regenerating to recover from turf damage. In addition to this all-important feature, two other characteristics for Winter games areas were considered desirable: firstly, a good colour over the Winter period (unfortunately most agricultural varieties tend to show a degree of leaf brownness then, so this had to be selected out). Secondly, an easily-mown sward was preferable for efficient gang mowing and to produce a tidy finish to the turf - agricultural varieties often tend to show ragged or torn leaf ends after mowing.

Having settled on our aims for the new variety, we started the breeding programme which eventually came to fruition in the marketing of our variety ‘Stadion’. Those of you who have seen it growing will know it has the characteristics which we set out to produce. This is by no means the end of the story. I stated earlier that a ryegrass variety for Summer
Quick-change artist

The Ransomes-Hahn Tournament Triplex is a remarkable machine—so remarkable that we call it the world’s first Greens Management System. The Tournament Triplex is a 12hp vehicle with hydrostatic drive, which powers four separate turf maintaining operations. Each conversion, from superb greensmowing to utility mowing, to Verti-Cutting, to spiking takes less than a minute—and no spanner! **Greens Units** A full 67” cut. Each 23”, nine-bladed cylinder can be lifted individually. **Utility Units** Heavy-duty cutting cylinders and bottom blades for approach and tee mowing. Grass catchers provided with all units. **Verti-cut Units** Patented twin offset blades remove ‘thatch’, keep greens in play even in difficult conditions.

**Vibra-Spiker** Now spiking takes even less time than greensmowing. High-frequency vibration penetrates to a depth of 1½” with a minimum of compaction. The combination of this unique quick-change unit feature, full 67” swath for every operation, variable-speed units and individual unit lifts make the Tournament Triplex an investment which no club can ignore. Your local Distributor is keen to impress you with a demonstration. Give him a call.

Ransomes Sims & Jefferies Ltd., Ipswich.

Ransomes-Hahn Tournament Triplex
When an advertiser tells you that a conversion is quick it’s customary to take it with a pinch of salt. But this time take it as fact. Trying is believing, and you can try it for yourself at your local Ransomes dealer! You simply null the connecting pin and quick-couple cable, remove the existing unit, and slip the selected unit into place. It takes less than a minute! Honest!

**Tournament Triplex**

**Greens Unit**

A full 67" of cutting width with the exclusive features of variable speed cylinder drive, giving you a cylinder speed completely independent of ground speed. Units may be operated one-down, two-down or all-down.

**Tournament Triplex**

**Utility/Tee Units**

Triplex utility units use same seven-blade design as greens reels, but have heavier fairway blades to withstand approach and teeing. These units are ideal for approach maintenance and the precision cutting of tailored tees, and can be adjusted down to ¾" for greens-mowing after top-dressing.

**Tournament Triplex**

**Verti-Cut Units**

Verti-Cut units use durable, yet thin offset blades to remove thatch and grain as they begin to form. With 67" of cut (the Verti-Cut units are the same width, work at the same speed, and use the same grass catchers as the greens and utility units) and a riding vehicle, these attachments are ideal for preventing the development of thatch etc., lessening the need to take greens out of play for renovation. Variable-speed cylinder drives provide high tip-velocity even at low forward speeds.

**Tournament Triplex**

**Vibra-Spiker**

Vibra-Spiker reels use gentle high-frequency vibration to achieve deep penetration, without excessive weight, even when ground is hard and dry. Spiking (summer aerification) provides root pruning and moisture absorption, relieves surface compaction, and conserves fertilizers and fungicides by getting them immediately to the root zone. Full 67" swath and Triplex speed make spiking a task that now takes even less time than greens-mowing. Spiker penetrates to depth of 1½".

Ransomes-Hahn

**Tournament Triplex**

- the world’s first Greens Management System.
For expert help and advice with their game, most club members have a professional to turn to. But who can a green keeper turn to for help in keeping his turf up to par?

His own professional: SAI TURF FOOD

Courses like Carnoustie and Muirfield use SAI Turf Foods. It works wonders with grass.

