Our greenkeeper.

Truly way out in front, the T44 is the self-propelled gang mower. The only choice you need to make is 10" fixed or 8" floating heads with 6, 8 or 10 knives.

Ample power, advanced controls, weight transfer, four-wheel drive and differential lock combine to make this machine your perfect greenkeeper.

To proceed further in your quest for perfection, call us today for full details and to arrange a demonstration.

GREENKEEPER INTERNATIONAL July 1995 3
WE SAY

Travelling together or miles apart?

In the March issue of Greenkeeper International I wrote that it was time for greenkeeping to take the global view and I asked our international members to get in touch and make suggestions as to how communications can be improved.

As the summer (perhaps a misnomer) of 1995 passes I have still to receive one single suggestion in this regard. So at present we remain primarily dependent on contact at conferences/exhibitions together with the occasional foray at gatherings but it is essential that they result in broadening the base of BIGGA's international contacts. To date this has happened only spasmodically and there is a need to move forward. There has been a suggestion for an international column/page monthly in Greenkeeper International. Would this be welcomed and from where such it is down to you, our international member, would like to be involved.

For the last three years BIGGA has held a European Forum during the BTME in Harrogate. These forums have proved to be worthwhile gatherings but it is essential that they result in broadening the base of BIGGA's international contacts. To date this has happened only spasmodically and there is a need to move forward. There has been a suggestion for an international column/page monthly in Greenkeeper International. Would this be welcomed and from where such it is down to you, our international member, to filter them through to our Editor for inclusion in the magazine.

As this issue of our magazine reaches you, we will be on the verge of The Open Championship at St Andrews. Now if ever there is an international gathering then surely this is it. Equally The Open will as usual attract a cosmopolitan gathering of greenkeepers within our new setting this year, the Madras Rugby Club, situated near the 17th green and for the exclusive use of BIGGA. So don't go looking for the BIGGA marque! Here then is an immediate opportunity for greenkeepers from foreign lands to make their views known on international matters to BIGGA officials and staff. I will look forward to speaking with many of you. Don't let the opportunity slip. I know full well the concern of international members that they should receive the same value for membership as that enjoyed by their compatriots in the United Kingdom. We at Aldwark Manor feel frustrated that international developments are not happening at the pace we would wish. Together we must make things happen - let's set a target to make real progress in the next twelve months.

Company's practical training for students

Colleges are being asked to nominate greenkeeping students to attend turf tractor product appreciation classes run by Massey Ferguson/Iseki and organised by BIGGA.

With the emphasis on practical training, the four day courses are designed to give candidates a good appreciation of the technicalities of the selection, operation and maintenance of turf tractors and are likely to appeal to those students who have already shown an interest in machinery matters.

Massey Ferguson's Grass Equipment Division, which also distributes Iseki turfcare machinery in the UK, became a Golden Key member of BIGGA's Education and Development Fund in January and this latest initiative further underlines the company's commitment to greenkeeper training.

The courses will be run at three different college venues in Scotland, the Midlands and the South East between February and April next year. 30 student places are available and all costs will be funded by Massey Ferguson/Iseki.

Massey Ferguson's Gold Key Holder status was recognised with the presentation of its plaque. The presentation to Nick Kirby, Massey Ferguson's Grass Equipment Director, was made by BIGGA's Vice Chairman Dean Cleaver as he sat aboard a SF300.

College course tutors should contact Ken Richardson, BIGGA Education Officer on 01347 838581 with their nominations. Look out for more details in the September edition of Greenkeeper International.
Leading light shines brighter

René Orban has been promoted from his current position of Managing Director of Jacobsen E-Z-GO and Textron Financial Corporation (TFC) within the UK to the role of Managing Director European Operations Jacobsen E-Z-GO and TFC.

In his new role René will be responsible for the sales and distribution of the Jacobsen and E-Z-GO products throughout the whole of Europe including the UK and Eire.

