We thought it was time you heard the hole story.

It's not easy being a pioneer. But since their arrival in 1996, the John Deere line of Aercore Aerators, with their revolutionary belt-driven system and superior Flexi-Link design, have quickly become the number one aerators in the golf equipment industry. Now, with the addition of our tractor mounted Aercore 2000, the bar for productivity has been raised even higher. Like the tractor mounted 1500 and 1000 and the walk behind 800, the Aercore 2000 produces a consistent, round hole. This is due to the Flexi-Link, which is attached to the rear of the tine leg and absorbs the forward motion of the aerator, allowing the tines to stay perpendicular while they are in the ground. As the tines come out of the ground, the Flexi-Link pushes the tine leg forward into position for the next stroke. What you end up with are quality cored holes up to 10 cm (4 in) deep, with productivity up to 9.295 m²/h (100,066 sq ft/hr). To see why the Aercore 2000 and the rest of the Aercore line have outpunched the competition, call your local John Deere dealer or John Deere Limited, Langar, Tel. 01949 860491.

WIN

A superb ‘Duck Down’ waterproof jacket

This is your chance to win a great, quilted jacket worth over £50 in our exciting new Buyer’s Guide competition in association with GreenLink International & Green-Relief

‘The Turf-Time Teaser’

Details on page 48
Scanning the front cover of this particular issue you might be forgiven for thinking that you had been sent a cinema magazine, and not your regular issue of Greenkeeper International, by mistake.

However, on this occasion "Back to the Future..." does not refer to Michael J. Fox's travels through time in a Delorean car, but to BIGGA Executive Director, Neil Thomas' article of the same name. Neil looks back at the growth and success of the Association over the last 15 years and then to the future, explaining some of the initiatives which are being put in place to ensure that such progress is not only maintained, but accelerates, over the next few years.

The motivation for the article is to highlight to you, the reader and BIGGA member, that despite the undoubted success of the Association since its formation in 1997, there is no resting on laurels by the Board of Management or the staff in their efforts to improve.

Why now?

Well, following the Mike Williamson survey which many of you took, part in last year, there emerged a feeling that now was the ideal time to take stock of what the Association does and how it goes about doing it. In other words the famous old adage: "If it ain't broke, don't fix it" was measured against the not-quite-so-memorable adage: "If you don't take time to examine things every so often they might just break".

Next, there followed the flood of letters inspired by Duncan McGalvry's original "Should we lead or be led?" article in the November magazine, which demonstrated that there were many greenkeepers keen to take more control of their own destiny.

It became clear to the Board of Management and the Headquarters staff, therefore, that the time was ripe for the next stage in the development of the Association and the profession. Neil has outlined what will be happening but we want to hear from you, whether it be through the magazine or through elected representatives of the Association. Don't worry if what you want to say is not complimentary. We are keen to hear criticism, particularly the constructive variety, because if members have taken the trouble to make their voice heard it proves they care about their Association. Don't worry if you think the criticism which is not so welcome is the sort which arrives "second hand" because it removes the opportunity for us to explain seemingly anomalous situations more fully.

I equate it to a piece of jigsaw. On its own it might look a little incongruous or even downright comical, as long as both parts fit together, the whole can be accommodated within the parameters of the game as we know it. But continued increases in the distance a ball can be struck is something different. There has to be a limit. "Tournament golf is the showcase of the game, and that should include strategy and fineness as well as just power. Golfers have the right to watch the great champions of today play the traditional and famous golf courses worldwide that will become obsolete unless we do something to control the distance that the leading players today can achieve with modern technology both in the dubs and balls they play!"

Jaime Ortiz Patino has joined the ranks of those who believe limits should be placed on golf technology or the game we know will cease to exist.

The President of Valderamma Golf Club believes that the specification of tournament golf balls is something that the USGA and the R&A could establish quite easily, and this specification should be adopted by all manufacturers of golf balls and played by professionals and scratch amateurs.

"By doing so, we would avoid losing a great many historic courses (through the traditional links courses) simply because they are no longer long enough for championship play."

