How do you create the fast and true greens that golfers demand without lowering the heights and causing stress? Is it possible to balance the speeds of all your greens so that they putt consistently?

True-Surface lightweight vibratory rollers are the only solution for both problems.

How do they do it?

The upper surface of your greens can easily be disturbed by ball marks and shoe spikes etc. This prevents a fast and true ball roll. Although True-Surface rollers are only a similar weight to your mowing units, their vibratory action will gently ease the surface particles back into place and restore the speed and trueness that you want.

Consistency is what everyone wants!

The True-Surface rollers unique vibratory action does something no other type of roller can. It helps you to balance the speeds of all your greens. By simply varying your forward speed, you can vary the vibrations per metre. This allows you to correct any inconsistencies between different greens.

Renewing a Link to the past

One of the most interesting pieces of news released in the last few weeks was that Royal Liverpool Golf Club, better known as Hoylake, is to return to the Open Championship rota, having last hosted an Open in 1967. Coming hot on the heels of Carnoustie’s return in 1999, after a gap of 24 years, it is another example of the R&A’s policy of widening the Championship rota.

I don’t suppose I’m alone in welcoming this development, particularly as none of the existing venues are being removed.

The Open is an amazing, unique, wonderful event. Every year something happens which quickens the pulse and causes you to stop and think back over the last few years. We’ve had Costantino Rocca’s amazing putt on the final green at St Andrews to force the play-off with John Daly; Justin Rose’s holeied chip from the rough to signal the end of his amateur career closely followed by Brian Wait’s extraordinarily difficult bunker shot to force a play-off with Mark O’Meara both at Royal Birkdale; then of course there was Jean Van De Velde and local hero Paul Lawrie at Carnoustie and, last year, Tiger Woods at St Andrews becoming the youngest ever to complete the set of Grand Slam events. History in the making.

Before that we’ve had the Duel in the Sun at Turnberry in 1977; Tony Jacklin at Royal Lytham; Sandy Lyle at Royal St George’s; Nick Faldo’s 18 straight pars at Muirfield and the first ever four hole play-off at Royal Troon.

Each venue on the current rota has offered something worthy of permanent space in our memory banks and extending the rota will give yet more opportunities for memorable moments.

There are so few classic links courses in this country, and even fewer with the infrastructure to host a modern day Open Championship that the R&A and Royal Liverpool Golf Club must be applauded for taking the initiative and spending the money necessary to make Hoylake a venue again. Since Roberto de Vicenzo won the Championship there in 1967, the Championship has become unrecognisable with a modern day Open Championship at Hoylake a venue again be given the exposure that it deserves and the infrastructure to host a modern day Open Championship at Hoylake a venue again be given the exposure that it deserves and the infrastructure to host a modern day Open Championship.

Robert to provide support for Marriott

York-based independent turf consultant, Robert Laywood, has been appointed by Marriott UK to provide agronomic support to the 11 Course Managers at golf courses located at Marriott Hotel and Country Clubs throughout the United Kingdom.

Encompassing 16 separate golf courses in England, Scotland and Wales, the appointment by Marriott UK involves the provision by Robert of advisory visits as well as detailed soil and plant analysis, as required by the individual Course Managers.

Robert’s appointment was confirmed by David MacLaren, (pictured right) Director of Golf Operations, Marriott UK: “This appointment is part of a world-wide strategy by our parent, Whitbread plc, aimed at reinforcing Marriott Golf’s position as the number one provider of quality golf and associated food and leisure facilities in the United Kingdom,” he said.

Although we are very proud of the work carried out by all our Course Managers, it was felt that they deserved additional independent technical support to help maintain Marriott’s golf facilities in peak condition throughout the year.”

David explained that Robert came highly recommended having worked closely over the past two years with the Course Managers at Marriott Hanbury Manor and Marriott Forest of Arden. Both courses are PGA European Tour venues and have hosted four English Opens between them since 1997.

