A Viking Invasion

Danish greenkeeper, Jacob Aakjaer, recently contacted Malcolm Peake, of Temple GC, with a request to visit the course and meet Martin Gunn, Course Manager. Jacob wanted to bring a group to exchange ideas and experiences, and it was decided to broaden the aspirations of the trip.

Malcolm met the group, and briefed them on the different characteristics of the courses and clubs they would be visiting.

The first port of call was Stweley Forest GC, a stunning heathland course, which Cult himself called his “least bad course.”

Course Manager, Lawson Bingham, gave a fascinating guided tour of the course, describing the management and the architecture. He also described the heather restoration programme and the principles behind the felling of birch, firs and rhododendron, which allows more circulation of air and light.

The next day the Vikings arrived at Temple, where Martin and Malcolm, a Past Chairman of Green, gave a short description of the ethos of the course management, before Martin invited the visitors to give a short talk on their own courses.

The group visited the greenskeeping compound, and discussed the extensive collection of machinery required on a modern course, before discussing composting and composting, which Temple has been working on for nearly a year.

After lunch, there was a tour of the course before being joined by Keith Adderley Secretary, and Michael Barratt, an advisor to the R&A Golf Course Committee, during which a lively debate and exchange of ideas ensued.

The following day saw the group visiting Taunbridge GC, where they were entertained by Course Manager, Neil Baker, and in the afternoon they visited Woking GC, designed by Tom Dunn, where they met course architect, Tom Mackenzie.

Everyone who took part viewed the trip as a worthwhile educational experience, and showed the passion of the greenskeeping profession at its very best.

POLARIS LAUNCH NEW MODEL

Polaris has launched new models and features in the Sportsman and Ranger ATV ranges. Styling on the classic Sportsman chassis has been updated and new transmission introduced.

All the upgrades are seen on the Sportsman 500 HO and Sportsman 800. The Polaris Sportsman 500 HO, a value-for-money machine is crammed with new features, and includes 19% more suspension travel, 25% more ground clearance and a massive increase in towing and rack capacity.

There is full instrumentation and the 400 returns in a full-size chassis.

The Sportsman Premium line-up, from the 550 to the 850 EPS, all feature weight reduction, new STX seat vinyl, improved BIS and splash protection.

Top Award for David

Lech Lomond Course Superintendent, David Cole, has won the international category in the prestigious GCSCA Environmental Leaders in Golf Awards for 2010.

David received his award at a special ceremony held in Orlando, Florida during the annual Golf Industry Show. Alligator 20

Supertendents were recognised at the ceremony and David, who has been a member of the GCSCA for 12 years, was the only recipient from outside the US.

“It’s a huge honour to receive this prestigious international award from the GCSCA,” said David.

“I am immensely proud to be the recipient of the award but want to share it with members of staff at Lech Lomond who have worked tirelessly to develop and implement the club’s Environmental Plan.

“Lech Lomond’s plan includes strategies to minimise water usage, waste and energy consumption, to reduce carbon emissions and protect and enhance biodiversity and the quality of the landscape.”

The club is a certified Audubon Cooperative Sanctuary and is GBF registered.

Lech Lomond Golf Club was recently acquired by its Members.

Counterfeit Product Warning

Advanced Turf Technology has recently become aware of an inferior imitation chassis purporting to be for use with their TMSystemTM logo.

The cassette-based turf maintenance system is for use with most mainstream triple green mowers and the imitation chassis attempts to replicate an old ATT chassis and is not made with the precision engineering and attention to detail, as the original.

Purchasers have inadvertently bought these imitations believing them to be genuine ATT chassis and have experienced problems.

The imitations are easy to spot as the top bar is not black and does not bear the TMSystemTM logo.

Also the adjuster top cap doesn’t have the ATT logo and standard of engineering, materials and manufacture are inferior.

The imitation products do not carry a guarantee or after sales service and may be dangerous in use.

If anyone has concerns or suspicion that they may have been sold an imitation, they should contact ATT who would also suggest that they return the product to the supplier and seek a full refund.

