Friends and Foes... under the microscope. Crippling turf diseases like Fusarium Patch, Red Thread, and Dollar Spot are easy prey to the systemic fungicide Rimidin*. Having both a protective and curative action, Rimidin is fast acting, long lasting, reliable and cost effective. Yet Rimidin has been proven safe to those all-important beneficial soil bacteria. Take a closer look.

Rigby Taylor Limited, Rigby Taylor House, Garside Street, Bolton, Lancashire BL1 4AE. Tel: (01204) 394888 Fax: (01204) 398379.
Rimidin contains fenarimol. *Rimidin is a trade mark of Dow AgroSciences. ALWAYS READ THE LABEL. USE PESTICIDES SAFELY.

The wonderful thing about Tiger

It was a wonderful experience to be at St Andrews during The Open and watch history being made. Only four people have completed the modern Grand Slam, and the last time it was achieved was in 1966 by Jack Nicklaus. Therefore, what we witnessed on the 18th green of the Old Course, is not something which comes along every day of the week.

Tiger Woods is an absolute phenomenon, and the impact he has made on golf cannot be underestimated. He has been smashing long-standing records all his life, and to achieve the winning margins he manages against the best of the rest, when golf is regarded as having more strength in depth than in any other time in history, is truly remarkable.

He currently holds three of the four Majors - Vijay Singh has the Masters - but on the form he has shown recently, the once fanciful thought that all four could be won in the same season, no longer seems such an out and out long shot. In fact the realistic odds on him doing it at some time in the next ten years would be pretty short.

For golf to possess the number one personality in sport at the moment, is great for the game. There is a body of opinion that he is simply too good, and that his winning on such a regular basis is monotonous. Indeed this year’s Open did lack a bit of excitement and there was a degree of inevitability about the outcome from very early on. But you can’t blame Tiger for that. It is the rest who are not good enough, and the players who recognise this quickest - and they do exist - are the ones who will make the biggest inroads into the ability gulf.

It will move golf, as a whole, onto a new plane, and the modern breed, led by Tiger, will “play a game of which I’m not familiar” as Bobby Jones said of Nicklaus.

The popularity of golf does move in quantum leaps. We had Arnold Palmer, perhaps the last golfer to have been the most popular sportsman in the world, putting The Open back on the map in the early 60s; we had the arrival of the young swashbuckling Seve Ballesteros in the late 70s and then Europe’s historic first Ryder Cup win in ages at The Belfry in 1985. Each of these moved golf on to a new level of popularity and we can expect the same with the impact Tiger has made on the game all over the world.

Golf must be ready for the influx of a whole new group of people wanting to try the game and the more enlightened golf clubs will open their doors to them.

That will be good for all BIGGA members because the more popular the game, the more money will come into it, and the more resources you will be given to do your job. Stand back and await the invasion.

Scott MacCallum

Amazingly, some species of fungus are hugely beneficial to your turf.

Mycorrhizal fungi develop a mutually beneficial relationship with turf roots for effective nutrient exchange, and increased resistance to drought, insect pests and disease.

As a result, turf associated with Mycorrhiza tends to be healthier.

You'll be pleased to hear then, that Rovral Green leaves these 'friendly' fungi completely unharmed.

You'll also be glad to know that Rovral Green is still as effective as ever at controlling the harmful species like Fusarium, Red Thread and Dollar Spot. No wonder it's still the UK's No 1.

Rovral Green - it thinks for itself.
Ransomes name leaves the golf arena

The Ransomes name which has been synonymous with golf for almost as long as courses have been professionally maintained is to be lost to the game.

In a major new strategy by parent company Textron the Ransomes brand is to be linked to the municipal market while golf will come under the Jacobsen banner. It will mean a phasing out of the familiar green machines on golf courses to be replaced by the orange of Jacobsen.

"When we looked at our position in the market sectors it became clear that the Textron brands were not as clearly defined as we thought," explained Harold Pinto, Managing Director of Textron Turf Care and Specialty Products.

They looked at three options. Changing the corporate colour for all machinery to Textron blue; branding the premium products as Jacobsen and the cheaper brands as Ransomes or splitting the two brands under the Textron banner so that they had Golf - Jacobsen, orange and Municipal - Ransomes, green.

"Before going ahead we spent a lot of time talking to people in the industry including some of our biggest customers at St Andrews and Gleneagles Hotel and they were all extremely positive about the move," said Harold.

