HONOURED
BEM for Walter Woods
THE OFFICIAL
BIGGA UNIFORM

Glenmuir Sweaters
- Sizes: 36" - 50"
Order No. BO1 £27.95

Glenmuir Moffat Shirts
- Short sleeved, 60% cotton /40% polyester. Can be worn with or without a tie.
- Sizes: XS - XXL (36" - 50")
- Colours: Light Yellow, White, Burgundy, Jade, Pale Blue, Navy, Black, Stone, Peach, Candy, Ferrari Red, Bermuda Blue, Pepperment, Sky Blue, Oxford Grey, Ascot Blue.
Order No. BO3 £14.95

Rainsuits
- Comfortable, practical and stylish - that's the all-weather Neptune II rainsuit specially designed for greenkeepers and guaranteed to keep you dry. Made from a revolutionary new fabric, these rainsuits are quiet, soft to handle and lightweight - but durable enough to withstand the coldest, wettest winter. What's more, the microporous fabric allows perspiration to pass through the outer membrane without letting in wind, rain or humidity - you stay warm, dry and comfortable all the time! The suits are hardwearing, washable and allow a full range of movement.
- Now BIGGA have teamed up with manufacturers ProQuip to bring you these weatherproof jacket and trouser sets at an unbelievable low price. They're available in Navy/Silver or Navy/Jade with different styles for men and women. And because of a cancelled export order, orders for women's rainsuits will be supplied with an extra pair of trousers - absolutely FREE! These quality workwear garments are fully guaranteed for a year.

Books direct from BIGGA HQ
- A Manual on Golf Course Construction, Turf Establishment and Cultural Practices - James B Beard
- Specifications for a Method of Putting Green Construction.
Written by members of the USGA Green Section staff and edited by William H Bengalfield

Greenkeeper International is proud to acknowledge the huge service that Cecil George – a ‘man o’ mony pairts’ – has contributed to greenkeeping for almost 50 years.

Preventing for the big one: BTME ’92
As the last minute fine tuning for Britain’s most successful indoor exhibition takes place, along with an exciting and ambitious seminar programme, we take a look at what’s coming up. We profile some of the speakers and explain the background to the big event.

Half a century of service
Greenkeeper International is proud to acknowledge the huge service that Cecil George – a ‘man o’ mony pairts’ – has contributed to greenkeeping for almost 50 years.

The worm keeps on turning
Jon Allbutt offers some thoughts on the demise of Chlordane, Rhone Poulenc add their contribution – and the news that Britain is receive thousands of the creatures on import.

Not the Way Forward
David White uncovers an alarming state of ignorance of what should be a policy document for the future.

</table>

Corporate members will receive an annual plaque in recognition of their support of BIGGA and the greenkeeping profession.

NB. The First Assistant is a post designed to recognise a third-in-charge where appropriate to the size of the club. In cases where the First Assistant is the recognised Deputy, the Deputy Course Manager/Deputy Head Greenkeeper subscription rate should apply.

1991 members will be invoiced for subscriptions due prior to 1st January 1992. If you have not received your renewal notice by the end of December, please contact Headquarters.

Those enrolling in the Associate/Company membership category will be encouraged to play a full part in the Association's affairs. Associate members will be those having a close interest in greenkeeping without being specifically employed as greenkeepers. As such this category of membership will be of interest to Chairmen of Green Committees, Club Secretaries, Golf Course Architects and Constructors and many others with a close affinity to greenkeeping. Company membership is available on an individual or corporate basis and will be of interest to those employed within the fine turf industries.

Individual membership cards will be issued and will entitle the member to participate in all national, regional and section events authorised by the Association.

Holders of Associate and Company membership cards are not entitled to use their cards to seek courtesy of the golf course.

Delegate fees at the BIGGA Turf Management Exhibition and National Education Conference, as well as at Regional seminars, will be offered to Associate and Company members at a discounted rate. Whilst many members may wish to identify with a particular local section or region, members are able to participate nationally if they so wish. They will be allocated to the section covering the geographical area in which they reside.

All Associate/Company members (with the exception of those Associate members in the £20 category) will receive each month a copy of Greenkeeper International, the Association's official publication and essential reading for those involved with or interested in greenkeeping.

A special Corporate rate is available for those companies wishing to enrol an unlimited number of their staff as members of the Association and individual membership cards will be issued. In recognition of their support of the greenkeeping profession, BIGGA will be presenting an annual plaque.

IMPORTANT - All greenkeeper members will be required to obtain a passport size photograph to validate their 1992 membership cards. The design of the new card allows for the photograph to be sealed, thereby giving proof of identity. BIGGA's Board of Management considers this innovation to be essential in preventing any possible misuse of membership cards particularly in relation to seeking courtesy of the golf course. Photographs are to be affixed by members personally on receipt of their membership card and should not be sent to Headquarters.
Don't drive into trouble

The ever vigilant Jon Allbutt, never one to miss loopholes in the law or keep silent about inconsistencies in their application, has been looking into the tangled web of The Law as it applies to driving greenkeeping machinery upon the highway. At first sight it appears you can drive straight across a highway without taxation or insurance cover (though this seems foolhardy, as an accident might occur) but should you need to turn left or right - even for a few yards - a different ruling comes into play. Jon is discussing the matter with New Scotland Yard and will be reporting via Greenkeeper International. In the meantime, if you are in any doubt regarding legality, you are advised to contact your local police station.

Vandalism on the nation's courses has reached such frightening proportions that plans are afoot to cover the subject in depth during 1992. However, one isolated piece of information received is too good (or too bad) to let pass without immediate comment. Last spring, to celebrate the privatisation of a municipal course in the Midlands, a number of the greens were sprayed by 'persons unknown' with a total herbicide, necessitating removal of the poisoned soil and subsequent returfing. Such senseless vandalism of excellent bent/fescue greens was bad enough but worse was to follow.

The work was put out to tender and an inexperienced firm put in the lowest bid. Instead of working largely by hand, earth moving equipment was brought in - several machines on a green at one time - creating severe compaction and soil destructuring. Despite a sensible specification, which included raking and heeling to ensure correct paction and soil destructuring. Despite a sensible specification, which included raking and heeling to ensure correct paction and soil destructuring. Despite a sensible specification, which included raking and heeling to ensure correct paction and soil destructuring.

The BIGGA recommended minimum salary/wages scale

The Association has updated its recommended minimum salary/wages scale, although actual figures remain the subject of negotiation between the Golf Club and Greenkeeping staff. The quoted rates apply from 1st January 1992.

| Course Manager/Head Greenkeeper | £17,440 pa |
| Deputy Course Manager/Deputy Head Greenkeeper | £12,590 pa |
| First Assistant | £209.30 pw |
| Assistant Greenkeeper | £196.70 pw |
| Apprentice Greenkeeper (All Courses) | £12,990 pa |

NB: Where appropriate these rates should be increased to reflect Regional variations up to a maximum of 24% in the South East region.

As a Course Manager/Head Greenkeeper member of BIGGA, you will recently have received a survey for completion and return to HQ. When analysis of returned surveys is completed, vital information will be available of lasting benefit to you, your golf club and the industry. If you have not already done so, please take time to complete the survey and return without delay.

Each greenkeeper completing the survey will receive a synopsis of the report; a similar survey conducted in the USA positively revolutionised the industry in that country.

Reports from the recent International Golf Trade Exhibition suggest that Tony Jacklin, yet one more professional golfer who has formed his own golf course design company, Golfscape, is in serious discussion with the PGA, who are considering leaving their base at The Belfry and purchasing Deer Park in Stoneleigh. If the deal reaches fruition the PGA would not only have new national head-quarters but three 18 hole golf courses. One would be a 'championship' course designed by Jacklin, the idea being that it could host the Ryder Cup in 2001!
A name to remember if your irrigation system needs attention.

With a sound reputation for design, installation and service, we are one company willing to help the Greenkeeper who has problems with an existing irrigation system.

If this sounds like you why not call us? Our experience and expertise are at your service.

TEL: (0625) 584571  FAX: (0625) 586130
This month’s issue was to have included a light-hearted seasonal chiding addressed at green committee men, under the title ‘twenty things for your green committee to consider in 1992’. Whilst I was indeed feeling in a sufficiently frivolous mood at the beginning of November to make the selection from the dozens of ideas that had filtered through during the year, my heart sank rapidly on learning (from a show of hands) at the excellent seminar at Cannington College that only a handful of the 120 delegates gathered had ever heard of the ‘discussion document The Way Forward’, and that only three had actually read it! What made Eric Shiel, who posed the question, and me even more incensed was the suggestion offered by one delegate that this was easily explained. The document, he opined, being critical in its comment of archaic committee practices, especially that of lack of continuity, had been effectively suppressed by Club secretaries and green chairmen.

To quote directly from the R&A document: ‘An interest in gardening or farming is deemed sufficient expertise to enable members to dabble in the running of the course... lack of continuity is an inherent problem, though in many Clubs there is often one brave soul who will battle on as chairman/convener until he tires of the yearly abuse thrown in his direction from impatient golfers. His thankless task includes attempting to protect his green staff from the more belligerent members, and fighting in general committee for sufficient funds with which to manage the course. All in all, it cannot be said that the mechanisms of general or green committees are even remotely satisfactory as a way of running a golf course. Whatever else may be wrong with the many forces impinging on course management, there is no doubt that the committee structure (and the fact that those taking bad decisions will not even be faced with their consequences in the longer term,) represents a most serious obstacle to meaningful progress. Perhaps the most serious’.

With a liking for figures, I calculated there were about 100 greenkeepers at Cannington and in taking the insignificant figure of those who were aware of ‘The Way Forward’ — generously, say 5% — and computing this nationally, the likelihood is that less than 200 greenkeepers from our membership of 4,000-plus have read the document. Taken a step further, from that 200 perhaps less than half are head greenkeepers, this from a total of over 2,000 British Golf Clubs!

Where does all this lead, you may ask? Instead of listing 20 considerations, I put it to Club secretaries, all save the few that are part of a more enlightened structure, ie. with a green committee consisting only of chairman, head green-keeper and secretary, and having clearly defined long term policy documents on course management. (Letchworth and Wishaw spring to mind as examples), to make Xerox copies of all 33 pages of ‘The Way Forward’ available to both their head greenkeeper and to all incumbents, both long standing and newly elected, who serve on committee. Further, I urge all Clubs to discuss and continuously act upon the implications of the document, and the national golfing media to broadcast the essentials which golfers really need to know in relation to golf course management. Acting upon the recommendations of ‘The Way Forward’, they will discover true salvation for Club, golf course and greenkeeper.

I am thankful to have this editorial column as a ‘soapbox’, for not only does it give me the opportunity to sound off on such matters as ‘The Way Forward’, but also to thank those who have made 1991 an exciting and eventful year in publishing. In particular my gratitude to the talented contributors, the BIGGA section reporters for splendid input to Around The Green, the staff at Aldwark Manor for valuable support; especially when I seem to have lost my way with the word-hungry computer; and most of all to the rank and file BIGGA members, dedicated folks all! May Christmas bring great joy to you all and the new year herald peace and prosperity throughout your world.

