Onward and upward to the year 2000

John Deere and Co are the latest company to sign up as BIGGA Golden Key Sponsors and as Scott MacCallum discovered the greenkeeping industry can only benefit from the company’s increasing involvement.

My wife is becoming worried about me. Ever since joining BIGGA 18 months ago I have become a machinery anorak.

Whenever we travel anywhere I scour the landscape for tractors, triples, even combine harvesters and, ever keen to display my new found knowledge, I inform her of the name of the manufacturer and, if I’m really on form, the model. A name she is becoming more and more conversant with, admittedly with a degree of reluctance, is John Deere.

It is my aim that she will, in

Watermation
IRRIGATION SYSTEMS

GREENKEEPERS and COURSE MANAGERS
IS YOUR COURSE PREPARED FOR WINTER?

Now is the time to ensure you have a comprehensive maintenance contract to eliminate any nasty surprises when you want your irrigation going again next Spring.

Watermation can offer you one of three options – guaranteeing that there will be no frost damage to your system and giving you a detailed check of the equipment.

Any make of system can be serviced. Full details of contracts from:

Watermation Maintenance Ltd
Tongham Road, Aldershot, Hants. GU12 4AA. England Tel: (01252) 336838 Fax: (01252) 336808
time, become so familiar with the distinctive green and yellow liv -
ery that she can point out distinctive green and yellow liv-
time, become so familiar with the

to the computerisation of the John Deere company is to be given an insight into just what can be achieved when the implementation of computers is planned at the very beginning and there is no well meaning, but ill conceived decision to change course or computer system. Run from a mainframe in the United States every John Deere plant in the world is tied into the same system and everyone has access to the same information – even the John Deere dealers. "All product information is put on our computer – the Service Communications System – to provide an encyclopaedia of information on every product produced by the company over the last 30 years," explained Product Specialist, Ivan Miller. "If a fault is reported or some-
son's knowledge. It is all shared," said Ivan.

Other benefits from the system are that information can be relayed to dealers instantly by the "News Flash" service. That came into its own recently when a Gator was stolen from a dealership. Information of the theft was instantly sent to all other dealers and the culprit was caught when he turned up at another dealer to enquire about the value of a Gator. The parts department is equally high tech with the self proclaimed aims of providing market leadership in parts support, minimising customer down time and promoting sales. "Our role is as an emergency parts department with the main European department in Bruchsal in Germany," explained Distribution Manager, Antony Scott. "We hold 34,000 different parts in Langar and around £5 million worth of stock at any one time. In

Parts are held in stock for machines which go out of produc-
tion for a minimum of 15 years but if there is still a demand we will continue to produce the parts.

With what averages at $1 mil-
lion a day invested in research and development John Deere prides itself on the quality of its product and spares no effort in ensuring its excellence.

The company hosts an annual Feed Back Fortnight at its US Headquarters in Moline, Illinois, where recently six greenkeepers from Britain met with colleagues from around the world to pass opinion on John Deere designed prototypes so that their views could be gathered and incorpo-
rated into the production mod-
els.

British customers and potential customers also are encouraged to visit Langar to see round the plant and become more acquainted with product.

"The UK operation has a total staff of 96 and the Commercial and Consumer Equipment division has nine – agriculture still takes 88% of the total business," explained Graham Williams, Divisional Manager Commercial and Consumer Equipment. "We have four territory Sales Managers Richard Charleton in Scotland and the North; James Morley, West and Ireland; Richard Johnson, East and Philip Tong, South.

"Howard Storey is the new Golf and Turf Product Specialist in Europe having previously been in the West and Ireland. "Ivan Miller is the Product Spe-
cialist who works with Nick Ash-
man, the Area Service Manager while Tony Smith takes the orders," said Graham.

It is a tightly knit team, each dedicated to the success of the company and it would be a safe bet that every effort will be made to reaching the Year 2000 goal and John Deere will become even more firmly established as one of our car journey conversation top-
ics.

Richard Charleton, Scotland and the North Sales Manager, with his trailer
TEE-TO-GREEN QUALITY FROM JOHN DEERE

The John Deere line of golf equipment will literally take you from tee to green.

**2653**
Superior performance on rugged terrain with a precision cut, hydraulic reel drive and 66-cm (26-in.) ESP cutting units.

**3235**
Delivers ground-hugging fairway mowing performance with five John Deere-manufactured 56-cm (22-in.) ESP cutting units.

**955**
Choose from a complete line of gear- and hydrostatic-drive compact utility tractors. Plus front-, mid- and rear implements.

