AQUA-VIVE

Aqua-Vive Biological Water Clarifiers “Are your water hazards really hazardous?” Prevent algae bloom: remove surface scum: get rid of suspended solids and bottom sludge. Eliminate odours. All these by applying only one product: Aqua-Vive. A natural biological process for converting organic wastes into water and harmless, odourless gasses. Completely safe for humans, animals, birds, fish, aquatic life, plants, and the environment. Takes minutes to apply using water soluble sachets directly into the body of water.

The golfers also play their part and are becoming used to using divot boxes. Regulars notice the speed with which the Fortiva seed works. “I have even had members asking where they can get hold of “that green seed” for their own lawns,” says Mick. For further information and details of your nearest distributor, contact

FORTIVA

APPLIED SEED TECHNOLOGY

SEE US ON STAND D99 AT BSENE

Moulded out of intractable London clay, Muswell Hill GC currently suffers from tees that are far too small to cope. “After rain, they become very greasy,” explains head greenkeeper, Mick Sherins. “Any re-seed doesn’t stand a chance, and can be lost if we cut too early.”

Last spring though, Mick was persuaded to try some Fortiva treated seed by Kings Horticulture. He found it gave him the time needed to keep tees in good shape and playable. “It is very fast to germinate, establishes within 10 days and quickly knits-in. We find we can cut it three times a week without the fear of mowing out.

“Fortiva also allows us to bring into play areas on some tees that have not been used for years knowing they will recover quickly once re-seeded.”

The golfers also play their part and are becoming used to using divot boxes. Regulars notice the speed with which the Fortiva seed works. “I have even had members asking where they can get hold of “that green seed” for their own lawns,” says Mick. Barrus will be exhibiting the new VICTA two in one 160ci 2 stroke Mulch or Catch. With its unique four winged blade, it directs cut grass into the centre of the mulching charger. Also on display will be the new Bluebird Turf Cutter with unique 4 wheel drive allowing excellent manoeuvrability. Easily operable, with two cutting speeds, and a low centre of gravity for greater stability. Barrus will show the new Bluebird Lawn Seeder with its amazing 'slice and insert' technology for seeding and the mighty 3 cylinder Yanmar LD18 Grass Tractor, with 48" cutter deck and optional clam or three big grass collectors.

Better Methods are showing their range of popular turf care hand tools and equipment for the maintenance of fine turf. Special tools for golf courses include the famous Tufemaster Golf Hole Cutter, the official USGA Stimp Meter for measuring and regulating green speeds plus levels, turf repair tools, samplers, the Bray Seed Sifter, dew switches etc. Accessories include tee markers, bunker rakes, signs, golf ball washers, barrier chains and posts, white lining strip etc. The innovative FMW weather suit provides some new varieties and mixtures. Barcrown, the superior slender creeping red fescue will be sporting its new record breaking score of 9 in the shoot density category. Barcrown has proved second to none for close-mown and low-maintenance use, such as lawns, golf fairways and landscaping. Making its debut at the show will be Baroxi, a new chewings fescue, suitable for fairways. All these cultivars are exclusively available in the BAR range of amenity grass seed mixtures.

Information on a major industry initiative awaits the visitor to the Blazon stand at this year's BTME. BIGGA and manufacturers of Blazon have cooperated to provide head greenkeepers with a valuable spraying aid specifically designed to promote safer more effective spraying. In addition to learning how to obtain a free spray management aid, visitors will receive information on other promotions and how they can win for their club a brand new Hardi spraying machine or one of ten Cooper Pegler Series 2000 knapsacks. Blazon, since its launch in 1990 has established itself as the undisputed first choice spray pattern indicator. When added to the spray solution Blazon provides greenkeepers and groundsmen with a simple, inexpensive answer to the effective, efficient and economical application of sprays onto turf and landscaped surfaces.

