Representing the South West and Wales

Duncan Brown is a relative newcomer to greenkeeping having joined High Post Golf Club, Salisbury, in 2000. Duncan has recently completed a National Diploma in Horticulture and Greenkeeping, at Sparsholt College. Duncan aspires to travel continuing to gain experience towards becoming a Course Manager.

Representing the Midlands

The Midlands Region will be represented by John Osborne, who is an assistant greenkeeper at Boston Golf Club in Lincolnshire. John has worked at Boston Golf Club since 1997 but mainly on a part time basis while he studied to become a probation officer. John decided that he preferred the outdoor life and joined Boston, full time, last year. John has, recently, completed his NVQ Level 2 in Sportsturf through the Myerscough ‘Mollnet’ distance learning.

The next step to becoming the TORO Student of the Year is the National Final, which will be held at BIGGA House on Monday 23 September, when a panel of judges will select the winner of the TORO Scholarship. This includes six weeks of study at the University of Massachusetts, a trip to the TORO factories in Minneapolis and in California and a trip to the GCSAA Exhibition in Atlanta in February 2003. Two runners-up will receive an all expenses paid trip to Continue to Learn and BTME at Harrogate in January 2003.

REGION AND SECTION TRAINING COURSES
AUTUMN 2002 AND SPRING 2003

Thanks to contributors to the BIGGA Education and Development Fund, we can, once again, this Autumn and Spring, offer high class training courses for a very low price. The full brochure will be inserted into the September Edition of Greenkeeper International and will be available at Saltex. However, as some courses are due to run in October, I thought that I would give you some advance notice so that you can be prepared.

OCTOBER COURSES

<table>

Remember, this is only a partial list of courses that will be run this Autumn and next Spring. These courses are guaranteed to be popular and places will be limited. Reserve your place by contacting Sami or Ken, at BIGGA House.

BULLYING AT WORK

What is it? How big a problem is it? Why does it occur? What are the consequences? How can it be prevented? These are just some of the questions posed and answered on a fact sheet available from the European Agency for Safety and Health at Work. This and other factsheets can be downloaded from their website:
http://agency.osha.eu.int

BAR 2

50% Barcrown — Slender Creeping Red Fescue
30% Bargreen — Chewings Fescue
10% Bardot — Browntop Bent
10% Heriot — Browntop Bent

This is the most successful mixture used today. Bar 2 includes Europe’s No. 1 slender creeping red fescue, making it ideal for density, disease resistance, drought tolerance and close mowing. It’s the perfect mix for golf greens, bowling greens or croquet lawns. For the perfect seed mixtures whatever the sports turf, call 01359 272000 and get on the ball.

FOR THE BEST MIX, GET ON THE BALL

Barenbrug UK Ltd., 33 Perkins Road, Rougham Industrial Estate, Bury St Edmunds, Suffolk IP30 9ND Tel 01359 272000 Fax 01359 272001 Email info@barenbr.co.uk www.barenbrug.co.uk
JOIN THE HORDES AND VISIT US AT SALTERX 2002

BIGGA will once again be exhibiting at SALTEX at Windsor Racecourse on September 3-5 and no doubt the BIGGA stand (G01) will be busier than ever before. I will be on hand to collect in renewal and application forms, take photographs of members who have still to get their picture taken, change your personal details such as address and employer changes and answer any questions you may have with regard to your membership and the benefits you receive.

Sami, from the Education and Training Department, will also be on the BIGGA stand to deal with any education queries, discuss the BTME Course and the Master Greenkeeping Certificate and Regional Training.

Covers of the educational/training videos that BIGGA has produced will be available for purchase along with three of the most popular books borrowed from our library, Practical Greenkeeping by Jim Arthur, Golf Course Presentation by John Hacker and George Shills and A Practical Guide to Ecological Management of the Golf Course by Bob Taylor.

Once again items from BIGGA's leisurewear range including the ever popular Cutter & Buck BIGGA Logo Classic Polo Shirts in either sunflower or navy and a variety of pullovers from Peter Scott will also be on sale.

Cheryl Broomhead, from Advertising/Media Sales, and Louise Thompson, from Exhibitions, will also be available throughout the week if you wish to discuss advertising in Greenkeeper International or BTME and Clubhouse.

Also in attendance will be BIGGA Chairman, Richard Barker; Executive Director, Neil Thomas and Editor, Scott MacCallum, all of whom will be delighted to talk with you on any aspect of BIGGA business.

The BIGGA Stand is located at G01. Why not pick up a free copy of the BIGGA field guides on production of your membership card, or how about a new membership application form so you will be able to enter the Rally Driving Prize Draw.
The value is in the finish.

Smooth surface, polished finish.
Jacobsen mowers always make the cut.

Come and see us on Stand V15 at Saltex
or call today for a demonstration: +44 (0)1473 270000.
A Remarkable Day

Already this year there have been some outstanding golfing performances to admire, but there are few which will measure up to that of the Lincsgreen team in the 2002 BIGGA Golf Day at Aldwark Manor.

