While the machine works, need to be free to move such as with some sweepers and mowers where height control wheels take the implement weight. A zero leak spool is required where the hydraulic service needs to be ‘locked’ without ‘creeping,’ (with pressure in the ram) during work, although standard valves are seldom a problem. If it is a problem the first option is to replace the spool’s O-rings, and if this does not cure the problem look at the seals in the ram before considering replacement – either may be worn or scored. A kick-out spool valve allows the operator to move the lever to its extreme and leave it, knowing that when the oil pressure builds up as the ram is stopped the lever will ‘kick-out,’ this is useful in situations such as lifting and lowering trailed gang mowers, as the operator can then concentrate on turning. The kick-out should be adjustable and can be disabled for other operations. A motor detent valve is specifically for hydraulic motors, it holds the spool open for a constant flow but it must not block the return flow when returned to the middle (neutral) position. Ideally it should be capable of being set so that the motor cannot be inadvertently reversed, – with some motors, stopping the return flow abruptly and/or reversing them will blow the seals. The common alternative of using a piece of string to hold the lever is potentially dangerous as it may be impossible to stop the oil flow quickly in an emergency, this similarly applies to the locks, catches or pins sometimes fitted as a ‘kit.’ In older tractors with only single acting valves or those which use the linkage lift hydraulic circuit for driving a hydraulic motor it may be essential to install a separate return pipe to the tractor – some tractors have a special port for this, others may need a special arrangement such as drilling into the oil filler.

**Controls**

Common problems with spool valves are that there may not be enough of them or they are in the wrong place – this is often the case with loaders. Answers from loader manufacturers vary but most use a separate spool valve block. There is a safety requirement to keep all high pressure hydraulic pipes away from the operator, i.e. outside the cab – this may mean longer levers or even Bowden cables, both of which are prone to problems and generally lack precision. Up market loaders are likely to use electro-hydraulic controls, which have the advantages of fingertip actuation and simple flexible fitting, further they can combine up to three actions in a single lever, the third action, for instance the clam of a 4 in 1 bucket, being operated by a rocker switch on top of the lever. A relatively simple answer to not having enough spool valves, suitable mainly for single acting and infrequently used services, is to use a diverter valve, these are available for manual or electric actuation. Electric actuation is gaining in popularity, particularly for mowers, as it allows the designer flexibility to optimise his pipework, thereby reducing the risks of damage and leaks, it also lends itself to tidy control consoles and automatic operation. For most operations a simple on/off or up/down actuation is all that is required, however for some operations – like loader or hedgecutting operations – it is best if the operator has lever control with proportional control so that he has a graduated response. Flow adjustment may be built into the spool valve, into the tractor hydraulic system or into the hydraulic circuit itself. If an implement drops too fast or raises too slowly the first consideration should be to see if there is an adjustment. Occasionally a restrictor is fitted into the circuit, often a disc with a small hole, this may not be the correct size for the machine, tractor or oil grade, however it is easily replaced. Remember that oil is thinner when hot.

**Other users**

While tractors were the prime users of hydraulics, on today’s golf course the most intensive use of the principles are inevitably ride-on mowers, particularly greens triples, however these are purpose built and self contained thus it can be assumed that the hydraulics are ‘right,’ – nevertheless no less care, cleanliness and maintenance is required, especially when all power transmission and control is hydraulic. Many turf maintenance vehicles also provide a hydraulic service and rudimentary lift linkages, one model is also hydrostatically driven, however it is electronically controlled to give it constant speed.

Our Professional Series Ball
Washer is an improvement
on the competition! Made
from high grade space age
plastic case and superior
construction, its easy crank
design and super ball clean-
ing action, it is able to wash
up to four balls at a time. The
Pro Washer can be mounted
on our Tripod Ball Washer
Stand, or attached to any
Available at £112.82
each.

Our Litter Caddies are now made with
Stainless Steel Mesh and are finished
with Polyester Termosetting Powder
Coating for reduced weathering. They
are available in a 9 Gallon capacity, or a
30 Gallon capacity.