Tel: 01747 852771, Fax: 01747 850266
Contact: David Smart
Biosseed Probiotic products have been developed to provide turf managers with the ability to supply the precise nutritional requirements of both soil micro biological systems and healthy plant growth. Examples of Biosseed's unique soil and tissue testing service and products will be on display. Sustane has made a major commitment to integrated turf management and the research required to support it. Years of test data clearly show that regular applications of Sustane fertilisers/soil builders add the humus and benefi-
cial soil microbes required to increase a soil's nutrient and water holding capacity, caution exchange capacity, nutrient availability and microbial activity. Research has also proven that Sustane increases disease suppression, improves microbial activity. Research has also proven that Sustane increases disease suppression, improves turfgrass quality and colour.

how hard is your bunker?

Perma-Soil Stabiliser

Perma-Soil stabiliser is a proven soil additive that dries, strengthens, and bonds soil into usable backfill. It minimises subsidence of restored excavations and potholes. It can even hold utility poles in position. Perma-Soil stabiliser increases strength 3 to 16 times more than untreated soil, while retaining original size and shape. Use it for a wide variety of applications to save both time and money.

How can Perma-Soil Stabiliser help you?

Waterline breaks turns wet soil into usable backfill within minutes. Trenches and excavations - minimises settling of backfill.

How is Perma-Soil Stabiliser applied?

As soil is excavated, add Perma-Soil stabiliser to the backfill. While your crew makes repairs, your backhoe operator can turn the backfill to mix properly. Place the mixture back into the hole in 6-to 8-inch layers, tamping each layer as you go.

Perma-Soil is environmentally friendly

Environmentally friendly construction aid which is totally harmless to man, flora and fauna.

The English Golf Union are the Governing Body for Men’s Amateur Golf in England with responsibilities for membership, tournaments, handicapping, golf development, golf course management and administration on behalf of its 1820 affiliated clubs. The Golf Development Department remains active in assisting potential developers and local authorities with guidance on the many aspects of this increasingly more involved subject. The Golf Course Committee, formulate the best existing clubs with the management and presentation of their courses, continue to provide sound advice on agronomic and environmental management policies through their continuing series of workshop seminars.

ERIC HUNTER GRINDERS LTD Stand No. C29
Hobson Industrial Estate, Burnipool, Newcastle upon Tyne NE16 6EB
Tel: 01207 270316, Fax: 01207 270312
Contact: Eric and Michael Hunter
Hunter Grinders will be demonstrating their Jupiter and June precision mower grinding machines which are proving popular with golf courses anxious to save maintenance costs and improve grass cutting standards. Hunter machines are market leaders in the technique of accurate ‘relief angle’ grinding cutting reels. This method of grinding has become widely recognised for improving the performance of grass cutting machinery and by reducing friction, takes the load from engines and transmissions. Bed knives last 3-4 four times longer with longer intervals between adjustment and it eliminates the ‘tram-lining’ or ‘striping’ syndrome associated with tightly set blades and dry weather. Hunter machines grind reeds and bed knives accurately on the same machine eliminating the need for a separate bottom blade grinder. They are also water cooled to suppress dust and over all handling. The majority of machines can also be ground ‘in-situ’ if required. A visit to Hunter’s stand would certainly be interesting, educational, save money and could give the greenkeepers more job satisfaction.

ETESIA UK LTD Stand No. B52
Unit 12 Hiron Way, Budbrooke Industrial Estate, Warwickshire. CV34 5WP
Tel: 01926 403319, Fax: 01926 403323
Contact: Robin Taylor
Now at BTME the Attila 80 ride-on brushcutter tackles the roughest areas including gentle slopes and keeps vegetation under control. When it comes to wild flower areas, woodland paths and infrequently mown sites on golf courses, there is nothing to beat an Etesia mower. Etesia’s Hydro 100 cuts and collects all types of grass, long or short, wet or dry. In autumn they are ideal for leaf collection. Fitted with a brush they will keep car parks and paths tidy. Amongst Etesia’s Viva and Pro ranges of pedestrian rotary mowers there is a model suitable for all types of terrain and conditions.

