Free the Titleist One?

Last month saw a great deal of news print devoted to one John Collinson. Does the name ring a bell? Well he is the guy who was jailed for three months for gathering thousands of golf balls from golf club lakes up and down the country.

His case was highlighted as one of these situations where this country gets things so wrong. How could lakes up and down the country have been so poorly managed that the golf clubs were forced to hire a guy who collects lost golf balls be sent to prison while so many more heinous crimes go unpunished?

The fact that he declared his earnings to the Tax Authority was highlighted as one of the legitimate business and that Mr Collinson was a legitimate businessman. There were radio phone-ins devoted to the case while a website ran a poll which found 90% of those who registered wanting him to be released. From memory even the Prime Minister got involved.

By the end he was being seen as a sort of Robin Hood figure providing lake balls for the poor impoverished golfers at the expense of the wealthy ball manufacturers.

Well, in the end such as the weight of opinion the Titleist one was released and justice was seen to be done.

But what did you think?

I must admit, without seeing all the facts, I did feel the sentence was a bit steep but that he did deserve punishment. He was going into golf clubs in the dead of night without permission from the clubs and taking balls that may have been declared lost, but were certainly not his property.

In cases just one of the crimes he committed and the fact that he was seen to be making such a decent living from his chosen career might well encourage others to take the same action and our golf courses could end up busier in the middle of the night than they are during the day. Where would that leave us?

With so many ecology and environmental projects being carried out on our courses the last thing we want is rubber clad, flipper wearing ball collectors damaging our flora and scaring our fauna, never mind our greens and bunkers.

And another thing...

What would you think if you arrived at the course early one morning to find a submerged body tangled up in weeds at the bottom of one of your lakes? I'd say that would be quite traumatic, and with the diving going on in the middle of the night together with the levels of stealth required it is not out with the realms of possibility.

Yes, perhaps Mr Collinson didn’t deserve his prison sentence but he certainly isn’t an innocent party in the whole affair.

This is the final magazine to be designed by David Emery who is leaving the Association to further his design career with another company. David has worked on every magazine since February ’98 and done much to ensure a professional look to the rest of the Association’s literature. I’d like to wish him well for the future and thank him for his outstanding work over the last four years.

The Greenkeepers Training Committee (GTC) is smoothing the path to the introduction of revised Sports Turf vocational qualifications in July National Vocational Qualifications and Scottish Vocational Qualifications in golf greenkeeping and ground maintenance are being updated to take in the latest advances in technology in the amenity horticulture world. The GTC has taken a lead role in this in collaboration with the two Awarding Bodies, City and Guilds and the Scottish Qualifications Authority. A network of training providers guide students to the qualifications and it is essential that these providers all work to the same standards. The GTC has therefore been encouraging the Awarding Bodies to develop standard documentation covering the learning programme.

The GTC’s Education Director David Golding said: “The GTC is committed to setting high and common standards in the UK and Ireland. This is why we have been at the forefront in setting out the knowledge and practical standards for the revised NVQs and SVQs.”

The GTC is golf’s independent advisory service for both employers and employees with regard to greenkeeper education, training, and qualifications. It aims to persuade employers of the necessity for learning and acquiring new skills throughout life and encourage more people to get the qualifications they need for working.

Chipping Norton GC wins first Deere qualifier

A four man team from Chipping Norton Golf Club is heading for the famous Bhaubazone course at The Belfry, having won the first British regional qualifier in the inaugural 2002 John Deere Team Championship golf tournament.

The team - consisting of Club Secretary Simon Chislett, Club Captain/Chairman, John Willis, Greenkeeper, Steve Doyle, and Club Professional, Neil Rowlands - beat off the challenge of 14 other teams in the competition, which was organised by Peter Helps, Manager of John Deere dealer Turner Groundscare of Bedlow, Aylesbury in Buckinghamshire.

He was assisted on the day by John Deer representative Henry Bredin and BIGGA’s Midlands Regional Administrator Peter Larter. The winners finished on 20 under, two shots clear of the field.