DAVID WHITE
ELLIOTT SMALL pays tribute to CECIL GEORGE, 'a man o' mony pairts' who's now retiring

BIGGA's valuable ambassador

As we say in Scotland, Cecil George is 'a man o' mony pairts': greenkeeper; educator; committee member; secretary; chairman; president; editor; poet and sometime singer of 'auld Scottish songs'.

Cecil began his greenkeeping career in 1943 at Whitecraigs Golf Club, a war intervening and taking him into the Parachute Regiment (if you can get him to relate stories of that time, don't miss them, they're as good as some of his old greenkeeper memoirs) before returning him to Whitecraigs, from which he moved to Fereneze and Cathcart Castle. Finally settling at Lenzie Golf Club, Cecil has remained true and loyal to the Club and only after 37 happy years is he hanging up his hat. Always renowned for preparing his course in first class order, many young greenkeepers received their own training at his capable hands.

Members of BIGGA will know Cecil from his annual participation at The Open Championship and for his many other Association activities, though what they will not know is the part he played in ensuring that greenkeepers were respected and recognised as professionals - and his gigantic contribution to the greenkeeper training cause. Greenkeeper training was and still is Cecil's passion, though in his early days there was no specific formal training for his craft and he was to attend night school at Glasgow Horticultural College for three years in order to gain his Certificate in Horticulture.

In the 1960s he was instrumental in setting up the first ever training courses for apprentice greenkeepers - at Glasgow's Woodburn House - and apart from his valuable initial impetus he also aided in the establishment of the specific courses and with Bob Moffat both taught and examined the pupils.

Throughout his long membership of SGCA, SIGGA and now BIGGA, his enthusiasm for education has never waned. First education convenor for the West section, then education convenor for SIGGA and now Scottish Region Chairman of The Liaison Committee with the five Scottish colleges - which he was instrumental in forming, Cecil has also been the Scottish representative on the Greenkeeper Training Committee since 1986.

His contribution as speaker and chairman at our many seminars and conferences has extended over many decades, with one of his highlights being that of representing Scotland at the first European Greenkeepers Conference in Switzerland in 1972.

However, it is not only in the field of education that Cecil has made his mark, for during his long career his service to the West section as member, secretary and chairman is second to none. As a list of achievements, consider the following: SIGGA President 1960 and 1972, Vice President 1974, Editor of Turfcraft (the SIGGA Publication) 1974, Captain of Scottish Team - 1st Ransomes International 1973 (bringing the team to victory), and to mark his retirement he was invited to be Scottish Captain at Fulford in 1991. When BIGGA was first formed, Cecil was an obvious choice to represent Scotland as one of our representatives on the Board of Management.

As I began, Cecil is the essential 'man o' mony pairts', though apart from this catalogue of dedication and selfless hard work, he is one who always has time to enjoy himself and can be relied upon to tell a good tale or sing a good song when the business of the day is finished.

On December 13th the Lenzie Golf Club are staging a dinner in honour of Cecil's years of service to the Club, a measure of the esteem in which he is held indicated by the event being a total sell-out! He may be retiring from greenkeeping but he is as keen as ever to continue the good work begun so many years ago and will continue to be BIGGA's most valuable ambassador.

To Cecil George, may you enjoy a long and happy retirement and may your dear wife Margaret enjoy sharing in your new found freedom and enjoy seeing a little more of you! All members of BIGGA echo our good wishes, none more than those college trained greenkeepers, who have every reason to thank you for their success.

• Elliott R Small is Scottish Region Administrator.
Who would have thought that the demise of chlordane would have caused so many problems for the greenkeeper?

Chlordane's only crime was to be a persistent organo-chlorine compound and as such was part of MAFF determination to phase out such substances. No evidence was presented that it was more harmful than was already known and, when handled according to directions, it gave excellent control of worms in fine turf. Its persistence was such that operator contact was limited to once per year and on heavy soils this could be extended to a span of once every three years. In COSHH terms this would have made chlordane the preferred substance as 'an engineering control'.

Not to worry, they said, now we have Carbaryl in a flowable formulation, which gives good control and is not so persistent in the soil. Carbaryl has the same broad classification as chlordane (both are listed 'Harmful'), but to give the equivalent degree of control as chlordane it needs annual applications and on some soils more than one application was needed. This means a higher degree of exposure to an organo-phosphorus compound for which there is an HSE Guidance Note MS17 - 'Biological Monitoring of Workers Exposed to Organophosphorus Compounds'.

The flowable formulations worked well enough providing they were applied in the right conditions and at the right water volume - eg. a minimum of 1,000 litres per hectare, (more than 100 gallons per acre in old money!). We were resigned to the fact that this was to become the standard treatment for worms: after all, this is in line with the current thinking on changing to the use of less persistent substances in general.

The new products have hardly touched the shelves of our stores when we learn that the supply of flowable formulations are to cease due to 'supply difficulties' from the EC manufacturer, who it seems has been recently acquired by Rhone Poulenc. And... surprise, surprise, a new wormkiller product is launched at IOG by Rhone Poulenc! Not a flowable formulation but a wettable powder, taking us back more than 20 years to the days of handling those nasty, awkward materials. Why, you may ask, has this been allowed to happen? The new formulation is MAFF approved, so presumably all those distinguished (and expensive) people gave careful consideration to the safety of the operator when they granted the Approval. But wait - that is not all - for my bleary eyes read that the new powder formulation is "semi-persistent" for up to two months! Not quite the regressive step, it is a mighty plunge backwards to the bad old days.

In COSHH terms, if we were given a free choice, the powder formulation would be discarded in favour of the liquid; but we must not look back. Is this progress?

No-one can accuse Greenkeeper International of blindly taking sides, although we are certainly not above taking a firm stand on issues that concern the well-being of the greenkeeper or his golf course. Thus we invited the manufacturers mentioned in Jon Allbutt's article, Rhone-Poulenc, to offer their side of the equation. Here is their reply:

We believe there are a number of factual errors in the material. Our response, however, will be restricted to the main points relating to our products.

It was surprising for us to read that 'Twister' is the sole worm control product available. This is totally incorrect, as Rhone-Poulenc market three products for worm control in turf. 'Castaway Plus', the original formulation of which was launched as far back as 1984, is as readily available today as it has been for some years. It is a flowable formulation and is held in high esteem by a large number of turf care professionals, offering as it does long term control of worms and leatherjackets.

Rhone-Poulenc launched 'Twister' as a wettable powder to increase the available choice of products. To help minimise handling a specially designed measuring beaker is included with each box of the product. Rhone-Poulenc think it is important that they give turf care professionals the option of being able to use a contact acting product and 'Twister's' contact action gives quick control of problem worms on playing surfaces ranging from sports fields to greens.

To round off this response, Rhone-Poulenc would like to point out that a third worm control product was launched at the IOG exhibition in September. 'CDA Castaway Plus', a flowable product, gives worm control at an application rate of 10 litres per hectare and when applied with a Lancelot CDA lance fitted with the new Rhone-Poulenc bleed valve, requires no mixing, is used straight from the bottle, and can be applied directly to the problem area. It reduces handling, saves time and is a major advance in terms of novel application technique. In conclusion, Rhone-Poulenc feel it is important that greenkeepers are provided with a wide range of products in order that they may select the best application for their situation.

Austin Davies, Product Manager, Rhone Poulenc

As the British greenkeeper struggles to keep down the nuisance of the earthworm, and to illustrate the difference in greenkeeping methods and principles between the USA and the UK, an article in the most recent issue of the USGA Green Section Record, written by a Professor of Entomology in Kentucky, offers an alternative viewpoint by extolling the virtues of the earthworm and suggesting they should be encouraged, as they reduce thatch. Aeration and sensible management to ensure that-free turf is not mentioned.

Now we read (Daily Telegraph, November 13th) that 1.5 million earthworms are to be imported at a cost of £70,000 from Holland (no-one it seems was prepared to harvest worms in Britain, though in Holland there appears to be a thriving night-time worm catching industry) to improve the top soil over what was once a rubbish tip, on the Stockley Park golf course adjacent to Heathrow Airport designed by Robert Trent Jones.

Within three years the worms are expected to have multiplied 30-fold and when the course is handed over to Hillingdon council for public use in 1993, the worms will be turning thick and fast. Then, no doubt, the greenkeeper will find the worms and their wretched casts a damned nuisance and find the task of elimination made doubly difficult by the aforementioned restrictions on chlordane.

GROWERS INTERNATIONAL December 1991
The programme including application form will be available soon from BIGGA Headquarters

Solving the height of confusion

I feel I must respond to the Autumn Turf Maintenance programme employed at Ham Manor Golf Club (October), and would make three points:

1) Height of cut. Mr George Barr comments that he "raises the height of cut from 1/8” to 3/16" on his greens gradually over a period of three weeks". I presume from this that he regularly cuts at 1/8” during the summer. This would seem to contradict Mr Jim Arthur's article on Page 9, where the regular cutting of greens at 1/8” is thought harmful to turf. It is also contrary to STRI opinion and that of many experienced greenkeepers, who have seen the results of such treatment. Does Mr Barr advocate regular (more than a few days) cutting at 1/8”, and if so, does he not agree that there could be serious long-term problems?

2) Cutting height of adjustment. Might it not be time to change to the metric scale, specifically millimetres? After all, we deal with hectares, metres, kilos and litres as a matter of course and I believe much confusion could be eliminated by adopting a millimetre scale dealing in whole numbers and not fractions. The metric scale appears to be eminently more practical and understandable and therefore less prone to error.

Also, it is not time for a more accurate method of measuring height of cut, especially below 6mm (1/4”)? Even a small error can adversely affect the accuracy on the putting surface, exacerbated by the fact that cylinder mowers (and units) are set up in the sheds, where both front and back rollers and the height of cut setter are all rigid and unyielding, whereas the surface they relate to is anything but!

3) Hollow tining. Mr Barr states that he not only hollow tines in eight hours, but clams as well. This claim must be totally unrealistic unless his greens are only 100m2 and all close to his sheds. He states that only one Ryan GA30 is used at 50mm (2”) centres. My Club owns an Iseki Coremaster which we attach to a John Deere 885 compact tractor, both being less than three years old and in good working order. The speed needed to core a 50mm centred area is so slow that our digital speedometer is incapable of consistently giving a read-out. The time taken to core our greens (average 500m2) at 50mm centres is approx. 50/60 minutes or more per green. If one adds non-working time, such as essential maintenance on corer and tractor, breaks for the operator, travel and from each green, plus stops for golfing play (to eliminate noise, if nothing else), the job takes two and a half days - this just for coring! Remember also that the job is done in October, when daylight hours are short and subsequently restricting any overtime that could be worked to finish the job. Mr Barr’s statement could give the wrong impression to inexperienced greenkeepers, Club members and green committees.