With the Turf-Save Spike they can be
quickly moved for mowing. The open
Mesh design lets you see from a distance
which Litter Caddies need to be emp-
tied, whilst allowing air circulation to
reduce odour. The tapered shapes holds
litter securely - even in gusty winds.

They are also available with Bases to sit
on Concrete or Asphalt Surfaces.

Available at:
£33.38 • 9 Gallon with Spike
£35.30 • 9 Gallon with Base
£85.34 • 30 Gallon with Spike
£92.18 • 30 Gallon with Base

Our Pro Line, Traditional
Consoles for function and
style. The Tee Data

Number, Par, handicap and
Yardages are engraved on
tough, resilient CAB material.
You can specify up to four
different Yardages which
should be coloured to match
the Tee Markers.
Available at £348.25 each
including sign detail.
There were, I suppose, three attractions in the offering as I prepared to visit Jonathan Harmer early in August. First, I had been cooped up too long and it was a day when the sky was filled with fluffy clouds and the sun shone – a day too good to stay tied to the keyboard of my faithful Apple Mac. Second, I was to drive to the village of Egerton, through a delicious part of the south described as England's Garden and into the very heart of Kent's hop country – where the most delectable beer in the world is brewed. Third, a positive magnet, I was to meet a man who shared my passion for motor sport, a fellow enthusiast who raced vintage MGs and who was just as likely to while away the time showing proper concern for such things as camshaft profiles, carburettor jet settings, and the right line to take through Becketts – with 7000 rpm protesting and a horde of MG T racers snapping at one's tail lights!

Of one thing the reader may be sure, though Jonathan Harmer is a 'play-hard' sort of fellow, enjoying, as his motoring trophies reveal, his 'on the limit' racing with the MG Car Club, he is without doubt also a 'work-hard' sort as well, which is why I didn't get all my own way with the interview. Truth is Jonathan was eager to tell me of the Farmura connection, while I was pressing him into revealing something more dashing, perhaps some racing scoop. I'll put this down to his sporting modesty, telling myself meanwhile not to forget my journalistic raison d'être, which is firmly embedded in turf. That stated, I suspect that something in the air of Egerton generates motor sport mania, for in a village of less than one thousand souls there's a fellow who races Bugatti's; a classic car restoration buff; a Ford Rally Cross champion; the youngest ever Mini Cross champion, a kid of just 16... and there's Jonathan, who is simply potty about MGs and crazy enough to race them – I tend to like that in a subject.

Born and raised in Egerton, where for over 50 years his father farmed apples and strawberries, Jonathan, 44, recalled driving his first car – an Austin Ruby that cost £8 – when he was just eight years old! He and his brother used to take a hose and saturate the grass around the orchards in order to practice handbrake turns – he grins when remembering how relaxed his father was about such high spirited activities, grimaces on recollecting his returning home on one fateful occasion, after a lengthy absence at school, to discover that the trusty Ruby, stripped down like a 'racer' of course, had been buried in a quarry – part of a tidying up plan for the farmyard! He could, he swears, take me to within ten feet of the burial plot.

Though with Farmura for some 15 years, seven as managing director, Jonathan did not immediately follow in the family business, rather he became a 'travel bug' after finishing school, setting off (with full parental blessing, let it be known) to 'see the world' – a trip that took him to South Africa and later to Rhodesia where, but for the changes that were taking place...
place politically, he well might have remained, for he fell in love with the grandeur of it all, describing Rhodesia as 'near to paradise.' In the event he stayed for a year, working variously as salesman and Land Rover delivery driver, before returning to England to take a place at university and later to live in London and work at being 'something in the City', in his case broking insurance.

