During BTME 2013 the GTC invited its Quality Assured Centre sports turf representatives to meet with Quality Assured Training Providers. This was designed to encourage sharing of human and physical resources between Centres and Providers.

The event proved very successful and David Golding, GTC’s Education Director, is constantly hearing examples of its QA Training Providers being invited to QA Centres both to share specialist subject knowledge and in some situations equipment and machinery.

David explained: “Many companies and their knowledgeable staff would love to support and contribute more but until the introduction of the GTC Quality Assured Scheme in 2010 it was impossible for companies to support the many colleges and private companies offering sports turf courses and qualifications.

"However, now with a limited number of QA Centres - two in Scotland, two in Wales and six in England - it is now far easier to develop a strong Centre - Training Provider partnership. “QA Centres offer the formal government accredited qualifications however they are also best placed to compliment these courses with specialist short-courses, workshops and seminars.”

David invited Jake Waites, Sports Turf Trainer/Assessor at GTC’s Quality Assured Centre Bridgwater College, Cannington Centre to explain his Centre’s vision on how and the increasing complexities Bridgwater in successfully managing a golf course, is it still enough just to deliver consistently high quality surfaces? It would be nice to be able to say ‘yes’ to this but is that still really the answer?

I am not suggesting for a minute that the hard earned knowledge and ability that goes into presenting your golf course is in any way redundant but how often have you found yourself thinking I used to be a greenkeeper, now I’m an Administrator/Communications expert/Finance and Human Resources manager as well? With this being the case, how can you ensure that you still have the skills to meet the challenge?

For those entering our industry as apprentices, for assistants with a greenkeeping background to best suit employers and sports turf students needs with input from QA Training Providers and guest presenters. Here are Jake’s views.

This month Jake Waites from Bridgwater College explains his education vision and discusses the question “What makes a great Head Greenkeeper?”

What makes a great Head Greenkeeper?

Jake would propose that the lines are becoming increasingly blurred. “You live and die on the quality of your greens” used to be the maxim but with the development of the game and the increasing complexities involved in Councils in Cannington, managed by a Head Greenkeeper? Who has aspirations to be the next generation of Head Greenkeepers and these programmes have helped drive the standards within our industry to higher and higher levels, but in the increasingly pressured working environments in which we work in that these busy environments are so willing to give their time to share their experience and best practice.

For course enquiries contact Helen Goodland Goodlandh@bridgwater.ac.uk or Tel: 07753 311160

To register on workshops contact Jane Wagner, Commercial Manager, Cannington Centre for Land Based Studies, Bridgwater College, Cannington, Bridgwater, Somerset TA5 2LS. WAGNERJ@bridgwater.ac.uk or Tel: 01278 655065 Mobile 07917 475641

What makes a great Head Greenkeeper?

I would propose that the lines are becoming increasingly blurred. You live and die on the quality of your greens’ used to be the mantra but with the development of the game and the increasing complexities Bridged in constantly managing a golf course, is it still enough just to deliver consistently high quality surfaces? It would be nice to be able to say ‘yes’ to this but is that still really the answer?

I am not suggesting for a minute that the hard earned knowledge and ability that goes into presenting your golf course is in any way redundant but how often have you found yourself thinking I used to be a greenkeeper, now I’m an Administrator/Communications expert/Finance and Human Resources manager as well! With this being the case, how can you ensure that you still have the skills to meet the challenge?

For those entering our industry as apprentices, for assistants with a high level of previous experience who are looking to build on it and for those who have aspirations to be the next generation of Head Greenkeepers and Course Managers, the training paths remain familiar and well travelled.

As one of the GTC’s quality assured training centres, here at Bridgwater College’s Cannington Centre our primary focus is to ensure that all these groups receive the training they require. We still feel that the Work Based L2 and L3 Diplomas (formerly known as NVQs) offer the best solution both for the student and the employer, offering them as a combination of real on-job experience and underpinning knowledge delivered in the classroom environment.

However, for those who have achieved a more senior level and for those ready to make a step up, the available routes are sometimes less obvious.

There are excellent options for further and higher levels of study and these programmes have helped drive the standards within our industry to higher and higher levels, but in the increasingly pressurised working environments which managers and supervisors find themselves in, the time commitment involved can prove to be a significant obstacle.

So, how can we address this training shortfall without having to use up too much of this precious commodity?

An excellent means of continuing your professional and personal development is to carry out a SWOT analysis of current abilities and then target events and short courses that meet the shortfalls you have identified. This may be by approaching your local college, through BIGGA’s excellent Continue to Learn programme at BTME, through regional seminars and workshops or GTC events.

The workshop model in particular provides an excellent opportunity to learn new skills, discuss techniques and share best practice with your peers in an interactive environment.

Earlier this year we ran the first in a series of workshops entitled “Smarter Greenkeeping”. Guest speakers at the first session were Laurence Pitcher from Turf Master One training and Paul Worster, Course Manager at Minchinhampton Golf Club and former BIGGA Chairman.

The first workshop covered all aspects of bunker renovation and maintenance, using various case studies as examples and their personal experience which spans over 70 years in the business.

The second workshop focused on how greenkeepers can be more influential in the workplace and how presentations for capital expenditure can be made more effectively.

We have worked closely with Laurence in developing future topics for the series.

Our upcoming events are:

- 12 December 2013 Greens Performance 13 February 2014 Planning & Budgeting 13 March 2014 Managing with less