If agreement on basic course maintenance cannot be reached, how can we achieve consistently high standards nationwide?

Paul Bertinshaw
Head Greenkeeper, Royal Norwich Golf Club, Norfolk

After reading the October issue there are several points that require further discussion. Jim Arthur's article, "The Quick and the Dead", was full of useful and sensible ideas concerning the "headless chicken" quest for speed. Common sense tells us that higher cuts are healthier cuts, and that the use of narrow tines leads to a thinning sward and increased weed and poa invasion. This is especially so when accompanied by the increased wear and traffic of 1,000 playing members, as at my Club. Add this to the dry summers and water shortages of recent years and we have a situation where our priorities have to be those of maintaining 100% grass cover. I am forever telling our members that it is better to have grass you can work with than no grass at all.

If one needs to increase putting speeds for that big event, it is surely better to top dress monthly, followed by verti-cutting, grooming and double cutting the day prior to the event. This would be preferable to keeping these speeds for long periods. The average 10-28 handicapper cannot cope with stimpmeter readings of ten feet anyway, never mind the lady members.

Yet further in the magazine we read of George Barr and his successful management techniques, including cutting at 1/8th for the whole season - what is the young greenkeeper to believe? Surely the magazine should be looking for some kind of continuity in its articles.

M Jones
Head Greenkeeper, Ely City Golf Course Ltd, Cambridge

We asked George Barr for further comments, which are printed below:

Both Mr Bertinshaw and Mr Jones seek uniformity of advice, or perhaps more accurately, advice with which they can personally agree. At the same time, surely they must concede that the practice of greenkeeping is by no means an exact science. It is the very fact that different management practices are followed - at different locations on different swards and in different circumstances - that makes greenkeeping so fascinating and infinite subject. In replying to the specific comments, it is my considered opinion that height of cut should be the decision of the head greenkeeper alone - the one who is in control of the whole course - and not written in stone. Granted there are general rules to observe, but there will always be those who break new barriers, repeatedly obtain successful results and feel no pain. Such actions are based on personal experience and are called free choice. The greenkeeper is dealing with a multi-faceted living area and should alone be the arbiter, based on the many factors (soil, grass species, growth patterns, root qualities etc.) he is capable of evaluating. I can state categorically that the management programme outlined works remarkably and consistently well at Ham Manor.
Regarding coring, the greens at Ham Manor are about 500m2 and are what would be regarded as average size. The Ryan G500 we use is a remarkably fast and efficient tool for hollow coring. With a Cushion Pick Harvester, we can (and indeed do) core and clear 18 greens in an eight hour day.

GEORGE BARKS Course Manager, Ham Manor Golf Club

May I convey my sincere thanks to all those at Aldwark Manor who gave us热情 support during the recent TOOR/PGA European Tour Student Greenkeeper awards. Our Association representatives and the Toro and PGA personnel all made us feel most welcome. May I wish the winner and runners-up the very best for their future in greenkeeping and express the hope that we shall all meet again at other BIGGA events very soon. I shall remember the weekend for a very long time.

Mark Ellis Woburn Golf and Country Club, Bedfordshire

With BIGGA offering an ever increasing variety of official uniform dress, do you think it would be a good idea to provide official BIGGA overalls? A small range would do much to improve the professional image we try so hard to create.

PETER LACEY Pennard Golf Club, South Wales

Mowers are indeed afoot to make BIGGA neckties and blazers obligatory wear at all official or invited functions, such as the Kubota Challenge and the Ransomes International Tournament, and indeed such a 'uniform' greatly improves one's professional image. At work the choice is perhaps one of greater individuality, though there is certainly merit in a smarter, uniform turn-out.

Whilst I normally have the greatest respect for Jon Allbutt's opinions, I was disappointed by his negative comments (October issue) on S.P.I.s (spray pattern indicators).

Here was an opportunity for an authority in his field to welcome with enthusiasm a valuable tool which enables greenkeepers to be more aware of their responsibilities and the need for more accurate and controllable spray applications.

The letter asked for more balance, yet balance assumes some form of equality and I see nothing about towing a set of chains behind a spray boom or the spitting of foam blobs to mark a spray boom width when compared to the simple task of adding colour to an existing spray solution.

Regarding his questions on the use of S.P.I.s and the Control of Pesticides regulations, these products fall outside the scope of this Act as they exert no effect on the pesticides activity, being purely visual. Pesticide manufacturers are themselves enthusiastic supporters of this concept. I cannot understand is Jon Allbutt's refusal to acknowledge the value of S.P.I.s in identifying faults, eg. blocked nozzles on the job, relying instead on The Code Of Practice. Of course greenkeepers should read this excellent manual and follow The Code, but surely Jon must realise that not everything is predictable and it is usually 'Murphy's Law' – anything that can go wrong will go wrong – that operates in the real world. If a nozzle becomes blocked it is usually impossible to identify without the addition of an S.P.I. and this results in a repeat application.

One positive aspect of his letter was his observation that some spray colourants sold in the UK can have a higher hazard classification than the pesticide with which they are mixed. Industrial acid blue 9 dye formulations adapted from the textile industry are used, whilst Blazon is a non-ionic polymeric colourant and has a non-toxic and non-hazardous classification.

So come on Jon, show an open mind to one of an ever decreasing number of products specially developed for greenkeepers. Remember, the status quo is a very safe state to be in but does nothing to aid progress.

RICHARD FRY Basildon, Essex

Richard Fry, the author of the article to which Jon Allbutt referred, is a Marketing Consultant, perhaps best known to greenkeepers as the head of Rhone PoulenC's (formerly May & Baker Ltd) Environnement Products Division in the early 1980s and the organiser of the National Turf Care Workshop seminars.

It is always worrying when those with little practical or technical expertise get involved in very important matters such as how to comply with the Control of Pesticides Regulations, and in particular with The Code of Practice. In order to fully comply with the Regulations, the operator of a pesticide applicator must show that he/she is using a 'safe system' to accurately apply the pesticide to the target, and only the target. Whereas marker dyes will show the operator where he has been, correctly aligned bout markers quite clearly show him where he is going! Thus it can be seen there is a role for both marker dyes and bout markers and sometimes they may well be used in combination to good effect. Ground conditions vary so much that having options is very wise, and all who are involved in this area, be it selling, advising or using, must be responsible and professional in their approach to protecting the environment.

JON ALLBUTT Biggin Hill, Kent

I have now read and re-read Mr Jim Arthur's article entitled 'The Quick and The Dead', which appeared in your November issue. On behalf of our Tournament Committee and senior colleagues I write to advise you that the Tour are appalled at his ill-informed references towards our efforts to assist greenkeepers involved with Tour events. Indeed, we believe that elements of Mr Arthur's comments are potentially damaging to the Tour and look to your magazine to reproduce this reply.

I question Mr Arthur's current knowledge of principles or methods that are now employed on the PGA European Tour, as the consultancy relationship the Tour had with him ended several years ago. It should be pointed out that the Tour look to putting greens: (1) as being true as possible, free from bumps and 'snaking', (2) having a consistent resilience for bounce and grip, ie a poorly struck shot should not hold the putting green; (3) having as fast a speed of putting surface as possible taking account of slopes and grass species and; (4) having consistency on all 18 greens, practice putting green and chipping greens.

I will, however, reiterate that the sound principle of aeration and sensible levels of water and fertilisation for putting greens preached by Mr Arthur still hold true today. Our approach in recent years has been one of gentle persuasion to build up a good working relationship with host greenkeepers. In the last three years we have organised two one-week seminars to enable all greenkeepers and managers of the Tour venues to meet and exchange ideas.

We feel these exchanges can only be good for the game, believing that no one person can honestly claim to have total knowledge.

In our experience of running professional golf tournaments, which even Mr Arthur might concede is considerable, we have found that the wish of everyone concerned at a Tour venue is to achieve perfection in terms of presentation for their tournament week, and if we are asked to provide practical help, we will continue to do so.

It is quite wrong to suggest that the Tour have advocated prolonged 'shaving' of greens to achieve speed alone. Indeed, all the methods mentioned by Mr Arthur – including rolling - have been used to good effect and certainly in taking the long term health of the Tour golf courses into consideration. Mr Arthur seems to suggest that the Tour have no care or consideration for the venue when the final putt of the tournament is held. I regard this as so contemptuous that it does not even require further comment!

It is seems that the inclusion of Tour representatives on the R&A's Joint Golf Course Committee doesn't meet with Mr Arthur's approval.

Our wish, and we believe it is also that of the R&A, is that with all parties 'pooling' ideas constructive ideas may be forthcoming.

Please do not request that Mr Arthur may not if all readers of your magazine would dearly love to read constructive ideas from a man who was, for so long, the agronomist. I am sure that he can pass on a great deal of knowledge, rather than embark on yet another attempt to discredit other organisations or individuals.

J N PARAMOR Director of Tour Operations, PGA European Tour

GREENKEEPER INTERNATIONAL December 1991 11
Winter play on greens – a topic never to be brought up in polite conversation. But just what is the answer to this perennial problem? James T Snow, National Director, USGA Green Section, considers a few of the alternatives.

It is common knowledge that three topics are simply too controversial and should never be brought up at social functions: politics, religion, and winter play on greens. Not too familiar with the last? If not, then you apparently haven’t spent much time at golf courses during late autumn and early winter.

Few subjects raise such an emotional response from greenkeepers and golfers alike. Golfers can become irate at actions restricting their access to regular greens during late autumn, winter and early spring, while greenkeepers are just as unyielding in their view that play should be kept off the greens at those times.

Who’s right?
As with most topics of this nature, qualifications have to be tacked on to any firm answer. It is safe to say, however, that winter play can only harm the greens and in many instances it has a significant negative impact on the health and playability of the turf during the following golf season.

Repercussions of winter play
It is not hard to understand why many golfers are sometimes sceptical about claims concerning the negative effects of winter play, because to them the turf on greens that have been played throughout the winter usually appears the same as the turf on greens that have been closed. The effects of winter traffic, however, need not be obvious and dramatic to have significant and long-lasting repercussions.

Direct wear injury – Thinning of the turf due to direct wear injury is an obvious and important result of winter traffic. Unlike during the growing season, when the turf is continually thinned throughout the winter in direct proportion to the amount of traffic. This thinning of the turf canopy can and often does encourage the establishment of such weeds as Poa annua, crabgrass, goosegrass, moss, algae, pearlwort, spurge and other weed pests during the spring and summer. True enough, weeds can indeed be a problem on greens that are not subjected to winter play, but winter traffic causes them to be just that much more abundant and difficult to control.