“We’ve run a great many tournaments here, but never one quite like this, or with teams made up in this way,” said Club Secretary Simon Chislett. “It was a long and nervous wait to see who won, as we teed off first, but it was worth it - and I have to say, we’d happily host the competition again! We’re all looking forward to playing at The Belfry, but there won’t be any advantage for us this time as none of the amateurs have played it before.”

Now in its 16th year, the John Deere Team Championship has traditionally been open only to teams from the USA and Canada. Last year invitations were extend to Germany and Australia, and this year teams from Great Britain and Ireland are also included. After the national final at The Belfry, two winning teams - one from Great Britain and one from Ireland - will travel to the USA with the chance to be crowned John Deere World Team Champions 2002.

John Deere Limited is also making a donation of £25 for every British and Irish team entered, to support the educational activities of BIGGA (British & International Golf Greenkeepers Association) and GCSAI (Golf Course Superintendents Association of Ireland).

Twenty years of success for Charterhouse

Charterhouse Turf Machinery recently celebrated 20 years of supplying equipment for greenkeeping and grounds maintenance tasks. The company is best known for the Verti-Drain range of deep aerators, the 115mm Redemix of Holland. This product revolutionised turf management when it was introduced to the UK in the early 1980s.

Charterhouse subsequently expanded into emergent niche markets, with ranges such as overseeders, scarifiers, corers, core collectors and pedestrian turf aerators. The company also diversified into consumer-oriented products, including DR wheel trimmers and brushcutters. In 1999, Charterhouse bought the Michael Richmond Ltd business, specialising in the supply of arboricultural and cultural and forestry equipment, broadening its market reach still further.

More recently, Charterhouse added the Antonio Carraro’s ‘super-compact’ tractors and the Rogers Windfoil shrouded boom sprayers. To mark their 20th anniversary, Charterhouse recently held a special dinner attended by past and present employees. A special feature was a commemorative cake baked by Secretary Barbara Jarman.

“Having identified the turf equipment market as a specialist niche market, we diversified into quality products, Charterhouse quickly became recognised as experts in our field,” says Philip Throop, a founder of the company. “Our ongoing flexibility has enabled us to develop the business to meet trends in new and existing markets, and we can look forward with confidence and excitement to the next 20 and beyond.”
English Golf on course with Nature

Golf clubs across England stand to benefit from free environmental management advice thanks to an innovative scheme to be launched this summer.

The English Golf Union and the government's adviser, English Nature, have provided joint funding for this new scheme, to be delivered by STRI, the golf industry's independent advisory and research specialists.

An additional ecologist will be employed to work under the guidance of Bob Taylor, STRI's Senior Ecologist, now well established in golf course ecology circles. Over the next two months details of the scheme with an application form will be sent to all English Golf Union affiliated clubs. In July STRI will begin visits up to 70 golf clubs assigned by representatives from EGU and English Nature from applications received by 28 June. This service is specifically designed for golf clubs who have little or no ecological or environmental input, to raise awareness of ecological issues relating to their golf courses. An STRI ecologist will spend a day walking each course with greenkeeping staff and club officials before preparing a detailed report offering professional environmental management advice.

Participating clubs will benefit from ongoing support from STRI for an 18 month period. At the end of which they will receive a free follow-up visit to assess progress and, hopefully, a certificate to acknowledge their environmental commitment and showcase wildlife gain.

Applications unsuccessful in the first year of the project will automatically be carried over to the following year for consideration, alongside opportunities for new applicants. A series of joint newsletters will be published, and circulated by STRI, to follow the progress of clubs taking part in the scheme.

The joint funding for this free service will also extend to offering support to all EGU affiliated clubs through telephone and written advice from STRI. A series of advisory leaflets providing conservation advice on issues ranging from pesticides to management of the rough will be made available free of charge.

This three-year project heralds a new era of co-operation between golf clubs and conservationists, and is the culmination of a series of meetings between the EGU, English Nature and the STRI over the last two years.

English Nature's Chief Scientist, Dr Keith Duff, himself a keen golfer, said: "Golf courses, contrary to popular belief, can provide vital green corridors and oases for wildlife amongst an ever encroaching tide of developed land and monocultured farmland. Often relatively minor changes to course management can deliver huge benefits to wildlife and we're delighted to co-fund this ground breaking scheme to provide free tailored expert environmental advice to golf clubs throughout England."

