tion. This allows him to meet his often conflicting duties of direct supervision of the crew and managerial responsibilities in the office.
The advantages of reliable and immediate communications between the course manager and the crew are too numerous to cover fully. Obvious applications include:
1. Testing, repair, and adjustment of the irrigation system.
2. Avoiding lost man-hours due to equipment breakdown.
3. Constant adjustment of the daily maintenance schedule to make the maximum use of available man-hours.
4. The coordination of activities such as tournaments, chemical applications, and special projects.
5. Since the maintenance workers are never out of site on the course, they are usually close by when an accident or medical emergency occurs. Once equipped with radios, they can quickly summon help.

The technology is already available to make FM radio systems work for you and your club in other ways as well as talking to the crew.

Many clubs have installed phones on the course in case of medical emergencies and to prevent long delays between nines as players stop for food and drink. Conventional phone lines require costly installation and often ditching across the golf course.

Many industries use FM voice reporter units to monitor and report on the function of specialized equipment. These units are triggered by an event such as low pressure, high temperature, etc., and a call is made to the portable base station or even a pocket pager. A recorded message is then played announcing the event.

There are many uses for such a system on the golf course - particularly regarding the irrigation system. When the swings of water and electricity (as well as turfgrass) that could be realized if the monitor detected power lost from the pumping station. The course manager would be notified by the voice reporter unit with a message such as “pump station power off.”

However, it was in his capacity of Captain, and Green Chairman of Lindrick Golf Club that Eddie made his mark in the field of golf course maintenance which became his great interest. For a period he acted as course manager before handing over to the current young, skilled Lindrick greenstaff. He studied golf course conditions countrywide and had amassed a considerable collection of slides on course conditions good and bad which he used for his numerous talks to greening groups. He was a friend and confidant to many greenkeepers and a firm believer that the condition of our courses would not improve until the ordinary golfer was better educated to the methods needed to achieve good playing conditions all the year round.

Another of his interests lay in country houses. He assisted his wife Nan on the research for her book ‘Schooldays at Chatsworth’, an account of her schools war time evacuation to Chatsworth House, the home of the Duke of Devonshire. Discovering the Duke’s connection with local golf clubs, Eddie set about researching the subject of ‘country house golf’ which was later published under the pseudonym ‘Historicus’ in Golf Monthly.

He had retired early to pursue his interests, and his untimely death whilst looking at a course in Cheshire has robbed his family and friends of invaluable support. The whole of greening will be saddened by his passing.

I mentioned that two-way FM communication systems are now affordable. Although the prices will vary according to the system you choose and your dealer, listed below are some rough estimates of what you will currently need to spend.

Base station $1,000-$1,200
(Cincluding antenna and desk microphone)
Course manager’s portable $600-$700 (with telephone option)
Crew’s portable (each) $500-$600
Repeater service $20-$25
(if necessary, per unit per month)

At first glance, the cost may seem high even though these numbers are significantly lower than they were one or two years ago. Actually, most courses would recover the cost of the system quickly as man-hours are saved and work is carried out more efficiently.

For most golf courses, the year’s capital equipment purchases are just around the corner. Give strong consideration to acquiring a two-way FM radio system. It is a purchase you will find well worth the cost.

**OBITUARY**

Walter Heeles, Secretary of the British Golf Greenkeepers Association for over 12 years died in Harrogate District Hospital, last month after a short illness.

The high regard of Walter’s contribution to golf was reflected in the huge attendance at his funeral, by not only the officials and members of his club but greenkeepers nationwide and representatives from the amenity turf industry.

The service was conducted by the Rev. Richard Kayes, an Oakdale member, Walter’s one time playing partner and a family friend.

Mr Heeles, who was 63 had been Oakdale’s head greenkeeper for 23 years, accepting the position when his business premises were compulsory purchased in 1963.

A talented natural golfer he joined Knaresborough Golf Club as a young man and in 1962 was elected Captain. He won the President’s Cup in 1955, held the amateur course record and later when head greenkeeper at Oakdale won the Harrogate Union Individual Championship.

A leading member of the Yorkshire Branch of BGGA, he became the National Secretary of the Association and ran their affairs with his wife Betty from their home in Knaresborough until the amalgamation with EIGGA and the BGGA in 1987.
