weather when you use it. Floranid is resistant to leaching, reduces scorch risk, keeps grass growing for longer even in a drought, and helps bare patches recover beautifully.

Independent trials have proved Floranid is more efficient to use. The results are more satisfying. And it's more cost-effective than you think, whether it's on the village green or in the national stadium. That's why Floranid is Europe's most successful amenity turf fertiliser.

If you want a tough, well-rooted sward - packed with strong, even growth, attractive to look at, hard-wearing to use, easy to look after - look into the Floranid range. The facts make other fertilisers look expensive.

Floranid
Europe's top-selling amenity turf fertiliser.

BASF United Kingdom Limited, Lady Lane, Hadleigh, Ipswich. Tel: (0473) 822531.

Floranid is a BASF trademark.
NEW ASSISTANT DIRECTOR AT BINGLEY

Following the retirement of Mr John Shildrick, Assistant Director of the Sports Turf Research Institute, the Board of Management have appointed, as their new Assistant Director (Research), Mr P. M. Canaway.

Mike Canaway joined the STRI in 1974 on a contract financed by the Department of the Environment to study wear and durability of sports turf. One of his first achievements was to develop a "wear machine" for simulating the effects of play in turfgrass experiments. The machine is capable of simulating different types of wear, including football, golf and abrasion as occurs on training, kickabout areas and parkland. The development of the wear machine had a major impact on the Institute's research programme. Also in the early period, Mike Canaway developed equipment for measuring the "grip" or "traction" available to players on turf and this is now incorporated in a draft British Standard for testing traction or friction on synthetic turf. Both the wear machine and traction apparatus were used in studies on wear tolerance of grasses, soils and nutrition during subsequent years. In 1981 Mike Canaway started a major programme of research on sand constructions for sport, the object being to provide a free-draining playing surface and good playing conditions. In 1985 he was honoured to be asked to present the Keynote Address on soils and plant nutrition at the International Turfgrass Research Conference in Avignon, France. The work on sand roctzones has flourished, with research finance being obtained from the Royal and Ancient Golf Club, the Football Trust and the Football Association. Mike Canaway has been asked to lecture at various venues throughout the United Kingdom and he has published some 35 scientific papers on various aspects of his work at the Sports Turf Research Institute.

New Reps for Ransomes

Michael Prentice

Michael Prentice 27, has previously been a service engineer with the well-known horticultural dealer Henton & Chatell, 33 year old Mr. Mark Radford has been appointed Ransomes grass machinery representative for the East Midlands and North East England. Educated in Nottingham at Forest Fields Grammar School and Brackenhurst College of Agriculture, where he gained a City and Guilds in turf culture, Mark Radford's first appointment was Grounds Maintenance Manager with Trent Polytechnic in Nottingham. He subsequently had a spell with British Seed Houses where he was an area representative.

A dedicated supporter of Notts County Football Club, Mark Radford and his wife Carole live in Nottingham, where they are enthusiastic theatre goers.

QUALCAST SERPAR STRENGTHEN TECHNICAL SUPPORT

Qualcast Serpar have strengthened their technical support to the professional market by appointing a professional technical service representative. Serpar are the specialist group company handling service and parts for Qualcast Garden Products and Atco Ltd. Barry Goodchild will be responsible for providing a full machinery after-sales service for the Atco professional range of products including the Gangmaster, Royale and Tractor ranges.

Before joining Serpar Barry was a marine engineer for ten years.

Royal opening at Leeds Castle Golf Course

Her Royal Highness Princess Alexandra, patron of the Leeds Castle Foundation, joined Ryder Cup Captain and former Open Champion Tony Jacklin, when she formally opened Leeds Castle's re-designed golf course, last month.

Tony Jacklin was the star guest of a foursome to play the first round on Leeds Castle's 9-hole golf course, which has been re-designed by Neil Coles, with the creation of four new holes and new water hazards.

After lunch, Princess Alexandra walked through the Castle grounds and gardens.

During the afternoon Tony Jacklin held a golf clinic for a group of local players, who regularly use Leeds Castle golf course.
Weather-matic has announced the addition of a new commercial series of micro-processor controllers. The Mark 200 Series will offer designers a choice of 12, 18, 24 or 30 stations in a heavy duty housing. As on all Mark controllers, the 200 Series will feature a Day-Bright™ high intensity LED display for superior outdoor daytime visibility.

