Institutional
grasscutting

Grasscutting problems vary. And don't you know it! But Flymo Institutional have most of the answers. Know how to help you cut maintenance and labour costs. Check your problem areas on the map now.

Key D. The Toro 21 "Greensmaster for perfection on the most undulating greens. 147 cuts per yard. With two Greensmasters, 18 greens on an average course can be cleanly cut in under 4 hours, with complete grass collection - any time, any day, even on waterlogged surfaces.

All over the country, golf clubs are proving the cost-cutting value of the Flymo Institutional range. Henry Fry, Head Greenkeeper of Clyne Golf Club, Swansea, uses two Greensmasters. Says Mr. Fry: "I am very pleased indeed... with the fine quality of the cut and saving of time, which meant the saving of one man at least in cutting time. Grass collection is a hundred per cent, no doubt about it".

Contact Flymo Institutional and find out more about cost savings in grasscutting. Now!

SPARE A THOUGHT FOR GREENKEEPERS

by Bill Dunn

(from Newmarket Journal, 7th November 1968, with acknowledgments)

Mr Bill Dunn is a well-known Cambridge county player and a past captain of the Gog Magog Golf Club

At a time when most club members are relaxing from the rigours of a hard season's activity on the links the greenkeeping staff of golf clubs are now busy with the highly important job of restoring courses at least to their condition at the start of the season and in many cases to carrying out developments and improvements not possible earlier due to heavy occupation of courses.

This is the time when the head greenkeeper takes stock of his responsibilities in matters of course, equipment and staff potential, but the pause is only a brief one, for, month by month, he has a strict calendar sequence of operations just as pressing as those which require to be carried out by the keenest gardeners among us, and his constant care is to try to get ahead of nature.

This year has been a very difficult one due to excessive rainfall which has both resulted in courses being more heavily divot-scarred than usual, and a much greater rate of grass growth. In these conditions, too, weeds have flourished and altogether there is cause for dismay. No wonder there is a shortage of greenkeeping staff nowadays.

* * * *

Give sympathetic and understanding thought therefore to those who, for your future enjoyment, rise early in all sorts of weather and work thoughtfully and painstakingly to bring your course up to a standard which will satisfy them and are often maligned in their absence. The greenkeeper has no redress against members' complaints, although he has a pretty good buffer in the secretary (who is paid to listen patiently to complaints!)

Greenkeeping is a vocation for the enthusiast and of the dozen or so I know in the area there is an air of sincere dedication displayed in every one of them. Nowadays, of course, his burden is considerably lightened with the rapid development of machinery and its intelligent use, effective fertilisers and worm and weedkilling agents (lead arsenate—£200 a ton!)

Skilled in his art, he is a manager of men, chemist and scientist, an expert in Critical Path Analysis (the "in" word for organisation). He has to be a book-keeper and scribe into the bargain for he registers all activities, materials used, time taken and so on in his log book—his most important record.

He can also call on the expertise offered to him free by the Greenkeepers' Association and the Sports Turf Research Institute who will give him Soil Analysis Reports and recommendations for curing acid or alkaline conditions particularly on the putting greens.

Courses of instruction both for the head greenkeeper and his staff are run regularly and most clubs are foresighted enough to enrol them, so that they may be kept abreast of all modern methods and developments.

Any club which has an experienced head greenkeeper today can count itself fortunate. It is a race which is slowly being reduced in number each year by retirements without suitable replacement, for not many young men are coming along with an interest in the upkeep of a golf course, not really surprising when they know they can earn more money on the factory floor.

On the other hand, it is a good open-air life and the job is one which is worth while and satisfying.

Tradition plays a large part, however, and locally this is borne out in the (contd. on p. 15)
I AM SORRY FOR THE DELAY IN letting you all know of the course and dates for the Annual General Meeting; after a long wait for an answer from the Southern-down Golf Club our request was turned down with pressure of fixtures for the season. We did not receive this answer until November. Mr Fry and I made a few visits to the club and I telephoned a couple of times; we still could not get an early answer. I then tried Royal Porthcawl Golf Club; our chairman, Mr Geddes, made the inquiry but still no luck so I had to write to the Pyle and Kenfig Golf Club which has very kindly permitted us to hold the meeting there. We are very grateful to them for their kindness.

A few words now about the course. Since the last meeting Mr Bert Jones and his staff have worked very hard and changed the course quite a bit. There is a big improvement now that the post and wire have been taken from the greens. The cattle, too, have been taken away. We look forward to you all having a good and enjoyable meeting. This course is near Porthcawl which would be the best place to stay, and I hope to see all the old faces and many new ones at this meeting. I am sure you will enjoy the course and good luck to you all.

A very Happy New Year to all members of the Association and a Prosperous New Year from all members of the Welsh Section.
Greetings

MAY I ON BEHALF OF THE members of the North-West Section extend to the Editor, Hon. Secretary, our friends in the trade and all members of the B.G.G.A. the Season's Greetings and Good Luck for the future.

Lectures

Our thanks to Mr R. Dagnall of Fisons for making the journey to Manchester in very poor weather to give us a very instructive and enjoyable talk, which covered a wide range of subjects.

Our next talk will be given by Mr Fairhurst of Fosters & Co. The date will be 13th January but the venue has been changed and will now be given at the Brunswick Hotel, Piccadilly, Manchester, and NOT at the Garrick Hotel as stated in last month's Journal. Time 7.30 p.m. The February talk will be given by B. Metcalf of J. Metcalf & Co. on 10th February. I would like to say here that there will be no more talks given at the Garrick Hotel.