It comes in the form of mini-crumb granules which makes it easy to spread. It also stays where it’s put, releasing its goodness slowly into the soil to strengthen grass growth.

For stronger, greener, cleaner, healthier turf, try SAI.

All enquiries to the manufacturers or to our accredited suppliers for England and Wales: Chipman Chemical Co. Ltd., Horsham, Sussex. Telephone 60341/5

Just like your club, your turf needs a professional.
turf was also required; these different conditions need other characteristics such as drought tolerance and resistance to red thread disease. We already have a breeding programme under way to produce a variety to fulfil these requirements. Furthermore, we are continually collecting, selecting and testing new plant material as a means to produce new varieties which show improvements on those in use today. Thus for many years to come we shall continue to make playing conditions better and turf management easier.

The British Golf Greenkeeper’s Association

MINUTES OF THE
EXTRAORDINARY GENERAL MEETING
HELD AT THE ENGLISH SPEAKING UNION
19th May, 1973

TWELVE MEMBERS were present including the Chairman who took the chair for the meeting.

The Agenda for this meeting was the proposal for increases in subscription rates which had been made at the Executive Meeting held at Birmingham in March, 1973, and which necessitated a change of rules. Views of this proposition were discussed at some length by the representative members of various sections, some of which were in full agreement with the proposals, and others were of the view that they should be modified to some extent, particularly with regard to the proposed increases for Honorary Members, as it was felt this could possibly have a detrimental effect on this form of membership.

Another point which was discussed at some length was the proposed increase in Entrance Fee from 15p. to 50% of the subscription. Here, again, it was thought possible that this large increase could possibly affect membership of the Association and Mr Heeles proposed an amendment to the original proposition that the increased rates, as suggested for Classes A, B, C and D, should be accepted but that there should be no charge in Class E membership. Also that the Entrance Fee should in increased to 50p and not 50% of the subscription. A vote was taken on this amendment which was passed by a majority of seven for and three against, with one abstention.

The Chairman then agreed that the rates should be adjusted according to the amendment and the Hon. Secretary was asked to publish these figures to operate from 1st May, 1973.

There being nothing further to discuss the meeting was closed with a vote of thanks to the Chairman.

NOTE
The wage scale recommendations printed in the May issue of the Journal should read Minimum per annum.

August 1973
Dear Sir,

I am sorry to have upset Mr Wright, Greens Convener at Downfield, G.C. I can only plead that on television it did look artificial. Now that I know, I withdraw that accusation wholly.

If, indeed, it was an accusation. If Mr. Wright will read that article again he will see that I suggested it made a good hole, calling for thought. The sight of that lake led me to think on water bunkers and write a general article on that subject. The piece is not entirely devoted to the Downfield G.C.

Mr Wright suggests that the Swilcan Burn, with its concrete banks bears more of man's stamp than his pond. May I, in all humility, suggest that the Swilcan was there many years before concrete was invented.

Were I younger and still active, I would give much to visit Downfield and have to make up my mind whether to go for the carry at the 11th, or play short. The test of a good hole.

By coincidence, the Head Greenkeeper at my home club is named Wright!

Yours truly,

Patrick Smartt

1974
Jan 15 Lecture and Film Show at Kidderminster Golf Club at 2.0 p.m. by Flymo Institutional
Feb 19 Lecture on Golf Course Construction; further details in later Journal.

President’s Match at Handsworth
The result of the Annual Match against Mr. Bretherton’s Team, held at Handsworth Golf Club on Thursday, 14th June, is given overleaf.

A beautiful summer evening made this very good fixture really enjoyable. The course was, as we have come to expect it, in fine condition and all the tributes to Vic Smith and the Green staff were well deserved.

The match was followed by an excellent supper, and it is to Mr. Bretherton that all players were truly grateful. Mr. D. Mansell, Club-Captain, welcomed everyone to Handsworth and proposed the Loyal Toast.