“I am naturally delighted to have been chosen to provide independent agronomic input and technical support to such an important group of golf courses,” commented Robert.

Charterhouse present dealer awards

Charterhouse Turf Machinery, the specialist distributor of turf and grounds care equipment, recently presented their 2001 Dealer Awards. The awards recognised outstanding achievements made by the company’s 16 Tractor Dealers and 34 Turf Machinery Dealer Outlets throughout the UK. Awards were also presented for development and success in reaching and surpassing targets in other key business areas.

Peter claims UK territory

Bernhard and Company has appointed Peter Hampton (right) as their new UK Territory Manager. This follows the company’s continuing development as leading manufacturers of professional grinding equipment.

Peter was previously the company’s US Territory Manager for Western North America.

He has been responsible for business and field support to distributor salesmen supplying Express Dual Grinders from The Mississippi to the West Coast, including Canada.

“Having been in the grass machinery industry since 1963 Peter has a wealth of experience and has been involved with many innovative changes in the industry,” says Stephen Bernhard, Managing Director.

A Trade Member of BIGGA for over 25 years Peter numbers many UK Greenkeepers as his friends.
BIGGA is big - and getting bigger!
We want that growth to continue, and we have therefore commissioned an independent market research study, with two aims:

- We want to know what our members, and those with whom we work most closely in the golf industry, think of the services we offer and the way we deliver them.
- We are also looking for new ideas, particularly in the areas of sales and marketing, so that we can protect and enhance the income base on which our continued growth depends.

The study is being financially supported by the R&A, and will be carried out by Mike Williamson, of MW Associates, a specialist golf research company which carried out a similar study for the Sports Turf Research Institute in 1999.

Mike will be sending questionnaires to about 2000 BIGGA members, and talking to representatives of golf companies, golfing organisations, and golf clubs. The survey work will be undertaken in March and April, with the full research report going to the BIGGA Board in June.

We do want (and I'm sure we will get) frank opinions and good ideas from as many of our members, clients, and those we work with as possible.

If you receive a questionnaire from Mike, please do complete and return it. BIGGA is YOUR Association, and we very much want your input to this study.

If you are contacted by Mike or one of his colleagues, please do spare a few minutes to pass on your views and suggestions.

If you do NOT receive a call or a questionnaire (since these will only go to a random sample of members), and you would like to participate in the survey, please contact Mike Williamson and he will be delighted to include you. Mike can be contacted at:

MW Associates, PO Box 6677, Edinburgh, EH14 3YB. Tel/Fax: 0131 476 6677. e-mail: mwassoc@virgin.net

We want BIGGA to get better as well as bigger - so please do help us with this important research.

Neil Thomas, Executive Director

**John Shaw Machinery host seminar series**

Toro dealer John Shaw Machinery staged a series of one-day seminars designed to assist all those involved with the maintenance of sports and golf turf throughout the area it serves across southern England.

For the three events, titled Sports Turf Maintenance - the Future, the firm, based in Sussex, brought together a group of top speakers that attracted a large attendance from golf and grounds care professionals.

Eddie Seaward, Head Groundsman at The All-England Club, Wimbledon, gave the keynote address. He told the interesting story behind the redevelopment of the Wimbledon complex and provided delegates with a personal insight into his turf preparations for The Championships.

The other expert speakers were Andy Brown, of The Toro Company; Neil Squires, from the STRI; health and safety consultant John Albett, of John All butt Associates; and John Westmore, Hambledon Grounds-care Finance.

The audience was made up of a cross-section of head greenkeepers, their staff and senior golf club officials, as well as groundsmen from the sports turf side of the industry.

Venues were Kings Hill GC, West Malling, Kent; The Wentworth Club; and Singing Hills GC, Albourne, West Sussex.

John Shaw's marketing director David Cole hosted the events. He said that since its inception his company has focused on the professional turf maintenance market. Their new company slogan was Providing Solutions for Grounds-care Professionals and it was against this background that they had put on these seminars.