"Thankfully," Patino wrote in his article on golf in Europe, "the USGA has announced plans to implement new test methods which will better determine whether golf balls conform to the Rules of Golf. It has held extensive discussions with the R&A, which I understand intends to follow the same methods. This is to be welcomed, as long as both organisations agree on a championship ball with reduced performance. Should this be the case, we might be able to dispense with regulations on the spring effect of metal woods."

"It is of considerable concern to many prominent figures in the world of golf that some of our great courses are under threat, and that championship golf is becoming a drive-and-wedge game. It would indeed be a pity if the game were reduced to simply breaking records, and if future generations were to be deprived of such magical moments as Gene Sarazen's remarkable shot at the Masters in 1935, when he made an albatross at the 15th his second shot being played with a 4-wood over the lake that borders the green. Tales of this marvelous shot reverberated around the world, and will be forever recorded in the annals of golfing history. By comparison, Tiger Woods generally plays a 7 or 8-iron for his second shot."

"Despite his undoubted genius, to me he is quite simply not playing the same game that Gene and his contemporaries played 50 or more years ago. Mr Patino points to statistics to substantiate his charges about the impact of technology. From 1968 to 1995, the players' average drive on the USPGA Tour increased just one foot a year. From 1995 until 2001, the drives increased 7.2 feet each year. "This is due to a combination of increased spring effect since 1995 and the introduction of new golf balls." Mr Patino is quick to add that he does not advocate any changes for the vast majority of golfers, and that he believes that even the finest courses need to be "refashioned from time to time to keep up with the changing nature of the game. This can be accommodated within the current parameters of the game as we know it. But continued increases in the distance a ball can be struck is something different. There has to be a limit. "Tournament golf is the showcase of the game, and that should include strategy and fineness as well as just power. Golfers have the right to watch the great champions of today play the traditional and famous golf courses worldwide that will become obsolete unless we do something to control the distance that the leading players today can achieve with modern technology both in the dubs and balls they play!"

The prospect of affordable "golf for all" is being brought closer through a new venture from Open Golf Centres, which has chosen Toro turf equipment to maintain the 15 golf complexes it plans to build.

Open Golf Centres aim is to combine superb pay-and-play facilities and friendly service with top tuition at The Monty Golf School, which is supported by seven-time European number one Colin Montgomerie.

The venture is the brainchild of Stephen Bridges and Martin Wright, who opened their first complex in Christchurch, Donset, this year after extensive research they undertook showed an appalling lack of opportunities for UK pay-and-play golfers to enjoy high quality, affordable golf.

The result was Open Golf Centres, where golf is available to everyone with tuition being paramount.

As part of providing its customers with the best, the organisation entered into a five-year exclusive partnership with "Toro. A wide range of the company's turf machinery is already used to maintain the two 18-hole courses at Christchurch, including the putting and chipping greens, 15 driving ranges and split-level, 60-bay driving range.

And the company expects to spend between £2.5 to £3 million over five-to-seven years putting Toro into all 15 of its complexes.

Jaime Ortiz Patino: Limits needed to protect the game of golf

Scott MacCallum

Steve appointed as new Textron MD

Steve Chicken has been appointed to the position of Managing Director of Textron Golf, Turf and Specialty Products International, with effect from 3rd April 2002.

Announcing the appointment, Dennis Schwieger, Executive Vice President, Sales and Marketing, Textron Golf, Turf & Specialty Products said, "I am delighted that Steve will be leading the excellent team based in Ipswich. Together they are charged with developing our International business to be a significant player in the global golf and turf markets."

"In February 2001 Steve accepted an assignment, based in Charlotte, North Carolina, with a promotion to Vice President of Engineering for the Turf business. During his time in the USA he has gained a broad understanding of the Golf and Turf business, and has also earned the enormous respect of the Senior Management Team. He is, in our view, the obvious candidate to lead the International business during a very challenging period."

Steve is a B.Sc graduate in Aeronautical Engineering from Salford University and a M.Sc. and Ph.D in Aerospace Vehicle Design from Cranfield University.

