**From the cold of Canada to the warmth of... Scotland!**

I've faced some real extremes of weather over the past month. I began the month in Calgary, at the Canadian Superintendents Conference and Show. It was cold, extremely cold, with more snow than we would see in many winters combined which made the magnificent scenery even more dramatic. Calgary was host to a recent winter Olympics and it was great to be able to see the ski jumps and all the other venues for that great event.

We also visited Banff, home to one of the country's, indeed the world's, top golf courses and although it was covered in snow you could tell how it had earned its reputation.

But if the weather was cold, the warmth of the welcome from our Canadian hosts was exceptional. They looked after us royally and it made the visit one of the most enjoyable I've had the privilege of making.

I'd like to thank Bill Fach, who has now completed his year as President of the CCGSA and all his team for their hospitality.

I did mention the snow and the cold temperatures but do you know, I didn't spot one broken down vehicle in all the time we were there. There must be lessons there somewhere. A couple of snow flake and our country comes to a shudder of halt.

One of the things that has surprised me since becoming Chairman is the sheer number of invitations the Chairman of BIGGA receives. It is a real tribute to the Association that this should be the case but, given that I have an extremely busy job at Turnberry and a limited number of days in which to attend events, I am disappointed that I'm not able to accept more of these invites than I do. Having said that, I hope that by the end of my year in office I shall have met up with many of you at one function or another.

I'd also like to thank the many hundreds of people who wrote to congratulate me on becoming Chairman. The support was simply overwhelming and although I have written personally to some of them the shear weight of numbers has prevented me from putting pen to paper to thank everyone so please accept my thanks to you through my column.

Having mentioned the cold of Calgary, the weather at Turnberry has been extraordinary. With global warming we were supposed to be getting wetter weather but we have just experienced the mildest February in the 17 years I've been in Scotland. And no rain! The first three weeks of March have been just the same and the forecast is the same for the next week as well.

I was playing golf in shirt sleeves yesterday, in the middle of March!

The great thing is that it has meant that both courses at Turnberry have been very busy and from a revenue point of view that can only be good. I hope that is the same at your clubs.

Having said that, with 3000 rounds a month in the early spring it means a lot of divots. If this is going to be the pattern from now on we may have to look towards taking fairways out of play with compulsory dropping in the semi rough or mats which are being used at more and more courses now including St Andrews and Carnoustie.

Another benefit of the dry weather has been the opportunity it has given us to complete our top dressing programmes successfully and many other jobs that we can carry out if we are fairly sure the weather is going to remain good. The downside has been that turf we have laid is curling up at the edges like toast and we are having to think about irrigation already.

No matter the conditions you can be sure that there is always something to keep us on our toes.

---

George Brown
