THE FAST WAY
TO TOPDRESS AND GROOM YOUR TURF

The Greens Groomer's Patented design uses 14 separate brushes to move the sand in all directions, gently rubbing it in and filling aeration holes without scuffing or bruising the turf.

"It does an excellent job and the faster you go the better it does it. I've also used it to brush the greens for extra speed.

Mr A Cale, Ifield Golf Club

You can even rub in while you spread!

The 17' wide Triple Gang quickly grooms Fairways, stands up the grass before mowing, and disperses dew and worm casts.

Accidents do happen

Elsewhere in this issue you can read about Dougal Duguid who has just emerged from a six year nightmare which began when a golf ball bounced up and into the face of a lady member causing her to lose an eye. She claimed it was caused by her ball rebounding from a stone negligently left on the golf course and sued.

It was a horrible accident and our heart goes out to the woman, who by cruel fate already had limited sight in her other eye. What could be worse than suffering such a horrific injury playing the game we all love?

But it was an accident, pure and simple, as decided by the Sheriff who heard the case, and said that Dougal had done all that could have been asked of him and could not be held responsible.

Had the decision gone the other way the implications for the game, and all greenkeepers were wide ranging. Read some of the comments made by Dougal and then make up your own mind. It would be good to hear from you on the matter.

There is an increasing trend, which appears to be American led, to go to the courts and target someone for blame. And you can see why.

Around the time Dougal’s case was resolved another golfer went through the US courts and successfully sued a golf course after he fell down a hole and broke his leg on some jagged rocks. He claimed the club was negligent for not putting up a guard rail and won his case. He was awarded substantial damages, including £866,000 for “pain and suffering.”

McDonald’s prints the warning “Beware. These cups contain hot liquid” on its coffee cups to cover it from anyone who feels the company would otherwise be negligent in not ensuring customers were made aware of such a fact.

What really amazed me though was the recent news that a deaf person was suing the American version of “Who Wants to be a Millionaire” because he was, in effect, excluded from the show because he couldn’t phone a friend. Let’s ask the audience. Is that, or is it not, plain daft?

Golf has shown restraint in the past. You may recall Greg Norman, spraining a wrist when he hit a submerged stone and had to pull out of many potentially lucrative tournaments. He accepted it as the “rub of the green” and his own bad luck. He didn’t look for anyone to blame.

Of course we can all understand the Westhill lady member’s desire to go to court, particularly as she can no longer work, but it must be hoped that golf can steer clear of such cases in future.

If golf does become a target for “no win no fee” lawyers and the unfortunate few who do suffer injury on golf courses you can be sure that the game will be worse off for it.

Let’s hope that common sense prevails and we remember that accidents can often be just that - accidents.
WHY DO SOMETHING TWICE THAT ONLY NEEDS TO BE DONE ONCE?

A single application of Spearhead® controls your turf weeds for the entire season.
Compare that with the huge cost of twice yearly applications required by lesser selectives.
Spearhead's unique chemistry even handles problem weeds like clovers and speedwells.
And it can be applied on turf as young as two months with outstanding results.
Spearhead. Apply it once. Then forget it.

THE SCIENCE OF SUCCESS

*SPEARHEAD contains MCPA, clopyralid and diflufenican. ALWAYS READ THE LABEL: USE PESTICIDES SAFELY (MAPP 09941).
INTRODUCING NEW

TurfVigor

with high impact beneficial microbes and key organic nutrients.

6 NEW MICROBES
New TurfVigor is a complete nutrient and microbe complex featuring six new microbes specially selected and screened to encourage turf health. During times of stress, TurfVigor responsively triggers the synthesis of essential growth factors and regulatory elements to maintain a healthier stand. Its performance has been validated through research conducted at leading turf grass universities.

ONE STEP APPLICATION
Because TurfVigor contains both beneficial microbes and organic nutrients, it can be mixed and applied in one easy step. In fact, TurfVigor is tank-mix compatible with a variety of fungicides and growth regulators. Its highly stable nature assures a long shelf life.

IT PAYS TO BE SELECTIVE
Like all GREEN-RELEAF products, TurfVigor is environmentally friendly with microbial strains selected strictly on their ability to provide targeted turf benefits. TurfVigor is packed in 9.5 litre containers.

We're very selective.
You should be, too.
Christopher Yeaman celebrated his 12th birthday last month and as you would expect with any youngster it was an occasion of great joy and happiness. For his mum and dad Carol and Chris, Head Greenkeeper at West Linton Golf Club, near Edinburgh, however, this happiness was multiplied tenfold and joined by equal amounts of sheer relief.

