A quick review of the statistics of the recently concluded 41st International Turfgrass Conference and Show sponsored by the Golf Course Superintendents' Association of America in Houston, Texas, February 8-13, 1970, indicates another record-breaking success. G.C.S.A.A. Conference and Show statistics are presented below, compared with those of previous years:

G.C.S.A.A. President Norman W. Kramer, superintendent of famed Point O'Woods Country Club in Benton Harbor, Michigan, said plans are already well along for the 42nd G.C.S.A.A. Annual Conference to be held in Denver, February 7-12, 1971. He said exhibit hall and hotel facilities are comparable to or better than those enjoyed in Houston and should result in another record-setting event.

**AUTO-CUTTER & TURFMAN**

A self-propelled turf-cutter with depth adjustment that cuts turf at 90 feet per minute and up to 2 inches thick. Not so different? But that's only half the story. The Sisis Auto-Cutter and Turfman will also take a range of optional implements for slitting, brushing or raking turf. Versatile enough to be used the year round for turf maintenance as well as turf cutting! Now that's different! And the price? Only £285 for the basic unit—that's different too! Write for details.

WALK ABOUT

By PATRICK SMARTT

I have for sometime thought it to be a pity that the head greenkeepers of neighbouring clubs do not visit each other's courses and exchange views. At the Annual General Meeting of the Association the matters discussed will be of a general nature, mainly, it may be supposed, on terms and conditions of employment. One is doubtful (I write in ignorance) if the art — and art it is — of cherishing a course is one of the items.

There are, as everyone knows, courses in greenkeeping. I have never come across such educational gatherings, civil or military that were as useful as personal discussions.

Courses, to point the obvious, differ: the links, the heath, the chalk downland and the lush park. Each calls for a different treatment, as does altitude which can expose the land to all the elements. Despite the differing conditions, one greenkeeper will increase his knowledge and widen his views in a day spent with another, who will also benefit.

I hold the belief that in this peculiar world of ours there is always something to be learned from another, either from mistakes made or something new.

"Whatever ignorance man may show From none disdainful turn For everyone doth something know That you have yet to learn."

Some 16 years ago I had cause to visit a links. I was secretary of a heath course which, at its highest point is 700 feet above sea level. I asked my opposite number if I might bring down my head greenkeeper to see a links, and converse with his head man — one who receives an annual accolade from Leonard Crawley in his reports on the President's Putter.

A. P. Arnold entertained his visitor royally, lunching him and they quaffed a beer or two followed by a tour of the course, inspection of machinery, stocks of dressing, etc. It is not unreasonable to suppose they discussed their respective secretaries (I hope not too critically), with some derogatory remarks on the subject of people who, mowing their lawns at week-ends, as members of the green committee offer advice on course upkeep.

I do know that my old friend enjoyed his day and that he absorbed the difference, the distinct difference there is in a sandy sub-soil and the one of clay to which he was accustomed. He learned there were problems other than his own, even the air with its ozone was unlike that inland. A call at a downland or park course would have created new impressions. The reverse holds good, visits from those responsible for these courses would add to their knowledge in seeing a high, heath course.

There is a risk, if you have been to a wealthy club, of your man coming back seething with envy over the mechanisation he has seen. At the time of that visit to Rye, there were many occasions on our home course when I used to hold the gears in the engaged position while Harry Gates drove the ancient tractor which, in our more placid moments we called "the old lady". Today, with the club substantially better off, he and I, both retired, watch several mechanical vehicles trundling about the place. I suspect there is an unspoken opinion in his mind that "in his day" they did a man's job. A remark that cannot apply to his successor who had been his No. 2.

Greenkeepers are a race of their own; they speak the same language. They are men of the earth, like farmers, gamekeepers, shepherds and the true gardener — they all have mud on their boots.

This scheme, if that is not too grandiose a title, must depend on secre-
Versatile, and economical in operation, the Leyland 154 is ideal for turf maintenance work. Its light weight is a great advantage when working on grass where heavy tractor wheel pressures are to be avoided. With 25 h.p., compact dimensions and the ability to manoeuvre in confined spaces, the 154 is the 'PERFORMANCE' lightweight tractor for work on golf courses, parks and sports grounds. Leyland 154 features include 9-speed gearbox with 3 reverse gears, independent hydraulics and 2-speed P.T.O. There's a wide range of optional extras and specialised equipment. Arrange a demonstration with your Leyland tractor distributor or write for information to:

TRUCK & BUS DIVISION, LEYLAND MOTORS (SCOTLAND) LTD., TRACTOR GROUP, BATHGATE, SCOTLAND.