Golf Services Committee Chairman, Colin Spurr, added, "The EGU welcomes the opportunity to join with English Nature and the STRI on this project which will ultimately be to the benefit of both our member clubs and the wonderful habitats that exist on their courses. This can only be good news for golf and conservation."

This free initiative is not intended to replace more comprehensive ecology and environmental services from STRI or other providers.

Boughton expands

To keep pace with expansion, Boughton Loam Ltd. have added a further two new machines to its growing contract fleet. A Kubota 4200 series tractor and a Charterhouse 7326 = 2.5 metre Outfield Verti-drain will be brought immediately into use. These machines will compliment the existing fleet, increasing capacity in the forthcoming end of season renovation on winter sports pitches. They will also be used in the ongoing maintenance of golf courses and cricket pitches.

All machines are operated by Boughton Loam's own highly trained staff who have extensive greenskeeping and landscaping experience.

Because they're damaging the course

Captain, you know how you said I have to get rid of the moles... How do I stand with the golfers?

Roger receives STRI honour

STRI's former Chairman, Roger Robinson, has accepted a position of Life Vice-President of the STRI, offered in recognition of his valuable contributions both as a member and as Chairman of STRI's Executive Committee.

Roger became a member of the committee in 1986, then known as the STRI Board of Management and Executive Committee, as a representative of the R&A. In 1992 he was elected as Vice Chairman, becoming Chairman in 1995, working closely with Dr Mike Canaway, who had been appointed to the new position of Chief Executive.

Roger retired as Chairman in September 2001, having supported for over 12 months Dr Gordon McKillop, STRI's current Chairman.

Boughton Loam's own highly trained staff who have extensive greenkeeping experience are employed to work under the guidance of Dr Gordon McKillop, Dr Keith Duff and Colin Spurr announce the launch of the new scheme.

In the last few months Boughton Loam Ltd. have added a series tractor and a Charterhouse 7526 - 2.5 metre Outfield Verti-drain to its fleet, increasing capacity in the forthcoming end of season renovation on winter sports pitches.

All machines are operated by Boughton Loam's own highly trained staff who have extensive greenkeeping and landscaping experience.

Three senior appointments have been announced at John Deere.

Graham Williams has left Langar to replace Joe Weegenaar as International Marketing & Sales Director for the commercial & consumer equipment (C&CE) division, based in Mannheim, Germany. Graham will be responsible for continuing to drive the growth and profitability of Deere's international business.

As C&CE Division Sales Manager of the UK & Ireland branch at Langar, Nottingham since 1993, Graham oversaw a fivefold growth in the grounds care business, making this the largest C&CE branch outside North America.

Graham attended both Lachkham and the West of Scotland agricultural colleges, obtaining an NDAge. He joined John Deere Limited as a territory manager in 1979, and became sales promotion manager in 1987.

Pieter Nel succeeds Graham Williams as C&C&CE Division Sales Manager for the UK and Ireland, based at Langar. Pieter originally joined the branch last year as Business Development Manager from John Deere (PTY) Limited in Nigel, South Africa, where he served as Manager Product Support. Pieter joined John Deere in South Africa in 1989 as a Territory Manager and was appointed Manager Product Support in 1993.

Keith Clayphan succeeds Pieter Nel as Business Development Manager for John Deere Limited. In this position Keith will supervise the company's complete goods department, and will be the branch expert in process management, working with all departments.

He will also lead the development and implementation of quality initiatives such as ISO certification, and will be responsible for managing and co-ordinating the branch's internet activities. Keith returns to Langar from Deere & Company's corporate headquarters in Moline, where he was a Project Manager on the order fulfilment team. 

The major breeders and suppliers of amenity grass seed have formed the Amenity Grass Crop Group (AGCG). Members include Advanta Seeds, Barenbrug UK, British Seed Houses, Cebeco Seed Innovations, DLF Perryfields, Nickerson and Semundo. 

Paul Johnson, Managing Director of Barenbrug UK, has been appointed as the Chairman and representatives will meet regularly with staff of STRI, at Bingley, which currently undertakes the independent evaluation of newly developed grass cultivars.