Programming the Mark 200 Series Controller is fast and easy with the function selector switch and four large, clearly labelled programming buttons. User training is minimal.

The LED display further aids programming by showing current time or programme values. A choice of six or seven-day calendar programming allows for every-day, odd-day, or third-day watering. The dual watering feature provides two independent programmes with four daily start times each.

A start-up/back-up programme automatically provides two daily 5 minute watering starts on all stations in the absence of a specific programme. The back-up programme can be switched 'off' at the user's option.

A separate test programme permits the operator to run all P1 or P2 stations for 2 minutes each without disturbing previously programmed duration times. Additionally, the test programme will skip stations that do not have programmed watering times.

A self-charging battery back-up system retains programmes and clock times in the event of a power failure. A 'short sensor' that detects shorted valves flashes an LED on the face panel and skips watering at that station as long as a 'short' condition exists.

Other standard features include 0 to 99 minutes timing at one-minute increments, a valve power switch to deactivate stations without disturbing set programmes, and semi-automatic or manual start capability.

All Mark 200 Commercial Series Controllers feature a heavy duty transformer, industrial terminal blocks, built-in pump start and pump protection circuit in a heavy-gauge steel housing. The hinged cover has two side toggle latches and a cylinder lock. An optional pedestal mount is available.

Weather-matic manufacture a complete range of irrigation controllers, valves and sprinklers which are distributed and installed in the UK by Prime Waterman Limited, Wangford, Beccles, Suffolk NR34 8AX.

HF-5 AND TRI-KING™ MOWERS

Here's the right combination for high quality cutting and trimming in parks and other council applications.

HF-5 Hydraulic Tractor/Mower
- 5 gangs with free floating 6- or 10-blade reels to follow ground contours
- 33 hp liquid-cooled diesel engine
- Lightweight (8 PSI ground pressure) but high capacity—mow up to 50 acres per day

Tri-King 1471
- 3-wheel drive for superior hill climbing ability
- Hydraulic reel lift for better productivity with less effort
- Hydraulic traction drive—no belts to slip or adjust
- Easy maintenance—easy access to engine, quick belt replacement
- Auto-type drum brakes for hill holding ability
- Choice of 5- or 10-blade reels, floating or non-floating for quality cut
- Isolation mounted engine for less vibration and noise

Jacobsen compact hydraulic mowers—part of a full line of Jacobsen equipment for parks, council and golf course maintenance: small and medium walk-behind mowers, riding rotary mowers, grooming tools, greens and fairway equipment, gang mowers, large turf tractors and special purpose vehicles. See them all. Call: King's Lynn (0553)763333.

Kubota Tractors for Turnberry

When George Brown arrived at Turnberry two years ago from Broom Park in Kent, he was faced with the situation of taking over a championship course which needed an equipment update.

The new owners – NITTO KOGYO of Tokyo were positive in their forward planning. Turnberry had to be, and remain, a major course and a continuing venue for the Open Championship.

Budget plans were agreed and a schedule of investment drawn up to meet the new owners commitment to the future of golf in Scotland.

Included in the schedule of investment was a requirement for two new tractors.

After looking at all available tractors and many years of practical experience, George was convinced that the ideal golf course tractor was in the 30-35hp mark, four-wheel drive, power steering and low PSI.

At SCOTSTURF '87 at Ingliston, George took the opportunity to take a close look at various tractors on the market. Attracted to the overall package Kubota had to offer, an appraisal was made of the Company, its product range, and Dealer back-up. Subsequently, a demonstration was arranged at Turnberry of Kubota products suitable for the course requirements.

These demonstrations led to the purchase of two Kubota L2850 tractors, one fitted with a back-hoe and loader.

AGRIMASTER® & AGRICROP®
Liquid Growth Stimulants

TIP THE SCALES IN YOUR FAVOUR

Two invaluable ingredients in one container!
Farmyard manure PLUS seaweed make the perfect foliar spray for fairways, greens, sports & recreation grounds and all amenity purposes.