While many other teams struggled to harness the windy conditions in the Texas Scramble format, Lincsgreen were oblivious to the weather and were a remarkable 14 under-par gross - a score of 57 - when they finally holed out. Even allowing for the low scoring nature of the format it was a stupendous achievement and the four man team of Philip Wilkinson, Graeme Macdonald, Les Howkins and Mike Love certainly deserved the plaudits and the prizes on the day.

The Golf Day, again sponsored by the Harrogate A Group of Hotels, has an outstanding record of good weather and once again it didn't disappoint and, even allowing for the wind, it was the hottest day of the year to that point.

With a record number of teams entering the sixth BIGGA Golf Day was undoubtedly a huge hit and it is safe to say that it has well and truly cemented its place in the industry calendar.

A special thank you to everyone who took place and in particular to the Harrogate A Group, for their generous sponsorship.

1. Lincsgreen - Philip Wilkinson, Graeme Macdonald, Les Howkins, Mike Love
2. Hunter Grinders - Keith Cann-Evans, Tony McLure, Bevan Tattersall, Gary MacDonald
3. Haifa Chemicals 2 - Scott Garnett, Mark Horner, Alun Davis, Brian Accnley

Putting Comp Tied 1st Mike Fenney/Peter Wessel/John Lelean

The winning Lincsgreen team display their trophy in the presence of BIGGA Chairman, Richard Barker, and Frank Flaherty, Manager of the Majestic Hotel, Harrogate.

The Hunter Grinders team.

Haifa Chemicals team.
Ex Newcastle United Captain, Bobby Moncur, tees off at the 1st.

Richard Barker presents a bottle of champagne to his team member and father to commemorate his outstanding tee shot at the 18th.

The Warners Midland team, printers of Greenkeeper International, prepare to tackle the Aldwark Manor course.

Anne Wilson, of the STRI, chats with Neil Thomas, with the new Aldwark Manor extension on the background.

The prize table.

Activity on the 15th green.
Post round refreshments.

Richard Barker hones his putting stroke.

Our feathered friends.

Walter Woods and Iain Macleod warm up.

Keith Cann-Evans, Managing Director of Hunter Grinders, and Bevan Tattersall, Head Greenkeeper on the Brabazon Course, De Vere Belfry, prepare to crack open a bottle.

The winning team before their remarkable round.
"My customers rely on me, I rely on ING."

Peter Broadbent, Head Greenkeeper
Effingham Golf Club, Effingham, Surrey.

If you’re planning improvements to your business, you should talk to ING.

As one of the world’s major financial organisations, we have a major presence in the grounds care market enabling us to bring a flexible approach to funding new developments and equipment.

ING offer agreements with a range of flexible and innovative features:

- Cash flow matched repayments including VAT
- Contract hire to match contracts
- Credit lines to support financial budgeting

Committed to your business

Rub in your Topdressing
FAST FAST FAST
with the Greens Groomer

What makes the Greens Groomer so special?

- Easy to fit, quick to use
- Controls grain
- Greens back in play sooner
- Removes dew before play
- Stands up grass before mowing
- Rubs in topdressing sand - wet or dry
- Improves germination rate when overseeding
- Also excellent for maintaining sand filled synthetic pitches

Excellent. The best we’ve used
Mr E Adams. St. Andrews Links Trust

Special Operating Lease Scheme – only £90 per month with no deposit and guaranteed ownership!

GreenTek
INNOVATIVE TURF CARE MACHINERY
DESIGNED TO SAVE YOUR TIME!
BTME

- established, still growing and successful
- now in its 15th year and with 8629 visitors in 2002 BTME is an essential experience if your company’s interests are in fine turf:

Architects/Design
All-weather Greens
Aggregates
Aeration
Tee Mats
Bio-organics
Hedge Trimmers
Clothing
Drainage
Netting
pH Control
Rootzone
Ecology
Fertilisers
GC Construction
GC Equipment
GC Vehicles
Rollers
Grinding
Bunker Maintenance
Irrigation
Landscaping

Seeds
Spraying
Cultivators/Rotavators
Spreaders
Top Dressers
Tractors
Trailers
Turf
Water Management
Weather Services
Weed Control
Workshop Equipment

BTME, CLUBHOUSE AND ‘CONTINUE TO LEARN’ combine in one great event - the BIGGA Golf Experience. Whether exhibitor or visitor you cannot afford to miss a week when the golfing world will gather to view new products, discuss innovations, engage in top class education and debate and partake in an exciting social programme.

So whether yours is the longest drive or the shortest drive, hit the road for Harrogate where the BIGGA Golf Experience will be a sure fire winner.

21-22-23 JANUARY 2003
Your company will need to be there if its interests include:

- Furniture and Fittings
- Lockers
- Software and Computer System
- Catering
- Financial Services
- Signage
- Course Accessories
- Clubhouse Design
- Kitchen Equipment
- Vending Machines
- Security
- Breweries
- Trophies
- Carpets
- Hotels and Leisure
- Bar Systems
- Flags or Banners
- Insurance Services
- Beverage
- Proshop

‘Continue to Learn’

BIGGA’s comprehensive education programme offers interesting, informative and practical educational opportunities throughout the week. It is designed to offer maximum flexibility to all visitors allowing them the chance to combine their visit to the Exhibitions with their own professional development.