Following a successful career as a Professional Engineer Officer with the RAF, Steve joined the Ransomes organisation to head up the Engineering function in November 1997. Following the acquisition of Ransomes by Textron in early 1998, Steve was promoted to the position of Engineering Director for Golf, Turf & Specialty Products International, prior to his assignment in the USA.

Steve will be relocating to Ipswich with immediate effect and will be followed home shortly by his wife Sally and daughters, Caroline and Elizabeth.

Announcement as Peter Bell leaves Textron

Textron has announced that Peter Bell has left the company. Peter is moving to take up the position of General Manager of Ardex UK Ltd, a manufacturer of industrial adhesives and sealants based in Haverhill, Suffolk.

Steve Chicken, the new Managing Director of Textron, Ipswich on making the announcement commented. "The business will miss Peter's leadership qualities and his drive. He has made a major contribution to the business over the years, firstly as Managing Director of the Jacobsen EZGO Textron company in Kettering and then latterly in Ipswich in both Sales Director and Marketing Director roles."

"He will also be missed within the golf and turf industry for his business acumen, commitment to new product development and his support for training and best practice initiatives."

"We wish Peter, his wife, June, and their family every success in the future and thank him sincerely for his contribution over the years."

Second Conference Due for Gleneagles

Jimmy Kidd, Golf Courses and Estate Director at The Gleneagles Hotel has announced that the second Gleneagles Turf Care Conference, sponsored by Textron Golf, Turf & Specialty Products, will take place from November 24-26.

This year's conference has the support of FEGGA, the Federation of Golf Greenkeepers Association and will focus on a range of operational issues surrounding the management of a successful golf course.

It is aimed at attracting an audience that includes Directors of Golf, Course Managers, Superintendents, Professionals, General Managers and Secretaries/Treasurers.

"The inaugural conference last November surpassed all my expectations. Our aim was to enlighten, entertain and educate and, without fear of contradiction, I can say that we achieved this...and more," said Jimmy.

"We had a diverse range of delegates from all parts of globe and it provided the ideal forum for them to expand their knowledge and understanding of the golf industry. The speakers, many of whom had travelled from across the world, were first rate and question time at the end of each session provided the opportunity for a lively debate on the various issues raised," he added.

Glyn Patrick, Sales Director at Textron added, "Through Jimmy's vision and the efforts of everyone involved, last year's inaugural conference was a tremendous success and achieved its goal of providing a forum where best practice could be explored to the benefit of all the participants. I'm sure that this year's event will be equally successful and we are delighted to continue our role as principal sponsors."

New Environment leaflet available

As part of the Briggs & Stratton UK Care programme, the company has launched a leaflet - 'Caring for our Environment'. This contains important information on the steps local authorities, contractors and other users of outdoor powered equipment need to take if the minimum amount of pollution is to be released into the atmosphere.

"As market leader, we take environmental issues very seriously. Exhaust emissions on our new engines are the lowest they have ever been and noise levels are down to a minimum. If the user protects our environment is going to be won, then once the engine has been purchased, it is up to the owner or user to make certain that it is maintained correctly. Our leaflet explains the necessary procedures to follow and would be ideal for distributing to operators," said Bryan Peachey, UK General Manager of Briggs & Stratton UK.

For free copies of 'Caring for our Environment' contact Briggs & Stratton on 01708 335616.

Marty Jones leaves Myerscough College

After 20 years service, well known face in the fine turf world, Marty Jones, has left Myerscough College to pursue other interests within the industry. During his years at the College, Marty was instrumental in the setting up of the turf programmes at ND, HND and BSc levels; he designed and built the College golf course that demonstrates a wide variety of construction methods, initiated links and developed internships in America, and has gained an international reputation as a speaker and agronomist.

"Marty has taken early retirement in order to pursue other areas of activity in developing links with the sports turf industry and increasing research opportunities. It is intended that Marty will retain his links with Myerscough as a visiting lecturer and in other ways," said College Principal Professor Moverley.

