As the golf season begins properly it seems many golfers will be struck by the highly contagious annual virus known as ‘Augusta Syndrome’. Scott Corrigan, Head Greenkeeper at Greenburn Golf Club, grabs his stethoscope and searches for a cure.

For golf course greenkeepers, Augusta National Golf Club and The Masters is a wonderful example of what can be achieved and created with unlimited resources.

I couldn’t even guess at their annual course budget – but reckon Greenburn Golf Club could comfortably survive for the next century on what they spend in a year.

We’ve now yet again approaching the start of a new golfing season which will inevitably be accompanied by the dreaded ‘Augusta Syndrome’.

As we emerge from the wettest year on record off the back of two very wet years previously, the golf industry around the world again looks to a single date during the second weekend in April to signify the Masters tournament as the unofficial start to the golfing season.

Ever since the Masters was first televised in colour in 1967, golfers have aspired to what they thought was the next best thing, an emerald green golf course to play on every week. We all know of golfers who race green golf course to play on every weekend. We greenkeepers love watching the Masters, and rumour has it that last year Hollywood set designers were brought in to hide damage caused by the use of weedkillers. Granted, the pressures to prepare Augusta, compared to the average golf course, are immense.

But there’s an interesting exercise for you. Look up ‘Augusta National Golf Club’ on Google Maps to see it in its natural state, and when you zoom in you will find the true golf course.

You’ll see grass that looks like natural grass, with bare patches and faded greens with dry ponds, a rather scorching appearance that people will not associate with the Augusta we know.

We greenkeepers love watching this tournament as much as not the next golf fanatic, but the expectations placed on our industry after the Masters is enough to make many of us tear our hair out. So golfers - please spare a thought for greenkeepers in the real world who work tirelessly to produce the best courses possible with more and more restrictions imposed in the form of limited funds and reduced budgets, and with the minimal manpower available.

Also bear in mind the issues that come with working with ageing equipment and don’t forget the unpredictable weather that we need to work with eight inches of snow have fallen in March here already). So this year, as spring approaches, I hope the golfers understand it’s as realistic to expect the average golf course to look like Augusta National as it is to expect their own golf game to perform like Rory McIroy or Tiger Woods.

GripClad composite anti-slip panels provide a hard wearing, long term safety solution for slippery railway sleeper steps, being resistant to spiked shoes, weather and chemicals.

Our affordable non-slip safety product for golf courses is proven to excel other methods. Installed as part of your golf clubs health and safety precautions it can help avoid slip accidents and potential liability claims.

We offer free advice with this easy to install product, that will far outlast all previous slip prevention methods. Unrivalled quality and durability means that our anti-slip panels can be installed and then forgotten.

A compensation claim can dwarf the cost of the solution, so why not pay a small price for peace of mind and contact GripClad?