Meanwhile farming of all varieties was in a state of flux, and changes were being thrust upon the community. Jonathan's father saw the 'writing on the wall', perhaps a good deal earlier than most, and sold the farm's land (a very shrewd move, as it turned out), at the same time acquired the business that is Farmura Limited. History will show that Jonathan's father was one of the first to successfully farm using both organics and synthetics - he was one of the very first to introduce Farmura, sold at that time mainly to farms and market gardens, finding also that it worked minor miracles on the fine grass used by the greenkeepers in S.W. Scotland. Contact with Jonathan's father ensured that Farmura products were trialled in greater depth for golf course use, packaged and labelled specifically for such specialised applications, and the products were trialled in greater depth for golf course use, packaged and labelled specifically for such specialised applications, and the effectiveness of ensuring that everything was well documented, so there's nothing mysterious about it, but if you don't understand it, you've been brought up on the white-hot scientific bumph about NPK, then of course it is. "Do you then dismiss the NPK regime?, I asked a leading question: "Does Farmura come under the heading of 'mystery and magic'?" - "No, the theory of organics is perfectly logical, it has been well researched and is well documented, so there's nothing mysterious about it, but if you don't understand it, you've been brought up on the white-hot scientific bumph about NPK, then of course it is. "Do you then dismiss the NPK regime?, I

There is a wind of change, greenkeepers generally are becoming more aware, keener to learn and to educate themselves...

Jonathan Harmer tick?". "Well, I knew you'd ask me, and you know about my racing MGs, but I suppose I could summarise my particular 'tick' by including the happy life I lead with my wife Lynette and daughters Charlotte and Louisa-Jane, I enjoy family life enormously, though developing innovative businesses is also good fun. You're swimming against the tide until the tide changes, but when you start these ideas off there's never a shake of the hand or an offer of congratulations - no one has ever said 'great, you've made life easier'. Sure, we're in business and that must mean making some profit, but it started off as a philosophical approach in a way, we're not hit and run merchants, and I can go back to any of our clients with a very clear conscience, we're ethical. I'll even admit there have been some, though not many, who have said 'Jonathan, this just isn't working', but mostly this has been because they haven't really understood why they are using the products - the fact is, organics take time to work. We live in an instant society: you're hungry, you eat a big Mac; you want a result now - remember when glyphophates came out and the complaints that came because people were used to weedkillers that wiped out overnight - now it takes three weeks. Nobody likes that, we all want it now, can't or won't wait - the problem is that nobody has told Mother Nature. Organics are longer term products that must form part of good management. Those who think they can go from bare earth to beautiful greens in a few weeks are fooling themselves, but the industry has, I believe, often sold 'snake oil' products on that basis.

Those who think they can go from bare earth to beautiful greens in a few weeks are fooling themselves, but the industry has, I believe, often sold 'snake oil' products on that basis.

Determined to finish with a nifty tale about MGs, I learned that Jonathan started racing about ten years ago, though he's always been an MG fanatic and has never owned any other marque for sporting purposes. Listening to his description of that first race was hilarious: joining forces with two other 'nutters', they'd gone to Silverstone with MG TDs and ended up at the back of the grid, firmly believing the timekeeper had made a mistake! It was pouring buckets and Jonathan couldn't see much of anything, but the industry has, I believe, often sold 'snake oil' products on that basis.

The NEW Kubota ST30. The compact with the big tractor performance!

It looks like a characteristic Kubota compact tractor. But on sports fields and recreation grounds, it performs like a big 'un! Producing more power, more productivity and more profitability.

Never has such a small tractor generated so much power.

- 29 (DIN) HP gives pulling power that's more than enough for the cylinder mowers.
- The mid-mounted cutting deck cuts a broad swathe across the turf.
- Flat deck access means more leg room for more comfort and operational convenience.
- Automatic Bi-Speed Turn and Hydrostatic Transmission means minimal turf damage and extra manoeuvrability and versatility when working in narrow spaces.
- Tilt steering wheel adjusts to the most comfortable position for greater operator comfort and greater productivity.

Never has a quart been so successfully squeezed into a pint pot.