- ENCOURAGES ROBUST, EVEN TOP GROWTH
- TAKES UP LESS STORAGE SPACE
- LOWER OUTLAY
- IMPROVES ROOT STRUCTURE
- HIGHER NUTRIENT VALUES
- LABOUR SAVING

2 GALLONS PER ACRE
6 PINTS (3.4 LITRES) TREATS 1800 SQUARE YARDS

AGRIMASTER® is a 100% organic formulation of manure and seaweed containing N[8%]PK, growth stimulants and a range of trace elements, all of natural origin.

AGRICROP® has similar ingredients, but with added nitrogen [15%]. Both products are available with extra iron.

**IoG's GOLDEN YEAR**

Paradoxically the 43rd annual IoG Sports & Leisure World Trade Exhibition – which takes place at the Royal Windsor Racecourse, Maidenhead Road, Windsor, Berkshire from 20th-22nd September 1988 – is celebrating its Golden Jubilee!

The Exhibition was first held in 1938 (the war and its aftermath account for the seven lost years).

With demand for space up by a massive 25 per cent, this year's exhibition is now all set to be the industry's biggest ever event.

- 386 exhibitors
- 46,000 square metres of stand space
- 16,000 square metres of working demonstration areas
- two covered pavilions
- exhibitors from 27 overseas countries.

To this must be added a record number of colleges which will be featured in the extended Educational and Training section. They include:

Also joining them in that section, will be such bodies as the Agricultural Training Board, BALI South Thames Training, the City & Guilds of London Institute, Garden Machinery Association, National Playing Fields Association, National Turfgrass Council and the Sports Turf Research Institute.

The education displays will be supported by a programme of 18 mini-lectures covering such topics as Winter Games, Bowling Greens and Cricket Squares maintenance, which will be held in the Lecture Theatre.

**JOHN SHAW OPEN DAY**

Mr Andrew Darlow (TORO) demonstrating the 220D to Mr Seymour of Hastings Borough Council who is awaiting delivery of his 220D.

Although the recent J.S. Open Day did not enjoy the best of weather this did nothing to dampen the numbers nor indeed the enthusiasm of everyone concerned. In fact around 80 invited guests including Local Authorities, Greenkeepers and Groundsmen seemed to treat the weather with the contempt it deserved. No doubt because there was plenty of machinery on view to raise the spirits, not to mention the lunch which, once again, was splendid.

Several products were demonstrated including the Groundmaster 220D a recent addition to the TORO stable. This 3 cylinder diesel engine machine is highly manoeuvrable and is fast gaining praise. The 52 in. or 62 in. rear discharge cutter decks which may be fitted, are an addition to the range and a unique flotation system ensures improved ground following.

The Flagship of the TORO range the Reelmaster 450D was also on show. This high output all-hydraulic mower powered by a 50hp Mitsubishi engine with power steering travels up to 15mph and will mow up to 10.5 acres per hour, 5 or 7 bladed cutting cylinders are available and the heads can be either fixed or floating.

Within the TORO section of Lely the New Reform-Metrac 4-wheel drive tractor unit has been added to the range as it will enhance and complement the existing TORO products.

The Metrac is a 38hp 4-wheel steer unit which is ideally suited for banks and difficult terrain work which can be fitted with flails or rotaries or any other front or rear mounted attachment.

**KAWASAKI MEETS THE DEMAND**

Readily identified by the twin headlamps mounted below the front carrying rack, the Kawasaki KLF220 is a very sophisticated machine available at the value for money price of £1,899 plus VAT.

Over the last few months, Kawasaki have been embarrassed by their KLF185 ATV – or rather by their lack of stock. For this well-proven work-horse has proved such excellent value for money that they had completely sold out, while still waiting for the replacement model.

The good news is that the new model (pictured) not only still retains both electric and recoil start systems. The KLF220 retains independent swingarms with dual shock absorbers for the front suspension, but at the rear there is now Kawasaki's refined Quad-Link system that offers a progressive, rising-rate action. Previously, stopping was via a single rear drum brake, now this is supplemented by drum brakes for each of the front wheels.

The new styling is practical as well as attractive: twin headlamps provide a wider spread of light than the original single unit.

Features that remain unchanged include the five speed gearbox with automatic clutch and reverse gear, shaft final drive, and the use of a vibration reducing balance shaft in the well proven engine.