CLUBHOUSE

- comes of age being staged alongside the BTME. A ‘must visit’ for golf club personnel.

Commenting on the move to Harrogate, Andrew Gibb, Divisional Director of Centre Exhibitions at the NEC, said: “This decision has been made in the best interests of the industry and we fully support the move to Harrogate.”

Keith Lloyd, Secretary of the AGCS, said: “We, at the AGCS are very pleased that Clubhouse is moving to such a venue. It is clearly in the best interests of our members enabling them to visit both exhibitions at the one location and to resource all requirements for their golf clubs.”

HARROGATE INTERNATIONAL CENTRE
A patch of discoloured turf or a patch disease?

Dr Kate Entwistle highlights some the difficulties involved in diagnosing problems

Several times a week I receive telephone calls from both Course Mangers and agronomists, describing turf symptoms to me and asking if I can suggest the likely disease that is affecting their sward. Which disease do I think is present and which fungicide should be applied to control it? Although I am more than happy to discuss the symptoms, their development over time and the conditions of the sward in general which may have contributed to the current problem, suggesting the name of a likely disease on that basis is something that I would never recommend that anyone ever does. A complete and accurate diagnosis of a turf problem can only ever be provided once a sample of the turf has been looked at in the laboratory. However, these situations do highlight some extremely important concerns over problem diagnoses that need to be seriously considered.

A complete and accurate description of the problem is an essential first step to its correct identification. However, if you ask several people with experience in the turf industry, to describe the same turf problem, I can guarantee that they will all provide significantly different descriptions. They will use different words to describe what they see and certain characteristics of the turf problem will come across as more important to some than to others. Confusion arises when this information is passed to someone else (like myself) for their opinion on the cause, because the words used to describe the problem will automatically rule out or may even suggest certain potential candidates. As an example, I was recently asked to comment on a ‘turf disease’ problem that was present across an entire field. The symptoms were described to me as large patches which themselves were not increasing in size, but which had “appeared” and remained at a given size for several weeks. To me, a large patch implies something approaching 0.5 m diameter, fairly regular and circular in outline with the entire sward inside that circular boundary affected in a similar way.

As I found out on visiting the site, what the client meant by a large patch, was completely different. They meant that large parts of the field (patches) were affected but within these parts, the turf was showing signs of localised discoloration, sometimes only individual plants were affected. Of course the ‘patch’ was not increasing in size because, in actual fact, there was no patch. The area of the field affected remained the same regardless of the number of localised infections present.

All professions have their jargon and turf pathology is unfortunately no exception. In the study of turf disease we use a variety of words to describe the symptoms of the disease as well the fungi that cause them. Many of these words have common everyday meanings which may well seem perfectly reasonable to use, but which may have little to do with the ‘pathologists meaning’. The utterance of a single word can send a pathologist running excitedly down a diagnostic path that you may well have not intended them to head!

Sometimes, even seeing symptoms first hand can draw you to an incorrect diagnosis of the problem, if the general symptoms alone are used for the identification. I recently saw an area of Poa annua in which the plants themselves were upright (turgid) and showed no visible signs of foliar rotting but the leaf tissues were fantastic shades of yellow, orange and red. Instantly, you may consider anthracose basal rot – the above ground symptoms were so obvious. However, on removing a few plants from the area, I failed to find any which showed the blackened crown tissue that is characteristic of this fungal disease. It was only on examination with a microscope that I convinced myself that these symptoms were not related to disease but were actually caused by severe droughting.

It doesn’t matter how many times you may have seen a particular problem before, it is always possible to confuse the symptoms with something that could well be totally unrelated. Simply by altering the height of cut, the symptoms of some turf diseases can be dramatically changed and some of the ‘characteristics’ you generally use to diagnose a problem, may not be present or not quite so obvious.

In my opinion, anyone who believes that they can correctly diagnose all turf problems by merely looking at the above ground symptoms, are not only fooling themselves but perhaps more importantly, run a very real risk of making a diagnostic mistake which the turf manager will ultimately have to deal with. This raises another concern. If a problem is described and/or diagnosed incorrectly, it can only be by chance that the correct course of action is advised. If that advice includes pesticide application, you may be applying a product illegally, you may have wasted your time and money on something that was not needed in the first place or you may even have encouraged a disease by the application of an inappropriate product.

The majority of the ‘incorrectly described’ and misdiagnosed turf problems come in the form of ‘patch disease’. Over the past 12 years I have seen hundreds of turf samples from areas that have been described as having a patch disease problem, only to find out through analysis that no fungus was involved in the problem at all. There are a whole range of turf problems that can express themselves as patches and serious fungal disease problems are definitely in the minority.

How well can you identify the grasses in your sward? It is not as easy as you think. You may be fairly certain of your ability but it is very easy to misidentify plant species in close-mown turf and misidentification can send you on a definite wild goose chase when trying to identify any problem. In one