The 120 products in the current Turf Care and Specialty Product portfolio will remain intact with machines being repainted and rebranded to fit their new market. For example the Ransomes G-Plex II becomes the Jacobsen G-Plex II; the Ransomes T-Plex 180 becomes the Jacobsen T-Plex 180 and the Ransomes Fairway 305 becomes the Jacobsen Fairway 305.

"Our aims were to present a simple message to customers, eliminate in-house brand conflict and provide a more specialised sales support service," explained Neil Woodfin, the company's recently appointed Marketing Director.

While Textron undertook research before announcing the change they are still aware of the potential dangers.

"There is an element of risk about it and we did think long and hard about it before going ahead," said Harold. "We announced it to our work force at a recent employee meeting and they were positive although there is some sorrow that the Ransomes name will be lost to the golf market."

Major environment award for BIGGA

BIGGA has received one of the coveted Green Apple Awards 2000 for Environmental Best Practice. The trophy will be presented during the Gala Prize giving at The Cafe Royal, London, on 1 August with Environment Minister, Michael Meacher, in attendance.

BIGGA is at the forefront of promoting an increasing awareness of the positive environmental impact of golf. The Association has a key role in stimulating action and debate in relation to the 'Committed to Green' initiative throughout the European golfing community.

For the past four years, BIGGA in conjunction with Amazone Ground Care and, for 2000, the Royal and Ancient Golf Club, has organised and run the BIGGA Golf Environmental Competition. This has developed into a major competition for golf clubs and BIGGA believes that through this competition it can greatly advance the message of environmental responsibility and stewardship to golfers, greenskeepers and trade companies as well as impact on the environmental and general media.

At BIGGA we are delighted to have received this award. It recognises the commitment of both members and staff in environmental matters and I believe that this award recognises that the game of golf is taking a lead in serving as a role model for good environmental practice," said Executive Director, Nell Thomas.

Below: The former Ransomes Fairway 305 now sports the distinctive orange Jacobsen livery as a dedicated golf mower

S West & S Wales Region set to go supersonic?

An approach by South West and South Wales Regional Administrator to Amenity Technology to investigate the possibility of the company sponsoring transport to BTME 2001 has revealed that the Region's members may be in for a whale of a time on the journey north.

In reply to Paula Humphries' letter Amenity Technology Managing Director, Carl Crome, wrote the following:

Dear Paula

Thank you for your letter dated 12th June regarding our sponsorship of the coach to Harrogate. We have also been investigating other modes of transport with some interesting results.

For speed of transit we have looked at the option of a coach trip to Heathrow, and chartering Concorde for a swift five minute flight to Leeds airport. Alternatively for a little extra expenditure the trip can be extended via Dublin to allow the plane to reach supersonic speeds. The cost of this would be £125,000 and, as agreed, we would be pleased to fund 50% of this.

The second option that we have investigated, is, in my opinion, more financially viable, and would also be more enjoyable for your members. This involves chartering the new luxury cruise liner Hedonism III. Sailing from Portsmouth the liner will stop at Calais allowing everyone to purchase duty free items before docking in Grinsby, for transit to the Harrogate show via a free courtesy coach. At only £99,000, this is in my opinion a 'steal' and, as above, we would be pleased to top up 30% of the costs. Naturally our offer is subject to each BIGGA member attending placing an order of £10,000 each.

I trust that you will find these options of interest and if you would like any further details then please do not hesitate to contact me.

Best regards
Carl Crome
Sad passing of Ron Whitehead

Ron Whitehead, until recently Head Greenkeeper at La Muye GC, on Jersey, has died after a short illness.

Ron, who was 68, retired to Skegness two years ago but in that time designed a golf course for a Jersey-based syndicate at Tattershall Castle, in Lincoln. He had started work on the construction of the course when he was taken ill.

He had started his greenkeeping career at Beauchief GC and worked at both Dore and Totley GC and Wheatley GC before moving to Jersey.

He is survived by his wife, Pauline; sister, Marvis; son, John and daughter, Deluxe.

New MD at Stihl

Peter Baker has retired as Managing Director of Andreas Stihl Ltd on the grounds of ill health.

Martyn Thomas, the newly appointed MD joined the company at the beginning of May and the formalisation of his appointment as the new Managing Director takes immediate effect.

As head of the STIHL operation in the UK, Peter Baker has been a key figure in the industry for over 20 years. His retirement, which had been planned and announced for December of this year, has been brought forward to allow him to concentrate on recovering his health and thus fully pursue his active plans next year. Friends and colleagues throughout the organisation wish Peter a full and speedy recovery.

Martyn Thomas' first months in the business were spent visiting the company's global headquarters in Germany and working closely with senior management to ensure the smooth transition of his role for customers, suppliers and staff.