For the three events, titled Sports Turf Maintenance - the Future, the firm, based in Sussex, brought togeth-er a group of top speakers that attracted a large attendance from golf and grounds care professionals.

**Royal Inverdivot GC...**

We need a new hole cutting machine. Why?

I'll show you.

That's why.

March 2001 Greenkeeper International 5

**Graham launches internet project**

A new greenkeeping website www.golfsupplies.net, has been launched by Graham Pickin, Head Greenkeeper of Thornhurst Manor, Doncaster.

"The net has plenty of greenkeeping resources, but they are a little bit fragmented, I thought it would be a good idea if I could browse other greenkeeping sites including golf courses and suppliers, also join in with a discussion forum and possibly find a bargain in a golf course equipment auction or even get rid of some old machines that are lying around the sheds all in one sit," explained Graham.

The site is completely free and no monies are passed through the site at all. At the auction the successful bidder has the sellers details sent to them automatically via email.

**Top level changes at British Seed Houses**

British Seed Houses has announced two senior management changes at its Lincoln head office. British Seed Houses director Simon Eyrer becomes unit manager for the Lincoln-based operation with overall responsibility for all seed business done from the site.

Jon Chippendale becomes amenity seeds manager and is now responsible for all grass seed, wild flora and granular fertiliser sales into the amenity sector.

**Apology for email address error**

In last month's magazine under the heading Grand Tour Scholarship 2001 we listed Bettina Schrickel's email address incorrectly. It should have read ntpetittina@aol.com and not ntpetitti-nna@aol.com as we listed at the end of the piece. Apologies for any inconvienence caused.
**Angus Horticulture launch new range**

Angus Horticulture are the manufacturers of the “Turf Rise” range of fertilisers. The programmed approach has been devised by the “FACTS” qualified personnel of the company to allow greenkeepers and groundsman to look after their turf to a high standard with optimum input.

“Turf Rise Spring spread at 50 grams /sq. metre will get the grass off to a good start in the spring. Turf Rise Summer is in granular or liquid form applied 4 - 5 times throughout the season, timing depending on the demands of the management of the course, greens, pitches and Turf Rise Autumn applied in September - October with enough potash to harden up the turf ready for the rigours of winter.

Made with raw materials including seaweed powder and lignite which helps the cation exchange in the soil, the “Turf Rise” range gives the greenkeeper the best chance to manage his turf in an efficient and effective way, producing his greens to the satisfaction of players and committees alike. The following is a list of some of the distributors throughout the U.K. and Europe.

**Phil joins namesake**

With a name like Seedhouse, Phil was destined to work for a seed company. The latest member to join the Johnsons Sport and Amenity team, Phil has an easy job of attracting customers. They all want to talk about his name!

Phil plays a very supportive role to the team, dealing with inquiries and processing orders. He has completed the STRI residential course “The passport to perfect courses”, and can act with authority when advising customers on mixture selection.

He is very confident about the range he is selling, “Johnson’s Sport and Amenity range of grass seed mixtures represents the best choice for turf grass. From rugby pitches to golf courses, the new range can cope with the best of British sport and the worst of British weather,” quotes Phil.

**Awards presented to Textron dealers**

Broderick Grass Machinery Ltd has won the Textron Distributor of the Year Award for 2000.

Noel Broderick, (pictured top) Dealer Principal, accepted the silver trophy and commemorative plaque from Harold Pinto, Textron Golf, Turf and Specialty Product’s Managing Director, and former three times world motor racing champion Jackie Stewart, at an evening awards ceremony held at The Old Swan Hotel, Harrogate during BTME.

Textron dealers from the U.K, Eire and Europe attended the ceremony which recognised business excellence in all areas. TH White Ltd of Tethbury in Gloucestershire, scooped two awards as did European dealers Svensnings of Denmark.

“Broderick’s have demonstrated exceptional performance across all areas of their business and tremendous commitment to the Textron franchise with the recent opening of their new premises in Co Tipperary. They thoroughly deserve the title of Textron Distributor of the Year,” said Harold Pinto.