Soil compaction – Soil compaction is a more subtle and perhaps more important consequence of winter traffic. Because of the cold winter temperatures and the lack of active turf growth, the loss of excess soil moisture through evaporation and transpiration is greatly reduced. In addition, frozen sub-surface soils may completely block the movement of excess moisture through the soil profile. Because these moisture losses are often non-functional during the winter, saturated soil conditions can persist for weeks or longer. Yet the golfers who can appreciate the need to close the course during the summer are completely unsympathetic to the same conditions during the winter.

The effects of soil compaction on the health and playability of the turf are insidious at any time, but because wet soils are especially prone to compaction, the likelihood of traffic causing the collapse of good soil structure is of constant concern during the winter. As soil particles are compacted and pushed closer and closer together, the pore space that facilitates drainage and root growth during the summer is gradually lost. As the season finally commences golfers often complain that these compacted greens are hard. From an agronomic stand-point, turf begins the season in a weakened state predisposed to a host of summer problems. In addition to the potential for weed encroachment, the turf on greens played during winter tends to wilt more readily during hot weather and often is more susceptible to a wide array of primary and secondary disease organisms.

Effects on playability – With the loss of turf density from direct wear injury and the loss of turf vigour caused by soil compaction, greens played during winter tend to be hard, slow and bumpy, and they are slower to develop during the spring compared to greens that are not subjected to winter traffic. Footprinting is often a problem and golfers tend to complain about the lack of trueness even after several top-dressings in the spring. Finally, the effects of compaction on the health of the turf can last to a certain extent for much of the season, making it difficult or impossible to keep greens as closely cut and intensively groomed as some golfers may desire.

Many winter golfers have heard these arguments before and have dismissed them as being the ravings of overprotective greenkeepers and turfgrass scientists. A favourite response is: “I pay plenty to play golf at this Club and I’m going to use the regular greens during the winter. That’s why we pay the greenkeeper – to fix up the greens in time for spring. Besides, the Let ’Em-Play-Anytime course down the street lets them play through the winter and they don’t lose any grass during the summer. Anyway, we only have a few groups that play much during the winter. How much damage can we do?”

Factors to consider
On the surface, these comments seem quite valid; after all, everything is a matter of degree. But many factors should be taken into account in developing a logical policy on winter play.

Anticipated traffic – If a single round were played on the course during the winter most would agree that the potential for serious damage would be nil. Same for ten rounds? How about 100, 500 or 1,000? If the weather is mild and there is little snow, how many more rounds will it add? Where do you draw the line?

Soil type – Winter golfers argue that sand-based greens drain well and don’t compact, making them very suitable for winter play at any time. While it is true that sand-based greens don’t suffer from compaction to the same extent that older soil-based greens might, it is also true that direct-wear injury is likely to be more severe on sand greens. Turf density can be greatly compromised and weed encroachment...
can be a real problem. Obviously, courses with older soil-based greens are especially vulnerable to both types of winter injury.

Specific weather conditions – Though traffic on dormant turf will indeed cause some injury, the weather and soil conditions at the time of play will dictate the type and extent of the damage. Traffic on dry, unfrozen soil will cause the least damage, but this condition is rare during the winter. Frozen soil can cause significant wear injury but little soil compaction. Play on wet, unfrozen soil can result in significant soil compaction but less wear injury. Play on a thawing soil (wet on the surface, frozen below) can result in severe soil compaction and wear injury and should be avoided. Finally, frosted turf is extremely susceptible to direct injury and play should never be allowed.

Grass species – Do you have fine bent/fescue greens and want to keep them? Then don't allow winter play. Thinned turf and compacted soil is just what Poa annua is looking for in the spring.

Cultural maintenance programmes – Winter golfers argue
that a good head greenkeeper should be able to fix any
damage done during winter by aerifying, topdressing, over-
seeding, fertilising and irrigating during the early spring. If
weed encroachment is a problem, then he should apply her-
bicides to kill the weeds and pre-emergent herbicides to pre-
vent crabgrass and goosegrass from developing. However,
a) it would be a rare case where intensive spring work
would completely compensate for the wear injury and soil
compaction resulting from winter play, b) chemicals applied
to control crabgrass and other weeds have a negative effect
on the root growth and the overall health of the turf during
the summer, c) golfers despise the intensive aerification and
topdressing required during the early spring, since most of
them return after a winter lay-off and find their greens
ripped up and in poor playing condition for weeks or more,
and d) all of the work to renovate the greens takes more
money for labour and materials and comes at the expense of
other spring course preparation activities.

History of winter injury - The effects of winter play can
exacerbate the injury from other types of winter problems,
including desiccation, winter diseases and low-temperature
kill (ice damage). Winter play should therefore be avoided if
the course regularly suffers from other forms of winter injury.

Previous weed problems - Courses that have previously
experienced and are concerned about weed problems such
as crabgrass, spurge, moss, algae and Poa annua would do
themselves a favour by avoiding winter play on the regular
greens.

Recent stress problems - Winter play is best not allowed
on greens that have experienced any turf loss or extreme
weakness during the previous year or years caused by heat
stress, secondary disease problems such as anthracnose or
summer patch, nematodes or other summer stress problems.
Greens like these probably would suffer even greater prob-
lems if they were burdened with the vigor-inhibiting effects
of winter play.

Trees - Greens close to large trees that suffer from shade,
air circulation or tree root competition problems should not
be forced to endure the complicating effects of winter play.
Compared to turf growing in clear areas, greens in locations
like these usually respond very slowly in the spring and tend
to be weak during the summer. Many greens on older,
mature courses can be grouped in this category.

Standards for play - One of the most important questions
to ask in contemplating whether or not to use regular
greens in winter concerns what the golfers want from the
greens during the regular season. If they want top-quality
turf from spring to autumn, involving close, frequent cut-
ting, double cutting, frequent verticutting, lean fertilisation,
minimal irrigation or other stress-inducing practices, then it
is best to avoid winter play. If the golfers don't mind higher
cutting heights, slower speeds and greater inconsistency
then winter golf was made for them. Some bias in that
statement? Perhaps, but too many golfers want to trample
their dormant greens in winter and then enjoy US Open
conditions from April through November. There are still
some things that money can't buy.

Some alternatives
Given that this article won't end the use of regular greens
during winter on all courses, a look at some of the alterna-
tives might prove useful in establishing a winter policy.

Use temporary greens. Many courses avoid winter injury
by establishing temporary greens on the fairway approach
to the existing greens. Often these areas are aerified and
topdressed several times during the autumn and the cutting
height is lowered to provide a reasonable putting surface for
the winter. Sure, it's more fun to hit to regular greens but
isn't it worth sacrificing a little bit during the winter to keep

14 GREENKEEPER INTERNATIONAL December 1991
Established on existing fairways, the greens in good condition for spring, summer and autumn? The best policy is to close the greens when growth ceases and open them in spring only when growth resumes and the soil has dried enough to resist compaction.

Design a winter course. This should be especially appealing to the addicts who simply can't get enough. Many Clubs play their course backwards, going from green to tee using the tee as a target or establishing a temporary green at the tee end of the fairway. Others use their imagination and design holes in a cross-country style, crossing roughs and water hazards that might rarely be seen or appreciated when golfers play the regular course. Temporary greens can be established on existing fairways or roughs, near fairway bunkers, water hazards or groupings of trees. The possibilities are limitless.

Establish temporary greens, but use them only when conditions are not appropriate for using the regular greens. This is a bad policy because conditions can go from fair to terrible in just a few hours. For example, greens that are frozen in the morning can thaw as temperatures rise during the day. If play is allowed on the regular greens in the morning, at what point should you switch to temporary greens? Who will decide? Will golfers already on the course be notified of the change? Obviously, the logistics of this policy are difficult and the likelihood of damage to greens is great.

Use regular greens during the winter but close the course on days when the potential for damage is great. This policy has the same flaws as the one previous. In some ways it's even worse, because the days that the greens should be closed, when temperatures rise above freezing and the putting surfaces become thawed, are the same days that most winter golfers want to be on the course. Greenkeepers can come under great pressure from Club officials to keep the course open, despite their misgivings, and sometimes they are simply overruled.

Play the greens throughout the winter, regardless of conditions. Because the alternatives require difficult decisions and complicated logistics, many courses opt for this worst-choice policy. For the reasons we've outlined, these courses are just asking for problems.

Close the course for the winter. From the standpoint of having the greens, tees and fairways in the best possible condition for spring, this is certainly the best policy. There is no doubt that winter play on the tees and fairways can thin the turf and compact the soil just as it can on greens. However, golfers don't play on tees and fairways during the summer and don't mind some cultivation and overseeding of these areas during the spring. Nevertheless, many courses establish temporary greens for the winter, or sacrifice small portions of the regular tees for winter use if play is expected to be moderate or heavy. If the Club decides to keep the course open, whether or not regular greens are used, golfers should be asked to wear shoes without spikes or cleats whenever possible and carts should be restricted to paths - if they are allowed at all.

Winter play can do an inordinate amount of damage to the health and playability of the greens in relation to the number of rounds. Every Club considering winter play should question whether or not it is worth the risk of damaging the greens and affecting their playability for a significant period of the regular season by allowing a relatively small percentage of the Club's members to use them all the time. In the view of most head greenkeepers, turf grass scientists and agronomists, it is not. Unfortunately, even the considered opinion of the experts is unlikely to separate winter play from politics and religion as a topic of controversy among golfers.

This article first appeared in the USGA Green Section Record in November 1987 to nationwide acclaim. It is reproduced here with due acknowledgement and thanks to James Snow, whose wise words demand repeating. Certain minor text changes have been made to adapt US terminology to a European readership, e.g. ‘fall’ has been changed to ‘autumn’ and ‘golf course superintendent’ to ‘greenkeeper’. 

The Golf Club Purchasing Association (GCPA) provides a very effective method with PROVEN IMPACT to sell your goods or services to Golf Clubs.
The best possible turf demands the best possible nutrients, and only Floranid can deliver them in the right amounts - at the right time.

Because Floranid is based on a synthetic organic nitrogen called Isodurf, nitrogen is released by temperature and moisture - the two factors controlling plant growth - thus eliminating problems of wastage and scorch.

This reduces flushes of growth requiring constant mowing, encourages strong root systems to stand up to drought and wear, and produces a good, even colour.

Worldwide usage and trials have proved Floranid to be the most reliable of all slow release nitrogen tested, requiring fewer applications and obvious cost savings, whether on golf courses, parks, sports grounds or bowling greens.

Hardly surprising then, that Europe’s best selling slow release fertiliser is Floranid - the high performer.

Readers of this magazine will be well aware of my enthusiasm for the course design excellence of Harry Shapland Colt, the golf course architect of genius who left a lasting legacy of perfection on every course he created. The player who is jaded by dull routine, or exasperated by the weird, monster creations of many of the latter-day pro-cum-architects, has only to seek out a Colt course in order to rediscover the proper meaning of golfing joy and its many delightful examinations.