Available with a roll-bar or a European-designed Q Cab, the Kubota ST30 provides more power from a compact tractor.

Kubota (UK) Limited,
Dormer Road,
Thame, Oxon OX9 3UN

How many holes are there on your course? Are there 9 or 18 - or perhaps the number could even be 1,237? If it's the last figure, then it is likely that your handicap is rabbits. Rabbits are increasing in number throughout the country, mainly due to the waning effects of myxomatosis. Although it is difficult to be precise, it is estimated that rabbit numbers are currently about a third of what they were before myxomatosis arrived and that this number may well double in the coming years as the effects of the disease continue to decrease. Eventually it may kill none. Therefore the message is that problems with rabbits are likely to become more common and more severe.

Problems
One of the most obvious problems which rabbits can cause for greenkeepers is by digging burrows. Many of you may recall the article in this magazine on last year's Open Championship (July 1992, Page 18) in which Chris Whittle, the course manager at Muirfield, described the scale of his rabbit problem where a tee which had been undermined by burrows collapsed when a tractor drove on to it! As if burrows dug into tees were not bad enough, burrows dug into the sides of greens are likely to please even less and there may even be the possibility of claims for compensation if someone breaks an ankle in a burrow hidden in the rough. Then there are also the smaller, shallow scrapes with which to contend. Rabbits seem to love to dig these on fairway grass and these rabbit 'divots' seem to have a magnetic attraction for golf balls, although relief may, of course, be taken under the rules of golf. Last but not least there is the problem of rabbits damaging or killing newly planted young trees on the course and these can be very expensive to replace.

Why do rabbits love golf courses?
Many courses provide ideal habitats for rabbits. There can be a mixture of scrub cover, thick rough or woodland in which rabbits can shelter. From these areas, rabbits can move out to the fairways to feed on the shorter grass, which they prefer to the longer grass of the rough. Populations are higher on sandy soil than on heavier soil types, mainly because young rabbits survive better when rain water can drain freely through their burrows, rather than on heavier soils where waterlogged burrows means cold and damp rabbits. Therefore it is not surprising that many links courses, such as Muirfield, have the worst problems.

Solutions
Under the 1954 Pests Act it remains the legal obligation of occupiers of land to take reasonable steps to destroy wild rabbits on their land or to prevent rabbits from causing damage on adjoining land. Unfortunately, however, there is no simple solution to the problem. There are a range of management methods which can be used. Numbers can be reduced by gassing rabbits in their burrows, by ferreting, trapping or shooting. Tree guards can be used to protect individual trees and fencing can be erected to exclude rabbits from the course.

The best results are achieved during winter (November-March), usually by using a combination of these techniques with choice being determined by the particular circumstances. Winter is the best time to initiate a management campaign, because rabbit numbers are at their lowest at this time of year due to natural mortality. Anything done by man before winter will only replace rather than add to this mortality. Also, control at this time of year will reduce the breeding population before the next breeding season begins in January-February and therefore there will be fewer young around that year.

Whether you do the controlling yourself or whether you employ a pest control company to do it for you, it is vitally important to know how effective control operations have been. Therefore, rabbit numbers should always be monitored before and after each operation. If you don't do this, you could well end up throwing money into a bottomless burrow! Monitoring will enable you to determine how cost-effective your control has been (or, possibly more revealingly, that of the pest control company you have employed), whether you need to change your strategy and when you can stop.

The author, Dr Gordon McKillop, is a specialist with Central Science Laboratory, a newly created Executive Agency of the Ministry of Agriculture, Fisheries and Food, the foremost research organisation in the UK for the development of rabbit management techniques.

CSL is in the unique position to discuss rabbit management with greenkeepers and has also considerable experience and expertise on other problem species, such as moles and badgers. CSL provide training courses tailored to the specific needs of greenkeepers, including tuition in how to determine the most appropriate management methods to use, how to carry them out and how to monitor effectiveness. In addition they make consultancy visits and will conduct specific research.