17
taries. Firstly in seeking the opinion of the other, and secondly by tactful enquiry making certain that one greenkeeper will not resent a visit from another, and that they are of compatible character. Nor should there be any suggestion that one is going to be taught by the other. Obviously the greenkeeper cannot be expected to pay for transport, or entertain out of his own pocket, and it should not be on his day off.

A secretary worth his salt takes a pride in his course, and leads rather than commands his staff. Thus, these interchanges should present little difficulty.

A further advantage is the break from parochialism... the day after day effort to coax the best from the sandy, the mud and wormcast course, the east wind emaciated grass — in many instances mis-called turf.

Looking back, I can only wish I had taken the responsible man with me on more occasions when I went to watch tournaments. I am convinced there is profit to the man, a day out for one thing, and therefore to the course if he has an occasional walk around with one of his profession at a club foreign to him.

HON. SECRETARY’S NOTES

Annual Draw

This year the draw will be run on the Dunlop Masters Tournament and the books of tickets are now in the hands of the Section Secretaries.

It is hoped that every member will do his utmost to promote the sale of these tickets to ensure the financial stability of our association.

SPECIAL OCCASIONS

MAY

6th Midland Section Tournament—Oswestry G.C.
13th East Midland Spring Tournament—Stanton on the Wold G.C.
13th North-East Section—Visit to S.T.R.I.
19th Sheffield Section President’s Trophy
27th Southern Section A.G.M.

JUNE

15th Sheffield Section Union Match
16th Northern Section President’s Prize
22nd South-West Section Am/Greenkeeper foursome
23rd Midland Section—Visit to Massey-Ferguson
25th Midland Section Annual Match
30th Welsh Section A.G.M.

JULY

8th Sheffield Section Annual Tournament
16th South-West Section Summer Tournament
NEW MACHINE REMOVES A TREE STUMP IN 15 MINUTES

A Vermeer Stump Cutter, which can remove a normal tree stump in 15 minutes with the minimum of site disturbance, has come into service with the Landscaping and Tree Transplanting Division of Scottish Land (Contracts) Ltd.

As well as using the machine on sites which are being landscaped, the company is also undertaking tree stump removal from parks, golf courses and sports grounds on a contract basis.

Says Mr George Christie, landscaping director of Scottish Land: “Tree stumps are not only unsightly but expensive in terms of the extra time involved in cutting grass or cultivating ground around them. Until the Vermeer machine became available their removal was costly, too, because of the site disturbance caused by digging or blasting them out.”

The stump cutter, which can be towed by a Landrover, simply grinds the stumps away leaving a neat pile of chippings.

This course on greenkeeping is designed to cover, in a very brief way, the fundamentals of grass culture and the maintenance of playing areas. It is open to all interested in the subject.

Fee, including Lunch, Tea and Coffee each day = £3 0s. 0d.

The programme is as follows:

**TUESDAY, 2nd JUNE, 1970**

9.30 a.m. Address of Welcome.
Mr A. G. Harris, Principal.

9.45 a.m. Lecture: Duties of a Golf Club Secretary
Capt. I. T. Roes, Burhill Golf Club.

11.00 a.m. Coffee.

11.30 a.m. Lecture: New Advances in Chemicals for Turf Culture.
Mr D. H. Gooding, Synchemicals Ltd.

12.45 p.m. Lunch.

2.00 p.m. Lecture/Demonstration—Turf Handling.
Mr G. Warwick, G.L.C. Parks Department.

4.00 p.m. Tea.

4.30 p.m. Lecture: Irrigation of Grassland.
Mr A. D. Chatfiell, Camaron Irrigation Co.
Followed by a visit to Worplesdon Golf Course to inspect recent installations of irrigation equipment.

**WEDNESDAY, 3rd June, 1970**

9.30 a.m. Film—"Keep on the Grass".

11.00 a.m. Coffee.

11.30 a.m. Lecture: Grasses for Sports fields and Greens.
Mr R. Palin, Sutton and Sons.

12.45 p.m. Lunch.

2.00 p.m. Machinery Demonstration.
Merrist Wood Staff.

4.00 p.m. Tea.

4.30 p.m. Machinery Demonstration contd.