Spring Tournament

The venue for the Spring Tournament has now been fixed; due to the kindness of the Captain and Council of the Southport and Ainsdale Golf Club we will be holding the above Tournament on their course. Date 13th May. I will inform members of any further details nearer the time.

Congratulations

Congratulations to F. Halstead on his retirement after more than 20 years at Bury Golf Club. Happy days, Frank.

We welcome back to the Section R. Janovskis, who a short time ago went to the Midland Section, but is now back with the North-West having taken over as Head Greenkeeper at the Swinton Park Golf Club, Manchester.

Meetings

Members are asked to note the dates for meetings in the New Year, all to be held at Horsforth Golf Club: Wednesday, 22nd January; Wednesday, 26th February; Wednesday, 12th March.

The Annual Dinner will be held on Friday, 28th March.

Grand National Sweep

Members will soon be receiving tickets for the Annual Sweep and it is hoped that you will all make every effort to make it a success. As you know most of the profits go to the Benevolent Fund and the bigger the

S.T.R.I.

THE NOVEMBER LECTURE BY  
Mr W. H. Bartle of the Sports Turf Research  
Institute was a repeat of that he gave to our  
members last January which was said at that  
time to be the best presented to the Section.  
The subject was “Greenkeeping in General”  
and the idea of a repeat was to invite the  
Chairmen of Green Committees of all  
Sheffield and District Golf Clubs. However,  
only seven clubs were represented at the  
lecture along with thirty-two of our members  
to hear Mr Bartle present ideas and recom-

dendations on course maintenance, work  
planning, management and staff relationship,  
etc. The evening had to be brought to a close  
at 10.30 p.m. after three hours of discussion  
and questions which was in itself proof of the  
popularity of the lecture.

Tractors

The February lecture to be held on  
Thursday the 27th will be given by Messrs.  
J. I. Fearn (Agricultural) Ltd., and the  
subject will be “Tractors” Maintenance and  
Handling Tips.

We wish all our friends both old and new  
a happy and prosperous New Year and may  
1969 bring more favourable weather con-

ditions than its predecessor.

person of the head greenkeeper at “The  
Gogs”, Douglas Neville. He is the son  
of a present greenkeeper in Buckingham-

shire and his own son, Andrew, has  
joined him and is making the progress  
under his watchful eye.

Nearer home and with a splendid  
record of service to the Links Golf  
Club is my old friend “Ted” Scrivener.  
Working with his brother who has now  
retired, Ted can be considered the  
doyen of his profession in this area.

The splendid condition of the course  
is a testament to his hard work and  
enthusiasm and he has the best of both  
worlds for he is a keen golfer himself.

Talking with him recently, he told  
me that next year he completes 50  
years with the club. I shouldn’t think  
there are many greenkeepers in this  
country to beat that.

Our friends the greenkeepers deserve  
well of us—salute them all.

FINE TURF SPECIALISTS  
EDINBURGH, 2
A very Happy New Year to you all

There should be plenty of bitter oranges now in the shops, if you wish to make your own marmalade. To make it successfully, be sure to use the special oranges (not the sweet eating ones) and to soften the skins before adding the sugar. If the skins should be exceptionally tough, a pinch of bicarbonate of soda added to the water in which they are cooking will help to soften them.

Old Fashioned Marmalade

Take 14 Seville oranges, divide into quarters, take out the pips, cover the latter with water and allow to stand all night; cut the fruit into fine shreds, put into a deep dish and add 3 pints of water to each pound of fruit; let it stand 24 hours, then boil till tender (about an hour); let it stand all night, add liquid from the pips, then weigh and allow 1 1/2 lb. of castor sugar to each pound. Boil together 1/2 of an hour, or until the juice is well set. Put into jars and cover, the juice of 2 lemons added is an improvement. If there is a tendency for the peel to rise to the top of the jars, leave to cool a little longer, then stir well to distribute the peel evenly.

Marmalade Pudding

1/4 lb. breadcrumbs, 1/4 lb. finely mixed suet, 2 oz. butter, 1/2 lb. flour, pinch of salt, 1 large egg, 5 oz. marmalade, 1/2 of a teaspoonful of bicarbonate of soda, a little milk, 1/2 lb. of demerara sugar.

Rub the butter into the flour, add the sugar, breadcrumbs, suet, egg beaten, marmalade and soda dissolved in the milk, mix thoroughly, pour into a well-buttered mould dusted with brown sugar, cover, with buttered paper, and steam for 2 hours; then turn out and serve with marmalade sauce.

Marmalade Sauce

1 tablespoonful of marmalade, 2 tablespoonfuls of brown sugar, 1/2 pint of water. Boil the sugar and water 10 minutes. Stir in the marmalade and serve.
The NUFFIELD 4/25
25 h.p. and light weight

The 4/25 is a tough, simple-to-use and yet technically sophisticated modern tractor. Its light weight is a leading advantage when working on turf where heavy tractor wheel pressures must be avoided. The compact dimensions of this new model, its power and ability to manoeuvre in confined spaces allow outstanding performance and versatility. Features include 9-speed box with 3 reverse gears, independent hydraulics, 2-speed P.T.O. and many more optional features besides. Arrange a demonstration with your Nuffield dealer.

Standard Model £564.
Drivers' cabs are proprietary fitments at extra cost.