Dr McKillop may be contacted at the Central Science Laboratory, Tanglestone, Worplesdon, Guildford, GU3 3LQ.
You Get More With TORO
we've proved it!

Our position as market leaders in professional TURF MANAGEMENT EQUIPMENT illustrates the trust that 1000's of satisfied customers have in our machines. TORO guarantee you a superbly engineered machine that cannot be equalled in terms of QUALITY & VALUE plus an AFTER SALES SERVICE backed by the finest dealer network in the UK.

TORO have also introduced a unique 24hr 'unit-down service' ensuring immediate call off of any replacement part.

For all the facts and figures on the best model to suit your own specific requirements please give us a call and we will be pleased to arrange a demonstration without any obligation whatsoever.

BIGGA IN EUROPE - HOLLAND
In Holland we presently have 12 BIGGA members, all of whom have received an invitation to attend our first ever meeting, which is organised to take place this month (September). Sponsorship will be arranged locally to cover expenses and whenever we feel payments need to be made these will be allocated - in order that we may operate on a professional basis. A report of our meeting will be sent to BIGGA HQ.

On a personal level, I have a visit to Scandinavia planned for October and will meet with Stig Persson, (journalist, member of the Swedish Golf Federation, Swedish Greenkeepers Association, and BIGGA), and visit his golf course in Sweden. David Golding (Greenkeepers Training Committee), has asked me to contact the Netherlands Greenkeepers Association to discuss and promote the GTC education programme, details of which were requested by the NGA via the Netherlands Golf Federation. I have spoken to the NGA chairman, Ties Straatman, offering him my assistance whenever it is needed.

FREDERICK ten HAGENORTH WEST
I have just returned from The Open at Royal St Georges, where volunteer greenkeepers assembled once more to form a greenkeeping support team. This gathering now appears to have taken on the role of an annual reunion, not only for greenkeepers from the British Isles, but also from Sweden and America. It also provides the opportunity to witness some of the finest golf one may ever expect to see - and from inside the ropes! The course was a credit to Derek Scarborough and his staff, who must be relieved that all their preparation is behind them, though they now have the nightmare job of getting things back to normal after thousands of trampling feet, tons of scaffolding and miles upon miles of cables have taken their toll on the course. But don't worry lads, you have about eight years before you start again!

Talking of well-presented courses, the NW section had the pleasure of playing their summer tournament on a well presented course at Warrington GC. recently. Les Kernott and his staff had the course in lovely condition and must be feeling pleased with all the kind comments, not only from greenkeepers but also from members of Warrington GC. I thank the club for their hospitality, the caterers for lovely food and, and Parker Hart, Rice Feed, and Rufford Top Dressing for helping to swell the prize table. The winner of the Reg Vickers Trophy was Neil Walfrey with a gross 73 nett 70. May I also congratulate Anthony Davies, head greenkeeper at Prestbury GC, who passed his M.G.C. and will be presented with his reward at the BTME in 1994. Well done, Anthony.

The next tournament will be the Autumn Tournament at Mere GC on Thursday 21 October. The usual arrangements apply, with soup and sandwiches served from noon 'till 12-30, followed by an 18 hole medal round, all rounded off with an evening meal and prize presentation. Your deposit of £10 must accompany an application to play, and the closing date for entries is 14 October. All applications to Paul Pearse, 1, Swan Close, Poynton, Stockport. SK12 1HX. Smart dress is essential. Preparing now to go to the National Tournament in Dumfer and the NW section will meet the Northern section in 'The Roses' match and retain the trophy.

Please don't let me down lads, or I will have to take some stick from Mick Hannam following last year's comments. Any problems or queries please ring 051 724 5412.

BERT CROSS

SOUTH WALES
This years Match Play Knockout competition, sponsored by PRO TURF Equipment of Carmarthen, has completed its first round, with the following results: Mike Jones beat Mike Richards on their tying of the knot pn July 24th, also to Andrew Jenkins and Emma on the birth of their 8th 4oz baby daughter, Laura Ashley. A warm welcome to all our new members, especially Judy Ann Weekes (our second lady member), Gary Johnston and James McKenzie.