Toro north of England dealer Cheshire Turf Machinery, in Stockport, has celebrated its fifth anniversary as an independent concern, with the sale of its 1000th machine - to the golf club to which it made its first sale, a Reelmaster 2300-D mower.

The club in question is Birchwood Golf Club, an 18-hole parkland course in Warrington.

Steve Halley, of Cheshire Turf Machinery, said: "The company was established to focus on the grounds care market, professional, with the belief that if we did our job properly the customer would remain loyal. It's therefore especially satisfying to reach this milestone by supplying our original customer."

Head Greenskeeper, Adey Holt, who has built up its Toro fleet over the years, said, "I've always been a Toro fan, they make the most reliable machines on the market. Our Reelmaster 2300-D has done over 2,000 hours since we bought it and it's still going strong."

Toro dealer celebrates anniversary in style

Dennis has appointed Alan Ronaldson to their sales and marketing team.

As Northern Area Sales Manager, Alan will offer product advice and service back-up to Dennis' customers and dealers throughout the North of England, Scotland, and Ireland. They will benefit considerably from Alan's extensive knowledge and experience. This year, Alan celebrates 30 years of working in the grounds care industry, many of which have been undertaken at the highest level. Most recently, he established a complete Northern dealer network for a New Zealand-based grounds care equipment manufacturer.

He is a founding member of the IOG's Scotsturf exhibition committee, and has worked closely with the IOG and BIGCA.

Commenting on the appointment, Dennis' Managing Director, Ian Howard, said, "Alan is dedicated to sharing his knowledge with others, and he is ideally suited to Dennis' commitment to supplying premium products and service to our customers. In the same spirit, he has also promised to give his new colleagues a practical demonstration of his bag pipe-playing skills!"

The Group will review with the STRI, the existing varieties available and fine-tune testing procedures. Its members will also liaise with end-users to ensure that the needs of industry professionals are being met in terms of amenity grass cultivar performance, and will meet under the auspices of the respected British Society of Plant Breeders.

"Developing new grass varieties takes typically 13 years, and it requires a long-term view to ensure they meet the user's requirements," said Paul.

"The AGCG's role is to monitor industry issues and listen to the views of amenity turf professionals, so that we can effectively set the standards that tomorrow's varieties, and appropriate evaluation procedures, should meet. The Group has already held fruitful meetings with several influential trade groups, and we look forward to gaining the views of others so that breeders and testers fully understand their exact requirements."

Tee 2 Green in link with ETT

Tee 2 Green and European Turf Technology have announced a collaborative partnership to market several grass seed varieties in the United Kingdom and Middle East.

"We have conducted extensive market research over the past two years through our UK subsidiary and have established that we certainly produce a range of varieties ideally suited to these markets. We need to involve ourselves with a company with direct links to the country's leading golf clubs. ETT fit the bill with their outstanding contacts and highly technical approach they are the ideal partners," said Agostino Gonde, Tee 2 Green, Corp. Sales Manager for Europe.

The agreement covers a complete range with several specially designed mixes as well as a custom mixing service and the popular A4 creeping bent. Richard Lawrence Managing Director of European Turf Technology said, "Our philosophy has always been to bring to the market products that have a distinct 'green edge', advantage, we have achieved this through our associations with Floratine Products and Norsk-Hydro the world's largest fertiliser company. The Turf-Seed and Tee 2 Green ranges are an ideal addition to our range."

SGM investment

Scottish Grass Machinery has invested £250,000 in two new workshops in Inverness and Aberdeen to support contracts recently won with Highland and Aberdeenshire Councils.

The new facilities will provide equipment and a full customer service, delivered by two dedicated engineers in each depot, supporting both the two council contracts as well as providing on-site support to SGM's golf customers across the North of Scotland.

Tillers Rootzone Turf

(est. Apr.'02 – rdy. Oct.'02)

This autumn you can buy greens turf grown on three different rootzones, two of which are to USGA spec. In addition, our custom-grown service allows you to order any mixture of grasses on any rootzone. For details call Tillers Turf on 01652 678000.

