Festuca spp.) and the composition within each category and overall, see Figure 1.

It was found that there was a significant relationship between the effective height and the sward composition. In the low category, P.annua had the greatest population, and Festuca had nil.

In the high category, P.annua was comparatively diminished against the Agrostis and Festuca spp.

The medium category was very interesting, especially as it was the most popular category. This could be defined as the transitional zone for Festuca ingress and P.annua egress. Agrostis was shown to be in equal population between the low and medium height. However, in the high category, Agrostis out-competed the P.annua by 3:1. Indeed, in the high category, the combined Festuca and Agrostis out-competed P.annua by almost 4:1. Whereas, in the low category P.annua was out-competing Agrostis by 3:1.

This not only showed that the most popular effective height of cut was 4-5 mm, it also showed that Festuca inhabits where P.annua does not and vice versa. It also showed that Agrostis almost maintained a consistent status through the changing heights, although it’s very difficult to conclude that raising the height of cut will lead to greens with higher proportions of Festuca and Agrostis and much of this possibly relates to the multivariate practices of greenkeeping and geological location etc.

Importantly, however, it has been possible to prove that a lowered effective height of cut will have a P.annua composition, as shown in Figure 1.

Again, it’s worth noting the intersection of P.annua and Agrostis at the medium category and the opposite values of Festuca and P.annua in the low category.

The greens cut at an effective height of cut between 2-3 mm had proven to provide Stimpeter readings for a fast putting surface see Figure 2. Again, this reflects a very large study that was carried out in the U.S (Throssell, 1981) indicating that low cut greens provide a fast surface. Greens cut at between 4-5 mm varied greatest in speeds between medium-slow, medium, medium-fast and fast. Greens cut at >6 mm, varied between medium-fast and fast see Figure 2. This reflects the findings of the Canaway & Baker (1992) as we know that the turfgrass genii they concluded as fastest are in this category, the 1992 study also details the height of cut used as 5 mm (more than likely bench set, so the effective height would be around 6 mm).

So then, what is it to be: horticulture, agriculture or ecology? Well, in conclusion there is a trend for adapted holistic and functional ecological principles in turf management. Foreexample, as greenkeepers we recognise the Power Rule or Self-Thinning (Danneberger, 1993 cited in Lush, 1990). In turf culture, this can be interpreted as an increase in the cutting height increases the leaf area and as the height of cut is reduced, the density of the biomass increases. Again, a recent example is the Disturbance Theory (Bechelet & Windows, 2007), which originates from an ecological study of British Species (Grime et al, 1988), whereby the intensity of a stress is multiplied by the intensity of the disturbing environment, leading to vegetation that is governed by the environmental stresses. Specifically mentioned is mowing pressures, these are identified as one of the variable disturbance pressures governed by the mowing height, quality and frequency. Indeed, a raised height of cut is identified as a less intensive pressure on the turf (Bechelet, 2008).

The confirmation here is that changing the height of cut has a relationship with the species composition of the sward. Of course, there is a relationship with cutting very low and having fast greens, however, this research suggests this will be a predominance or even a monoculture of P.annua and the associated problems with the troublesome weed are well documented (Adams & Gibbs, 1994 and Hagley et al., 2002). But, fast greens are achievable with perennial sustainable species. The cost of reaching the objective of the fast putting perennial surface is to provide the turf environment for Festuca to thrive, in turn causing P.annua to egress, and the Agrostis spp. can play nurse. Remember, by cutting at an effective height in the region of 6 mm is one of the multivariate maintenance practices. The over-seeding of Festuca rubra spp. with Agrostis spp. preferable tennis at the optimum time with the general renovation program should also be considered. As identified (and it could go without saying), there are many variables to affect the golf Greens’ composition, so adjustments to nutrient input and the management of the precipitation and infiltration rate will also need consideration. Nevertheless, I do realise how important these factors are; the research revealed these were seemingly less influential on the sward composition than the cutting height.

Finally, remember to monitor the sward composition and ingress as accurately and as practically as possible, at least randomly sample the species composition of the greens. It is at this point that true management of sward composition is borne, and remember, a ‘walk over inspection’ will not cut it!
A QUICK GUIDE TO...