Stone Hill, Egerton, Ashford, Kent, TN27 9DU
Tel: 01233 756241, Fax: 01233 756419
Contact: Lynette Harmer
FARMURA. We are delighted to introduce the New Model CM354. This 35 hp rotary mower has been designed to cut a large area of turf, yet large enough to make a single pass. FARMURA are well respected throughout the industry and their reputation is well deserved. We are confident that FARMURA will continue to thrive in this competitive market.

FLOTRONEX PSI LTD
Stand No. D24
Begowienweg 33, Hamburg 22047, Germany
Tel: 06962390, Fax: 69692391
Contact: Martin Goulding
Flotronex PSI Ltd, the golf industry's largest manufacturer of prefabricated pumping systems, combines the finest craftsmanship with the latest technology in producing the new standard in irrigation pumping systems. Whether you need a conventional system or the energy efficiency of Variable Frequency Drive (VFD), vertical turbine or horizontal centrifugal. Flotronex PSI Ltd provides the most reliable and cost-effective system available. Flotronex PSI Ltd has recently introduced the EF Series fixed speed pumping systems. The EF Series systems are specifically designed for the smaller flowrate turfgrass irrigation market. The EF Series uses a conventional control configuration and vertical in line fixed speed pumps to provide smooth, efficient and economical operation.

FORCE LIMAGRIN LTD FORTIVA
Stand No. D29
The Old School, Fen Drayton, Cambridge CB4 5JJ
Tel: 01954 232020, Fax:01954 232270
Contact: Simon Mitchell
A new and unique concept of applied seed technology that provides fast, better, greener establishments. Fortiva was introduced as a cost-effective means of ensuring good establishment and rapid return to ideal playing conditions. Especially when renovation time is short or high levels of disease are expected. Fortiva produces more grass in a shorter time and even when the seedbeds and drainage are poor, Fortiva buys time for the turf manager.

GARFITS INTERNATIONAL LTD

On Stand C42 this is more evident with the products on display for golf course and local authority markets. Launched at SALTEX, the new Triple Turf Mower the LT324 featuring a 4 wheel drive “on demand” system, will make its first visit to golf course and local authority markets. Launched at SALTEX, the new Triple Turf Mower the LT324 featuring a 4 wheel drive “on demand” system, will make its first visit to golf course and local authority markets.

CHEMICALS LTD
Stand No. C27
50A Market Place, Thirsk, North Yorkshire Tel: 01845 523133, Fax: 01845 523133
Contact: Paul Huxley
This unique approach to the process of aerating the rootzone and not just the symptoms, of poor water quality. New Otterbine products for 1997 include the Tri-Star floating fountain/aerator and Otter Clear, which complements aeration and bio-augmentation, a process of introducing bacteria which improves water clarity, reduces pH and removes sludge from the pond bottom.

HULKEYS GRASS MACHINERY LTD
Stand No. A32
The Bear, New Alresford, Hampshire Tel: 01962 733222, Fax: 01962 734702
Contact: Paul Huxley
New from Hulkeys are the Soil Reliever Junior deep time aerator and Groundforce 104 off-road transport vehicle. The 48" Soil Reliever Junior is a heavy duty machine for smaller tractors, and can aerate to 12" depth. Faster than competitors, it’s ideal for greens and small to medium size areas. The Groundforce 104 has a 1500 lb payload capacity, automotive type transaxle, excellent traction and rugged construction. A low cost, economical “working vehicle”. The Grasskeeper Greens Brush is used by golf courses throughout Britain for integrating top-dressings quickly and effectively, and to help produce faster, more even putting surfaces. Huxleys also manufacture and sell a wide range of grass maintenance machinery.

