Malcolm's course is a Temple

Everyone at Temple wants me to thank BIGGA, the Judges and especially the Sponsors for running the Environment Award Competition. It has created a lot of interest and we have been contacted by a number of clubs, not only with their congratulations but also for information and assistance.

I sincerely believe this is the way forward for golf. Natural management not only helps the environment but returns golf courses to the conditions which is ideal for playing traditional British golf.

We and the Award have featured on national and local radio, local papers and even the glossy national golf press. This must be good for the game of golf.

While I am writing, please pass on an invitation to Jim Hillier (Letter from America – December issue) to visit and play Temple. He will certainly be able to play the course in February, as we are open 365 days a year! We are a Willie Park Jr designed course, opened in 1910 and I hope this will be traditional enough for him. I'm not sure if Martin Gunn, our Course Manager, would consider our maintenance practices “old fashioned” but they would certainly be approved of by Jim Arthur.

I Need to say more?

Over the years Martin and I have been shown great courtesy and more important, given valuable time by Course Managers and Head Greenkeepers around the British Isle and it would be a pleasure to return some of this hospitality to someone who obviously appreciates traditional British standards of Golf Course Management.

Malcolm Peake, Temple Golf Club, Berkshire

Suni thanks

The two days I spent at BIGGA for the Toro Awards were very informative and a great experience.

The standard of the finalists was very high and I felt every one of us should have won. How the judges decided on a winner must be extremely difficult.

I would like to thank Toro for their tremendous support towards our education system and BIGGA for promoting the image of the greenkeeper, as I feel we still do not command the respect we deserve from the golfing fraternity.

Brian Turner, Sunningdale Golf Club, Berkshire

The Turner prize

I was so pleased to hear that Brian Turner had been given the Toro Excellence in Greenkeeping Award. I have known Brian for more years than I care to remember having been in the same trade since my retirement last January.

Brian has always been a good advertisement for greenkeeping with his golf courses being kept to the highest standards.

I am sure he would be the first to admit that being a very good golfer to boot has helped considerably in his greenkeeping career.

My congratulations to him. It’s well deserved.

John Nudds, Hunstanton Golf Club, Norfolk

Communication the key to a good course

In preparation of my dissertation in golf course architecture and my seminar for the BTME 2000 entitled 'Is the grass really greener on the other side', I carried out a survey among British and American Course Managers in order to draw a realistic comparison between course conditions and maintenance standards on both sides of the Atlantic. From the beginning of my career in golf course architecture, I was guided by the words of Robert Trent Jones who said that 'We can build the greatest golf courses in the world, but if they are not properly maintained, they are nothing.' I am convinced that appearance and performance of golf courses are products of the degree of collaboration between golf architects and superintendents. It is therefore vital for both professions to understand each other's principles, skills and limits.

Too many golf courses have been designed and built without any regard to the needs of the maintenance staff. This has resulted in conditions, and resulting problems. There is no doubt that massive budgets, high staffing levels and modern machinery everywhere can be maintained. On most golf courses however the maintenance budget is limited. Architects and superintendents shall therefore communicate whenever possible in order to broaden their professional views. I think that communication forms the foundation for optimum results of a project. Exchange of knowledge and experience will improve conditions for course maintenance and lead to golf courses with a high aesthetic and playing value.

It was a pleasure to realise that this subject is an interesting issue for both golf course architects and superintendents. The fact that 53 out of 80 British Head Greenkeepers have responded and filled out my extensive survey is very encouraging. I was sent wonderful letters and extra information, material and photographs of their golf courses. The response exceeded my expectations by far.

I am very touched and grateful for the friendly and generous help of the Head Greenkeepers, Course Managers and Superintendents, and I hope that we will meet at BTME 2000 in Harrogate.

Bettina Schrickel, Design Associate at GOLFPPLAN, The Ronald Fream Design Group Ltd, California & Germany