**1200A**
Excellent pulling and pushing power. Opens up a whole new era of bunker rake design. Many attachments available.

**3365**
Five 76-cm (30-in.) ESP cutting units combine to deliver the highest quality of cut over wide areas - from fairways to roughs.

**220**
This new walk-behind Greens Mower features an operator-presence safety system, more power, and a precision cut with 11-bladed reel.

**2243**
Petrol and diesel models both feature 13.4-kW (18-hp) engines and John Deere cutting units, for an exceptional quality of cut on your greens.

Count on us for world-class parts and dealer support as well.

NOTHING RUNS LIKE A DEERE

John Deere Ltd., Harby Road, Langar, Nottingham NG13 9HT, Tel. (01949) 863299 (answerphone)
Wentworth is probably the busiest club in the country, but Chris Kennedy and his team relish every action-packed day, as Scott MacCallum found out when he visited shortly before the Volvo PGA Championship.

Course pictures by Brian Morgan

For many Course Managers and Head Greenkeepers the arrival of the pros for a tournament, whether it be a small pro-am or a major Tour event, is the highlight of a season, or in some cases, a career.

The pressures are greater, the demands on staff much more intense, praise is shouted louder but the criticism cuts deeper. The courses must live up to the high expectations of the professional players for the short time around the championships. Wentworth Members, however, quite rightly, expect the best all year round.

Even at the biggest golf clubs such occasions are at most annual and the preparations can be put in place months in advance.

At Wentworth Club, though, it's different. There are two major tournaments every year - the Volvo PGA Championship in May and the Toyota World Match Play Championship in October... plus innumerable smaller pro-ams, society and company days and product launches. It means that there is always something coming up to keep Chris Kennedy and his team from letting, the grass grow under their feet.

"No-one else to our knowledge has got two tournaments every year", explained Chris, who works closely with the West Course's Head Greenkeeper, Graham Matheson.

The winter programme work is carried out during January and February - the only real rest time that the West is allowed.

"It's a bit of a disadvantage because most clubs can put greens away for the winter and have five or six months recovery period whereas we're talking just three months before another major tournament."

"Here we are in April and there's not a leaf on the trees and we've got five weeks to the PGA. After the tournament it takes three to four weeks to break down the tented Village which takes us to the end of June, providing a mere six to eight week fallow period before it starts to build up again for the Match Play."

The nutrition programme at the PGA has therefore to be looked at carefully. "You've got to push the growth on as it is early season but you want the grass to be on the wane rather than the rise and you want it not to be thinning out but healthy and vigorous and at the same time not growing too quickly when the tournament is on. We get the fertiliser programme set in April and use a lot of top dressing, a minimal amount of fertiliser and a lot of aeration which has to be done because of the length of the tournament day."

Although "peaking" twice a year, Wentworth Club has to be at its best primarily for its members, and the considerable number of pro-ams, celeb-ams, charity and company days held at all times of the year, every year. For many, playing at Wentworth is the highlight of the season. Anything less than perfect would be a great and lasting disappointment.

Chris came to Wentworth in 1989 having been Course Manager at Hagg's Castle, where he was in charge of five European Tour Championships and two Scottish PGA Championships, but there are the similarities between that job and this one end.

"Since coming down from Scotland, I've had to rethink my greenkeeping strategies and management processes. If you're dealing with what is simply a private members' club you can make decisions designed to safeguard the golf course, whereas here you've got to think about a broader customer base and manage those customer relations accordingly. You can't say 'it's wet or it's too frosty today, we'll close the golf course.' At times you've got to open the course even though it's against your better judgement. Then you've got to think quickly can we recover from the damage which has been caused. Luckily we have the resources to make the recovery happen," explained Chris.

By the end of the year Chris' team will have coped with a deafening 23 shotgun starts; admittedly a heavy workload, but this is compensated for by the fact that a third of them are charity days. This is the Club's way of supporting their fund-raising efforts.

"Whoever's big day it is, it is essential that their participants and guests leave with happy memories. We tailor the day to make it special. I sit on the planning meetings for these days and feed down the line to Graham and his crew."

Meanwhile, there are two other top quality golf courses, a par 3 course, a driving range, two practice facilities, plus 14 tennis courts to maintain.

The two major events of the year provide differing problems for the greenkeeping team. One, the Volvo PGA Championship takes in the final Bank Holiday in May and has a field of 154 players while the other, the Toyota World Match Play has just 12 players playing 36 holes with
spectators following at most four matches during the first two days and just two on the other two days. One bonus is that the tented hospitality Village is in the same place but on the downside it is laid out completely differently.