LINE MARKING

When selecting a linemarking system, the first question to ask is: ‘Does the system suit my specific needs and budget? Peter Bridgewater discusses.

It is vital that the correct choice is made and, after careful assessment, the final selection is the one that suits your needs and circumstances.

Which system to choose, spray or transfer wheel?

A system that applies paint as a spray through a spray-marking machine, is generally used in a multi pitch situation where speed and the number of pitches marked is preferred to quality of line.

However, with a spray marker, the line usually only has to be marked one way as the spray covers both side of the leaf blade.

Transfer Wheel markers

Transfer Wheel markers are probably used more often within the professional sporting ranks where there is more time to mark out a pitch and on which there is a consistent growth of grass to produce a line.

It is also important to achieve a highly visual effect, especially if the game is televised.

Transfer wheel application only coats one side of the leaf blade so a return pass is often required, a practice that take twice the time.

Paint selection

When it comes to paint selection, a massive selection is available.

These range from powders that are mixed with water, pre-mixed ready to use liquids and dilutable concentrates.

In addition there is the bag-in-the-box option, which has made such an impact since its launch.

There is also the option of putting down an initial line using a white marking paint containing a dilute amount of glyphosate.

There is only one MAPP approved product Preline, recommended for this purpose.

All the various options have their supports but there is a cost that must be justified and in this aspect ‘You get what you pay for’.

Cost per pitch

When it comes to paint selection it is important to consider the cost per pitch of the operation NOT the unit cost of the container.

There will be a paint to suit every need and budget but ask questions, trial the paint and see if it does ‘What it says on the tin!’ Don’t just purchase products because that’s what you have always purchased.

Do the maths

‘Do the maths’: Paint with a low unit cost of say 0.39p/litre used neat in a transfer wheel marker on wet muddy pitch will use around 10 litres at a cost of £3.90.

This however is not the true cost as by using a lower quality paint the pitch will probably have to be marked twice doubling the costs.

Economical Option

A paint with better quality ingredients, which will obviously have a higher unit cost of £1.60/litre diluted in water at, say, 4 part water to 1 paint mix (5 litres in total) will be just as economical as when applying 10 litres the actual cost of marking the pitch would be just £3.20.

Presentation:

From the professional turf professional to an enthusiastic amateur volunteer, pitch presentation is everything. The linemarking operation should produce the whitest, straightest lines that budget and time will allow.

Passion for Business • Turn Contacts into Contracts • Fresh Thinking
A new Turbine Blower marks another chapter in AgriMetal’s history of turf care product development and gets its UK launch during BTME at Harrogate Week.

The new heavy duty blower is powered by a Kohler 23HP petrol engine and features a wireless remote control unit that provides control of the engine/turbine RPM and directional control of the air chute. Each remote control works on a unique frequency, so multiple units can be operated in the same area without suffering interference.

An oblong shaped air outlet provides great directional control via the unbreakable, composite material air chute and the aluminium turbine itself is electronically balanced for years of trouble free service and performance.

The Raycam TrunkPump. from Campey Turfcare Systems. comes into its own during in these days where flooding is a much more regular occurrence. Fully portable and PTO driven, it can be mounted on most tractors by a three point linkage.

The pump, hoses and operator can then easily be transported to the flood site, making it a one person job. The 3-inch plastic centrifugal pump can handle salt water and chemicals, has 25 feet of suction head and can efficiently pump 1100 litres per minute.

So even when the weather throws its worst at you, the Raycam TrunkPump gives you the facility to react quickly and independently to remove the excess from troublesome standing pools of water, relieve the pressure from small lakes or ponds on golf courses or in parks and return the site to its designated use as soon as possible, with the minimum of fuss.

www.campeyturfcare.com

OARS/correctOARS

For the past two years, Aqua-Aid Inc. has been in dispute with its former distributors, Tower Chemicals Limited (now in liquidation) and its directors, in relation to its OARS branded product.

The parties have now settled this dispute amicably.

While correctOARS is no longer available for purchase, the former directors of Tower Chemicals Limited, David and Edward Goldstone, have issued an apology for any confusion caused and made a statement clarifying that:

• OARS was and never has been anything to do with correctOARS
• CorrectOARS was not an Aqua-Aid product and was never supplied by Aqua-Aid
• Tower Chemicals is no longer an OARS distributor and Tower Sports (Europe) Limited has never been an OARS distributor
• OARS was a different product to correctOARS; and
• Aqua-Aid and its distributors are fully entitled to incorporate the Milliken patented technology into its OARS product.