"I am sure that I speak on behalf of all his colleagues in thanking Marty for the contribution that he has made to Myerscough and in wishing him every success and good health in the future," he added.

For Toro’s Fairway Range nothing is out of bounds.

Reelmaster 5200-D  Ideal for links or heathland courses with slower rates of growth, this lightweight, 26hp workhorse with small reels is competitively-priced and simply engineered for self-servicing.

Reelmaster 5400-D  Similar to its smaller stablemate, the 5400-D’s larger 32hp turbocharged engine gives greater pulling power for more severe cutting conditions or steeper inclines. Options include 2 and 4 wheel drive, cab and grass boxes.

Reelmaster 5500-D  Fitted with a larger engine and bigger reel diameter for higher productivity, the 5500-D follows ground contours smoothly to give the finest of cuts. Options include 2 and 4 wheel drive, cab and grass boxes.

Reelmaster 6500-D  A 38hp engine and larger reel diameter make this a highly productive and easy-to-operate fairway mower. Options include 2 and 4 wheel drive, cab and grass boxes.

Reelmaster 6700-D  Up to 11 feet of exceptional productivity is promised from the 6700-D’s efficient 42hp engine, which comes with 4 wheel drive and is capable of cutting with 5, 6 or 7 units. Options include cab and grass boxes.

At last, here’s a range of fairway mowers that can’t be beaten, whatever the weather or the growth rate. For sheer versatility and high levels of productivity the Toro range of precision-engineered tools are designed to meet all your turf management needs.

So, if you need powerful performance and superb playability, choose from Toro’s Fairway Range. Just call 01480 226800, you are bound to be impressed.

Kevin meets Portuguese Greenkeepers Association

Kevin Shaw (right), European Sales Manager for irrigation pump system manufacturer Flowtronex Europe, meets up with Simao da Cunha, President of the newly-formed Association of Portuguese Greenkeepers, pictured on the Old Course at Vilamoura, Algarve.

Flowtronex pumping systems already form the backbone of irrigation systems for the growing number of golf and leisure complexes on the Algarve, one of Europe’s favourite destinations for golfing holidays and tournaments.

Kevin, who took up full time residence in the Algarve last summer to head up the company’s Sales and Service Centre, was on hand to hear about the new Association of Portuguese Greenkeepers.

“Many people have welcomed the idea. Its backbone is a website through which members can communicate and pick up information - most greenkeepers now have access to a PC and this avenue seemed an obvious choice,” said Simao.

“Companies involved in the business will also be able to promote their services, giving greenkeepers easy and fast access not only to the latest technical information but also a wide range of services,” he added.

Martyn joins Lindum in South Wales

Lindum Turf has expanded its operation into South Wales, following the appointment of Martyn Dave as the company’s new distributor.

Martyn, who was born in Llanharan and has 20 years experience working for the family landscaping company, will enjoy sole distribution rights for the full range of Lindum turf conventional, washed, large and small rolls and crushed shell. Dry Patch at Hoylake was certainly no recent phenomenon either, for old records revealed that the problems were first noted back in 1920.

Laurence Pithie spiced an altogether fascinating talk with his own highly professional slide presentation in talking of ‘Golf Course Development’ from his own individualistic viewpoint, enlivening the proceedings with shots of course construction disasters that would have made Harry Colt turn in his grave.

It was Bernard Findlay, Course Manager at Portstewart Golf Club, who, in the final presentation, set the seal of excellence on the Conference. Bernard had actually built a seaside links course from scratch, had the scars to prove it and the pictures to back up his experiences. The magazine reported that Bernard had begun the day as a greenhorn, modestly murmuring about his inexperience, and finished as the star of the Conference, a perfect role model for other greenkeepers - indeed for the platform presenters - to follow in the future.

The report concluded that if BIGGA can produce such worthy speakers from within the ranks, it is a great credit to the profession and augurs well for the future of greenkeeping.