"We've asked if certain aspects could be the same, but the organisers have different marketing strategies", explained Chris. "The PGA Championship is the 'Ascot Week' of golf with a village green party atmosphere while the Match Play is a more commercial week where people visit, look at the sponsor's product, have lunch, be ferried out to watch some golf, come back and have afternoon tea", said Chris, who has close relationships with the European Tour whose headquarters are at Wentworth, and IMG.

As well as the PGA Championship itself, the entire week is filled with events which require the attention of the greenkeeping team. This year that started on the Sunday, a full five days before the serious competition began with an Andersen Consulting event with all their VIPs. On the Wednesday there was a Canon Shoot out with ten of the top players playing over nine holes of the West for charity, while on Thursday there was the Corporate Cup – there is no Pro-am at the PGA Championship.

"Whereas normal golf tournaments have a four day programme plus a pro-am, typically, we have nine or ten days of competition," said Chris, in a matter-of-fact tone.

At both the PGA and the Match Play the greenkeeping staff start and finish work in the dark as the first tee time in the PGA is 7am and the practice ground, putting green and pitching facilities have got to be prepared and ready for use one hour before players begin. "So we need upwards of 22 guys setting up course at 5am and the course has still got to be playing to tournament conditions at 8.15 in the evening."

There is a running crew of 24 for the PGA Championship and the preparation work cutting tees, surrounds, greens, fairways and semi rough, is all done before play every morning and then done again in the evening in case there is bad weather and it can't be done in the morning.

"People say 'why can't you get the greens lightening fast like Augusta?' Well, if you've prepared them at 5am and they are still being played at 8 in the evening, you're looking at a long growing period. The Masters has a smaller field of around 95 players.
There are similar problems in the Match Play to overcome. “You can get frost and freezing fog. Last year the first ball struck in earnest was at 1 I am and then they played two rounds”.

Chris, Graham and Bernard Gallacher OBE, resident Club Professional and the successful 1995 European Ryder Cup captain, are always looking at ways of changing and improving the course.

Chris elaborated, “The new bunkers at 18 were re-designed again in the winter of 1995-96 to make them much deeper. It was done with the Tour’s blessing and although we thought there would be great resentment from the players the view has been that it should have been done years ago.

We are limited, because we can’t add to the length of the Harry Colt design so what we can do is tighten up with new tees, bunkers and a reshaping of fairways.”

One of the examples of this is the mini forest which has been planted on the right side of the 8th so anyone who blocks his shot out will not have an easy path in to the green.

“The layout is a very good test of golf whether it’s windy or not, but the players all agree it plays even tougher if the wind is blowing.”

The course plays similarly for the PGA and Match Play. The world’s best players participate in both championships, and they know Wentworth well. There are subtle changes in the shapes of the fairways and pin placements because they are tougher for match play. We tend to use variations on tees more in the Match Play than we do in the PGA.

Green speed, height of cut for fairways, semi rough and rough is primarily all set up the same. We aim for both tournaments to have green speeds of something like 10.5 to 11.5. Between 10 and 11 for the PGA because it’s a longer tournament with more feet going over the greens and between 10.7 and 11.5 is what we aim for at the Match Play and so far we’ve been quite lucky with the weather and we’ve been able to produce the goods. We can’t stress how much the weather comes into it. We can put all the ingredients into the pot but if it goes cold on us there is not a lot we can do about it.”

The Match Play offers up some
Some people say there shouldn't be any trees on a heathland golf course but I disagree

difficult logistical problems to overcome.

"You can have 10-15,000 people watching just two matches and all hitting the tented village and clubhouse at the same time.

"We have a very good irrigation scheme and can now virtually control the bounce of the ball from the tee. Graham now has the facility to wet down the fairways, so provided the players hit the fairway, the ball reacts in the desired fashion. For example, making it spring forward to stop it in the landing area, particularly on a hole like the 17th with the big left to right slope. Seven years ago you couldn't have stopped a wedge on the 17th fairway.”

A new irrigation system was recently completed on the Edinburgh, installation took place during the 1995-96 winter, while a new scheme is also planned for the East. The aim is that all three 18 hole courses should be brought up to the same standard as the West. Other areas of development include the re-design of the driving range. Re landscaping will encompass total irrigation, while more bays will be added and the teaching facilities improved.

Over the years, nature has played its part in the re-design of the course.

"Some people say there shouldn't be any trees on a heathland golf course but I disagree. I think when Mother Nature does something you should try and work with her instead of having a constant tree felling programme. If you go out onto the Chobham Common end of the course – holes 8, 9 and 10 – there wasn't a single tree 40 years ago. Those that are there now weren't planted, they just appeared of their own accord. I think the course looks better for it.