The reason was that Christopher’s birthday signalled his departure from hospital after a near six month spell which should bring the curtain down on a four and a half year nightmare for the family. It began on Boxing Day when he was flown to the internationally famous dry ski slope in the Pentland Hills Swanston, a sliding paradise for the local youngsters and Christopher was hurtling down the slope one particularly icy day when his watching mum and dad recognised the danger.

“I rushed to try to stop his sledge but couldn’t get to him and he crashed into a fence post,” said Chris, who ironically had been the man responsible for planting the post.

Christopher spent six months in Edinburgh Sick Kid’s Hospital as a result of his injuries with the first three weeks in intensive care with serious liver damage.

“The same injuries had struck three children before Christopher and none of them had survived,” revealed Carol, who gave up her job to look after her son full time.

Christopher did recover, and recover well. He returned to school and got back into the sports he loves. And everything seemed fine until last October when he became ill again and internal bleeding was diagnosed.

He was assessed for a liver transplant at Birmingham Children’s Hospital, one of only two in the country able to conduct such procedures, and placed on the waiting list for a suitable liver to become available.

“Christopher went into hospital on December 22nd last year and the transplant was eventually carried out on April 26th. He was in surgery for 14 and a half hours, all requests for information and anything going well until he was struck by a serious infection and had to undergo another five hours of surgery to ease the problem,” explained Chris.

During Christopher’s time in Birmingham Carol stayed in a house provided by Livingstone. He has also been invited to play golf with one of West Linton Golf Club’s Honorary Members. One Sandy Lyle, the former Open and Masters Champion.

“It is not enough just to carry a card, families must be made aware as well so that they can give permission straight away and save vital time when the organs could be utilised,” said Carol, who has written to Tony Blair asking him to change a system of opting out of donation to a system of opting in out of donation rather than opting in.

“Because medical procedures have progressed so much in the last few years there are actually fewer organs available for transplant than there was. At Birmingham the transplant unit is only operating at half capacity because of a lack of organs,” explained Carol.

Meanwhile Christopher is settling into his new home with his mum, Carol and dad, Chris. His injuries with the first three weeks in intensive care with serious liver damage.

He was assessed for a liver transplant at Birmingham Children’s Hospital, one of only two in the country able to conduct such procedures, and placed on the waiting list for a suitable liver to become available.

“Christopher went into hospital on December 22nd last year and the transplant was eventually carried out on April 26th. He was in surgery for 14 and a half hours, all requests for information and anything going well until he was struck by a serious infection and had to undergo another five hours of surgery to ease the problem,” explained Chris.

During Christopher’s time in Birmingham Carol stayed in a house provided by a charity for the parents of long term child patients while Chris started his new job at West Linton and travelled down to Birmingham every weekend.

Christopher was finally transferred back to Edinburgh before being allowed home - to a brand new home which he hadn’t seen before, right on the golf course - on June 5.

“The support we’ve received for every one has been absolutely incredible. Fellow greenkeepers, people in the trade and even those who have never heard of golf have been great. I even got into trouble from the Green’s Chairman for being on the course and not at the hospital” said Chris.

“Steve Dixon has been my PR man handling all requests for interviews and drumming up publicity while National Chairman, Elliot Small, has kept in regular touch.

“We’ve even had letters from people we’ve never even met. Two women offered to donate their livers to Christopher, while the local people of West Linton have also been wonderful. We’d like to thank everyone at Ward 4 of the Sick Kid’s Hospital in Edinburgh who know Christopher so well, also the staff and surgeons in Birmingham.

We must also thank our parents who did so much to help, particularly Chris’s who looked after Christopher’s sister, Amy, while we were away,” added Carol.

Elsewhere such has been the amount of publicity generated by Christopher’s situation others have been doing their bit to help.

Livingstone Football Club, whose Stadium Manager is a relation, held a fun run to raise money to send Christopher on holiday as well as the Children’s Liver Disease Foundation and raised £7,000, while some of the players took time out to visit him in hospital.

As well as the holiday Christopher has a lot to look forward to. Having already been a Livingston mascot he has been invited to be a Rangers mascot - his favourite team - at an up coming match with Livingston. He has also been invited to play golf with one of West Linton GC’s Honorary Members. One Sandy Lyle, the former Open and Masters Champion.

“Sandy used to live close to the club and his coach is the club pro here and when he learned about Christopher he gave him a signed putter as well as promising him a game when he’s recovered.”

One plea that Carol makes strongly is to ask people not only to carry donor cards but also to inform relatives of a desire to donate organs.

Henry Bechtel, a former Turfgrass Agronomist with STRI, has returned to take up the position of Advisory Agronomist for the North East.

Dr Gordon McKillop has been appointed as the new Chief Executive for STIRL. He officially takes over the role on July 10.