Stephen is lucky De Vere winner

Stephen Hartshorn, Course Manager at Hoyrose Golf Club, is the lucky winner of the De Vere Hotel Weekend Break competition. Steve, whose course coincidentally featured in last month’s magazine, correctly answered the three golf posers. They were 1. Tom Watson was the man who defeated Jack Nicklaus in the famous head-to-head Open at Turnberry in 1977, 2. Tony Jacklin won The Open in 1969 and 3. 1930 was the year in which Bobby Jones completed the Grand Slam of US Open Championships.

Steve, and his wife, have decided to use the prize to stay at The De Vere Belfry.

Erica joins Turfgrass Growers Association

Turfgrass Growers Association has appointed Erica Nicholls to the position of Business Development Executive.

Working alongside the TGA’s Chief Executive, David Clarke, Erica’s principal remit is to help build and extend the association’s income streams, enabling the TGA to sustain the continued growth in its activities, influence and profile across the United Kingdom, Ireland and further afield.

In addition to expanding the TGA’s range of professional services and activities, Erica will be seeking to increase the number of turf producers and industry suppliers belonging to the association. She is aiming to build on the valuable financial, practical and educational input resulting from the TGA’s training courses, turf shows, seminars, conferences and publications.

Among her first activities for the TGA are the organisation of a series of half-day training courses being held during April, May and June for suppliers, specifiers and installers of cultivated turf and the planning of the TGA’s inaugural turf conference, scheduled to take place at the East of England Showground, Peterborough, on October 24 this year.

Erica brings to her new post a wide range of experience gained in conservation, marketing, IT and public relations. Living near Ipswich, Suffolk, she sings in a local rock band during her spare time.
The BIGGA Board of Management reaffirmed its intention to introduce a minimum qualification for Full Greenkeeper Membership of the Association at its meeting held on 26 March 2002, at BIGGA House. After considering feedback from members who attended the Annual General Meeting, held in Harrogate, on 23 January 2002, together with inputs from the BIGGA Regions and Sections, the Board of Management decided to circulate their recommendations to all BIGGA members, asking for any feedback, before the recommendations are put to the 2003 Annual General Meeting.

Why introduce a minimum qualification?

The reasons for introducing a qualification for full greenkeeper membership are as follows:

- It is Government policy that all adult workers, in all industries, should hold or be working towards, at least, an N/SVQ Level 2 or equivalent, qualification.
- The GTC is encouraging employers of greenkeepers to train all new entrants to N/SVQ Level 2 Sportsturf.
- BIGGA aims to improve the qualifications and status of greenkeepers.
- Greenkeepers want greater recognition and better pay.
- Anyone working as a greenkeeper at a golfing establishment should be competent ie. should be able to do the job without supervision.
- Assessment of competence leads to qualification.

Feedback from the BIGGA Market Research Study 2001, indicated that members felt that strengthening the link between qualifications and BIGGA membership would help to differentiate between members and non members, thus strengthening BIGGA's general standing as a genuinely professional organisation.

N/SVQ Level 2 Sportsturf comprises 7 Units which include basic greenkeeping tasks such as mowing, raking, brushing, scarifying, applying top dressing, fertilising, repairing divots, irrigation, applying pesticides, rolling, course preparation, machinery, construction, estate maintenance and plant identification. Therefore N/SVQ Level 2 Sportsturf shows that the holder can perform all basic greenkeeping tasks, without supervision, at work, to National Standards. The proposal to introduce a minimum qualification for BIGGA membership would not bar anyone from becoming a member of the Association.

Being able to join a professional organisation should increase membership applications not reduce them.

Background Information

All current greenkeeper members of BIGGA would be given full qualified greenkeeper membership.

All new recruits to the Industry, not currently members, applying for full greenkeeper membership, from the date of approval by the AGM, eg. 1 February 2003, would need a minimum qualification of N/SVQ Level 2 Sportsturf or other relevant qualification eg. HND plus experience.

Anyone who does not hold a minimum qualification of N/SVQ Level 2 or equivalent, who is not currently a member of BIGGA, who applies for membership after 1 February 2003, would be offered Greenkeeper Assistant Membership.