Despite the vast experience of Chris and Graham like every other greenkeeper they are well aware that they never stop learning.

Chris said, "We're very lucky that we're part of a friendly industry and we can go and see how other people tackle problems, how they present the golf course and people will pass on pieces of information. I've been going to The Open since I was 14 years of age and I've always asked questions of greenkeepers. At the open Championship every year, BIGGA greenkeepers get a chance to see the examination paper in the front line by doing bunker raking, divoting and any other task which they are asked to do. Guys who have never been involved in a golf tournament in their life are now in the front line and see exactly how things happen. Then they go away and use what they have seen at the Open championship on their own golf course. That can only be good for their members. This is an education process which happens annually and I'm very pleased to say that along with Walter Woods, I was one of the people who started that off many years ago. It's great to see it going from strength to strength on an annual basis and presentation at small 18 hole courses is now better than it's ever been because they see how it's done at golf tournaments."

"The last six years at the Club have been very interesting and with more plans on the drawing board, the future is going to be every bit as exciting."

Things just never stop at Wentworth.

WHEN I'M NOT AT WORK

SO DEDICATED, THEY EARN THEIR STRIPES EVERYTIME.

Whatever the season, whatever the weather, this greenkeeper cuts a fine swathe through thick, uneven turf to produce the perfect fairway.

For the new Reelmaster fairway mowers boast many new, innovative features resulting in a cut like never before.

Rugged, powerful and durable, they have the lightest of touches. Their new L-I-N-K-S™ system of floating linkage and individual lift arm dampers hug the turf to get into dips and hollows for a close, all-over cut with no “bobbing”, even at speeds in excess of 7mph.

The Reelmaster 6500D, with its 5-gang mower, and the 6700D, a 7-gang mower, both offer impressive cutting technology with all-interchangeable variable speed, automatically controlled reels to handle fast-growing, tough seasonal grasses.

Quiet in operation thanks to Toro's advanced noise reduction, the powerful 38hp and 42hp diesel engines will help these machines reach inclines other mowers can't.

To win your stripes, give us a call and we'll walk your course with you and recommend the best machine for your needs.

You too can trust Toro expertise and quality. Simply telephone 01480 476971 and we'll arrange for a local dealer to contact you.

More and more golf clubs in the United Kingdom are now employing full time mechanics but with the obvious benefit of having someone on site to service and repair machinery comes the need to provide him or her with a workshop. This can range from a couple of spanners and a workbench to a fully equipped affair the equal of any dealer. However, one workshop recently visited in Finland would be the envy of even the best equipped here at home.

would you believe, a “dish-washer” for machine parts. Everything is designed with cleanliness in mind. There is a cold shower outside the front door so any chemicals can be washed off overalls - as you can imagine it is also the ideal initiation instrument for new members of staff. Oil is piped into the workshop and then drained into a tank in the floor while the Finnish made machine parts washer is ideal for cleaning mowing units and many other pieces of equipment.

Mechanic Matti Niskanen at Katinkulta, the excellent course which is a major draw at Scandinavia’s largest tourist resort, has everything he could possibly want from a workshop including, taking two to three weeks over four consecutive winters. The samples were actually kept in a freezer so they could be counted when the golf courses were not so busy. “The tests were useful because in some cases they showed just how little time there was to repair everything, ready for the new season. It can be days instead of weeks and this can come as a
And you thought you had it bad: checking for ice in Finland, a task carried out three or four times a year allowing nature to take her course.

This shows that the best results were obtained merely by brushing the greens, although the diagram clearly shows that vertical cutting, brushing and aeration all perform better than merely allowing nature to take her course.

Published with kind permission of the Finnish Greenkeepers Association.

You're on to a winner with Greenkeeper International

Find three tiny £50 notes - win a real one, for free!

Here we go with another chance to win £50 with Greenkeeper International!
All you have to do is take a look at this £50 note symbol. Now look through the ads in the Buyers' Guide section and spot three of them - they've been reduced in size, but they're there, somewhere!
Write down the names of the three ads where the £50 notes are located and send your entries on a postcard to: Note the Notes Competition, BIGGA, Aldwarke Manor, Aldwarke, Alne, York, North Yorkshire YO6 2NF, to be received by first post Friday October 25, 1996. The first correct entry drawn after that date will win £50. It could be you! Enter today - and note the notes!

Note: Judges' decision is final. Not open to BIGGA staff.
