As recently as 20 years ago you could go to a golf club and it was quite possible that not one of the staff had any formal greenkeeping education.

pressure so I spoke to the club management and told them that if the right position came along I wouldn't let the club down. In fact I delayed going to Churston so I could do the second TPC in '81.

Coping without a regular adrenalin fix at the friendly Devon club was not always easy but it was BIGGA which filled the void and in particular the demanding role of Regional Administrator. "That took up a lot of time and gave me what I was missing from not having tournaments."

Looking at the industry as a whole Gordon is convinced that the big breakthrough came with the advent of quality education.

"As recently as 20 years ago you could go to a golf club and it was quite possible that not one of the staff had any formal greenkeeping education."

Gordon has a fund of stories to tell some about his own career and some about the industry in general.

"I remember subscriptions at Birkdale going up to £50 per year. The assistant secretary came out onto the course and said 'you'd think we'd robbed a bank. It's only the price of ten packets of fags a week.' Now stop and think about the price of cigarettes now - about £2.50? That would make membership £1,300 a year.

He also makes a valid point about golf club members and their perceptions of their own course.

"A member has played his own course so often that he knows it so well - the line and what the hole looks like and does so he starts to look at the little things - small marks on the fairway or indentations on the green. When he goes to a visiting course he's more concerned about the panoramic views and the layout of the holes. He'll come back talking about how superb this course was and all it is is a different way of viewing a golf course."

It's that type of thought provoking conversation you get from Gordon Child and you can be sure that during his period of office many more people will get a chance to engage him in it.
Thank you

BIGGA SOUTH WEST AND SOUTH WALES REGION PRESENTS

WESTURF

29TH APRIL, 1998
MAKE A DATE FOR THE WINDOW ON THE WEST

There will be lots to see and try, putting and chipping competitions to enter. It is a great place for greenkeepers, Chairmen of the Green and Traders to meet and exchange ideas and talk in depth about products and also a chance to compare prices and quality. There will be machinery to examine and try out and a great competition to enter on the day with great prizes. The major colleges in the region will be represented and you will be able to discuss education opportunities in depth.

There will be a warm welcome in the BIGGA hospitality tent.

It is the 10th birthday of WESTURF - come and have a glass of wine and a piece of anniversary cake and meet your Regional Board, Regional Administrator and National Chairman who will be delighted to meet you.

Westurf will have a whole new look this year - put the date in your diary -

29TH APRIL, 1998
LONG ASHTON GOLF CLUB 10AM - 4PM

New this year - come and meet the experts. Consultants include representatives from Symbio; Dr Brian Clifford from Astara; Peter Winter from STRI; John Mullins talking on water management and representatives from the colleges on education. Full list of consultants in next month's Greenkeeper International.

FURTHER DETAILS FROM PAUL HUMPHRIES ON 01363 82777
Historic Royal Mid Surrey suffered badly in the recent drought but some extensive work has brought about a transformation as Scott MacCallum found out.
There is an old folk song which must make all publicans wake up in the middle of the night in a cold sweat, before realizing that it is no more than a horrible nightmare. I am convinced that the sad ballad, "The Pub with no Beer", must have that effect on the men who pull the pints.

Looking at other areas where equally horrific songs could bring about the heebie-jeebies you might get "The Hospital with no Nurses" or "The Cinema with no Films" or "The Football Team with no Players" - although, in the last case, there are supporters up and down the country who believe they live through such a case every Saturday. In golf, the haunting refrain of "The Course with no Grass" would induce shivers up the spine of many greenkeepers and, until recently, one of these would certainly have been Allan McDougall, Course Manager at Royal Mid Surrey, who came close to facing up to the reality of just such a situation.

When Allan took over at the Richmond club a combination of drought and no fairway watering system had conspired to leave the course in the middle of a drought, as bare.

"I must say now that the membership was very understanding because it was not the first time that Royal Mid Surrey had faced that type of problem," he explained, "My predecessor, Bill Lyon, had gone a long way to solving the fusarium and thatch problems on the greens but, while we still had patches of bare grass on the greens, there were large dead areas, the same as Royal Porthcawl experienced during the Walker Cup in '95.

"If the greens were bad the rest of the course was causing just as much concern. At the time we didn't have a green blade of grass left on the fairways, semi rough or rough and the problem we had was, 'how do we bring it back?'.

"My view was that if we didn't have grass on the fairways there wouldn't be any putting on the greens. If you don't have grass no one comes and plays, and there are 13 greens staff, and all the clubhouse staff, relying on the club for their wages. It would all go down the Swanney," said Allan.

A native of the Isle of Bute on the West coast of Scotland, and the son of a greenkeeper, Allan's arrival in 1970 had been done the proper way. "I knew the soil temperature was high and that the seed would take right up to the end of October, so it was a case of sitting there and knowing that the job had been done the proper way.

If Allan had been praying his pleas were finally answered at the end of September when they got a week's rain. "It was never upgraded and as a result we found ourselves in an ever decreasing circle. We had a 17,500 storage tank and while originally we could water the greens every night and the tees every second night latterly we couldn't afford to water the tees and they died. It was a case of overwatering them more or less every autumn," explained Allan, who in his golfing prime played off 1.