Consider the attractions of the wonderful Colt courses in Britain such as Beaconsfield, Bentworth Park, Blackmoor, Calcot Park, Churston, Denham, Edgaston, Ham Manor, Longniddry, Moor Park, Northampton County, Princes (with Guy Campbell), Rye, St Georges Hill, Stoke Poges, Sungardale New, Tandridge and Wentworth, the delicious St Cloud in Paris and the glorious Pine Valley in the USA, where his hugely effective influence resulted in the greatest course creation of all time, and you will instantly appreciate why Colt is still held to this day as the consummate course artist of all time.

Already reviewed in these pages in August, I make no apology for bringing the book Colt & Co., Golf Course Architects, by Fred Hawtree to your attention again, simply because in my view it is a work of merit that will add greatly to the greenkeepers understanding and appreciation of the way the great man operated: his ideas, dreams and design concepts.

My views on Colt's brilliance are endorsed by almost every modern day architect, with this further exposure encouraged by the knowledge that the publishers, Cambuc Archive, are to make available a special BIGGA members only offer over the winter of 1991/2 (ends March 31st 1992), reducing the price of the book to £21 inclusive of post and packing, representing a saving of £6. The book is a numbered limited edition of just 1,000 copies, and if present trends in golf book collecting continue, is likely to become a highly prized collectors item before too long. The offer made is limited edition of just 1,000 copies, and if present trends in golf book collecting continue, is likely to become a highly prized collectors item before too long. The offer made is

The recent STRI publication, David Lawson's Fertilisers for Turf, is one that will find considerable appeal amongst greenkeepers, though some of the more learned sections ('learned' being editorial jargon for 'over my head') contain chemical formulae written perhaps more to please the technical laboratory boffin than the practitioner. That stated, the chapters on sources of mineral nutrients for turf, fertiliser programmes (including timing), and an eminently understandable chapter on soil ph and turf growth, make this a worthwhile and practical working manual for all within the amenity turf industry. Copies of Fertilisers for Turf (£47p soft cover), published by the STRI, are available from The Secretary, STRI, Bingley, W Yorks BD16 1HZ. £12 including postage.

C onservationists are often vociferous in their condemnation of new golf course developments, more vehement than when crumbling country mansions or 'stately homes' with adjacent parkland are the subject of a developer's attention. This writer is all for preserving our heritage, but must express horror at the almost total damnatory attitude expressed in a report for The Georgian Group – In The Rough? – which puts all such development – often nothing more than sensitive rescue plans to save otherwise decrepit houses and overgrown and neglected parkland from oblivion – as the work of The Devil incarnate.

How much happier we would be if the antagonists could also see our point of view through their tinted spectacles of prejudice, exercising some restraint in their carte blanche dismissals and accepting the better compromise of seeing such lovely places survive and prosper. In the knowledge that it's wise to know thine enemy, In The Rough? (40pp soft cover) will prove invaluable to those in the business of rescuing such properties. £3 plus postage from The Georgian Group, 37 Spatial Square, London E1 6DY.

Perhaps the greatest gift available to man is a sense of humour. There's no question about it, some are blessed with the 'sense in abundance, whilst others struggle through life like those who fail to see anything but doom and gloom.

I like to believe that most greenkeepers are of the gifted majority, for in their work they are exposed to the average doses of pompous hypocrisy, with an ability to see the funny side often their own salvation.

If you doubt me, ask yourself how many other professionals have upwards of 500 bosses, all of whom know more about their work than they do.

How fortunate we British are to have so many great cartoonists, many of whom specialise in sporting absurdities and including the handful who capture the funny side of greenkeeping. One such is John Hart, whose Hart of The Green, a collection of cartoons based on characters that are the figment of John's fertile imagination, is guaranteed to bring a chuckle to greenkeepers – because it is all about greenkeepers and the absurdly comic happenings witnessed in their everyday tasks. The sketches are never mocking or hurtful, though one or two are cheeky, and draw on the escapades of the Headgreenkeeper (the one with the tie), Hamish and Harry, a YOP trainee called Harvey and the inevitable Chairman of Green, who is described as being 'loved by his mother' and who delivers requests through a powerful index finger and a barked Above all they project the conflict between traditional views and new technology, attitudes toward members, green committees and pro's and often ironic identification with most of the situations. I'm sure you'll see at least one fan- tasy character you know - a Harry, Hamish or direct from Thrievale, 1 Eason Square, Newcastle Upon Tyne NE1 7SR. Add 75p postage.

by DAVID WHITE
APPROVED COLLEGES FOR GREENKEEPER TRAINING

Surely the best way to invest in the future is to invest in people. Training and education are the greatest motivating factors. A more articulate and educated workforce will inevitably lead to greater rewards and an awareness and recognition of the greenkeepers profession.

The Greenkeepers Training Scheme has appointed thirteen colleges in Britain and Ireland as Centres of Excellence for Golf Greenkeeper Training.
GET SET for 1992's world class turf management exhibition, organised by the British & International Golf Greenkeepers Association.

At Harrogate, between 22-24 January, discover the full potential and diversity of greenkeeping and the fine turf industries. National and international exhibitors, plus a wide selection of smaller but no less significant companies, promise to make the 1992 BTME the best you've seen.

We'll see you there!
Viscount Whitelaw will open exhibition

Wednesday morning, January 22nd, brings the official opening by the Rt. Hon. William Whitelaw, President of BIGGA, of a wondrous display of products and services, aimed exclusively at our industry and presented by a larger number of exhibitors than ever before. Many exhibitors have hinted that BTME will be their launching pad for introducing new products and services to such an exclusively greenkeeper orientated audience, and with such a large and varied display accessible under cover and on a single floor, visitors can be assured of evaluating the very latest equipment.

An unmistakable air of excitement is erupting from those associated with the greenkeeping industry’s greatest annual event, the BIGGA Turf Management Exhibition and Seminar Programme, to be held in Harrogate during January 20th-24th 1992. As the day draws near, a large number of registrations have flooded into the Association’s headquarters at Aldwark Manor, ensuring a spirited pool of participants for the biggest and most ambitious workshop, seminar and exhibition programme ever staged by the Association.

Looking at the schedule of events, one cannot fail to be impressed by both the substance and the quality of speakers chosen and the fascinating subjects they will present to audiences eager for learned information. The educational seminar programme brings together speakers who will not just educate but also stimulate debate within the halls of Harrogate.

Among the speakers are:

- Dr Norman W Hummel, Associate Professor of Turfgrass Science at Cornell University, currently on leave of absence to work for the USGA Green Section on a project relating to USGA Specifications, and on methods for testing construction mixes. Dr Hummel has operated a laboratory at Cornell for testing construction mixes for some years and has worked closely with Architects, contractors and superintendents on sand and peat selection. In his Educational Workshop, which he will present with Stanley Zontek, various options for constructing golf course greens will be covered, including the USGA Specifications for greens.

The fine turf industries' premier event

As Chairman of the British & International Golf Greenkeepers Association, I look forward to welcoming you all to the BIGGA Turf Management Exhibition and Seminar Programme.

Both on the exhibition stands and in the lecture rooms I'm sure you will enjoy renewing old friendships and making new ones. Harrogate is a welcoming and friendly town and those who have been before now look forward to returning each year.

I hope to meet many of you during the week, either at the exhibition stands or at our social functions, which past experience indicates will once again be a forum for a forthright exchange of views and opinions on our great profession.

Providing educational opportunities for greenkeepers is now very much to the forefront within the game of golf, and BIGGA has a leading role to play in developing training programmes which will produce well qualified and technically sound Course Managers. As knowledge increases and techniques improve, the golfer will be the ultimate beneficiary of better presented and maintained golf courses.

In developing our training programmes, we do need support from our members' golf clubs and it is my hope that many Green Chairmen, Secretaries and club officials will take this opportunity to attend at Harrogate to see how much real and visible progress our profession is making.

Finally, the week at Harrogate simply would not happen without the support of the many trade companies present at the Exhibition. To them BIGGA expresses its sincere thanks for backing the event which I feel sure will mark yet another step in BIGGA's development.

Having read about BTME in the pages of Greenkeeper International, I hope that you will follow the trail to Harrogate and I look forward to seeing you there.

GEORGE MALCOLM
GREENKEEPER INTERNATIONAL December 1991

A message from the BIGGA Chairman

BTME
BIGGA Turf Management Exhibition and Seminar Programme 1999

John Hacker: Passing on tips from extensive and practical knowledge of golf course agronomy

construction.

Stanley Zontek is USGA Green Section Director, Mid-Atlantic Region, essentially a practical man with many years experience of greens constructed by different methods. It is said that what Stanley doesn't know about greens is not worth knowing, and he can and will provide a very practical overview of the successes and failures of greens.

Another dual presentation that promises to be hugely entertaining is the workshop on Irrigation, tutored by Robin Hume of the British Turf and Landscape Irrigation Association and aided and abetted by David Halford, Senior Lecturer in Horticultural Mechanisation at the Lancashire College of Agriculture and Horticulture.

A soil scientist, Mike Harbridge has specialised in sportsturf and golf course soils, rooting zones and drainage for the past 16 years. As Senior Soil Scientist at Myerscough College and subsequent independent consultant, he has an extensive knowledge of the practical problems associated with aging drainage and construction systems which are taken beyond their limit by heavy play.

After gaining his Diploma in Horticulture from Kew, John Hacker specialised in Applied Plant Physiology while studying in the USA. His interest in plant hormones led him to study growth regulators in turfgrass, whilst working at the University of Bath, and eventually to his becoming the Senior Sportsturf lecturer at Myerscough College. Together with Mike Harbridge, John now provides agronomy advice on the construction and maintenance of golf courses under the title banner of Professional Sportsturf Design Limited.

Dealing with green committee personnel has never been the easiest of tasks for greenkeepers, many of whom express frustration at having perfectly reasonable proposals turned down! Graham Phillips is an experienced presenter with just the answer to those frustrations, with many major companies such as Shell UK testifying to the efficacy of his presentations. Graham's interest in golf has intensified over the past years through involvement in a regional golf newspaper and his keynote speeches will reflect some of his experiences within the golf community. With a reputation for presenting lively, upbeat and enjoyably practical presentations, he will help you to identify those who constantly oppose strategies that will help in the development of the golf course.

Finally, the week at Harrogate would not have happened without the support of the many trade companies present at the Exhibition. To them BIGGA expresses its sincere thanks for backing the event which I feel sure will mark another step in BIGGA's development.

Having read about BTME in the pages of Greenkeeper International, I hope that you will follow the trail to Harrogate and I look forward to seeing you there.
Delicate watering...but it creates a splash of colour!

Wright Rain irrigation adds a hidden dimension to the appearance of any golf course. The wide choice of pop-up sprinklers providing a growing freshness to tees, fairways and greens, bringing appreciation from greenkeepers and club members alike.

We offer a total package, including sophisticated control systems, which operate automatically to suit the exact requirements of the course.

Our experts will advise on the choice of equipment, complete and commission the installation and provide full service support. Contact the address below and see how Wright Rain irrigation is designed to improve your game.