A word of warning to those awaiting application forms for both the workshop and seminar at Cammington, College on 12 October and 23 November respectively - demand will be great, so get those forms back as soon as possible in order to ensure your place is reserved. Any news or information will be greatly appreciated, 'phone me on 07922 339232.

PETER LACEY

EAST SCOTLAND
I again had the pleasure of being one of the support team at this year's Open Championship at Royal St Georges. A great week was had by all, with Neil and his staff certainly flying the flag where BIGGA is concerned. It was nice to meet up again with all the old faces and already we are looking forward to 1994 and The Open at Turnberry.

Our annual Committee Match was held on 10 June at Royal Burgess, again sponsored by Scottish Grass Machinery. Our grateful thanks go to them. The Eddie Holt Trophy was won for the first time by 'yours truly' with a nett 71, though only on count-back. Our thanks as always to Royal Burgess for the courtesy of their course and clubhouse facilities, and certainly not forgetting Roger and his staff for the excellent playing conditions - 'twas a pity the weather couldn't be kinder.

Forthcoming events are the Autumn Tournament on 14 September at Ratho Park, the East versus North East match on 28 September at Goswick, and the Willie Woods Tournament on 19 October. Notification of these events will be issued shortly.

Don't forget to obtain your tickets for the annual Dinner Dance at Turnhouse on Friday 3 December. These are selling quickly, so don't be disappointed by booking late.

Winter lecture programmes are almost finalised and notification will be issued soon. The 'big one' this year is the Health & Safety lecture at Oatridge College, and golf clubs and members alike will receive information concerning this, as Health and Safety is the one thing that affects us all - we are hoping for a large turn-out.

I am pleased indeed to welcome new members to the section and hope that they will attend our many tournaments, lectures etc. Over the past five years, membership in the section has been on the increase and it is hoped that this trend will continue. There are still vast numbers who are not members and we are working on these. It is in everyone's interest to be a member of the Association, with the advantages far outweighing the disadvantages - ask any member.

I don't have to tell you of the dreadful weather we have all experienced. This has been the coldest, wettest summer I can remember, with many courses flooded and more closures during this year than any other. At the beginning of '93 I put in a new automatic sprinkler system and have yet to use it! Let's hope we see some sunshine shortly.

I am always looking for news for the magazine, so anyone with information should contact me, no matter how insignificant.

WILLIE BLAIR

SOUTH COAST
Details of our Autumn Tournament are as follows: -- Venue: High Post GC., Great Durnford, Salisbury. Date: Tuesday 5 October. Format: 36 hole Greensome. Fee: £13 per person. Closing date: 25 September. Teeing off: 8.30 a.m.

Each member is requested to bring along
The results of the Summer Tournament are:

1st P Baynton 95-24=71 (on last nine), 2nd S Sherry 94-21=73 and S Webb 93-22=71, 3rd A Johnson 101-28=73. The Head Greenkeepers Cup was won by M Pearce 93-18=75, and the Trade Prize by M Samuel 99-28=71. Two's were scored by D Neale and P Worster. Prizes were generously donated by Messrs Avoncrop, Rofley Brothers, Barenbrug, and Rigby Taylor – Thanks to them all.

It is hoped that we can continue with training programmes through the autumn and winter, with Pesticide Application, Chainsaw Maintenance & Operation, First Aid, and Health & Safety at Work all subjects which the average greenkeeper needs to be conversant with. The Pesticide Application course is one we need to work more on, as the majority of our members have never attended such a course before.

The connection between Alresford GC and BIGGA goes back a long way, which is much appreciated by members. I would like to place on record my thanks to all the officials at the club.

