## New Developments from Mommersteeg

MOMMERSTEEG INTERNATIONAL have introduced two new grass varieties.

**MAJESTIC** — a new breed of perennial ryegrass which should meet the demands of both groundsmen and landscape architects alike. As well as displaying the essential qualities of a top class variety such as rapid germination and establishment and outstanding resistance to hard wear, Majestic also enjoys other features such as low mowing requirement, fineness of leaf, retention of its dark colour throughout the year, drought tolerance and ease of mowing.

**MONCORDE** — is claimed to be Britain's greatest advance in fine leafed turfgrass. This versatile, fine-leafed creeping red fescue has many outstanding features including fast establishment, dense compact growth, a rich and deep colour throughout the

year, resistance to wear and versatility and adaptability.

Mommersteeg have published five new leaflets: a new mixture list detailing Mommersteeg blends for bowling greens, cricket, football and rugby pitches, golf courses, playing fields, race courses, stadiums and ornamental and open space areas as well as special mixtures for problem areas and mixtures containing wild flower and herb seeds;

“perennial ryegrass blends for sports turf and amenity use” which traces the development of perennial ryegrasses up to the latest introduction of special blends of certified varieties to meet specific turfgrass needs; and these three exclusive Mommersteeg varieties - “STADION” Britain's most widely used perennial ryegrass, “MONCORDE” a new creeping red fescue claimed to be the greatest advance in fine leafed turfgrass and “MAJESTIC”, Mommersteeg's latest perennial ryegrass which will meet the demands of both groundsmen and landscape architects alike.