Water Water Everywhere

The Raycam TrunkPump from Campey Turfcare Systems comes into its own during in these days where flooding is a much more regular occurrence. Fully portable and PTO driven, it can be mounted on most tractors by a three point linkage.

The pump, hoses and operator can then easily be transported to the flood site, making it a one person job. The 3-inch plastic centrifugal pump can handle salt water and chemicals, has 25 feet of suction head and can efficiently pump 1100 litres per minute.

So even when the weather throws its worst at you, the Raycam TrunkPump gives you the facility to react quickly and independently to remove the excess from troublesome standing pools of water, relieve the pressure from small lakes or ponds on golf courses or in parks and return the site to its designated use as soon as possible, with the minimum of fuss.
Toro get Tough with the New Workman HD Series

Built to handle even the toughest of tasks, Toro’s new Workman HD Series of heavy duty utility vehicles is tougher than ever. Comprising two-wheel and four-wheel drive diesel options, the Workman HDX-D boasts the highest total carrying load in the industry together with a towing capacity of up to 1,588kg/3,500lb.

Replacing its predecessors the Workman 3300 and 4300, key features of the HD Series include the i-beam shaped DeDion rear axle, an innovative automotive technology that isolates the engine, transmission and main frame from all load forces, thereby eliminating potential overstress in these components and ensuring the vehicle’s trouble-free long life.

Further design benefits such as a truss-like front space frame, integrated wheel bearings and hydraulic disc brakes on all four wheels for greater stopping power ensure the Workman HD Series utility vehicles combine remarkable performance with a smooth, comfortable ride.

Boom Time for New Holland

New Holland celebrates 45 years of involvement in the compact tractor sector in 2010, and will mark the occasion by launching the Boomer 3000 series, featuring the award winning EasyDrive continuously variable transmission. The tractor allows drivers to match exact speed to every task without being fixed to a gear, thus maximising productivity.

www.newholland.com

Traditionally, rootzone mixes for intensively used sports areas have comprised of sand amended with either soil or peat to increase the water and nutrient retention characteristics. However, neither of these resources is renewable. There is significant interest in the use of green compost as an organic amendment in rootzone mixes, as it is sustainable and environmentally sound. Accordingly, Bathgate Silica Sand developed Re-Root, which has recently completed a thorough independent evaluation by the STR on the physical and chemical properties of the product, especially regarding water and nutrient retention, drainage, grass growth and turf quality.

The results obtained were compared with conventional blended sand/soil mixes. Re-root led to significantly quicker grass establishment than the sand/soil rootzone treatments. Although Saturated Hydraulic conductivity was measured at 213 mm/h, concentrations of the critical nutrients were nevertheless higher for Re-root than in the conventional sand/soil rootzones. In particular, Re-Root retained 40% more Nitrogen. Greater chlorophyll index values were exhibited in the Re-Root turf in comparison to the conventional sand/soil mixes.

Re-Root and its counterpart Re-Dress, a similarly amended Top Dressing, are now available as renewable products.

www.bathgatesilica.co.uk
I trust everyone had a good Christmas and New Year and are now looking forward to BTME. In December, the Section had an interesting evening seminar at Elmwood with Martin Ward, of Symbio, talking about Compost teas. This was hastily arranged due to the short notice of Martin’s availability and we are fortunate to have good email communication along with the info on our website, www.biggacentralsection.org.uk which allows us to contact people in this way.

To stay in the loop it is vital members keep us informed of any changes to their contact details. This took the place of the appraisal training which has now been postponed until the New Year, it is hoped that we will run this course sometime in February, in association with the CMAE, at the same venue (Old Course Hotel, St Andrews). Further details will appear on website in near future.

In early December I was fortunate to visit the Manitoba Turf Conference in Winnipeg, Canada, to give a couple of presentations. Including me there were only three speakers to cover the three days and it was fascinating to discover that although from different fields we were all advocating the practical, cultural approach and also that the Canadians face the same problems as we do in the UK.