1992 will see the BIGGA Turf Management Exhibition entering its fourth year. With an established date in the industry's calendar, the Exhibition is looked forward to by exhibitors, delegates and attendees alike.

From the outset, BIGGA saw the need for full consultation and co-operation with the industry if the Exhibition was to be properly planned and successfully mounted. For the 1991 Exhibition, three Steering Committee meetings were held and a further meeting during the Exhibition assessed relevant feedback. All four meetings were well attended and proved an excellent example of BIGGA and companies within the industry working together to mutual benefit. A similar consultation process is in place for the forthcoming event.

BIGGA has much appreciated the support and enthusiasm displayed by company representatives at these meetings and a wide cross-section of the industry is currently represented on the Committee. Exhibitors may wish to note that the Committee includes representatives of Ransomes, Iseki UK Ltd., Klbota (UK) Ltd., Supaturf, Lely (UK) Ltd., Toro Irrigation Ltd., ICI Professional Products and Farmura. All members of the Steering Committee will be pleased to receive views or representations from Exhibiting Companies at any time.

Technical support/consultation is a vital area and a close working relationship has been established with both the Resort Services Department in Harrogate and the official Exhibition Contractor, Joe Manby Ltd., who are a company of national repute with the great benefit of being locally based in Harrogate. The technical support and expertise available has proved invaluable in ensuring a high standard of presentation within the Exhibition Halls. Any last minute problems experienced by Exhibitors can be attended to without delay by utilising 'in-house' resources. The Exhibitors Kit agreed by BIGGA in conjunction with Joe Manby Ltd and approved by the Steering Committee is geared to ensuring a minimum of 'red tape' for Exhibitors with advice and guidance easily accessible for those companies with queries to be resolved.

The policy from the outset of the Exhibition in 1989 has been to encourage a large European presence. In the future, the Steering Committee will be examining ways of achieving a greater European awareness and will be looking to establish links with European Greenkeeping Associations as well as seeking out local authority contacts. BIGGA now has a growing European membership and means will be sought to enable BIGGA members in Europe to promote their own Exhibition.

Internationally, the promotion of the Harrogate Exhibition is being taken on board particularly through an official BIGGA presence and stand at the Golf Course Superintendents Association of America Conference and Exhibition. All in all, the Steering Committee believes that the Exhibition has much scope for further development and looks forward with anticipation to the 1992 event.

It's not too late to book your stand space for the 1992 event - but you'll have to hurry. Contact Debbie Savage, BIGGA's Exhibition Officer, on 03473 581/2 or fax 03473-8864.
Here at Atterton & Ellis we have been making Grinders for over 100 years and although we say so ourselves, we are rather good at it and our Grinders prove it!

It is hardly surprising that during this time we have made Grinders for just about every type of cylinder on the market and for most of the prominent Grounds and Golf Clubs around the country.

In fact, in our workshops at the moment we have Express Duals ready to go to America - the Atterton is well proven on the other side of the Atlantic too!

Our customers tell us the reasons we are still in demand 100 years on - our dedication to service, the quality of build, the value for money - they all add up to the finest Grinders available today.

We have constantly changed and adapted our manufacturing techniques to combine the best of yesterday's skills with the benefits of tomorrow's technology.

But more important than all that we are first and foremost Grinding enthusiasts and are happy to talk and give advice whatever your grinding requirements.

The Atterton Master leads the field - The Express Dual a technological revolution, in-situ and separate cylinder grinding - The Anglemaster, a bottom blade grinder to complement the best in cylinder grinding machines.

Finding your way to Harrogate – by air, road, rail and ferry

BY AIR: International flights from most countries now operate to Manchester Airport which is only 1½ hours drive away or use London Heathrow and take an internal flight direct to Leeds/Bradford Airport which is only 13 miles away and 20 minutes by taxi. There are flights every weekday between London Heathrow and Leeds/Bradford Airport. Direct flights are also available from Amsterdam, Belfast, Brussels, Canada, Cardiff, Dublin, Edinburgh, Glasgow, Guernsey, Isle of Man, Jersey and Paris.

BY ROAD: Road access is convenient whether by car or coach - the motorway network incorporating the M1, M5, M6, M62 and A1 are all within easy reach of Harrogate.

BY FERRY: North Sea Ferries have regular crossings from both Rotterdam and Zeebrugge into Hull, 60 miles to the east of Harrogate.

BY RAIL: Due to Harrogate's central location it is well served by British Rail connections from all over the country including direct Intercity services from London King's Cross.

The week's main social event is to be a sumptuous Exhibition Banquet on Thursday January 23rd - and following the meal will be entertainment from Norman Collier, one of Britain's top comedians.

Norman and his wife live near Hull. For relaxation, he enjoys an occasional round of golf.

Free accommodation booking

BIGGA has again nominated Inntel as the Association's agents for accommodation booking during the 1992 Education programme and Exhibition. Please take advantage of this service: it's efficient, accommodation can be found for both exhibitors and delegates - and it's FREE!

Contact Annie Moncrieff on 0206 211106 (fax 0206 210881) for more details.

How to save time and money

Whether an exhibitor or delegate, you are urged to pre-register for the event.

Why should you bother? Quite simply, you will save time and money. A reply-paid pre-registration ticket can be found facing Page 36 of this magazine. If you complete and return this ticket to BIGGA, you will automatically be pre-registered, handed your exhibition catalogue and identification badge at the entrance and admitted to the Exhibition without charge or delay.

Otherwise, admission is by catalogue at a charge of £2.50 and you will have to await issue of your identification badge.
AROUND THE GREEN

Keeping in touch with news and comment from the regions

Section secretaries and correspondents should note that the closing date for 'Around The Green' copy is the first day of the month preceding publication - eg. copy for February issue to be received by January 1st. This means that section scribes must think ahead by at least one clear month and send relevant new copy before the appearance of the current issue. All out-of-date announcements will be rejected. Co-operation in meeting these deadlines will be much appreciated.

BUCKS, BERKS AND OXON

This column is so up-to-date I've decided to give it a title. Various ideas have been tossed around and my final choice is 'hot and fresh'. On that theme, we have another fine victory to add to our list of conquests in 1991, this time perhaps our most notable and dangerous, for we beat The Section Secretaries by 5 to 1 at Ellesborough GC on October 31st. This is something we would all like to crow about, but considering it is almost wage review time I think it's best that we just say how lucky we were and no doubt the secretaries will get their own back next year!

Thanks go to the Ellesborough staff, secretary Ken Flint, head greenkeeper Dave Childs, and Alma Cheshire for the marvellous catering. Also we thank Bob Stewart - for the secretaries - and Golf Turf Equipment for the magnificent shield donation.

Our other golf event in October was the Autumn Invitation at Sonning GC. It must be some sort of justice that over 30 greenkeepers, all of whom had been praying for rain over the past months, should get so thoroughly soaked throughout the day. Never again will I doubt The Great Greenkeeper In The Sky! Weather apart, the day was a resounding success, thanks in no small part to the sterling efforts of our section secretary, Bob Woodward, whose tireless work made this the smoothest run event we've had yet. RESULTS: 1st overall - Colin Vince and Andy Elmsly, 2nd - Phillip Slater and Paul Wakefield, 3rd - Bob Woodward and Terry Jackson. Best a.m. - John Bevan and Dennis Ellington. Best p.m. - Simon Robinson and Owen Cooper. Nearest the Pin - Alan Collis (a.m.) and Steve Craddock (p.m.). Longest Drive - Ian Pierce (a.m.) and Simon Robinson (p.m.) Special thanks to Sonning GC, especially secretary Peter Williams, Club captain Derrick Howes, who presented the prizes, and course manager Alan Collins and his staff, for an excellent day. Finally, our trade friends from Parkers, Sta-Brite, Rigby Taylor, Pattissons, County Mowers, and Maxwell Hart, with a special word of thanks to Bernie Wall, who walked round with a score card when one of 'ours' decided not to play the second round.

Just a few reminders to tidy things up, with a gentle reminder not to forget our Gentlemen's Dinner at Frilford in Feb '92. Tickets are avail-

The section held its annual Autumn Tournament over the Peebles course on September 10th, with bright sunny weather shining kindly upon us. Our thanks as always go to the captain and council of Pebbles for courtesy of the course and clubhouse facilities and to the green staff and catering personnel for their respective excellence. A total of 46 members, guests and traders entered the tournament, which was held on the 26th of September. The section held its annual Autumn Tournament on September 26th, and I hope to see many more of you at this event in the future. Details will follow in the next newsletter. My sincere good wishes to all our members for Christmas and the New Year.

BRIAN KELLY

SOUTH WALES

Our Autumn Tournament was held at Morriston GC on September 18th, with numbers down on our annual average. The reasons for this drop are many, varied and, as I am sure you all understand, are easily explained by the individuals concerned. The competition was medal play over 18 holes, with scores very 'up and down', though the winner of the Presidents Shield, Graham Cox, produced a very creditable nett score of 67. The best gross score was that of Steven Price with an 83. Second nett came Doug Donne with a 76 (on course), Gerwyn Price, also on 76, was in third place and Peter Lacey was fourth with 77.

A raffle was held to swell the coffers and resulted in Anthony Smyth winning golf balls, with Dennis Jones, Doug Donne and Henry Fry all taking away a bottle of something warming. This was followed by a lecture evening, first with Frank Chute of Modern Maintenance Products (MMP) giving a company sales presentation on lubricants, greases and fire extinguishers, complete with slides. He also touched on such items as industrial glues, adhesives and compounds that can be utilised in repairing irrigation piping.

A sales package prepared specially for greenkeepers is available, those interested should let me know.

Next came Dr Paul Wilson from Agriplan, who addressed us on the subject of Agrimaster and Agriland fertilisers, bucking up his talk with revealing tests and trials successfully carried out by the STRI.

Our annual match against the South West was held at St Pierre on October 3rd, with a tied result at three games all resulting in our retention of the trophy for another year. Our thanks to St Pierre management for courtesies received and to course manager, David Jones, and his staff for making the day so enjoyable.

Pennard GC was the venue for our seminar on October 4th, attracting greenkeepers, local authority representatives and green chairmen. A total of 80 people attended the John Deere/Power Cut jointly sponsored event, enjoying the demonstration of Power Cut machine on display and listened spell-bound to a presentation by Howard Storey of John Deere on the John Deere range and their applications.

Dr W G Rees, BSc, MA, PhD, FRCS, a soil scientist and former Head of Agricultural Chemistry at Glasgow University gave a talk entitled 'Grass Care Stems with Soul Care', with Neil Squires, BSc, closing the meeting with a talk on agronomic before chairing a question and answer session.

Our thanks to the Pennard GC committee for granting us the facility for this seminar and to their secretary for his valuable help in organising the mailing of letters to golf clubs. Additionally, thanks to Colin Murphy, Malcolm Rees and Pen-nard head greenkeeper, Colin Reilly, all of whom did sterling work behind the scenes.