Following the announcement René Orban said, “This is clearly an exciting time for the Textron companies in Europe following the acquisition by Textron of the ORAG Distribution Company earlier this year. This acquisition formed the merger of Jacobsen and E-Z-GO distribution and the incorporation of TFC in Europe.

“I look forward to pulling all of these group companies together to create a turf based company with European dimensions.”

René will continue to head up the UK operation in addition to his new responsibilities.

Stalwart dies

Captain Paddy Hamner, the secretary to the Honourable Company of Edinburgh Golfers from 1968-83 has died. He was 80.

Cut irrigation costs by planting tyres

An American entrepreneur has claimed that up to £45,000 a year could be saved on irrigation costs by burying old car tyres under the fairways.

It was reported in a recent issue of the New Scientist that Bob Henderson, President of Tire Farms, a Californian used tyre disposal company, had patented the Rain Trap System which comprised of a series of old tyres split around the middle and buried a foot underground the fairways where they act as wells. The idea is that water will remain where the roots need it rather than seep away.

It is estimated that 1.2 million tyres would be needed for an 18 hole course.

Tests have already been carried out by the Center for Irrigation Technology at the California State University into how long the tyres can keep an area of unwatered grass green and further tests are planned to establish whether the tyres would work their way to the surface or end up waterlogging the course.

Selsdon Park Hotel in South Croydon is the home to the first Bob Torrance Golf Academy.

The new academy, created under the guidance of Jack McMillan and built by Head Greenkeeper Simon Osborne and his team, was opened by the Mayor of Croydon. Unfortunately Bob Torrance couldn’t attend the opening have injured himself in an accident shortly before the opening so his star pupil Ryder Cup hero Sam Torrance, pictured, was on hand to represent the Torrance family.

The academy includes two fully landscaped pitching greens, an all weather practice area, two putting greens, a practice bunker and a five bay driving range with video analysis equipment.

With 170 rooms and a host of leisure facilities Selsdon Park Hotel is one of the largest independently owned country-house hotels in the United Kingdom and boasts a magnificent par 73 6473 yard course designed by five times Open Champion JH Taylor.
It's time for the programmed approach to turf disease control

'Greenshield' and 'Daconil' Turf is the best possible partnership to maintain disease-free turf. Two powerful fungicides give broad spectrum disease control including Fusarium Patch, Anthracnose, Dollar Spot and Red Thread, with safety to the grass.

'Greenshield' is the ideal product when the turf is growing strongly. The combination of the contact chlorothalonil and the systemic carbendazim controls disease for up to six weeks.

'Daconil' Turf is one of the most popular contact fungicides on the market with a proven track record for turf disease control during the cooler, slow growing months. Multi-site activity means fungal disease resistance has never been a threat.

Greenkeepers' opinions sought to shape policy

Greenkeepers are being called up to assist with a survey of pesticide usage on golf courses to be undertaken by the Central Science Laboratory, an executive agency of the Ministry of Agriculture and Fisheries. The information collected from the survey will be used to make estimates of the quantities of pesticides used nationally. This in turn will allow the Advisory Committee on Pesticides to answer questions on its usage and make recommendations to the Government upon which official policy can be based.

The survey group contacted and obtained approval to conduct the survey from the R&A, BIGGA, the golf unions of England, Scotland and Wales, Royal Holloway College and the European Golf Association.

"A number of courses throughout Britain have been contacted and some replies have already been received," explained David Garthwaite of Central Science Laboratory. "The quality of the completed questionnaires has been outstanding with extremely useful and detailed data being provided," he added.

However the survey group still require more returns in order to make the final report statistically valid and useful both to CSL and to the golfing bodies which have lent their support.

The group is interested in the total quantities of pesticides applied to fairway, green, tee and other areas of the golf course.

"Pesticides" includes insecticides, fungicides, herbicides, molluscicides, growth regulators, worm and mammal control (moles and rabbits) and repellents applied to young trees etc to prevent browsing.