Previously with Mitsubishi Electric Europe, Martyn was Divisional Manager responsible for the significant multi-million pound Industrial Automation Systems business - a major supplier of control systems to manufacturing industries throughout the UK.

Prior to working for Mitsubishi Electric, Martyn spent 15 years with DuPont, the US based chemical company in a number of sales, marketing and technical roles. Since graduating from Bristol University in 1977 with a First Class Honours Degree in Chemistry, Martyn has lived and worked in Germany, Switzerland and the USA, and has travelled extensively throughout Europe and Japan.

Daniel returns to STRI

A former STRI employee has returning to Bingley, following the loss of three turfgrass advisers in June.

Daniel Binns, previously employed as an STRI Research Officer in Soil Physics, is currently working as a project team manager for a community environmental programme operating a recycling business.

Daniel will be joining Henry Bechellet, also a former STRI Turfgrass Agronomist who re-joined the Institute in May.

Sisis record a busy year after merger

A year on from the company's take over of Huxley's, Sisis has completed the extensive consolidation work and is now ready to face the future with confidence.

"With ourselves based in Macclesfield and the Huxley headquarters down in Hampshire it was a logistical nightmare," explained Lynn Hilton, who added that she believed the company now offered the largest single range from a single company in the world.

A team including joint Managing Director, William Hargreaves; Operations Manager, John Arnold, and Design and Development Manager, Brian Hartley spent three months at the Huxley site ensuring a smooth change over.

"Some 40 wagon loads of parts came up from Hampshire and all had to be logged and found space in the existing storage here," she explained, adding that a recently built mezzanine floor will help to alleviate the congestion.

The "merger" of two of the best known British companies in the fine turf industry made sense from an economics of scale factor but also because Huxley was a grass cutting specialist whose portfolio of products fitted nicely into Sisis' wide range of products.

Since the purchase of Huxley's, the Sisis staffing numbers have increased to around 77.

Huxley's had around 30 products in its range and Sisis will be concentrating on around 12 of these - the other 18 being covered by products in the existing Sisis range.

"On a few instances we shall be continuing with the Huxley machine and dropping the Sisis one," said Keith Vertigan, the UK Sales Manager.

"It is good to be getting back into grass cutting which Sisis did 20 years ago," added Keith, who is relishing the task of selling the now expanded Sisis range.

Sisis now export to 42 countries and to every continent while the recently formed outlet in South Carolina, under the stewardship of Ian Camp, is making headway.

Although the Huxley name no longer appears on machines Sisis have retained the familiar burgundy colour for the grass cutting machines.

"It was felt that burgundy was a better colour than our usual black and yellow colours for grass cutting machines," explained Lynn.

Martin Cook, one of the former Huxley staff who joined Sisis, drives one of the Huxley machines which now carries the Sisis name.

New storage system increases efficiency

The Inverkeithing based company, Textron dealer Scottish Grass Machinery has invested £30,000 in a storage facility for parts to dramatically increase the speed and efficiency of their distribution and after sales support.

The Inverkeithing based company, part of the SGM Group, purchased the giant-sized Kardex Industriever as part of its constant drive to improve customer service as the machinery operates a carousel enabling quick and easy access to more than 10,000 stored parts.

"Time is of the essence in meeting customer demand. It now takes seconds to access a part using this piece of machinery. This means we are able to provide an even more efficient maintenance and support service to our customers. It has also reduced the floor space required for parts storage by around 60%, which we now use as additional workshop space," said SGM Managing Director David Mclnroy.
Porsche efficiency at Antonio Carraro

Technicians from Porsche in Stuttgart have begun an important collaborative project with Antonio Carraro as part of the Padova firm's on-going development.

This project with the German firm fits into the Company's wider strategy. During the last three years Carraro has made a major commitment designing and developing tractors to form the Egxi series. They have also constructed a new manufacturing plant and further developed their centre for study and research.

The intention is to optimise on these investments by further developing manufacturing processes and commercial methods using information technology at every level.

In this first stage Porsche technicians have reduced production times on the old assembly line by re-organising the warehousing to achieve a just-in-time process. This has resulted in work on the assembly line having fewer interruptions and creating high quality control at every stage.

The training system advocated by the Porsche technicians has the individual at its centre. Each person is made to feel actively part of the construction process and is allowed to work with a high degree of autonomy. This results in an increased sense of responsibility and greater personal satisfaction.

These changes have generated a great deal of enthusiasm for the project and for the training which it involves.

Charterhouse Turf Machinery Ltd are the sole importers of the Antonio Carraro Tractor range.