Dr McKillop joins STIRL from the Central Science Laboratories in York. CSL is an agency for the Ministry of Agriculture, Fishery and Food (MAFF). He joined CSL in 1978, where he progressed from the Science Team to Science Manager, to his current position of Commercial Business Strategy Manager, working on strategies to further the commercial development of CSL.

Growing up in Glasgow, he studied at the University of Glasgow before obtaining his PhD from Reading University. In 1997, he was awarded an MBA from Henley Management College.

Dr McKillop is looking forward to the challenges of his new appointment. He brings with him qualifications, skills and experience which will enable him to combine business management skills with science in his role as Chief Executive.

Henry Bechtel, a former Turfgrass Agronomist with STRI, has returned to take up the position of Advisory Agronomist for the North East.

Henry, who left to work with VATAX, has spent the last 8 years gaining extensive commercial exposure of the Turf Industry in Technical Sales. Henry’s previous advisory work experience, combined with his knowledge of the Turf Industry and a BASIS registration, has enabled him to commence visits to his client portfolio from his starting date on May 30.

Henry is the second employee to return to STIRL this year. In January Tim Colepage was appointed as an additional Advisor for Scotland, having spent a number of years in education.

The South West and South Wales Course Management Trophy due to be held at the Manor House, Castle Loonhbe, on August 22 has been changed to Monday August 14.

For further information contact Paula Humphries Tel: 01288 332194

July 2000 Greenkeeper International
Chinese students graduate at Elmwood

Students from Shenzhen University in the South of China have completed their Professional Development Award for the Advanced Certificate in International Golf Course Management at Elmwood College, Cupar.

The 24 week course endorsed by the R&A; China Golf Association and the GTC was set up with the College’s link with Shenzhen University in China. Golf is a growing sport in China and the students who attended the college were very dedicated with a high work ethic.

On their return to China they will either work in the Golf Industry or education and training degree programmes being the first people in China to gain a Golf Course Management qualification. However, some of the students have made the decision to stay on at Elmwood College to further their qualifications, working at Golf Courses around the area, applying this to their HNC/HND programme.

Academy’s abundant academic accolades

Success was the theme at Huyton Civic Centre on Merseyside when eleven members of the Knowsley Metropolitan District Council Greenkeepers Academy were presented with their NVQ Level 2 Certificates in Sports Turf, by the Mayor of Knowsley, Councillor Bob Maguire.

Shaun Guinen was also awarded his prize for outstanding theoretical work and Darren Rickets collected his prize for outstanding practical work.

A bonus prize of a computer was given to the Academy by the Whiston Pathways Group.

A bolt from the blue wreaks havoc

This picture ably illustrates the power of the lightning and the caution that should be shown on golf courses when thunder storms are in the area.

This tree was beside the 8th green of the Kingfisher course, at Mannings Heath Golf Club, and Course Manager Billy McMillan witnessed the strike.

"It was about 4.30pm around the middle of May and we were a quarter of a mile away when we saw it happen. "We found debris from the strike 60 feet away some buried six inches into the turf which shows the sheer power," recalled Billy.

"It really does bring home to you the dangers that are around and the need to get somewhere safe during storms," he said, adding that some golfers refused to come off the course during the storm.

In fact that clubhouse was also struck and suffered damage.
Textron put greenkeepers back in classroom

Bernhards are set to carry out practical demonstrations at leading colleges throughout the country. Worldwide suppliers of special maintenance equipment for turf care, Bernhards is building on the successful programme of educational initiatives they ran last year. Demonstrations will be complemented by a theoretical seminar on the range of improvements that can be made to turf, by making sure mower blades are kept really sharp.

Leading colleges throughout the country have shown an interest and seminars will be given at Elmwood College, Merrist Wood College and Writtle College.

"We developed the seminar to be of considerable practical benefit to students as they study turf management," said Stephen Bernhardt, Managing Director of Bernhards.

"The knowledge gained is very broad, and links plant physiology to mechanical issues. The financial and practical implications are useful in almost all job applications and will apply when the students become greenkeepers or groundsmen."

In response to demand, this year Bernhards is increasing the number of seminars they are undertaking at colleges.

Berhards get set for demonstrations

The late Eric Palmer

Eric started at work at Sitwell Golf Club then moved to Abbeydale Park Golf Club where he was Head Greenkeeper for many years. He then moved to Hickleton Golf Club as Head Greenkeeper and he worked there until his retirement in 1992.

Eric was a stalwart supporter of BIGGA's Sheffield Section and also for many years was a very active committee member of the Section.

Eric was highly thought of in the greenkeeping fraternity and will sadly be missed.