A special award for Outstanding Service to the Grounds Maintenance Industry was presented to Len Breakwell, (pictured bottom) of ET Breakwell Ltd, the Solihull-based Textron dealership. The company celebrated 60 years of trading in 2000, 40 of those as a dealer for Ransomes turf maintenance equipment.

**£150 BIGGA voucher for Vitax winner, Alan Court**

One of the first duties of Clive Osgood, as the new Chairman of BIGGA, was to make a draw on the Vitax stand for a £150 voucher for BIGGA merchandise. The lucky recipient was Alan Court of Bradley Hall Golf Club, Halifax, who gained an extra benefit from attending the BTME exhibition.

Alan (left) is pictured being presented with his voucher by Gary Potter, Technical Representative of Vitax.

**Advanta Seeds aim for Headstart with first Internet site**

Advanta Seeds UK has launched its first Internet website at www.headstart-advanta.co.uk.

The clear and colourful pages, which are easy to navigate, explain the features of Headstart - the biological seed treatment applied to all Advanta’s amenity grass seeds.

Seeds treated with Headstart emerge faster and stronger than untreated seeds. The seedlings also have improved natural resistance to diseases, and are less prone to drought stress.

The treatment, which is non-toxic and completely safe, contains only natural substances including cytokinins and enzymes. These encourage cell division, and help mobilise food reserves within the seed. It also has chelated trace elements, which are readily available to the young seedling. Water attractants draw moisture from the soil to help the start-up process.

“Headstart is particularly useful where groundsmen and greenkeepers are under time, or weather pressure, to establish new swards or repair existing ones,” explained Advanta’s Amenity Sales and Marketing Manager Dave Phillips.

“With so much work postponed from the autumn and the rain continuing to fall, Headstart could make all the difference between success and failure, for any resowing work carried out this spring.

“We want our customers to know what Headstart is and what it can do. The website will answer any questions, and also provides a quick and easy way to contact us, through the response form on the last page.”
Friends and Foes... under the microscope. Crippling turf diseases like Fusarium Patch, Red Thread, and Dollar Spot are easy prey to the systemic fungicide Rimidin*. Having both a protective and curative action, Rimidin is fast acting, long lasting, reliable and cost effective. Yet Rimidin has been proven safe to those all-important beneficial soil bacteria. Take a closer look.

*Rimidin is a trade mark of Dow AgroSciences. ALWAYS READ THE LABEL. USE PESTICIDES SAFELY.
Volunteers required!

Volunteers required for the following events:

The Association will again be providing a support team for this prestigious event, the year, for the first time, it will operate on each of the four competition days. Each team member will be allocated a match and will walk the course with the game, raking any bunkers found by the players. In addition, should adverse weather conditions prevail, you may be required to assist the Wentworth greenkeeping staff in keeping the course playable.

You will be responsible for your own transport arrangements to the course and there is no provision for overnight accommodation. You may apply to help on any or all days and usually all those who apply are given the chance to participate on at least one day.

When applying please give details of your polo shirt size as this may be provided together with daily meal vouchers.

Helping at this event will not prejudice your chances of a place on The Open Championship Support Team.

**The Open Championship, Royal Lytham & St Annes, July 19-22, 2001**

The BIGGA Greenkeeping Support Team at The Open Championship will be involved in early morning course preparation; bunker raking, while matches are in play, and evening course repair. You must be available from Wednesday evening, July 18, through to the close of play on Sunday, July 22.

While all transport, accommodation and meals will be provided between these dates it is the team member’s responsibility for travel from home to the venue and return. When applying please give your polo shirt size.

Full BIGGA members only may apply in writing, for either or both of these events to: John Pemberton, BIGGA HOUSE, Aldwark Alne, York, YO61 1UF. Should you require any further information John can be contacted on 01347 833800 or via email: johnp@bigga.co.uk.