THE HYDROSCAPE GROUP
Stand No. C26
Water House, 10 Carvers Industrial Estate, Southampton Road, Ringwood, Hampshire, BH24 1JS Tel: 01425 472380
Contact: Graeme Francis
The Otterbine range of water aeration equipment and floating fountain are being used increasingly on golf courses around the country. The range, distributed in the UK solely through The Hydroscape Group, is particularly geared to oxygenating and circulating water and has proven to be the most cost effective long term way in which to tackle the causes, and not just the symptoms, of poor water quality. New Otterbine products for 1997 include the Tri-Star floating fountain/aerator and Otter Clear, which complements aeration and bio-augmentation, a process of introducing bacteria which improves water clarity, reduces pH and removes sludge from the pond bottom.

Our newly-developed top quality grass variety is particularly suited to close mowing to give you the leading edge in preparing golf greens, tees, bowling greens and ornamental lawns.

New Mocassin, a slender creeping red fescue, gives superb disease resistance and high shoot density for a close-knit, even-textured turf which leads to a true run of the ball.

As part of our MM10 mixture, it offers fresh opportunities for variations in greens mixtures adding resilience to the turf.

For free technical advice on how you can take the lead with new Mocassin and our MM10 mixture, or for your nearest distributor, call the Mommersteeg Main Line on 01480 459500.
Walk this way

...don't miss anything in the SHOW of the year!

Johnsons staff will be available to give technical advice about grasses used in golf course maintenance and construction. From the finest green to the most environmentally sensitive wild flower area, our position as a major seed producer and plant breeder enables us to provide, not only the full range of varieties needed, but also the expertise and service that professional users should receive. Detailed technical literature will be available so please come and see us in Hall A, stand 20.

MAXICROP INTERNATIONAL LTD
Stand No. C25
Weldon Road, Corby, Northants NN17 5US
Tel: 01536 402182, Fax: 01536 204254
Contact: David Evans
New research has shown that Maxicrop Bio-stimulants increase soil microbe activity around plant roots, which in turn act to exclude disease and improve early nutrient uptake, ensuring strong, early grass growth. At the same time, leaf chlorophyll levels are increased, boosting the photosynthetic process, leading to hardy plant growth. Ask us about turf management programme which gets the best results from bio-stimulants.

MOMMERSTEEG INTERNATIONAL
Stand No. C4
Spitfire Close, Emme Business Park, Huntingdon PE18 6GY
Tel: 01480 459500, Fax: 01480 459990
Contact: Phil Davies
A comprehensive line-up of grass seed varieties and mixtures to suit every greenkeepers need awaits visitors to the Mommersteeg International stand. The display features Mocassin a highly-rated slender creeping red fescue in STRI trials. Mocassin has been included for the first time in two specialist mixtures for the golf course – MM12 a mixture for tees and fairways and MM13 a fine fescue mixture for tees and fairways without smooth stalked meadow grass. Also featured will be the Mommersteeg biological seed treatment – Improved Headstart. The reformulated seed treatment is used on all Mommersteeg MM mixtures and ensures better root and shoot development, greater water absorption and improved photosynthesis.

MOORE UNI-DRILL LTD
Stand No. 820
33 Kirk Road, Ballymoney, Co Antrim, Northern Ireland, BT53 6PP
Tel: 01265 65696, Fax: 012656 64444
Contact: Sam Moore
'Moore Sportsfield Drill 1.2M.' The drill can follow ground contours accurately and plant seeds at a constant depth in its own prepared mini seedbed. Seeds planted at 12mm give an excellent rooting structure, which holds the grass sward together better than shallow planted seeds which tend to be more easily scuffed off. To obtain a hard wearing playing surface, the drill should be used at regular intervals. Root pruning helps to develop and strengthen the root structure thus giving a much improved playing surface. Fairways on Golf Courses should be seeded every Autumn. Root pruning which relieves surface compaction and aerates the soil, simulates root growth and encourages the existing native grasses to grow between rows.