ATT is taking steps to stop any more imitations being manufactured and to protect the intellectual property rights, the company’s reputation, and most importantly, its customers.

ATT products are exclusively marketed in the UK and the rest of Europe by The Grass Group.

Fine Turf’s First PhD

The UK’s first PhD looking specifically at environment-related stress in fine turf, has been announced by Syngenta and Harper Adams University in association with STBI. Dr Ruth Miah, who has recently completed his MSc at the University of Nottingham, will begin his three year study this spring.

Dr Ruth Mann, Head of Turf Protection at STBI, believes the underlying impacts of environmental induced stress may be having a profound effect on turf plant health, along with its ability to utilise water and nutrients resources to maintain quality.

An in-depth study into environment related stress symptoms and the associated physiological and biochemical changes within turf plants, will provide us with the real opportunity to evaluate options to mitigate the effects.

“The creation and funding of a turf-specific PhD study is an exciting and important development to focus turf plant physiology knowledge on the commercially important fine turf, bent and rye grass species used in sports turf management,” said Ruth.

Dr Simon Watson, of Syngenta, said: “Harry’s scientific research will enable us to understand exactly what is happening, to quantify the benefit and to help provide the advice and practical solutions for turf managers to get the best possible results, particularly with Heritage Macs and Primo Macs applications.”

Harry’s research will be based at Harper Adams University College, along with work at the STBI and within the industry through Syngenta links.

There is full instrumentation and the 400 returns to a full size chassis. The Sportsman Premium line-up, from the 550 to the 850 EPS, all feature weight reduction, new STX seat vinyl, improved EBS and splash protection.

Fine Turf's First PhD
JCB Recruitment Drive for 80 Engineers

JCB has launched a recruitment drive for up to 80 engineers in the UK.

The vacancies are across all the company’s sites in Staffordshire, Derbyshire and Wales and will see JCB take advantage of a return to growth in global markets.

JCB Chief Executive Alan Blake said: “JCB’s success over the past 65 years has been built on having the very best engineering talent. This year has started very strongly and all the signs at this stage are that growth will continue throughout 2011. “We need to respond to this growth and strengthen our excellent team of engineers with new talent as demand for our machines increases and as we develop a range of exciting new products for the future.”

The vacancies include mechanical, electronic and electrical design engineers, development engineers, research and development engineers, engine design and development engineers, technicians, apprentice engineers, undergraduate engineers and graduate engineers.

Pictured left-to-right are JCB CEO Alan Blake, The Chancellor of the Exchequer, The Rt. Hon. George Osborne MP and HE Services Chairman Hugh Edeleanu, whose company has placed a £14 million order for JCB machines.

HEADLAND AMENITY HAS DEVELOPED WEATHERCHECK, A WEATHER FORECASTING TOOL TO PINPOINT A SPECIFIC LOCATION SUCH AS A GOLF CLUB OR RACOURSE.

Turf Managers will be able to access vital, personalised information on temperature, wind speed and direction and predicted rainfall. Forecast, which breaks down into three-hour segments and graphically illustrates rainfall intensity and timing, provides an accurate overview.

The RainNow option produces a 25km radius ‘rain radar map’ with the chosen facility at the centre. RainNow gives past rainfall over the last two hours and projected rainfall looking ahead for 90 minutes.

Spraying conditions over a seven day period can be accurately ascertained giving anticipated rainfall, wind strength, precipitation, air temperature and evapotranspiration.

For further information contact the company on 01233 597834 or weathercheck@headlandamenity.com.
**Bluebell Forest**

Center Parcs is adhering to its biodiversity policy by choosing nearly 40,000 native bluebells over an invasive Spanish rival species. Supplied and grown by specialist Norfolk nursery British Wild Flower Plants, the Bluebells have been propagated from seed collected from existing plants at Sherwood Forest Center Parcs where the bluebells will be planted and other areas throughout the UK.

Linda Laxton, BWFPs owner and MD says that the seeds were sown 18 months ago into 13,000 pots and have taken two winters to grow. “The Spanish Bluebell is a completely different species compared with our native plant. It’s very vigorous and very aggressive,” she explained.