You may think Winnipeg in December would have been a difficult (and cold) gig but I found the 100 attendees to be extremely motivated and enthusiastic which made the whole trip very enjoyable. At the time of writing Gordon McKie is doing a similar exercise in China, along with Elmwood College, a report on that next month.

A presentation by Stan Zontek, of the USGA Green Section, sometime in April is on the cards. More details later.

Gordon Moir

Happy New Year all, I hope you are now dieting hectically after you’re over indulgence during the festive period or you’re out jogging trying to shed the few pounds around the waistline. As nobody else is willing to undertake the task of penning a few words each month and the fact that the whole of last year not a single footnote was submitted I have now been given the opportunity to try and stir up some enthusiasm within the ranks of the West Section. Therefore if you have any information to pass on let me know about it by contacting me via phone 07790823914 or 0141-942-5554, or e mail me at st.greenkeeper@ukonline.co.uk. Stuart Taylor in case you were wondering.

I hope you are all keeping well and looking forward to a good season this year. Hopefully the financial situation will change slightly in the next few months to give some optimism for the future as I'm most of us have suffered from budget restraints.

Well, let’s try not to be depressive, I look forward to seeing a few of you at Harrogate this month and would pass on my congratulations to John Brown and David McBride on receiving the Patrons’ Award and will hope you enjoy the trip to the show. Thanks to our many Patrons.

A couple of items to mention which happened over the last few months

The AGM was held at East Kilbride Golf Club, on October 29, and 25 people attended, which isn’t too bad as things go. Thanks must be extended to Symbio and Rigby Taylor for sponsoring the day and giving two excellent talks. Thanks also to Brian Bolland, and East Kilbride Golf Club, for hosting the event this is very much appreciated.

The annual Match against the Clubmasters was held at Cardross golf club on November 2 on a pretty wet day and congratulations must be expressed to John Barr and his staff for enabling this match to go ahead. Well done lads. Four teams took part with the matches finishing two a piece - the clubmasters retained the trophy as they were the previous winners. Could members who are interested in taking part in this event next year please inform a committee member as each year the clubmasters have at least 12 people available and we struggle to find numbers.

The Ingliston show this year wasn’t quite as busy as previously seen but numbers appeared to be satisfactory, I hope all that attended enjoyed the experience and were able to conduct their business satisfactorily.

The Annual Dinner on November 27, held at The Loft in Ashton Lane, was attended by 23 people and all who turned up seemed to have a good time. There was some comment that people didn’t know about the event and I would apologise if this was the case but, at the same time, who did you contact to find out about it, as the event is held each year at roughly the same time?

One for the future will be at football match against the Ayrshire Section some time in March/April. If there are people interested then contact any of the committee members: Brian Hillan; Douglas MacIntosh; John Barr; Brian Bolland; David McBride; John Brown; Derek Duthie; Gordon Howatt; Gavin Jarvis; Fraser Ross and myself.

I hope to hear from you in the near future and look forward to the various comments from members.

Stuart Taylor

January comes but once a year and thank goodness for that with new year resolutions that last if you’re lucky a couple of days, cold short days and longer even colder nights but we must look on the bright side (well we are greenkeepers do we really have a choice but to look on the bright side!), new year, new start, lessons learned during the last year put to practice to make this coming year possibly the best yet.

In November, we held the Christmas tournament at Caldy Golf Club and on the what seemed like the only dry day in that month, 56 greenkeepers and guest played what can only be described as a completely blemish proof course, followed by a scrumptious meal in the club house all thanks go to Carl Crocher and his team for the exemplary course and to the clubhouse staff for the food and warm hospitality shown to us all.

The results of the golf day are: 1. Stuart Yarwood (who also did pretty at the raffle table too although I’m not bitter... not much anyway!), Ian Taylor, Andrew (Acorn) Corne and Rob Northern Region

The results of the golf day are: 1. Stuart Yarwood (who also did pretty at the raffle table too although I’m not bitter... not much anyway!), Ian Taylor, Andrew (Acorn) Corne and Rob...
Cooper, 84pts; 2. Phil Watson, Eifion Ellis, Will Evans and Moody, 82pts; 3. Jez Hughes, Johnny Evans, Peter Larter and Huw Brown, 82pts

Nearest the Pin went to Jez Adamson on the 2nd and Ian Taylor on the 17th greens.