MULTI-CORE AERATORS LIMITED
Stand No. B13
6 Chestnut End, Beson Spa, Wetherby, West Yorkshire, LS23 6JG
Tel/Fax: 01937 843281
Contact: Katharine Waddington
Designed and manufactured in the UK and to be launched at the BTME show by Multi Core Aerator Ltd will be the new MC15 tractor mounted aerator. Both the MC10 and MC15 models now feature a one piece steel floor plan for added strength and rigidity. Larger bearings, stronger tine arms, fully sealed flexible link units and a fully floating turf holder have now been incorporated. Lower hitch points and a larger roller allow for greater ground clearance and easier coupling to the tractor. Both the MC10 and MC15 are CE marked and this assures the customer that they comply fully with current EU health and safety laws. Both machines are supplied as standard with 61mm spacing heads, mini tine heads, one set of 13mm hollow tines, one set of 9.5mm mini solid tines, turf holders, parking stands, core windrow assembly and power take off shaft.

MYERSCOUGH COLLEGE

NEW HOLLAND UK LTD

Cranes Farm Road, Basildon, Essex
Tel: 01268 292590, Fax: 01268 292597

New Holland Series 20 tractors are renowned for their strength and durability which is achieved through their robust construction. With engine and transmission forming the main chassis structure, Series 20 models combine outstanding hydraulic performance with superb handling characteristics. CM commercial mowers have a specification which includes automatic 4WD engagement and a hydraulic deck weight transfer system for improved traction. For mowing in confined areas, GT mowers with their three cylinder diesel engines, are available with 48" side or rear discharge decks. High torque reserves are a feature of the two diesel engines used in the new Series 35 multi purpose and micro tractors. With hp levels from 45 to 95, these tractors offer a specification to suit most applications.

NORTH STAFFS IRRIGATION COMPANY

Spanning six continents and touching more than...
The college also offers sandwich placement at an extensive greenkeeper training in the UK. The college has:

Tel: 01270 625131, Fax: 01270 6255665
Contact: D. Mortram/B Cope

Reaseheath College is at the cutting edge of innovation and precision greens mowers - the E-Plex, the Greensplex and the Hawk – powered by a 46.5hp turbocharged diesel engine. Also being exhibited at BTME '97 is the 160 and the walk behind Greens Super.

Envirojet turf grass injection system, the Hawk features a 70ltr tank and 1000lpm injection rate, a field sprayer that can immediately inject surfactant and insecticide into the grass. It can also be used for pre-emergent, post-emergent and desiccant applications. The Hawk is ideal for spraying golf greens and is manufactured in the UK.

Ransomes engineers have made a major investment in the development of new products, and there will be further interesting introductions at BTME 1997 under the "Advanced Technology Products" banner. In addition, there will be technical advice from supporting manufacturers, competitions and special show offers to make your visit to our stand at Harrogate entertaining, informative and profitable.

Rofey Brothers Ltd announce Britain's best ever choice of greens turf. Two top quality blends – Advantage – independently tested by the STRI and Minster – produced from 80% Barelone or Barwell (Bare) and 20% Bardot (Bardot), are available throughout the UK. Contact: Paul Seward
Specialising in turf compaction Seward is the first company in the UK to operate the vertidrain and now has available two 2.5m fairway and two 1.5-1.45 greens mowers. Seward’s have now added their own developed sand and gravel sifting machine to their range for both sale and hire marketed under the Jenison Agyn Bander trade name. Overseeding is carried out with various types of drills, stone burying, hollow tining, fairway grooming with a collector is also available. Top dressing is carried out with a 1 and 4 ton spreader. We are also distributors for Force Laminagrass Fortiagrass seeds, fertilisers and top dressing.

SHARPS INTERNATIONAL
Stand No. B26
Seaford, Lincs, NG4 7HA
Tel: 01529 340511, Fax: 01529 413928
Contact: Ian Backhouse
Sharps International are highlighting four new varieties of perennial ryegrass which have been added to the 1997 STRI list. The varieties are Bleeveur, Brightstar, Fancy and Repe. Bleeveur is fine leaved and scores highly for shoot density. Its growth pattern will make the variety useful in low maintenance conditions. Brightstar, which originates from the USA, will perform well in mixtures where wear and appearance are important. Fancy and Repe are both mid-table varieties which give a good performance for those whom economy is a key consideration. Technical staff will be available to discuss these and other varieties in more detail.