John Deere launches Turf Tech scheme

A major new training scheme for the UK groundcare machinery industry is being launched by John Deere Limited, in conjunction with Brooksby Melton College in Leicestershire, with the approval of BAGMA and the City & Guilds of London Institute, and the support of the Learning & Skills Council.

The sole aim of its kind in the groundcare industry, the John Deere Turf Tech apprentice engineering training programme has been developed to assist dealers and their service departments in the recruitment and training of suitably skilled technicians. It is based on a similar John Deere scheme that has already been operating successfully in agriculture since 1992, and which won a National Training Award at the end of 1997.

Turf Tech is a four-year block release course at Brooksby Melton College, leading to the BAGMA City & Guilds of London Institute 4024 Agricultural / Groundcare Service Engineers NVQ Level 2 & 3 Certificates, and the John Deere Turf Tech Certificate.

The standard three year apprenticeship will cover all the normal engineering principles and systems, and include regular sessions at the John Deere Training Centre in Langar. During the additional fourth year the trainee works at the sponsoring John Deere dealership, and attends at least three service schools at the John Deere Training Centre.

Successful completion of the fourth year of the scheme also qualifies technicians for Associate Membership of the Institution of Agricultural Engineers, and registration as Eng Tech with The Engineering Council.

The first intake of students, who need to be resident in the UK, sponsored by a John Deere dealer and aged 16 or over, is planned for September 2002. Anyone interested in applying will be able to obtain a brochure outlining the scheme from Brooksby Melton College, area careers officers, John Deere dealers nationwide.

Trilo buys Long Equipment range

MJT Contracts Ltd and Trilo have added the Long Equip range to their own range of Trilo Vacuum Sweepers. All production has been moved to the factory in Holland with MJT continuing the supply of parts and machines to the UK. The range has been "thinned down" to the successful collection of machines and parts expected by existing Trilo customers. They are holding back with them while we gear up for a four-week period before full production being resumed at Salfest at the latest.

Sportsworld seminar a great success

David Bates (left) gets up to his elbows in a demonstration of hydraulic conductivity at the Sportsworld Amenity-sponsored North Wales Section Seminar at Carden Park, chaired by Bill Lawson and with speakers including Peter Wabey, of the EGU; Duncan McGilvery, of Potters Bar GC, Ken Richardson, of BIGGA, several speakers from Sportsworld Amenity as well as Colin Hood, from Tufftrax, the audience was treated to a wide ranging array of topics.

Great news for Woodlands

The Forestry Commission has changed its Woodland Improvement Grant giving more opportunity to golf courses to access grant aid for the management of their woodland.

The grant is split into 3 units: WIG1 for Public Access, WIG2 for Undermanaged Woodland and WIG3 for Biodiversity. It is WIG 2 and WIG3 that are generally of interest to golf clubs, previously uneconomic thinning was not applicable for grant aid under WIG2. This has now changed and therefore golf courses with woodland should now be eligible for 50% of the agreed costs to bring their woodland back to environmentally acceptable levels. This grant has a ceiling limit of £10,000 in grant aid.

A new scheme, WIG3 has also been restructured with a new ceiling limit of £50,000 in grant aid. This is available to clients wishing to improve the biodiversity of their woodlands providing it is in accordance with either, the National or Local Biodiversity Action Plan, or a Habitat Action Plan or a Species Action Plan. The grant gives a 50% contribution towards agreed costs. For further information please contact John Nicholson Associates at:-

John Nicholson, John Nicholson Associates, 18 Douglas Gardens, Durham, DH1 3PT Tel: 0191 3842556

South Wales Seminar well supported

Pictured at the South Wales Seminar are Professor Bill Adams, Head Greenkeeper at Royal Porthcawl GC. Simon Barnaby, Scott's Technical Manager and Martin Townsend, Scott's Sales Manager. The event was well supported and the South Wales Section would like to thank Scotts for their very generous sponsorship of the event.

NOT BAD VALUE FOR A POUND

Mark Cox, an assistant of 23 years standing at Long Ashton GC, in Bristol, became an overnight star in the angling world when he hooked this 10lb 2oz rainbow trout near the club. The catch came as Mark was giving a lesson in the art of fly fishing to a friend. His story was recounted in the fishing column of the Bristol Evening Post.

June 2002 Greenkeeper International