It is intended that a full report on the usage of pesticides on golf courses will be produced and that a copy of the report will be sent to everyone who participated. All information collected is strictly confidential and data relating to individual courses will not be disclosed.

If you have recently received a questionnaire and have any queries on it or would like to take part in the survey please contact Joanne Hartley or David Garthwaite on 01582 715241.

Duke of York to open The Duke's Course

The new 18 hole course at St Andrews is to be known as The Duke's Course and Royal golf addict The Duke of York will attend the inaugural opening of the par-72 7,200 yard course on July 16, just before The Open Championship is played over the town's more famous course.

The course, designed by five times Open Champion Peter Thomson, is two miles inland from the Old Course at Craigton Park with panoramic views over the town and the coastline. It is St Andrews' first inland course and will add to the existing 99 holes of links golf the home of the game has to offer.

The course will be open only by invitation or prior arrangement until April next year when it will be available to the local community, general visitors and residents of the Old Course Hotel, the local community and visitors to the area.

Pictured is the 4th hole at The Duke's Course.

Outcome of Dunfermline's special meeting

The special meeting into the condition of Dunfermline Golf Club and the performance of the greenkeeping staff (see page 5 of last month's magazine) resulted in an agreement to put a course policy document in place.

"We had a very constructive meeting. It lasted an hour and a half and many views were aired," explained Secretary, Bob De Rose.

"The positive element of it was that it was decided to produce a course policy document and this is being prepared with Head Greenkeeper Ronnie Cunningham's agreement. We are now in a position to build for the future," he added.

Mr De Rose said that recently he had made a point of asking visiting parties what they had thought of the course. Their views, and those of the members, were that the course had improved over May and June and that it was now extremely tidy.

"It is fair to say there has been improvement on the course since the matter was first raised," said Mr De Rose.

Ronnie Cunningham agreed that the weather had improved since the end of May and that as a result the course had benefited.

"I'm pleased we are producing the course document and hope we will now be able to get on with our job of looking after the course to the best of our ability," he said.

Irrigation association swings into action

The European Irrigation Association has been launched with a view to defending the interests of the European irrigation industry, residential and consumer products and explain its role in a country's economy and development.

The Association membership is open to all professionals - manufacturers, dealers, installers or consultants. More details from: European Irrigation Association, c/o Multiburo, 58 rue Pottier, 78150 Le Chesnay, France.

Ransomes on the up

Ransomes has reported a substantial improvement in its trading position and a reduction in the Group's nett borrowings.

For the six months to April 1 operating profits more than doubled to £11.9 million with pre-tax profits standing at £5 million compared to a loss of £5.3 million for the same period last year.

Nett borrowings have also fallen from £20.7 million from £288 million in April '94 to £67.3 million this year,

Sunny Southturf
Summer at last arrived at Motspur Park on June 21 when the sun blazed down on Southturf. On behalf of BIGGA members, many thanks to David Wood and Geoff Hills for a well organised show.

GREENKEEPER INTERNATIONAL July 1995 7
Supervisory & Management Courses

Module 1. October 16 - October 20. Managing People
This week contains team building skills, interpersonal skills, leadership, time management and staff appraisal, computers in greenkeeping and a presentation by a top course manager.

Module 2. October 30 - November 3. Managing People
This week deals with planning and organising, estimating costs, budget forecasting, cash flow forecasting, managing budgets, project management, solving problems and relating costs to employers objectives and golfers requirements, producing a portfolio of evidence, computers in greenkeeping and a presentation by a top course manager.

This week deals with assertive communication, listening and questioning skills, influencing skills, grievance and discipline interviews, computers in greenkeeping and a presentation by a top course manager.

This week deals with the writing of letters, memos and reports, managing meetings, communication skills, presentation skills, collecting and recording information, computers in greenkeeping and a presentation by a top course manager.