SHELTON TRENCHING & SYSTEMS LTD
Stand No. C46
Fir Tree Farm, Darfield, Barnsley S73 9JB
Tel: 01226 751762, Fax: 01226 755481

More new innovative products and services from Supaturf. At Harrogate 1997 Supaturf will have their biggest stand yet and will be launching new innovative products such as Aqua-Pro, a new technology wetting agent. Aqua-Pro complete Supaturf's range of soil surfactants offering all the new technology benefits of not needing to water in and guaranteed not to burn, all at an attractive price. The new even-spray sprayer will be launched offering a compact and highly effective electric sprayer and the award winning clean carbon will be demonstrated. The new "Supaturf On-Line" service will be demonstrated, offering greenkeepers access to information and technical advice 24 hours a day, 7 days a week. Another innovative year for Supaturf.

Toro will be showing the new Reelmaster 2600-D Precision Cut, all purpose triplex mower with a wide 85” cut for highly productive performance and featuring Toro’s unique l-1-R-K-5 cutting unit suspension system. Also on show will be the new Greensmaster 1600, Toro’s latest walk behind addition to the market. Leading Greens-mower Series, with a wide 26” cut for high productivity on fine turf. Two important new attachments for the popular ride on Greensmas-ser 3200-B first shown at last year’s BTME will be a grooming and thatching unit.

TOTRAX LIMITED
Stand No. C18
Rectory Farm, Langrick, Boston, Lincs, PE22 7AD
Tel: 01205 280518, Fax: 01205 280520
We specialise in tyres for turf care management, with a view to helping greenkeepers, park keep- ers and contractors keeping their machine rolling. We have expert advise on hand to discuss tyre replacement, alternative tyre, reduction of footprint, increase flotation, or any specific customer requirements. We have on display a small sample of our wide range of tyres, tubes and wheels, with tread patterns to suit most requirements. Also on view is the 15 x 15 pm tyre fitting machine, designed to meet the needs of turf and ATV users, making both removal and fitting of tyres a much easier task. Demonstrations can be arranged.

TURF-ACTANT PRODUCTS
Stand No. C7
8 Lucas Road, Sudbury, Suffolk, CO10 6WR

Would you like to have the country’s top agrono-mists visit your course every month completely free of charge? Then why not take out a free subscrip-tion to Turf Management magazine. Every month, Turf Management gives you practical advice from the country’s top sports turf consult-ants, such as Jim Arthur and George Shiel. Turf Management is completely free but you do need to come to the stand to register to receive it. You’ll also be able to take advantage of a special cut-price subscription offer for Horticulture Week, the UK’s best-read weekly for contractors and growers and to sign up for a free subscription to Amenity Management, the essential buyer’s guide to landscape equipment and products.

Undergear offer what is probably the most compre-hensive range of turfcare tyres in the world. In addition to being sole UK distributor for Goodyear Tera Tyres, Undergear are distributors for Trelleborg, Bridgestone, Carlisle and Continental tyres. Undergear developed their own ‘Golf’ design tyre specially for the preparation of the Ryder Cup course at the Belfry. This tyre is now working on courses all over the UK and is also exported to many countries. Undergear can supply tyres for most machines and with their own wheel-making facility offer complete tyres and wheel units to the customer’s individual requirements.

The college in Wales offering the complete NVQ/GTC packages (Levels 1-4). This year three students achieved their NVQ Level 4 GTC certifi-cates in Course Management. The Home study course had yet again students achieving Level 2, this course is still proving a market leader for those unable to attend college via the traditional route. The college has embarked on an expan-sion project of its golf course facilities with the support of the liaison panel, R&A, the local Tec and the trade. The greenkeepers of Wales can look forward to training with confidence and optimism as the College seeks to expand to meet the challenges of the future.