The Association wish to send their condolences to Eric's wife Margaret and also to Andy, his son and all members of his family.

David Eccles: The man from Advanta

Advanta Seeds has appointed David Eccles as regional amenity seeds specialist, for grass. Based in Forfar, he will be responsible for supporting sales of the Advanta MM and Designer from Advanta' grass seed ranges, to sports and landscaping customers throughout Scotland.

"We are very pleased to welcome David to our team. Having worked in the seed trade for ten years his experience will prove valuable as we continue to develop the sales of our leading amenity grass seed products. In particular, he will be working closely with Stewarts and Co. at Dalkeith, who distribute the Advanta MM range in Scotland for us," said, Advanta’s Amenity Sales and Marketing Manager, Dave Phillips.

David, who has qualifications in management and personnel training and development, has also lectured at the Borders College on horticultural topics. In his leisure time, he plays rugby and golf.

"Is that a roll of turf I see before me?"

Rolawn have received several orders to provide their Minster turf from the Royal Shakespeare Company's touring Department.

The turf will be used to cover the stage during the performance of the Company's production of "The Seagull" at various theatres throughout the UK.

The locations range from Stratford, Norwich, Woking, Milton Keynes, Bath, Sheffield, Newcastle and London.

Rolawn have 18 depots situated throughout the UK and are well placed to deliver fresh turf into each of the locations throughout the production period.

"Rolawn has been approached to provide turf to many unusual sites - from the inside of pubs to steps of Town Halls and we are delighted that we can add the Royal Shakespeare Company to the list and that they will be performing on our turf," said Terry Ryan, Rolawn's Sales and Marketing Director.

Royal Inverdivot GC...

by Tony Husband

I didn't know we had a new greenkeeper

We don't...

Well who's that then?

July 2000 Greenkeeper International
New Director for Rolawn

Rolawn has promoted Guy Barrett to the post of Farms Director. Guy joined Rolawn in 1980 and has risen "through the ranks" to head the harvesting and production functions which now operate on a large scale supplying millions of square metres of specially cultivated turf throughout the UK. When not tending to the 3000 acres of turf under his care for Rolawn, he enjoys playing golf and cricket.

"It is in recognition of his hard work, dedication and success in his role over many years that this appointment has been made. I am delighted to welcome him on to the board and I am certain that Guy will play a key role in the future development of our business," said Ken Dawson, Chairman of Rolawn.

Students plan Vintage Open at Reaseheath

Golf Course Management students at Reaseheath College, organised the annual Reaseheath Millennium Vintage Open as part of their third year studies. Held on the college's nine hole golf course, the tournament attracted septuagenarian competitors from all over Cheshire.

Veteran golfer Fred Hallworth, 79, proved age is no handicap by winning the tournament run specially for the over 70s.

Walton Heath Annual Gentleman’s Evening

It has been brought to my attention that BSP Landscapes were inadvertently omitted from the list of sponsors for the recent Annual Gentleman’s Evening at Walton Heath. Those of you who were there will know that Barry Pace not only sponsored the 6th hole on Walton Heath’s Old Course for the event but also built the very fine bunker that so many of you managed to get into.

Sorry about that Barry.
Derek Farrington
South East Regional Administrator

Pinehurst tested my cutting degree

I was very interested to read the article about Pinehurst and especially G2 turfgrass. When working in the USA, I spent a considerable amount of time at Pinehurst with Richard Yoe, Pinehurst’s machine maintenance director, working on methods of mower set up and sharpening techniques to obtain a better quality cut than was being achieved.

As G2 has such a high shoot density, is so fast growing and is a very juicy grass obtaining a quality cut was proving very difficult using Pinehurst’s tried and trusted methods. Maintaining a sharp edge and angle on the bottom blade was also a problem due to regular top dressing dusting because of the denseness of G2 it is very difficult to get the dressing in, it tends to lie on the leaf.

I was given four Jacobson walkers to experiment with, the normal angle ground on the bottom blade was 5°, this was not enough relief for grass ejection due to the growth rate of G2 and top dressing problems. After experimenting with different angles and set ups on selected greens on No.8 course I found a top face angle of 9°-10° and front face angle of 5° with the cylinder set with 0.01 clearance from the bottom blade, a quality cut was obtained combined with regular facing of the front free angle a quality cut was maintained.

This regular facing of the bottom blade is a practice that should be used for grasses and is far more beneficial than back lapping, which did not work at Pinehurst using regular sharpening angles on the bottom blade. The co-operation and friendliness that I experienced at Pinehurst was second to none. No wonder the lads enjoyed the experience of working with such great people.

Peter Fletcher, Professional Mobile Grinding, At Austell Cornwall