© GOLF GREENKEEPING May/June 1988 15
HYDRAULIC LIFT VERSION OF ATCO GANGMASTER

Hydraulic lift is now available on all four versions of Gangmaster, the PTO belt driven gangmower made by Atco.

For ease of operation the user will now be able to lift the cutting heads automatically without having to leave the cab, particularly useful when moving from one cutting site to another.

There are four versions of the Atco Gangmaster. It is available with either 5 or 3 cutting heads and overall cutting widths of 138 inch and 83 inch respectively, and with either fixed or floating heads.

Special features on the Gangmaster include a belt driven system, operated from the tractor’s power take off, designed to provide constant cylinder speed in all conditions with the added advantage of avoiding expensive damage if a hidden object is hit – the V belt will simply ‘slip’.

For further information contact: David Woolridge, Marketing Manager, Atco Limited, Suffolk Works, Stowmarket, Suffolk IP14 1EY.

BROUWER 5 GANG MOWER

One of the Brouwer range of trailed gang mowers.

The Brouwer range of turf care machinery has a first-rate reputation for quality and reliability and the latest tractor mounted reel mower is loaded with exciting new features and options. Golf Course models are available, delivering a fine cut.

The Golf Course model is fitted with floating heads to cope with .5 inch fine cut to 2 inch rough cut. No lengthy adjustments are needed, just a flick of a lever. Optional brushes are also available which virtually eliminate tractor tracks from fairways.

The most outstanding features of the new lightweight mower include simple one man 5 minute operation to detach the rear mowing units and release the tractor for other duties, full 5 gang operation with 4-gang and 3-gang modes for tight spots, simple bedknife to reel setting and with either fixed or floating heads. The decks themselves are offset for close trimming and feature quick change height adjustment from 1.5 to 4.5 inches. All Brouwer decks have front mounted flotation wheels for perfect contour cutting.

The result is a quality mower that is economical, versatile and dependable. Turfland Professional, sole UK distributors of the Brouwer range of machinery, provide a first-class spares facility and back-up service through their nationwide team of representatives. This expertise, added to the reliability and dependability for which the Brouwer range has become renowned, means that the customer has at his disposal a complete package that is second to none.

Moving up the scale is the Turflazer 727 with its 27 horse-power engine, hydrostatic drive and hydraulic lift, giving a wide variety of cutting widths in both rotary and cylinder modes.

Three models are initially being imported by Iseki, the smallest of the models is the 22 horsepower Turflazer 422 with a choice of 60” or 72” wide rotary cutting decks with options of snow blowers or front mounted brushes. The decks themselves are offset for close trimming and feature quick change height adjustment from 1.5 to 4.5 inches. All Turflazer decks have front mounted flotation wheels for perfect contour following.

New British Triplex to Hit the Golf Market

A new greens mower has been announced by Huxleys Grass Machinery, the Hampshire based family company at Alresford, known best in this country as the main Cushman dealers.

The independent British firm, headed by Ted Huxley and his two sons, have had the machine under wraps for some time to ensure that the principal requirements demanded by greenkeepers were met.

It is a no frills machine, easy to use, quieter than other diesels, economic in running costs, there is a first class service and parts back-up, and the machine has front wheel drive and rear steering.

The white painted triplex, designed by a team of engineers under the direction of Ed Fox, will be priced at around £10,000 when it goes into full production prior to being launched at the IOG Windsor Show in September.

In a market dominated by Jacobsen, Toro and Ransomes, the Huxley Three 58, so called because of the three cutting cylinders and the 58 inch cutting width, is powered by a Kubota diesel engine.

From tests carried out on a number of golf courses in the south of England it is said to use only 1.6 litres an hour in fuel, which, compared to the petrol engines of other machines can save a golf club around £500 a year in running costs.

The Three 58 has hydrostatic drive with separate pedals for forward and reverse, stopping by easing off the drive pedal. Cutting speed is around 3 mph at 180 cuts per yard, with a top travelling speed between greens of 8.5 mph.

LLANDUDNO (Maesdu) GOLF CLUB Ltd.

Urgently require an ambitious, enthusiastic and experienced

HEAD GREENKEEPER

with course management qualifications.

The golf course is mainly meadowland with a few holes of links texture.