The AGM was also held after the meal and with 27 members present, various reports where given on the state of our Section and we’re looking pretty healthy and the Section committee was voted back on as is.

We held a half day seminar at The Welsh College of Horticulture in Northop on December 9 on the subject of cylinder sharpening and the importance of sharp units in greenkeeping. We have to thank Bernhard’s for giving the seminar and the College for hosting the event.

The bus to Harrogate is due to run again this year but will only be put on if enough seats are booked so please get your seat reservations to Jez Hughes by January 10 at the latest.

Well that seems to bring us up to date for now but if you have any news to share with the Section please get in touch contact details below.

All the best until next month!

Pete Maybury petemayb66@aol.com
Johnny Evans
Johnny.Evans@tesco.net

North West

We held the AGM and Bert Cross Trophy at Wilsom Golf Club on December 3.

The day started well and then down came the rain and sleet. 41 members started but only 18 finished the full round. The winner was Tim Johnson, who works at Wilsom Golf Club.

Tim also won Nearest the Pin with the Longest Drive going to Spencer Lloyd Pye. Many thanks to Bathgate’s for their sponsorship over the years. A special thank you to Steve Oultram and the Wilsom Golf Club for allowing us to have our AGM and golf day there every year.

While we are on the subject of thanks a mention to the North West Committee who work very hard on your behalf. We have a new Chairman this year, Adie Holt, who is based at Birchwood Golf Club, was pleased to accept the post and our Vice Chairman is Peter McVicar, who will take over from Adie in two years time. Two new additions to the committee are Mike Davie and Alec Davis. A warm welcome to you both. These will be the last notes I will be compiling as Peter has kindly decided to take on this job next year. Thanks Peter.

Please think about attending Harrogate this year if you can bring your Green Chairman or Secretary they might be impressed at how professional we all are. I am sure they will enjoy the show.

Chris Sheehan

Northern

Hello all. Hope you’ve all had a good 2009 golf season. We hope to see you all at this year’s golf events. A few changes to note on the Northern Section Committee. Firstly, to thank Adam for his good work over the last few years as Secretary and I’m pleased to see him carry on as Treasurer. Also a welcome to Richard Smith onto the Committee.

I hope by the time you read this report we will have news of your 2010 golf fixtures and a date for a spring seminar.

Hope to see you all at BTME at Harrogate.

Just time to wish all a belated Merry Christmas and hope you all have a Happy New Year.

Any news or gossip, please contact me.

Midland Region

Midland

Well I am afraid that as usual I have left our notes to the very last moment, if indeed not too late. The reason for such being that here at Stratford we have been reconstucting a tee and laying turf that must have come from Cockermouth in Cumbria! So all I have time to report is the results of our Christmas event held at the wonderful venue of Woburn.

Thanks to Woburn Golf Club for affording us the opportunity to play such an internationally renowned and respected course, as wonderfully presented by John Clarke, Course Manager, and his expert team. You must all be very proud of the course you produce, tremendous. The famous Duke’s Course was our host and what a pleasure. As two tees were employed we were blessed with two Mr Starters, our thanks to John Hammond and Mike Whitehouse.

The main prize table was sponsored by Mark Chamberlain/Tacit. The results being; 1. A. Jones & A. Brougham; 2. T. Cheese & R. Beacham; 3. M. Hughes & C. Lowe. N.T.P.s were sponsored by both Tacit x2 and N. Tyler/Sheriff Amenity x2.

The education day that was held at Forest Hill Golf Club saw a great attendance from many golf clubs. I think everyone who attended would agree that the topics were very interesting and created great debate.

I would like to draw people’s attention to the article in last month’s magazine about the fund that was set up so that greenkeepers could possibly have a course to call their own. What a dream! What an inspirational idea, that if successful could change our industry for the better. Wouldn’t it be nice if greenkeepers around the country pulled together and made the dream come true.

If anyone has anything that they think is worth mentioning, it can be anything, anything at all then please e-mail: Andy de Wet at biggaeastmidlands@hotmail.com.