The Wentworth support team will be co-ordinated by the BIGGA South East Region and Derek Farrington, the Regional Administrator, is available to offer help or information. Derek can be contacted on 01903 260956 or mobile 07850 162401.

---

**Moore aim to give ‘more’ mower for your money**

With the Moore Mower now in full production, with both its 36" cylinder and 44" rotary mower heads, it is not surprising that Frank Moore is busy adding attachments to his innovative brainchild.

Now a novel Dumpybarrow has gone into production. A practical means of shifting materials such as hardcore, ballast, builder’s sand, soil or manure, the attachment can be fitted to the Moore Mower in a couple of minutes with minimal effort.

Designed to carry 100kg, its low profile makes hand loading easy; for unloading, the body is tipped hydraulically to a vertical position and will empty completely in a few seconds, making the whole operation extremely quick, especially where the load must be carried some distance.

A prototype has been in use for several years and has shifted tons of various materials, often at confined and otherwise inaccessible sites. RRP for the attachment is £396 + VAT.

---

**Royal Mid Surrey GC appoint Inturf as turf supplier**

Inturf has produced turf that exactly matches the specific requirements of Royal Mid Surrey Golf Club. Royal Mid Surrey, at Richmond, approached the York based company to grow turf for a major redesign that will involve the re-turfing of 36 greens. Rapid establishment is essential to bring the holes back into play quickly and to minimise loss of green fee revenues.

Under its Custom Grown Turf service Inturf imports prescribed rootzone and seed that matches the conditions where the turf will eventually be laid. The company then grows it for the client, strictly following the highest standards of turf management. For Royal Mid Surrey Inturf is growing the turf on a USGA specification rootzone. The Club has selected the grass mixture itself, choosing varieties that will give an equally proportioned bent/ryegrass mix. The project at Grantham involves growing some 20,000 m2 of turf - enough to cover about three soccer pitches.

Royal Mid Surrey’s turf is currently being cared for at the 330-acre Grantham nursery by seven of Inturf’s turf management experts. They are implementing a strict greenkeeping regime, with much of the work being done by hand. Their final task will be to harvest the special turf, ready for installation.

---

**ESD Waste2Water launch new recycling system**

ESD Waste2Water launched their new Recycling Wash-Off System for Golf Course Equipment at BTME.

The system is installed as part of the wash-off facility, replacing ‘traditional interceptors etc.’ The contaminated water is biologically cleaned and recycled for continual reuse, potentially saving very significant amounts of water.

The system provides a rapid breakdown of Organic contaminants including Oil, Grease, Petrol, Diesel, Pesticides, Fangicides etc., into Carbon Dioxide and Water.

A range of capacity sizes are available to suit wash-off requirements from a small 9 hole course up to a 34 hole golf complex and beyond.

With environmental consideration of everything we do now so important, the benefit of this new closed-loop system, which saves very significant amounts of water and at the same time removes a number of major potential contamination areas, makes this one of the most exciting developments for some time.

For more information contact Tim Earley Tel. 01782 373 878.
The best ever BTME attracts praise from MG

I would like to acquaint you with my profession and some of the problems in our country in this respect. I am an assistant at the Faculty of Forestry, Department of Landscape Architecture.

My subject is Management and Maintenance of Lawns and, in our country, it is still in the phase of development. Unfortunately, I am the first person who defended a Master of Sciences degree in this field and nobody has ever defended a doctoral dissertation dealing with Lawns.

My obligation to the Faculty and also my desire is to prepare the thesis in such a way that it has multiple benefits.

Moreover, I would like to tell you, that in my country we haven't even got a Golf Course. Concern for this sport is present. I think, in the close future, my country will need to make the first Golf Course in Yugoslavia. Because of that and my concern for Management and Maintenance of Lawns as well as Golf Course, I would like to be trained in this way.

Since my country who been in war and long-standing isolation, I haven't financial possibility for cost of some course. In some occurrence I am ready to learn and work in order to pay, cover cost of course. University of Belgrade and me like assistant have minor financial facilities.