BOB DENNIS

SOUTH WEST

The thunderstorms of last month have now largely died away, leaving another problem – flies. I've noticed so many of the little devils swarming around the course. There is, you'll be pleased to read, a remedy which can be particularly useful when playing golf. The flies are attracted to cheap perfumes. The answer, therefore, is to purchase a bottle and sprinkle it over your opponent. This gives the immediate advantage of playing in a relatively fly-free zone!

Thanks are due to our sponsors, Parker Hart and Rofley Brothers, for their generosity. Peter Barry (Enmore Park GC) represented the sponsors and they also enjoyed their afternoon of golf.

It was a pleasure also to have Bill Young, one of our honorary life members, in attendance.

Bill has the distinction of having been both the head greenkeeper and club professional at Alresford in times past and has a fund of stories about golfers and their peculiar ways!

The connection between Alresford GC and BIGGA goes back a long way, which is much appreciated by members. I would like to place on record my thanks to all the officials at the club.

BOB DENNIS

LONDON

The Summer Tournament was held at Muswell Hill GC on July 12, and following a cloudy start to the day, the afternoon by all accounts developed into a splendid affair. The field of 37 competitors enjoyed a course that was in excellent shape, this clearly reflected in the high standard of golf witnessed. The Sta-Brite Shield was presented to Stuart Green, who scored 39 points. In second place with 37 points was Paul Cooper, this including a back nine score of 22 points. In third place was Mark Webb, with a score of 37 points. The nearest the pin prizes went to Doug Smith and Dick Dunne, both hitting excellent shots, with the longest drive being struck by David Paterson on the 16th.

Our after-dinner talk was given by Graham Paul from Sta-Brite, his presentation on water quality and pesticide contamination being extremely interesting and prompting many questions. Our special thanks to him for standing in at the last moment, also to Linda Exley and Sarah Clarke for their help throughout the day.

Our next golf event is at Brookmans Park GC on 6 October – so get those entry forms in!

TONY DUNSTAN

NORTH SCOTLAND

Well, another Open Championship has come and gone, and your's truly were the North members present, although ex North member Neil Metcalf was there also, as he is a member of the Sandwich staff. We flew down to Heathrow and fellow team member Ronan Mckewon took us down to Sandwich. Everything ran smoothly, thanks to HQ staff and Dave Wood.

This year's competition was in the South East region, whilst not forgetting the first tee 'Gensrais', Cecil George and Jimmy Neillson. One of the many highlights of the week was the Saturday evening football match against the Ring and Brumy chefs. The greenkeepers ran out as 1-4 winners and if Dundee United still seek a replacement for Duncan Ferguson, they should look no further than Paul Murphy! All in all it was a great, if sleepless, week with much done to cement European relationships (private joke!).

I would like to take this opportunity to congratulate support team member, Paul Seago, on his appointment to Gullane Golf Club, we welcome him to Scotland and wish him well there.

A new competition launched in Ross-shire and Sutherland Counties to find the Champion of Champions reached its climax at Tain recently. The brain-child of Brora's Robin Wilson, all Club Champions, County Champions and four-day Open winners were invited to compete in a matchplay tournament. The winner was Muir of Ord greenkeeper, Steven Macintosh.

Robert Hardie of Strathefper was the man on form in his club's one round Open. He aced the tenth hole on his way to a 69-8= 61 and first prize. This month sees our Autumn Tournament, Kinrara. We look forward to seeing Jim McCormack's course, where I'm sure there will be the usual large turn-out. Let's hope for a decent day weather-wise. I'll see you all there.

Good luck to the Scottish Team in the Hayler Challenge Tournament, to be staged later this month at Sand Moor, Leeds.

One new member this month, Stuart Griffiths of Tain. That's four out of five members of my staff in BIGGA – and I'm working on the other one!

Finally, congratulations to Dundee College for, at last, gaining approved status for Greenkeeping Education. It's good that the 'new' North section has an approved college within its area and we wish Graham Carr and the staff all the best.

IAN MACLEOD

NORTH WALES

First, I must apologise to Mr P Shaw of High Speed Oils for failing to include High Speed