Mr. H. Walsh, Association Chairman, thanked Mr. Bretherton for his services to the Greenkeepers’ Association for so many years. Mr. Bretherton announced the result of the match in which his team won by 9 to 6. He said how pleased he was that everyone had enjoyed their evening.

George Hart, Section Chairman, thanked Mr. Bretherton and his players for a grand...
game and pointed out the score, suggesting that the Greenkeepers were doing better every year. Mr. Bill Dudley-Evans, speaking for the President's Team, thanked the Greenkeepers for their efforts in work and play, and Mr. Bill Dudley-Evans, speaking for the President's Team, thanked the Greenkeepers for their efforts in work and play, and Mi.

Class F Members

We were all delighted to have with us on the occasion of our A.G.M. the following Honorary Life Members: Tom Mason, Bill Mason, Jim Rosier, Stan Morton and Jimmy Ness.

A.G.M.

The following are details of the A.G.M. held at the Hendon Golf Club on Wednesday 6th June 1973.

Before asking the Secretary to read the Minutes of the last A.G.M., the President Our sincere thanks to the Hendon Golf Club for allowing us the courtesy of the Clubhouse and course, to the Members of the Trade for their great help and to John and Derek for running the Benevolent Fund Sweep. Proceeds £11.30. The prizes for the Benevolent Fund were presented by: Bob Plain, Bonzo Ryan and Huxleys.
called for all Members to stand in memory of Bert Dixon, Wally Drewitt and Jock Drummond.

The Minutes were then read and signed as correct. The Secretary and Treasurer reported the Section and Benevolent Fund Accounts in a very healthy state and after the Balance Sheets had been scrutinised by all Members present, they were adopted on the proposal of D. H. Major, seconded by S. Morton.

**Election of Officers**
- **President:** Jack Wallis-Arthur
- **Chairman:** F. W. Ford
- **Vice-Chairman:** D. H. Major
- **Executive Representative:** D. H. Major
- **Hon. Secretary and Treasurer:** F. W. Ford

It was decided to change the venue for the 1974 A.G.M., and to make an all-out effort in the search for larger lecture rooms. Philip Marshall informed the meeting that there would be a coach laid on for the International Golf Tournament; details will appear in a later issue of Journal.

The Chairman called for a vote of thanks to the President and the meeting closed.

**Autumn Tournament**
The Autumn Tournament this year will be played at the Langley Park Golf Club, Barnfield, Wood Road, Beckenham, Kent – nearest Station, West Wickham (½ mile), on Wednesday 5th September 1973.

For the benefit of new members, the competition will be a 36-hole Stableford – 4 Ball better ball A.M. and a Greensome P.M. Partners must be a member of their own Club. Members wishing to play should write to me stating NAME, PARTNER’S NAME, CLUB AND HANDICAPS, in Block Letters. Closing date Monday, 20th August.

**New Members**
A warm welcome to the following new Members:
- F. C. Stroud (Herne Bay)
- P. Manning (West Essex)
- J. F. R. Shipp (Thorpeness)
- D. C. Wash (Ipswich)
- V. Gant (Ipswich)
- M. G. Brock (Sudbury)
- P. J. Groves (Addington Court)
- J. Gunstone (Addington Court)
- M. Stansfield (Addington Court)

**STEWARTS OF EDINBURGH**
FINE TURF SPECIALISTS
EDINBURGH EH2 2AY 031-556 2102

**NORTH-WEST**

**Chairman:** O. P. Jones, Bramhall Golf Club

**By H. M. Walsh**
**Hon. Secretary:** Horrobin Cottage, OldLinks Golf Club, Montserrat, Bolton, Lancs.

**Lectures**
I am in the process of arranging for various speakers for this winter series of lectures and will inform members when list is complete.

**Annual Trip**
The venue is not decided as yet, date probably in November.

**Autumn Tournament**
The venue will be published in the next issue of the Journal.

**Annual Draw**
Please let me have moneys and counterfoils by the date on the tickets and please make cheques and P.O.s out to the B.G.G.A. and not to me.