This week deals with level 4 Management techniques including, the maintenance and improvement of service and operations, the management of change, project management, negotiation skills and quality assurance. Entry to this course is restricted to delegates who have completed three or more Aldwark Manor Management Courses.

Modules 1 and 2 could include outdoor practical exercises and delegates should bring suitable casual outdoor clothing. Protective clothing will be provided.

The NVQ/SVQ Level 3 courses are not cumulative and delegates can choose to attend one or more weeks so that over one to four years all the underpinning knowledge requirements of Level 3 could be met. Additionally, Level 4 courses will provide evidence towards the award of a Level 4 NVQ/SVQ. All course delegates and employers will receive an end of course summary. This could be used to provide evidence for NVQ/SVQ assessors.

Attendance at each year's course qualifies for eight credits towards the Master Greenkeeper Certificate.

The cost per week, including accommodation, all meals and tuition fees is £425 + VAT (£499.38) for BIGGA members and £490+VAT (£575.75) for non members.

GTC Grants
As these supervisory and management courses are approved by the Greenkeepers Training Committee (GTC), golf clubs with mature and Hands Greenkeepers who have never attended a management course, may be eligible to claim a grant of £150 per delegate per week from the GTC. Further details of the grant and an application form may be obtained from the GTC, Aldwark Manor, Alne, York, Y06 2NF. Telephone 01347 838640.

To reserve your place, complete the postcard in this magazine and return it to BIGGA, together with a deposit of £100 + VAT (total £117.50). The balance will be due for payment no later than October 1 1995. If a delegate cancels his booking prior to the course, he will be liable for the payment of the total cost unless the place can be filled by another delegate.

In order to provide a high level of instructor/delegate interaction, each course is limited to 12 delegates so book early.

Regional Supervisory and Management Courses
To allow greenkeepers to expand and revise the management techniques taught at Aldwark Manor and to make management training more accessible to all BIGGA members, we are planning to hold a series of residential management training courses which will be held in the Regions. The first two of these courses will be held in the Scottish Region, at Elmwood College. Each course will last for two days and will cover front line leadership skills, budgeting and finance. The cost of each course, including all meals and one night's accommodation is £50 to members and £150 to non members including VAT. The low cost is made possible by a subsidy for each course from the BIGGA Education and Development Fund making this exceptional value for money. To reserve your place, complete the postcard in this magazine and return it to BIGGA, together with a deposit for £10. The balance is due for payment no later than October 1, 1995. If a delegate cancels his booking prior to the course, he will be liable for the payment of the total cost unless the place can be filled by another delegate.

The first course will be held on October 16/17 and the second on October 18/19, 1995.

Master Greenkeeper Certificate credits
Attendance at each course qualifies for four credits towards the Master Greenkeeper Certificate.

Plans are well advanced for courses to be held in all four other regions and in Ireland, during February/March 1996.

If you have any queries or need more information, call Ken Richardson, BIGGA Education Officer, on 01347 83881.
Going up: next year's BTME now larger than 1995 event

In the last month eight more companies have committed to BTME '96 bringing the total number of exhibitors so far to 139.

Among the latest group are Driving Force Leisure and Headland Agrochemicals both of which are exhibiting for the first time.

The Strategic Marketing Alliance between BIGHA and the IOG means that if anyone exhibits at both Saltex in September this year and at Harrogate in January '96 they will be entitled to a 5% discount on stand costs at both events.

It looks likely that there will be a full turn out from the national golf unions who have been offered stand space at the exhibition.

"I'm pleased to announce that already we have had acceptances from the English, Welsh and Irish Unions," said Ken Richardson, BIGHA Education Officer.

The latest acceptances mean that 90% of exhibition space have gone.

"I'm pleased with progress so far. With seven months still to go the '96 event is already larger than BTME '95 which means that there will be even more for the visitor to see and, with an extended education programme, additional opportunities to learn," said Bill Lynch, BIGHA Sales and Marketing Manager.