“Because the flowers are larger than British Bluebells the Spanish species were sold by garden centres and now in danger of taking over. If they are grown in a private garden near woodland there’s a strong possibility they will interbreed.” She explained.

**RJ Territory Expands to Include Asia Pacific Region**

Ransomes-Jacobsen, has expanded its management territory within the Jacobsen group with the inclusion of the Asia Pacific region and too accommodate David Wittens, Managing Director, left, has announced several management changes at senior level.

Alan Prickett, far right, the former Sales Director, has been appointed Managing Director, Asia Pacific, and will be relocating to Singapore in the near future.

The role of Sales Director will be taken by Rupert Price, second left, who is promoted from his former role of UK and Ireland Sales Manager while Jason King, second right, has been promoted to Customer Care Director.

“Similarly, Rupert, who joined us on our graduate intake programme back in the late 1990’s, has shown great aptitude in many differing sales roles and last year was mainly responsible for our significant increase in market share as a result of the innovative new strategies he introduced in the UK.”

“Alan Prickett will do a great job for us out in the APAC territory from his base in Singapore, where he will build on the successes of the team out there, as we aggressively pursue and exploit the burgeoning opportunities across that region,” said David. **NEW ENHANCE R ‘PRIME’ JOINS RANGE**

Vitax Amenity launched Enhance R Prime, a zero phosphorus formulation which shows the results of the Enhance R range of fertilisers, winner of the JCO’s “Best New and Innovative Product” award in the Fertiliser and Pesticides category.

Specifically developed for Turf Managers who require a zero phosphate product Enhance R Prime 5+1+4 (F) (Fe) 2MO+TE shares all the benefits of its fellow formulations, Enhance R Prime and Enhance R Autumn and Winter, being a 4-in-1 combo of conventional fertiliser, slow release organic fertiliser, Amino-Such Rands related bacterium.

**New Fleet for Rochford Hundred Golf Club**

“The machinery fleet at Rochford Hundred Golf Club in Essex is now almost all John Deere, with new arrivals for 2011 including a 4520 compact tractor, a 400CX front loader and an Aercore 600 pedestrian aerator.

These have joined 11 other John Deere machines supplied by dealer P. Tuckwell Ltd of Aylsham, near Norwich, including greens, tees and surrounds and fairway mowers, several Gator utility vehicles and another compact tractor.

“We particularly like the quality of cut we get with John Deere mowers,” said Course Manager, Dave Rand.

“John Deere is an established company that has proved over time that it can deliver on its promises, and the dealer is always prepared to help us out with extra loan machines when necessary.”

“We are fortunate that there has been a big investment by the club over the last 6 to 12 months to improve our greenkeeping facilities and equipment, including general refurbishment of the club area and the installation of a new waste water system, as well as improvements to the clubhouse, including new changing rooms.”

“We are also looking at a new John Deere irrigation system for commission in 2012.”

**Ground Penetrating Radar Survey at Stonehenge**

The Geophysics Team at English Heritage has just completed a state-of-the-art survey of the ground surrounding Stonehenge:

This is the first large scale Ground Penetrating Radar survey at Stonehenge and has resulted in highly accurate 3D mapping of the fine detail of objects down to a depth of two metres.

To ensure there could be no possible damage to this world heritage site Multi Channel Radar equipment with the GPS unit on top was towed by a 4x4 JCB Utility Terrain Vehicle hired by English Heritage from specialist UVV vehicle dealers SMH Quad.

Dr Neil Liddell, English Heritage’s GPR specialist, said: “The GPR data set greatly enhances our understanding of the archaeological site at Stonehenge. The GPR data set is indicative of company policy and future goals. The last year has seen us expanding all divisions of the business. We developed the Brichello Arrow transfer wheel borderline for Vitax Supaturf, embarked on a new joint venture with Vitax Grower and Unitrade International to develop trade in Turkey and the Middle East and have expanded our Retail division with new house and garden products and have introduced our new range of designer products to our famous Nippon range.”

