Aged 22, expecting a 2:1 honours degree in 'Finance with Business Systems'. I have 8 months Greenkeeping experience, working individually and as a team. Available from June I would like to pursue a career in Greenkeeping, preferring to work in the 'home counties' at a course that offers appropriate training.

JS/74/98

Practical Greenkeeping by Jim Arthur

No one knows more about golf greenkeeping than Jim Arthur, who with a career spanning six decades has given priceless guidance and advice to over 750 golf clubs throughout the UK, and Europe, while also acting as consultant to the R&A, the European Tour, and a number of golf course committees. Practical Greenkeeping is a must for all course managers because it covers every aspect of greenkeeping, providing practical advice on the care and maintenance of putting greens and the preparation of all playing areas. It is the most complete guide to greens maintenance ever published.