**Subscriptions**
Subscriptions are now due, please send to our Treasurer, Mr. R. Janovskis, 303 Moorside Road, Swinton, Manchester, M27 3PN, who will be very pleased to receive them.
The Annual Spring Tournament of the Section took place at the Bradford Golf Club, Hawksworth, Guiseley, Leeds on the 30th May. On behalf of the Members of the Northern Section of the B.G.G Association who took part in the Tournament, I would like to say thank you to the Committee and Members of the Bradford Golf Club for letting us have the courtesy of the Course and Clubhouse for the day, also to Mr. Ralph Smith and his staff for the excellent condition of the Course and the Steward and Stewardess for the way they looked after us. Also a very big thank you to all the Traders who donated the many Prizes.

Many thanks to the following firms who donated prizes – Bradford Golf Club, Ransomes, Simms & Jefferies, Aspera Motors, Flymo, County Mowers, Cannock Fertilisers, Hayters, Chaplins, Pattisons, Wolf, M. A. Wardman, Farrods, Rigby Taylors, Metcalfs.

Our thanks to Mr. and Mrs. J. Mawson for taking over the organisation of the score cards and issuing the meal tickets. (Thanks Jeff you did a good job).

Winner: W. Mountain

Highest Score of the Day – B. Umpleby

Following the prize giving, the Annual General Meeting of the Section took place, approximately 42 members attended.

The following persons were elected to Office at the General Meeting.

President: W. Mountain
Chairman: J. Scott
V. Chairman: E. Paley
Sec. Treas.: W. Heeles
Executive Rep.: W. Heeles
Hon. Auditors: F. G. Smith, W. H. Bartle

Congratulations

Congratulations to David Storey on his appointment as Head Greenkeeper of the Fulford Golf Club (York) Ltd.

Atco kick start versions of the 28 in. Groundsman. It is powered by a 256 cc 4-stroke engine with fan cowl cooling and fitted with a centrally positioned kick start lever and open handles to permit easy access to the starter in pedestrian use. The six heavy duty blades give 81 cuts per yard.
OBITUARY

It is with deep regret that we record the death of Mr. John Parker, our Superintendent of Grounds, on 28th May at the early age of 59. Mr. Parker had suffered a minor heart attack about a fortnight previously, from which he was apparently making a good recovery in hospital, when he had a further, and fatal, attack. John Parker was a native of Bingley and an old boy of its Grammar School. He first joined the ground staff before the last war—in which he was later to serve—and then left to take up greenkeeping; for many years he was Head Greenkeeper of the Nevill Golf Club at Tunbridge Wells in Kent. He re-joined the Institute’s staff in 1958 as Assistant-Superintendent of Grounds and upon the retirement of Mr. F. G. Smith at the of 1962 succeeded him as Superintendent. For many years he was Honorary Secretary/Treasurer of the B.G.G.A. Northern Section. He will be sadly missed by all who knew him but most of all by his widow, to whom we extend our deepest sympathy.

From STRI Bulletin.

The Secretary/Manager,
Shifnal Golf Club, Decker Hill,
Shifnal, Shropshire, TF11 8QL
with full details of career to date
**SISIS THATCH CONTROL REEL FOR ROTORAKES**

SISIS Thatch Control Reel, which can be fitted to existing models of the SISIS Duo-Rotorake and Auto-Rotorake, is now generally available.

The purpose of the Thatch Control Reel is to sever horizontal surface growth, whether of weeds or broad leaved grasses, and thus to assist in preventing a buildup of thatch. It is not intended that the blades should cut beneath the green leaf and therefore be in contact with the soil. This is not a scarifying reel and any attempt to use it as such could severely damage both the turf and the machine. If used correctly, tine wear will be at a minimum.

The reel consists of 24 triangular cutting blades mounted at 3/4 in. (19 mm) intervals along a shaft. Two of the three points are offset, one by 1/4 in. (6 mm) to the right and one by 1/2 in. (6 mm) to the left. In action, therefore, the reel cuts at 3/8 in. (6 mm) intervals across its 18 in. (45.7 cm) width.