For further info visit: www.vitax.co.uk
**JCB ACADEMY OFFICIALLY OPENED BY ROYAL COUPLE**

The £22 million JCB Academy has been opened by Their Royal Highnesses The Prince of Wales and The Duchess of Cornwall. The Academy, which opened this spring, represents a significant investment in education and training, with the aim of providing a world-class training facility for the next generation of engineers and technicians.

**RJ Territory Expands to Include Asia Pacific Region**

Rarasan-Jacobsen, has expanded its management territory within the Jacobsen group with the inclusion of the Asia Pacific region and too accommodate David Withers, Managing Director, left, has announced several management changes at senior level.

The new territory includes Australia, New Zealand, Japan, and India, among others. The region is expected to see significant growth in the coming years, driven by expanding markets and increased demand for Jacobsen products.

**Bluebell Forest**

Center Parcs is adhering to its biodiversity policy by choosing nearly 40,000 native Bluebells over an invasive Spanish rival species. Supplied and grown by specialist Norfolk nurseries British Wildflower Plants, the Bluebells have been propagated from seed collected from existing plants at Sherwood Forest Center Parcs where the Bluebells will be planted and other areas throughout the UK.

Linda Laxton, BWFP’s owner and MD says that there was never a private garden near woodland there’s a strong possibility compared with our native plant. It’s very vigorous and have taken two winters to grow.

**New Fleet for Rochford Hundred Golf Club**

The machinery fleet at Rochford Hundred Golf Club in Essex is now almost all John Deere, with new arrivals for 2011 including a 4520 compact tractor, a 400-CX front loader and an Aercore 800 pedestrian aerator. These have joined 11 other John Deere machines supplied by dealer P. Tuckwell Ltd of Ardleigh, near Colchester, including greens, tees and surrounds and fairway mowers, several Gator utility vehicles and another compact tractor.

“We particularly like the quality of cut we get with John Deere mowers,” said Course Manager, Dave Rand.

“I first saw the 7400 TextronCut rotary mower on a greenskeepers feedback trip to Germany, and just loved the look of it, so ordered one as soon as it became available and I believe we had the first unit delivered in the UK.”

“The oldest triplex is now used with a GreenTech cassette system and another is mainly used on the tees, but we can change heads between the two newer mowers as required for use on both the greens and tees.”

Vitax’s new Enhance R ‘Prime’ joins range

Vitax Amenity launched Enhance R ‘Prime’, a zero phosphorus formulation which scores the marks of three Enhance R range of fertilisers, winner of the IOG’s ‘Best New and Innovative Product’ award in the Fertiliser and Pesticides category.

Specifically developed for Turf Managers who require a zero phosphorus product Enhance R ‘Prime’ S+O+DV+Mg+100+TE shares all the benefits of its fellow formulations, Enhance R ‘Spring’ and ‘Autumn’ and ‘Summer’ being a 4-in-one combo of conventional fertiliser, slow release organic fertiliser, Amino-Sort Rands related bacterium, Commercial Director for Vitax, Daniel Williamson says that the expansion of the Enhance R range is indicative of company policy and future goals. The last year has seen us expanding all divisions of the business. We developed the Briteliner Arrow transverse wheel boom marker for Vitax Stapaturf, embarked on a new joint venture with Vitax Groower and Unitrade International to develop trade in Turkey and the Middle East, and have expanded our Retail division, with new head and garden products as well as improvements to the ranks of their Enhance R ‘Prime’, a zero phosphorus formulation which scores the marks of three Enhance R range of fertilisers, winner of the IOG’s ‘Best New and Innovative Product’ award in the Fertiliser and Pesticides category.

“Enhance R ‘Prime’ was developed specifically for Turf Managers who require a zero phosphorus product. Enhance R ‘Prime’ shares all the benefits of its fellow formulations, namely Enhance R ‘Spring’, ‘Autumn’ and ‘Summer’, which offer 4-in-one combo of conventional fertiliser, slow release organic fertiliser, Amino-Sort Rands related bacterium.

Commercial Director for Vitax, David Williamson says that the expansion of the Enhance R range is indicative of company policy and future goals.