As the salary of Greenkeeper Assistants would, probably be lower, they should pay a reduced membership subscription of £10 less than the prevailing rates for Green Staff.

Greenkeeper Members and Greenkeeper Assistant Members would receive the same membership benefits.

Greenkeeper Assistant members could request to be upgraded to full greenkeeper membership once they become qualified.

Any full greenkeeper member who is unqualified and leaves the Association for five years or more would be offered Greenkeeper Assistant Membership on reapplying.

All full greenkeeper members, whether qualified or not, would be enrolled onto the BIGGA CPD Scheme.

All Greenkeeper Assistant members would have their membership category reviewed after 5 years. All full greenkeeper members should be granted continued membership if they continue to pay a subscription and work as a greenkeeper, golf course manager, estate manager or other related job, at a golfing establishment.

Those greenkeepers who have held full greenkeeper membership but are not currently working as a greenkeeper at a golfing establishment but remain connected with the Association, greenkeeping or the fine turf industry, should be granted continued full membership at the Board of Management's discretion.

Any person employed in the keeping of the green at a golfing establishment, who has ten years experience or greater should, on application for membership, be granted full greenkeeper membership at the discretion of the Board of Management.

Conclusion

The introduction of a minimum qualification for greenkeeper membership for BIGGA would not affect current members, unless they left the Association for more than five years and they were not qualified.

Introduction of a minimum qualification for greenkeeper membership should improve the status of members within the Industry and enhance the reputation of BIGGA. For example, Golf Professionals who are members of the PGA are all qualified.

Full Greenkeeper Membership would show employers that the greenkeeper is qualified.

The Standing Committee on Greenkeepers Pay and Conditions of Service already recommends that new recruits to the Industry should be paid a 'training salary' until such time as they become qualified. Therefore, unqualified Greenkeeper Assistants would receive lower rates of pay until such time as they could 'do the job'.

Recruitment of trainee greenkeepers should improve if they could see a defined career path in a professional industry.

The term 'greenkeeper' currently includes anyone maintaining a golf course whether they can actually do the job or not. Greenkeeping is a skilled occupation and the term 'greenkeeper' should indicate that the person is skilled, competent and qualified to work on a golf course.

May's Membership Draw Winner

Just introduce one or more new greenkeeping members to BIGGA and your name will be placed into a draw to win a fantastic BIGGA Clock/calculator/ calendar and a pen. Our congratulations go to May's winner, Brian Hillen, of Drumpper Golf Club.
Key Skills corner

"Wear your learning like your watch, in a private pocket: and do not merely put itstrike its merely to show you have one."

Philip Dormer Stanhope,
Earl of Chesterfield

A great theory, but I am beginning to feel that the greening industry should start to wave the tune-piece in its pocket around a little more. I am referring to the new Key Skills Corner in Greenkeeper International. I was so embarrassed to read Ken Richardson's article telling members where to place capital letters in a sentence, that I taught at the age of six.

Richardson's article telling members in Greenkeeper International, explain to readers the function of a capital letter. Greenkeeping is an industry that has been driven by a lack of adequate training and trying to pitch its levels higher than this. To explain to readers the function of a capital letter is little short of condescending and frankly insulting, and considering the Association is trying to rid ourselves of an unwanted stereotype. Greencare is an industry that needs the input of all bodies within our industry, not just for funding, but also for new and better ideas. Each and every one of us wants the best that education and training can offer from colleges, BIGGA and GTC, and with the support of the R&A and Home Unions the future looks very healthy. Now it's time for cooperation and moving forward.

I for one feel very optimistic for the coming years. Good luck to you all and thanks for taking the time to read this letter.

Gordon Child, BIGGA Past National Chairman and the Association's GTC Representative

quoting your name and Membership number, and we'll do the rest!