Finally our congratulations to Paul Hopkins and Nigel Owens on additions to their family and we hope they are coping with the inevitable sleepless nights! Our final competition will be the Christmas thrash at Pyle and Kenfig on December 11th. We'll play for the Vitax Shield and follow with our AGM. Arrive by 9.30am please. A very merry Christmas to you all.

PHILIP SWAIN

NORTH SCOTLAND

The decision to change our 1991 lottery format, running it on the World Match Play proved to be very successful. Almost everyone played their tickets and made it the best section money spinner thus far. This is vital for the continued running of the section, providing as it does the means to keeps prices down and provide support in sending three delegates to BTME in January. For the first time since our lottery began, the major prizes were won by greenkeepers, with Robbie Allan of Hazlehead GC drawing Seve Ballesteros and winning £100 and Steven Sulli-van of Craigielaw GC drawing Nick Price for second place. Other prize winners were: 3rd (£50) M Donald, 21 Windford Rd, Mastriek, Aberdeen. 4th (£40) I Ross c/o Tain GC. Others winning £20 each were S McPherson, c/o Mathew Glog, Perth. S Hay, 4 Prunier Place, Peterhead, E Urruqhart, 4 Ness Hs., Fortrose and I Thom c/o Westhill Inn. The £10 winners were: A Low, c/o Westhill Inn, J Sweeney, Birkenhill, Elgin. Kat-rina Foster c/o Donside Paper, Aberdeen, and I Phillips, 22 Harley St. Stke.

Plans are afoot to stage a conference, similar to that of Croydon Golf Club in Aberdeen. Our hope is that it will be staged at the Dundee College of Further Education around Nov/Dec 1992, with attendance fees again being held to a very reasonable level. The committee would welcome any fresh ideas for speakers.

GORDON MOIR

NORTH EAST

The now traditional four-ball matches against our arch rivals - the East of Scotland section - took place at Goswick GC on October 8th. The result was a close affair until the very last match, with our North East team finally making it with a 3 1/2 to 2 1/2 result. Our thanks to Goswick GC, George Thompson and his staff for splendid preparations and the captain of Goswick for presenting the prizes. Finally a special thanks to Stewarts of Edinburgh for sponsoring the competition yet again. Results (S. E. players named first): G Lauder & I Johnson beat G Wood & G Thompson 2 & 1. B Wilson & G Atkinson halved with S Greenwood & W Blair. J Richardson & S Cram beat J Neilsen and R Dugan. 1 up. P Robi-son & K Rutherford lost to R Bullock & S Melville, 5 & 4. C Parkinson & R Black lost to P Bowden & A Holmes. S and G Pope & A Wright beat S Dixon & C Yeaman, 2 & 1.

JIMMY RICHARDSON

SHEFFIELD

May I apologise to section members for lack of news over the past two months. This was due to a misunderstanding over deadline dates, which I kept missing! Now this is sorted out I 28
enthusiastic Neil Whitaker, for providing the perfect ending to our golfing season on October 30th. The great attraction of playing both the Duke and Duchess courses proved irresistible to a full field of greenkeepers and was undoubtedly a most fitting season finale. Woburn was at its autumnal best, wreathed in the colourful tints that only Mother Nature can provide, and in a condition that would have brought reams of praise in the golfing press had ours been a PGA Tour event. Though we are not Tour players, we can and do appreciate such excellence and our vote is clearly stamped – NEIL WHITAKER. Casting an expert eye over both courses, one could not fail to admire the architectural excellence of the late Charles Lawrie, whose design career spanned an all-too-brief span, cut short by his untimely death at the age of 53. There is little doubt that the Duke & Duchess courses were his greatest legacies.

So another year of fixtures is over, a new committee has been elected, and I ask bowing out gracefully by taking this opportunity to thank all those who have made my spell as secretary so very enjoyable. Throughout the year we have been very well supported by so many members and traders that to thank them individually would take up too much space. I would be bound to miss someone out and rather than risk unintentional omission, I give a hearty thanks to one and all for continued support, which is much appreciated.

All that remains is for me to wish everyone a happy Christmas and to ask that you continue to support YOUR section, which belongs to you, you know.

**GEOFF SMITH**

**MIDLANDS**
The warm welcome given to us at the recent Open Day of Brockton Golf Club was much appreciated, with many Midland section members commenting on how much they enjoyed the event.

During the winter we plan to hold two lectures, in January and March, and members will be advised more fully in our new fixture list, which is due in December. May I take this opportunity of reminding you all of the all important AGM, which will take place at Gedstown Golf Club on December 16th, starting at 3pm. Please try and attend.

**DEAN CLEAVER**

**NORTH WEST**

How are things in the North West? One can only assume that there are no problems, and that everyone is happy. How do I arrive at this assumption? Simply by recalling the North West Autumn AGM, which was held at Hoylake Golf Club on October 24th, which called for our membership of 335 greenkeepers to attend. From this figure of 335 only 16 people turned up, eight of whom had never stood before so many greenkeepers before – except at the Club’s AGM, if anyone, captain, and our thanks for a grand day out.

I said I would end with a merry Christmas, so to all East Anglian section members, wherever you are, a merry Christmas.

**MICK LATHROPE**

**KENT**

It is always a great pleasure to play Knole Park, and our Autumn Tournament played there on October 5th was once again a fabulous day. I have to admit that for many years it has been one of my personal favourites. The course was
preparing the very highest order by Andy Arthur and his merry men and I hope he will pass on our thanks to the staff for their exceptional hospitality.

The morning play produced some pretty unspectacular scoring, due perhaps to the super slick putting surfaces. Our thanks to Sta-Brite and Chris Sharp for donating the new Sta-Brite shield and handsome trophy, awarded to the medal winner, John Rootes with a nett 69. John was followed closely was Steve Phillips with 70 and Malcolm Arthur with 71. The scratch prize was won by Ian Ratcliffe.

The afternoon saw a three man Texas Scramble played, with much better golf and won (not unsurprisingly by the rest of us) with a gross 67 by the Rootes, Rawlings, Stapley combination. Personally, I feel the man responsible for 'arranging' the teams has much to answer for and I am still pressing for a stawards enquiry. Why did nearly all the teams have a combined handicap of around 50, with my team on 64? A credit here to Andy Arthur and his staff who play in the Scratch event during the 30s and 40s. His list of achievements are legendary and best listed by David White, who spent an hour with Sam in totally spellbound admiration. All I can say is that it was a great scene to be at his table during dinner and to listen to his recounted tales of an illustrious golfing career.

I was delighted to read that the winner of the GCSAA Trip to New Orleans was John Atkins, he does not enjoy the best of health and fitness that we take for granted. John is not one who would wish me to elaborate, but I must add that he and his staff do a superb job at Chestfield and my artisan members, who make regular visits, always speak highly of the condition.

As Chestfield, this prompts the view that many courses in Kent are under threat of alteration and perhaps those working on the courses might elaborate on the changes. We have Chestfield and Herne Bay at threat from dual carriageways and recouring of the Thanet Way, Gillingham threatened from an Isle of Grain relief road and now Rochester and Cobham from the 'good old' Channel Tunnel Rail Link, not to mention Sittingbourne and Cobham Manor that are already making way for larger road routes - and the world of golf is damaged with the environmont! I would include Barnhurst on the casualty list after seeing the proposed alterations (desecrations) of the course, submitted to the council by a well known architect/constructor, supposedly to speed up play and 'modernise'.

Granted the course requires playing in a different order, some enlargements to tees are necessary and some reconstruction and reinstatement is required to many of the bunkers if it is to withstand the high traffic, fortunately this work was already planned, in sympathy with the established course and its environment. That stated, many Barnhurst players see the new proposals as vandalism, amounting to wiping the slate clean and starting again. To put the 'alterations' into perspective, the current nine holes are all that remain of the original 18, a ladies championship course laid out by James Braid for £12,000 in 1903. For many years it was regarded as the sister course to Royal Blackheath. Rather than being lost to tarmac and steel, Barnhurst may well be lost to bureaucracy, the quick buck and the USGA specl.

AROUND THE GREEN

SOUTH COAST

This year it was again our privilege that Jacobsen Limited, with Jenman Engineering and Vitax Home and Garden Products, provided the generous prizes for our Autumn Meeting at Hockley Golf Club. The meeting proved very successful, with 45 players battling for honours. An additional prize was donated by New Forest Garden Machinery, I have been in touch with John Millen's face when the mislaid cheque book was prepared to the very highest order by Andy Arthur and his staff do a superb job at Chestfield and my artisan members, who make regular visits, always speak highly of the condition. It was the Surrey Section's honour to host the Spring, Summer and Autumn Tournaments, went to Mick Bryant for the over-50s and Mick Leaman for the under-25s. Very many thanks to all at Garforth for extending such a warm welcome to us all.

Our lecture evenings are now underway, the first being an informative talk by Eddie Sims and his team from Par 4. A good audience attended, which included some very welcoming new young faces. Thanks to everyone for coming and I hope to see many of you again in the future. The next lecture is on January 15th - Munro's on Spraying - and a Quiz and Social Evening with colleagues from the IOG at Headingly Cricket Club on February 11th.

We are again having a trip this year – to Lloyds of Letchworth - and with many names already listed for this one, a booking now may save later disappointment. Cost about £10.

On a serious note, the misuse of a BIGGA membership card has been brought to the committee's attention. Members MUST realise that this will not be tolerated and action will be taken to stop any repetition. Please keep your cards to yourselves.

I am happy to finish with some good news – Nick Faram, long serving assistant at Baldion GC, is finally tided the knot in November. Very best wishes to Nick and Betty, and to all our members a merry Christmas.

PAUL COPSEY

SOUTHERN

I am happy to finish with some good news – Nick Faram, long serving assistant at Baldion GC, is finally tided the knot in November. Very best wishes to Nick and Betty, and to all our members a merry Christmas.

PAUL COPSEY

NORTHERN

The final golf event of 1991 was held on a blustery day at Garforth GC, the more pleasant by the appearance of two Northern section members who have been ill recently: Mick Hegarty of Cobble Hall and Garforth's very own Colin Garnett. Both looked fit and well. The contest was won by Graham Wilson, with Edwin Walsh second. In the second division Les Nelson, Graham Oxley and Mick Bryant collected prizes, with Philip Palmer and Derrick Batty victors in category three.

The Eclectic Trophies, played for our Spring, Summer and Autumn Tournaments, went to Mick Bryant for the over-50s and Mick Leaman for the under-25s. Very many thanks to all at Garforth for extending such a warm welcome to us all.

Our lecture evenings are now underway, the first being an informative talk by Eddie Sims and his team from Par 4. A good audience attended, which included some very welcoming new young faces. BOB LUPTON

SOUTH EAST REGION

(Surrey Section)

It was the Surrey Section's honour to host the 4th S.E. Region Seminar recently at Merrist Wood College, graced by the presence of BIGGA's National Chairman, George Malcolm, and Executive Director, Neil Thomas, together with splendid contributions from seven lively speakers - all of whom contributed towards an enjoyable and highly educational day, made even better by an encouragingly high turn-out of members.