This makes three types of reel available for use in SISIS Rotorakes:
- Thatch Control Reel
- Thatch Removal Reel for cutting out existing accumulations of dense fibrous growth.
- Surface Scarifying Reel of spring wire tines.

**COURSE MANAGEMENT THEME AT OPEN EXHIBITION**

The contribution of modern, high work-rate grasscutting equipment in total golf course management was emphasised by machines displayed by the Institutional Division of Flymo Limited of Watford at the exhibition associated with the Open Golf Championship at Troon (9th to 13th July).

Highlight of the display was the Toro Greensmaster 3 – the first ride-on triplex greensmower introduced to the United Kingdom and now in use on many championship courses.

The Greensmaster 3 has had widespread acknowledgement of advantages gained in time and labour, as well as superb finish to greens achieved by the most advanced concepts of engineering and design. The machine is used to cut 18 greens in less than four hours. Thatching reels, fitted in about 10 minutes, also enable de-thatching to be undertaken in about four hours to provide a comprehensive turf management programme.

More than 100 golf clubs and local authorities in the United Kingdom have purchased GM3's including three clubs which have two machines.

Another complementary unit in the Toro golf course turf management line-up on display on the stand of Flymo Limited was the Toro 70 in. Professional ride-on triplex mower used for bunkers, tees and aprons. With a cutting rate of 13/4 acres an hour, the 70 in. Professional has advantages of extreme manoeuvrability and contour-hugging characteristics.

**J. H. Hancox Special Autobarrow Spray Unit**

J. H. Hancox Limited of Wood Lane, Earlswood, main distributors for Autobarrow Products in the Midlands, have supplied Stourbridge Parks and Crematorium Department with a specially designed Autobarrow Spray Unit for all-year-round use.

The unit incorporates an 80-gallon tank mounted on a strengthened version of the standard Autobarrow multi-purpose handling unit. The spray attachment has also been re-designed for variable height adjustment which gives an increased spray area.

An all-season programme is planned for the basic handling unit which is adaptable to any mechanical handling job and built to carry a variety of easily detachable bodies to cope with all maintenance work from spraying to waste collection on park land areas.

The Standard Autobarrow unit is powered by a Villiers F15 engine and has a payload of 9 cwt.s. and a turning circle of 7ft. Its unladen weight is 2 cwt.s. 28 lbs. Further details are available from J. H. Hancox Limited.
FYLKING TURF GRASS

mightiest blade growing

The Champion, a hardy Viking blade, originating in Svalof, Sweden, Fylking Smooth Stalked Meadow Grass excels on every count.

- Disease Resistance
- Low Cutting Height Tolerance
- Wear Tolerance
- Rapid Establishment
- Certified Seed Quality
- British Tested

FYLKING SMOOTH STALK MEADOW GRASS

'FROM QUALITY CONSCIOUS SEED DISTRIBUTORS'
To see the 10-blade cutting cylinder of the Auto-Certes whirring smoothly across a golf green is the surest way of appreciating what a truly splendid piece of machinery this famous mower is. And the finish rolling out behind the two-part landroll is a delight to anyone who really cares for fine turf. For a superb finish to golf greens, cricket squares and bowling greens Ransomes Auto-Certes is unsurpassable. Your local distributor would like you to see it for yourself. Contact him now.

**Check these features**

Choice of 18" or 20" cut.

Separate landroll and reel clutches allow precision control.

NEW high speed gearing on 20" Auto-Certes ensures a smooth 135 cuts per yard.

NEW airflow grassbox ensures full capacity filling, reduces emptying time.

The 10-knife impact-resistant steel cutting cylinder stays razor-sharp for longer.

Single-point height-of-cut from 1/4" to 1/8" at a microscopic 1/64" at a time.

Power-driven transport wheels mean quiet and easy site-to-site transportation.

Brush and comb set optional extra for turf grooming.

Ransomes Sims & Jefferies Ltd., Ipswich.