The original system greens only system had been installed in 1974 and extended to cover the tees. "It was never upgraded and as a result we found ourselves in an ever decreasing circle. We had a 17,500 storage tank and while originally we could water the greens every night and the tees every second night latterly we couldn't afford to water the tees and they died. It was a case of overwatering them more or less every autumn," explained Allan, who in his golfing prime played off 1.

The system had been installed in 1974 and extended to cover the tees. "It was never upgraded and as a result we found ourselves in an ever decreasing circle. We had a 17,500 storage tank and while originally we could water the greens every night and the tees every second night latterly we couldn't afford to water the tees and they died. It was a case of overwatering them more or less every autumn," explained Allan, who in his golfing prime played off 1.

The system was up and running in April last year and Allan has already enjoyed the results of the control he can now exert. "We are able to control our own ecosystem. Last summer we were putting on anywhere between 70,000 and 160,000 gallons a night."
He seeded using a 25% Barerown (Slender Sleeping Red Fescue); 25% Baroxi (Chewings Fescue); 15% Limousine (Smooth Stalked Meadowgrass) and 5% Baron (Smooth Stalked Meadowgrass) and 20% Highland (Brown Topped bent) mix in September last year to make use of the heat and is recommissioning the irrigation system in March so he is ready to reseed again in April. We also Sub-Aired, hollow cored and vertidrained every fairway and when I can get a tractor on them without marking I'm going to slit them four or five times.

"For the next three years this will be an on-going programme and I have warned the committee that this is not a one-off cost.

"Once we've completed and got a density of sward we'll back off and verti drain every year, Sub-Air every second year and hollow core every third year," said Allan, whose own son has joined him on the staff to become the third generation McDougall in greenkeeping.

The effort that Allan and Royal Mid Surrey has put into its fairways is something which is being replicated throughout the country while a number of nearby clubs are in the process of installing new irrigation systems.

"More attention is now being paid to fairways and it is great in this instance to see that work being combined with a new irrigation system which brings about more reliable results," said John Bradley, UK Sales Manager for Barenbrug.

In conjunction with the fairway work Allan has devoted a great of time to improving the greens which had suffered in '95 - and been identified by David Stansfield - as suffering from Thatch Fungus.

"The greens had tended to be wet and very susceptible to disease and Bill (Lyon) had a problem with a film of white lead under four or five of the greens," revealed Allan, who added that Bill had been good for the club as he had improved the machinery provision and encouraged the committee to think along the right lines.

"When I came in, the verticut reels were non-existent. I bought new ones and went out to the 10th green and emptied the boxes 32 times - that's 96 boxes of grass. I took out of the 10th green," said Allan, who is a great believer in the hands-on approach, spending the vast majority of his time out on the course and keeping his paper work to the end of the day.

"Every green got the same treatment. Now we vertiut every Monday it is possible to do so and we've bought another set of reels so we can work with two machines. It is that important to get the thatch under control.

"They are not the best draining greens in the world and this spring I'm going to have to hollow core again, and really attack them with the verticore reels, because they haven't drained well again this winter."

Allan is acutely aware of the problems which will arise should legislation rule out the use of pesticides in the not too distant future.

"There is no point in saying we'll go back to the old methods because they are not going to be available either. There won't be Lead Arsenic or Mercury. We're all going to have to learn the job again...on the hoof."

Troubled with worms and with an ever decreasing armoury a company told him recently that they were looking at curry powder because worms didn't like it.

"The biggest problem is how to get rid of the smell and if by doing that it has to go through a process which makes it also chemical it will fall in the same category as the others."

He is working, and having success, with organics through Symbio and Soil Life.

"This autumn while everyone has been spraying we've only had to do it once. So we are hopefully getting fusarium under control."

It all means Allan can sleep relatively soundly knowing that nowadays the grass is greener on his own side of the fence.
A word which could lay claim to being the most widely used worldwide came into being at the King's Observatory which is a recognised feature in the park as you play Royal Mid Surrey.

The universally used word which came out of the King's Observatory was OK. The building was used to determine true north with two posts one on what is now the golf course and the other at nearby Twickenham.

Among the jobs performed there was checking the accuracy of time pieces. Those which passed muster were stamped "OK" for Observatory Kew.

"There was a time when Mid Surrey golf course was internationally famous for the excellence of its greens. No royal lawns were ever more cosseted that these, being cut daily (twice in summer), rolled, swept, dressed and nourished with human zeal by a dour Scot named Peter Lees. He affirmed that he could turn it into a first class course in five years provided he was given a completely free hand. Wisely, the committee recognised a maestro in the art of green-keeping, and gave him the go-ahead. Acting on his advice the club arranged for a flock of sheep to graze the course every summer. Their droppings contributed to the rich texture of fairway and green.

"Being a Scot, Lees was no mean golfer; he and JH played regularly together, and during the round they would decide on certain policies for the greens, then inform the secretary who saw to it that the committee endorsed them. In 1915 after a disagreement with the committee Lees resigned and went to America to a similar post with a much higher salary. He was responsible for laying out and maintaining five courses round New York. Sadly, in 1923 he died from pneumonia."