The morning session concentrated mainly upon the matter of ecology and conservation, opening with a combined address given by Jonathan Adey and Desmond Hobson of Environmental Golf Services, this followed by I.G.'s Dr David Riley, who opened our eyes to the huge investment made in order that pesticides may be safely available.

This was followed by Dr Rob McGibbon, whose concern for the vanishing heathers and the importance of heather was shared by many greenkeepers. All is not lost however, for with the odd bulldozer and chainsaw the heather seed (which has been in the ground for 50 years or more) will still germinate if given the right conditions.

One good talk deserves another, and this led to the last public appearance in England for some time of our own Phil Baldock, soon to join Royal Portrush as their head greenkeeper.
Phil's talk concentrated on the practical side of conservation, and with the help of slides Phil showed the sound results achieved at Hankley Common following a calculated conservation programme over the past years.

A substantial roast luncheon followed, with Jack McMillan opening the post prandial session by telling us of his experiences in Europe, with emphasis on his recent 'French Connection'. This did not stop Jack from hopping back across the channel occasionally, expounding upon his well known views of winter play and the stress factor involved for both course and greenkeeper!

The final speaker of the day was our Executive Director, Neil Thomas, who presented a comprehensive paper on the present and possible future prospects for our Association. Stressing the need to ‘get out and generate more support’, this was seen as the way for us to capitalise on the terrific success. The simple fact that the event was a complete sell-out speaks volumes for both organisation and regional enthusiasm, each complementing the other.

The seminar closed with Chris Marden, the SE Region Chairman, thanking all speakers and sponsors and giving no small praise to those members who by their attendance had made the day successful.

The Surrey Section committee acknowledge and thank the following sponsors for their generous support, each in their way contributing to our success: CMW, Charterhouse Turf Machinery Ltd, T Parker & Sons Ltd, Ian Kerry, Huxley’s, RFE Turf Machinery Ltd, SISIS and Watermation Ltd.

Forthcoming events for 1992 include a winter lecture on Chainsaw Use and Safety, to be held at Walton Heath GC on Jan 15th, the Regional Gentlemen’s Dinner, also at Walton Heath, on March 13th and the Spring Tournament at Foxhills GC on April 29th. Finally, a most welcome return to New Zealand GC for the Cresta Cup on June 8th.

Our annual ‘knock-out’ competition for the Huxley Bowl has been concluded with a fine win (for the third time!) by Alex Armitage and Paul Weston, beating Paul Mayne and Mike Oram on the last green after 36 closely contested holes. The winners afterwards celebrated with champagne in the clubhouse of Richmond GC. May I take this opportunity to wish ALL members a merry Christmas and a happy New Year.

CLIVE OSGOOD

SOUTH WEST & WALES REGION

None can deny that the now well established annual S.W. & Wales Regional Seminar, staged recently at Cannington College and master-minded by Gordon Child, is anything but a great success. The simple fact that the event was a complete sell-out speaks volumes for both organisational ability and regional enthusiasm, each complementing the other.

The event was sponsored by Modus 'T' Systems, whose sales director must have been gratified to have such a large and captive audience to view the system machinery on display in the college grounds, and it was a Modus 'T' presentation which opened the proceedings. This was followed by an enthusiastic slide presentation - marred perhaps by a less than perfect projector more suited to a smaller and darker room - but nevertheless showing some marvellous slides of flora and fauna, with the presenter making an impassioned plea to keep the rough rough and for greenkeepers to conserve wild life. If I may make one minor comment, Allan Mitchell should qualify his plea with sound reasons, for example what might happen if the rough is cut back drastically or how one might convince a green committee of the merits of such conservational acts. After all, too much rough and dense undergrowth rapidly increases the probability of already tiresome four hour plus rounds!

Eric Shiel is thoroughly enjoying his job of promoting the Joint Golf Course Committee and the new way forward, and it is heartening to learn that golfers will have to buckle under in order that the new generation of greenkeeping specialists may be thoroughly and competently trained. That he was preaching to the converted might have seemed apparent, yet it was depressing to learn from a show of hands that only a handful had even heard of 'The Way Forward' document and even fewer had actually read it! From the floor came a comment that because of the critical comments in the document regarding archaic Club committee methods, many secretaries had seen that it was effectively suppressed, this giving food for much thought.

At his fire-eating best, Jim Arthur was to have presented an uncontroversial paper but was prompted to re-write, telling us that having been brain-washed earlier at the week-end into ~ 38
THE COLNE VALLEY GOLF COMPANY LIMITED
is seeking a top flight
GOLF COURSE MANAGER
at their wholly owned Buckinghamshire Golf Club.

This post will give the successful applicant a unique opportunity to set new standards in British Golf Course Management.

The 18 Hole Course, which is of a Parkland nature, has been designed by John Jacobs and constructed to a high specification by Southern Golf Club Co Ltd. The Club is situated 20 miles west of London in the village of Denham and will open in July 1992.

First class resources have been provided to enable the Course Manager achieve his goals in Course Maintenance and presentation. These resources include a staff of sixteen, the latest Greenkeeping and Administration hardware all housed in purpose designed and built facilities.

The Course Manager will be seen, and operate as a vital member of the Management team, (this is not a job for someone who enjoys management by club committee), and will contribute fully to the commercial and general success of the golfing facility.

Below are listed the attributes that will make you suitable for this post:

• Minimum of twelve years greenkeeping experience.
• Five years are a Course Manager/Head Greenkeeper.
• City and Guilds Golf Greenkeeping and Turf management Phases I, II and III.
• Some form of formal management training.
• Highly self motivated.
• Have an interest in staff training and the furtherence of your profession.
• Want to be or already are highly respected by your peers.
• Articulate with an even temperament.

Now that you have read this far and feel this is the job for you, then please write to the address below enclosing your detailed Career Resume.

As you are already planning your future you will also need something to live on. As this post demands a high class professional, the remuneration package will match it. Recommended rates will not form a limiting factor if you are the right person for the job.

Mr B V Morgan, Colne Valley Golf Company Ltd., Grove House, 248a Marylebone Road, London NW1 6JZ.

HEVER
GOLF CLUB
plc

HEAD GREENKEEPER

Opening in Spring 1992, Hever Golf Club is one of the finest 18 hole parkland courses in the South. The course has been built to the highest specifications in the magnificent setting of the Astor Estate adjacent to Hever Castle in Kent.

Applications for the post of Head Greenkeeper are now invited. The applicant must be of the highest calibre and have suitable qualifications and experience in every aspect of course and budget management combined with the ability to motivate and direct staff.

On-course accommodation is provided together with a negotiable package reflecting BIGGA recommendations.

Apply in writing with full C.V. to: Hever Golf Club, Hever, Kent TN8 7NG.

Business Development Executive
AMENITY AND FORAGE GRASSES

We are currently one of the UK’s fastest growing agricultural seeds distributors. Shortly, we shall be a wholly owned subsidiary of the internationally known Netherlands based plant breeders, Cebeco Zaden BV. We have exclusive distribution rights in the UK on the excellent range of their amenity and forage grasses.

There is an unusual opportunity within this lively environment for an enterprising person to develop this special part of our business. The job will demand a candidate with a good working knowledge of the turf and agricultural grass markets and an ability to quickly create an even more profitable business sector based on the present outstanding and ongoing list of varieties. The remuneration will be in line with responsibilities outlined and the skills of the appointed candidate.

Apply in writing, in the strictest confidence, giving full career details to:
Julie Taylor, Company Secretary.

SEED INNOVATIONS LTD
Commercial and Technical Centre, Barroway Drove, Downham Market, Norfolk PE38 0AR.

- ALL-WEATHER PUTTING SURFACES.
- DRIVING BAYS FOR CLUB & HOME. Complete frame and net enclosures.

Artificial sports surfaces and associated equipment for a complete range of sporting and leisure activities.

30 believing that the professionals are making overtures to eventually take over from the R&A in controlling British and European golf, he was spurred by such convictions into making an impassioned plea for the grass roots to at least be aware of the situation. He was equally passionate in condemning invidious attempts by Club professionals to take over the 'management' of golf courses, without getting their hands dirty of course, (there were a couple of vocal Club professionals/managers in the audience) suggesting that their essentially commercial interests would have dire consequences. Above all he urged greenkeepers - interspersing his comments with documented case histories of those 'warm climate' methods that had proved both disastrous and costly in our colder climate conditions - to remain ever vigilant and to learn from past mistakes and avoid repeating them. His address was loudly applauded.

It could be said that safety regulations and The Law is a subject guaranteed to be about as exciting as watching Astroturf grow, but this is never the case when the speaker is the hugely entertaining Jon Allbutt. Jon has the skill and personality to cut through the gobbledygook of official government publications and ministerial edicts, with the wit to interpret even the most tiresome of regulations and make them appear almost as interesting as The Ryder Cup. There is none finer than Jon and his warnings of the consequences, should one be tempted to flaunt the law on such diverse subjects as chainsaws and pesticides, held the audience spellbound and he quite rightly drew both loud acclamation and the bulk of questions at question time.

From the floor came one question from an eminent head greenkeeper, Ivor Scoones, which brought both wry smiles and a silence in which one could hear the proverbial pin drop. 'Why', he asked, 'since 'The Way Forward' condemns large committees and favours their abolition, does the Joint Golf Course Committee have such an indefensibly large committee?' The question remained unanswered.

EXPORT FACILITIES AVAILABLE
THREE NEW PRODUCTS FROM

'Longlife' Preseeder
It is often necessary to turf or re-seed bare patches on existing areas or where new construction is taking place. To achieve the best possible results there is now 'Longlife' Preseeder, designed specifically for use as a base dressing for the establishment of both outfield areas and fine turf.

'Longlife' STANDARD Spring and Summer
Most fertilizers in the existing 'Longlife' range described overleaf contain the unique ingredient 'Didin' which provides a controlled release of nitrogen over an extended period. There are circumstances however when the turf manager may not need all the benefits these particular products can give. 'Longlife' STANDARD products have been formulated to fill that gap. 'Longlife' STANDARD Spring and Summer is a conventional, high-quality fertilizer with the analysis 9:7:7 providing essential nutrients for good grass growth and colour response.

'Longlife' STANDARD Autumn Feed
With a 4:12:12 analysis our second STANDARD fertilizer contains the ideal balance of nutrients to strengthen the turf for the rigours of Winter use. Levels of phosphate and potash are higher to encourage harder growth and better root development.

The 'Longlife' range has been developed to give todays turf manager a choice of high quality fertilizers from which he can select those best suited to his individual requirements. To give an extra dimension to his annual fertilizer programme we are introducing three new mini-granular products, formulated to the same high standard you come to expect from ICI Professional Products.