Thank you very much in anticipation. Looking forward to hearing from you.

Nenad Stavreovic, M.Sc.
Faculty of Forestry, Department of Landscape Architecture, University of Belgrade, Kneza, Viseslova 1, 11030 Belgrade, Yugoslavia

BIGGA gets familiar with industry professionals

A one day course designed to familiarise members of the trade with BIGGA and the wider golfing industry was held at BIGGA HOUSE, at the end of February.

Attended by several people relatively new to the industry as well as a number of more established industry figures the day was an excellent opportunity for an exchange of information.

The morning consisted of a look at BIGGA's membership and education initiatives as well as a tour round the many other bodies and Associations within the game of golf itself.

Kim Mache, Sales and Marketing Director of Hayter, then gave a talk on the Trade's, and his own, view of greenkeeping and greenkeepers.

The afternoon session offered an opportunity for greenkeepers to give the audience an appreciation of their work.

Philip Taylor, Course Manager, at Alwoodley Golf Club in Leeds talked on his work on a members' golf club while Andy Campbell MG, Golf Courses and Estates Manager, Carden Park Hotel and Golf Resort, spoke on life in a proprietary-owned development.

The day closed with an Open Forum at which many issues pertinent to the industry were discussed.

John wishes team best wishes for 2001

After 11 years at Golfclub Neuhof near Frankfurt I have moved to Golf Park Gut Wissmannshof in Staufenberg, Niedersachsen.

I would like to wish all the lads a good season for 2001.

John MacKay, Gut Wissmannshof 2A
34355 Staufenberg, Germany

BTME thanks

I wanted to express my thanks and appreciation for the hospitality I received while at the BTME 2001. This was my first trip to the UK and I was quite pleased with warm reception that was extended.

Everyone was very warm and friendly during our visit. A special thanks to Ken and Sami for their help and support. Hopefully a return visit will be possible and a chance to make additional friends.

Stuart receives his award from Sir Michael Bonallack and Elliott Small

David Winterton, CMS, MG.

Plea for help from Belgrade

This month, BIGGA'S Education and Training Manager, Ken Richardson, looks at the future of Education and Training and asks you to get involved.

**Education - the future**

BIGGA has been offering its members the chance to take part in education and training since it was formed in 1987. The majority of newcomers to greenkeeping are now trained and assessed to meet the National Standards of NVQ Level 2 in Sportsturf Management, progression to Level 3 Sportsturf Maintenance and Level 4 Sportsturf Management.

Others take the more academic route and study for HNC/HND in Golf Course Management, with some moving on to study for a first degree. Those who have attained a formal qualification should not sit back and stop learning, as learning should be continued throughout your career.

**Greenkeeper Training**

Training providers are now starting to offer what the industry has been requesting through the GTC for some time, for example distance learning and at work learning and assessment, so that greenkeepers continue to develop their careers.

BIGGA introduced its Continuing Professional Development Scheme in 2000, to encourage greenkeepers to take part in Life Long Learning so that they can adapt their skills to the requirements of today's golf courses.

Anyone who attended the Annual General Meeting in Harrogate in January, would have heard Neil talk about the changes that were due to take place, including months with education and training being just one area where change may take place.

This is your chance to have your say to determine what education and training should be offered by BIGGA, where should it be, how much should it cost and how long should it last.

Think about where you fit into the model shown below and contact me, Sami, your Section Secretary, your Regional Administrator, your Course Manager or any member of BIGGA staff and let us know what you want.

The model shows that entry to greenkeeping may be for those already holding an academic qualification or by those not yet qualified.

Unqualified entrants should be given induction training eg, health and safety, working hours, holidays, pay, pension, golf etiquette, uniform, communications with golfers etc and on the job training. They could also be sent to a training provider who would give them the appropriate underpinning knowledge and skills training. Does BIGGA have a training role here?