"The average stand size in '96 is 12% greater than in '95," explained Louise Lunn, Exhibition and Marketing Executive. "This means that although we have some space still available it is going faster than ever."

Anyone thinking of exhibiting at BTME 96 should contact Louise on 01347 838581 now.

• Site plan: pages 22-23.

Ditch relics of past, say Americans

Have you ever considered what it must have been like to be the person who lit the gas street lights when electric ones were just around the corner? Or a bus conductor when one man operated buses were introduced? Or a hot metal compositor when journalists were issued with computers which meant they could input their stories directly?

Well according to the bimonthly Golf Course Superintendents Association of America publication Leader Board you should know exactly how those poor individuals felt.

The main front page story in the latest issue begins: "Q: What do a Featherie and a Greenkeeper have in Common? A: They both are old-fashioned and out-of-date."

It goes on:

"The featherie, an early ball, was composed of a leather cover stuffed with wet, compressed feathers and bears little resemblance to today's highly specialised and aerodynamic ball.

"The term greenkeeper has also become obsolete. The expanding responsibilities and specialised knowledge needed to manage a golf course has advanced the professional beyond 'greenkeeping'. "Correct terminology: Golf course superintendent, golf course manager, and director of golf course operations."

The story continues to explain that approximately 71% of GCSAA members have two or four year degrees; 24% of members are certified and 49% have certification as their long term goal; almost half of GCSAA members control maintenance budgets in excess of $500,000; 73% of members are involved in their local non-golfing communities and over 98% place importance on environmental research to help them protect land, water and wildlife.

Obviously on this side of the Atlantic we have course managers but there are still a great many Head Greenkeepers. Do you feel that the title "greenkeeper" is insufficient to convey the full extent of your responsibilities? Would you rather be, perhaps, a Deputy Course Manager instead of First Assistant or one of the American titles?

Write in and let us know. We could even be forced to change the magazine name to Director of Golf Course Operations International!"
Iain’s on... 

Scott MacCallum discovers that local knowledge proved the key to success in the Scottish National Tournament.

It wasn’t so much a long journey for many of the competitors who travelled to Royal Dornoch for the Scottish National Tournament but more of a pilgrimage. The course has long been recognised as one of the best in the world with many of golf’s superstars, including Tom Watson and Masters Champion Ben Crenshaw, both of whom are Honorary Members, making visits whenever their schedules allow. It is just its location, 45 miles north of Inverness, which has stopped it from gaining more widespread recognition.

However it drew Scotland’s greenkeepers like a magnet and rewarded them with a day unlike many the summer of ’95 had dished up. Sunshine and a brisk breeze meant the course was seen at its absolute, devilishly difficult, best.

It is not surprising therefore that the best scoring came from those who knew the course and the area best. Iain MacLeod of neighbouring Tain clinched the SGGA Challenge Cup for the best scratch with a magnificent 77 clinching it with a better inward half from George Patterson of Fortrose, another course not a million miles away. Third just a shot behind was Robert Patterson the Course Manager at Dornoch and the recently crowned club champion.

Iain MacLeod’s 77 was exemplary for two reasons. He was in the last group out when the wind was at its height and he succeeded in not being dragged down to the inadequate depths of one of his playing partners. Iain played magnificent golf despite having to witness some appalling stuff from this journal’s Editor, who thoroughly enjoyed his first visit to the course but found his Heath Robinson swing no match for the might of Dornoch off the back tees in a breeze.

The Royal Dornoch Club made everyone exceedingly welcome with Secretary John Duncan and Green Chairman, Rollie Biuck, both playing in the event and Captain Alan Ramsay on hand to present the prizes.

The tournament was magnificently organised by Elliott and Edna Small to whom a great deal of thanks is due and thanks must also go to caterer John Boyd and

Scottish Region Chairman Gordon Moir puts up the 1st watched by Rollie Biuck Royal Dornoch, Green Chairman.