A big thank you

As a recipient of the Scottish Patrons' generous letter, I spent a very interesting time at BTME at Harrogate. To be able to attend so many seminars and listen to some of the most knowledgeable speakers in the world of golf was certainly a revelation. As usual on display were the latest machinery and other course necessities which were of the highest order. The camaraderie among fellow greenkeepers was also very much appreciated. In closing I would like to thank the sponsors for their generosity and also my East Section for their kind nomination.

Ian Aitchison

Our members are leading the way!

To say I am proud to be a part of our profession at this moment in time is a considerable understatement.

As you will see from the publicity in this month's magazine, BIGGA, our professional Association has just approved a very exciting initiative, which will ensure that our profession, and with it our professional futures, are secured.

From a personal and professional low point, when I first penned the article "Should we lead or should we be led" some six months ago, I am now extremely excited for all of us now and in the future.

BIGGA officials and Board members had already been looking at areas of concern among the profession (not least apathy), and my article helped to galvanise members' concerns into well reasoned and thought out reaction - your response was admirable.

You will no doubt have read many of the replies and spin off subjects and debates published in the pages of our magazine over the past months - it is still going on! But there have also been many discussions behind the scenes, involving a broad spectrum of greenkeepers from within the profession, offering positive opinions and suggestions, which I have found extremely heartening.

Get - together were arranged during "Harrogate Week" to discuss various issues further, in a more structured way, and recommendations were discussed with BIGGA officials.

BIGGA's Board of Management has subsequently approved the setting up of a group to be named the "Futures" Sub Committee, which will be made up from a wide selection of differing denominations within greencare and golf course management from our membership, who will sit and recommend action regarding the future of our profession.

The terms of reference for this group, which will be finalised at the inaugural meeting, are now published in our Executive Director's article elsewhere in this issue.

Action on various issues will, I am sure, filter through fairly soon watch this space as they say - in fact the first meeting should have already taken place by the time you have read this letter.

I would also like to use this opportunity to impress on every member the importance of voicing your opinions and ideas for the future of our profession - don't sit on it or just talk amongst yourselves - get in touch - any problem or grievance can be solved by discussion and debate.

As a Course Manager I have received valuable comments, ideas and opinions from apprentices through all designations of greenkeepers and managers, to even Captains of golf clubs (honestly!)

Please talk to our professional Association and let them know your feelings - only then can they do something about it.

Through your response, over the past six months or so, I am now convinced there is a secure future for us all.

Duncan McGilvray, Course Manager Potters Bar Golf Club

Clarification

I am writing to clear up any confusion that may arise from your presentation of my article "Changing the Nature of your Greens" in the April edition of Greenkeeper International.

Firstly, the photographs were designed to illustrate the characteristics of each of the primary growth strategies should have been captioned as follows:

- Common mouse-ear (Ruderal). Rapid life cycle and seed production in anticipation of disturbance.
- Mono-stand of competitive species (Ragwort and Rosebay willowherb) in a productive environment. The greater proportion of time here is devoted to producing biomass for resource capture.

I hope you will print these valuable comments, ideas and opinions from amongst yourselves - just talk amongst yourselves - get in touch - any problem or grievance can be solved by discussion and debate.

Greenkeeper education is one of the most important issues for us all, and we are now in a better position than ever before to make big strides forward. We need the input of all bodies within our industry not just for funding, but also for new and better ideas. Each and every one of us wants the best that education and training can offer from colleges, BIGGA and GTC, and with the support of the R&A and Home Unions the future looks very healthy.

Now it's time for cooperation and moving forward.

I for one feel very optimistic for the coming years. Good luck to you all and thanks for taking the time to read this letter.

Gordon Child, BIGGA Past National Chairman and the Association's GTC Representative

- Heather carry, a good example of a stress to-mer.
- Trampling disturbance or grazers will serve to eradicate this important species.

Also, the conclusion to the article ("Feeling the Pressure?") was for some reason placed in the middle of the article. I realise that the article was quite complicated in nature but feel that it was not presented as written. I hope you will print these comments to help clarify any confusion that may have arisen as a result.

Henry C Bechelet, Turfgrass Agronomist, STRI