Some greenkeepers may wish to continue as assistants and not progress to Level 3, however, continuing training, eg First Aid, Chainsaw, Spraying etc may be required. Does BIGGA have a training role here?

For those wanting to progress to Level 3 do we need to 'drip feed' training or are they ready to take on the higher level tasks and duties and prove competence. Does BIGGA have a training role here?

If they are ready to move to the next level then a training provider can offer the appropriate underpinning knowledge and skills training, however, assessment should be done at work.

Some greenkeepers may wish to continue at this level and not progress to Level 4, however, continuing training will be required. Does BIGGA have a training role here?

For those wanting to progress to Level 4 do we need to 'drip feed' training or are they ready to take on the higher level tasks and duties and prove competence. Does BIGGA have a training role here?

If they are ready to move to the next level then a training provider can offer the appropriate underpinning knowledge and skills training, however, assessment should be done at work.

Once reaching this level, continuing training is still required. Does BIGGA have a training role here?

Entrants with academic qualifications also need induction training and will need to prove competence before doing unsupervised work. Where they fit into the model depends on experience and skill level. Nevertheless, they will need continuing training and development. Does BIGGA have a training role here?

BIGGA and the GTC are committed to life long learning by encouraging golf clubs and greenkeepers to 'buy into' the training options available. Training at the appropriate level is available to all greenkeepers. Use it or fall behind.

**The BIGGA Golf Environment Competition**

Following a major reorganisation, Amazone Ground Care have, unfortunately, withdrawn their sponsorship of the BIGGA Golf Environment Competition. However, with support from the R&A, the Competition will run as normal this year. Information leavelets being sent to all golf clubs in Britain during March and requests for entry forms need to be returned to BIGGA House by 12 April.

Entry forms will be sent to interested clubs by return. You should be thinking about your entry NOW! The competition is designed to reward those clubs that integrate ecological management with normal golf course management and to encourage those to do so.

Some clubs have already taken part and seen the benefits and are looking forward to getting Involved again.

For more information contact BIGGA on 01347 833800 or visit the website www.bigga.org.uk

**The TORO Award for Excellence in Greenkeeping**

The TORO Award for Excellence in Greenkeeping is now open to Head Greenkeepers/Course Managers/Superintendents in the whole of the United Kingdom and the Republic of Ireland. With prizes like a TORO Workoman 2100 Utility Vehicle and a two week trip to the USA, plus TORO Greensmaster 1000 pedestrian mower for Runners up in the National Final plus £2500 for the winner's greenkeeping team. Additionally, each country finalist is those in England, Ireland, Scotland and Wales will receive a plaque and a framed certificate.

The winner in 2000 was Ian Ritchie from Portmarnock Golf Club in Ireland. This year could be your turn.

Application forms will be sent to all Head greenkeepers/course managers/superintendents in Great Britain and Ireland, during March, and if you need a copy then contact BIGGA HQ. Return your application as soon as possible to reach BIGGA HOUSE for British entries or the GCSAI for Irish entries by 27 April 2001.

**The TORO Student of the Year Competition**

Now in its twelfth year, the search to find the TORO Student of the Year has begun. Competition details and entry forms have been sent to colleges and training providers and all entries should reach BIGGA HQ by 11 May 2001. The main points of the competition are:

1. The winner receives the TORO scholarship to the USA and visits to the TORO factories and to the GCSAI conference and show in Orlando.
2. The winner’s greenkeeping lecturer wins a visit to the GCSAI conference and show in Orlando.
3. The two runners - up win an all expenses paid visit to the Learning Experience 2002 at Harrogate.
4. Regional finals will be held in six locations during late June and up to eight students will be selected for the National Final which will take place on 29 and 30 October 2001.

---

**Greenkeeper Education and Development Fund**

The Fund provides the key to the future of greenkeepers, golf club and game. Individuals and companies can join the Golden Key Circle and Silver Key Circle. For details, please contact BIGGA on 01234 833900.