New faces at Textron

Selina Flynn has been appointed Communications and Promotions Manager at Textron Turf Care Specialty Products. She will be responsible for the planning and implementation of Textron's marketing activities throughout Europe, the Middle East and Africa and will report to Neil Woodfin, the former Turf Care Product Manager appointed to Marketing Director earlier this year.

Selina joins Textron from a marketing communications background having worked in East Anglia for Volvo Commercial Vehicles and latterly the US-owned electronics company Wavetek in Norwich. Previous to this Selina lived in Brussels and worked as an interpreter and translator after gaining an BA in French and European Studies at Keele University.

She now lives in Norwich and having travelled to many parts of the world enjoys weekend breaks in Europe as often as a busy work schedule permits.

Tim Lansdell has joined Textron as Product Manager, Turf Care and Tractors and will be responsible for product development and promotion of the Ransomes Jacobsen, Cushman and Ryan turf care products throughout the world and the Iski tractor range in the UK.

Tim obtained a degree in Agricultural Engineering from Silsoe College in Bedfordshire and then joined Ford Tractors, now New Holland, as a Product Demonstrator. During his 16 years with the company he was promoted to work in the Training Dept before being appointed a Product Marketing Manager, a similar position to his current job at Textron.

He lives in Chelmsford with his wife and daughter and in his spare time enjoys an active lifestyle, skiing in the winter months, bike riding in the summer and renovating his home.

Royal Inverdivot GC... by Tony Husband

Can I have a word Nigel?  
Sure.

You didn't tell me you could spell  
What do you mean?

Sage.

You are the only person I know who can spell it.

You did it again.

And you are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.

You are the only person I know who can't spell it.
TGA's one-day practical courses

A series of one-day practical courses was held recently for members of the Turfgrass Growers Association (TGA) looking to maintain the continuing rise in the standard of cultivated turf.

Arranged and presented by independent turf consultant and agronomist, Robert Laycock, the courses took place at centres in Lincolnshire and Kent and were attended by managers and field staff from TGA members located in the north and south of England.

The principal theme of the courses was how to assess turf to the TGA quality standards. Produced in 1996, the TGA standards lay down a number of criteria that need to be met by good quality cultivated turf used in general landscape situations. Under this voluntary self-certification scheme, participating turf growers have to complete and provide a written declaration that the specific turf being supplied to the customer meets all of the requirements set out in the standards.

"By the end of the course, participants should be in a position to complete the TGA declaration with confidence and be able to use the equipment necessary to make a number of simple turf measurements," explained Robert.

The course also involves brushing-up on the identification of individual grasses and provides an insight into the methods of assessing turf, both on the roll and in the field.

According to Robert complaints about turf quality have been one of the most common problems dealt with by Trading Standards officers. However, the rapid demise of pasture or meadow grass, and the steady growth in the area of cultivated turf being harvested in the UK, principally by TGA members, means that quality standards are on a continuing upward path.

"The higher the quality of turf produced, the fewer the complaints from customers," he concluded.

Grass Science consultancy attracts new staff

Grass Science, a leading UK based sports turf and environmental consultancy has appointed two new staff to their operation.

Andy Cole, formerly with the STRI, joins as Senior Agronomist and will cover Central England and North Wales while Noel Mackenzie (also formerly with the STRI) joins as Senior Agronomist to cover Southern England and South Wales.

"These appointments are an integral part of the continued expansion of our consultancy services. It also enables us to further consolidate our policy of working closely with our clients to ensure that top quality results are achieved," said Brian Robinson, Director of Agronomy for Grass Science.

Lindum Plant appoint Scottish agents

Lindum Plant Nutrition has expanded its operations over the border, following the appointment of Greentech (Sports Turf) Ltd. as its Scottish agents. Responsible for developing the Scottish market, Greentech, now in its third year, has a rapidly expanding customer base, and a three man board, whose members have jointly acquired over 60 years experience in the industry.

Kevin Brunton, one of the directors explained that the two divisions of the company, construction and supply, apply to all sports played on natural grass.

"We were looking for a good after care maintenance programme for our customers and Lindum Plant Nutrition offers basic soil chemistry with no gimmicks, backed with sound products," he commented.

Lindum’s David Snowden said that the fact that Greentech had quickly established an enviable reputation, and had two strings to its bow, made the company ideal to develop Lindum Plant Nutrition in Scotland.

Steve’s new pastures

Steve Evans, for the last nine years Deputy at St Enodoc Golf Club and a well known BIGGA member, has taken up the post of Head Greenkeeper at Yelverton, in Devon.