Matt Wormald

East Midlands

Over the three years I have been greenkeeping I have always read the “Around the Green” articles and found it fascinating the different topics people write about and the different styles of writing, having just joined the BIGGA committee for the East Midlands I now find myself thinking frantically of things to write about, hoping that it at least maybe interesting to some of you reading this.

Firstly, I would like to start by saying a few over due congratulations to David James and his wife, Biba, for the birth of their son, Connor, and to Colin Crowther and his wife, Clare, on the birth of their baby daughter, Chloe. Both babies are doing well.

Our Autumn Comp and AGM was held at Matlock GC on October 15. The damp and rainy day wasn’t able to curb people’s enthusiasm and a great day was had by all in attendance. The day was won by Mark Blacknell, Mick Marvell and Tim Bloodworth – putting his local knowledge to good use!

Our thanks go to Tim and his team for presenting the course in such fantastic condition and also to our sponsors for the event – Boughton Loam, British Seed Houses, Henton & Chartell and Sheriff Amenity.

The AGM was largely uneventful with Asa English, Andy Marsh and Tim Allard standing down from the committee. Thanks for all your effort and input over the past few years guys. They have been replaced by Peter Smith, Greg Skinner and Matthew Wormald.

The education day that was held at Forest Hill Golf Club saw a great attendance from many golf clubs. I think everyone who attended would agree that the topics were very interesting and created great debate.

GC and Ashridge GC. Dates and
most welcome.

hospitality and making us feel
suitably proud of their course.
I know that the members are
and develop over the years and
fairly regular visitor to the club,
the golf course was in exceptional
dering the course. Frank is stepping
down from the committee this
year after many, many years of
service looking after the mem-
bers interests and enabling the
Section to function effectively.
Thanks very much Frank, it is
very much appreciated and we
wish you well.

A look forward to seeing those
of you that are travelling to
Harrogate for BTME later this
month, let’s hope it doesn’t
snow. TTFN

Mid-Anglia

Happy New Year to one and
all, I trust you all had a restful
and peaceful Christmas. Let’s
hope that Spring comes early
this year and any troubles you
encounter are minor ones. Sorry
it’s a little while after the event
but here is the report from the
Autumn Tournament held at Mid-Anglia GC on October 7. A field of 34 contested the
event and the weather was not
bad at all. 39pts was enough to secure victory for P. Compton,
from Stevenage Golf Club,
with Nigel Phelan, St Andrews Hospitals GC, on 37pts coming
a good second and D.Hodkin,
Knebworth GC, in a respectable
third with 36pts. There were
prizes for Nearest the Pin on all
five par threes with Geoff James,
Geoff Fenn, Nigel Phelan, Kevin
Armstrong and Steve Mason
proving to be the most deadliest
eyed dicks.

Rob Catlin and Dave Murphy,
from Pareto, were the generous
sponsors of the day and a big
thank you to you both for not
only sponsoring the event but
for your long and continued
support over the years of the
Section.

Jody Wilson and his team
must also be congratulated as
the golf course was in exceptional
order, as it is all year round. As
a fairly regular visitor to the club,
I have seen the course improve
and develop over the years and
know that the members are
suitably proud of their course.
Thanks also go to Mid-Herts
Golf Club itself for their kind
hospitality and making us feel
most welcome.

This year’s competitions are
cancelled for Aspley Guise
GC, Stocks GC, Berkhamsted
GC and Ashridge GC. Dates and
times are yet to be confirmed but
I will keep you posted. We were
going to have an extra golf day
this year but we couldn’t find
another venue within walking
distance of the others!

The Section Committee would
also like to take this opportunity
to thank Frank Scullion, of
Dunstable Downs GC, most
sincerely for his contribution to
the Section. Frank is stepping
down from the committee this
year after many, many years of
service looking after the mem-
ers interests and enabling the
Section to function effectively.
Thanks very much Frank, it is
very much appreciated and we
wish you well.

I look forward to seeing those
of you that are travelling to
Harrogate for BTME later this
month, let’s hope it doesn’t

please contact South East
Regional Administrator Clive
Osgood on 01737 819343 mob
07841 948410 or cliveosgood@yahoo.co.uk

BMW PGA Championship
Anyone wishing to volunteer
to be a part of the BMW PGA
Championship Support Team
for the final two days of the
Championship at The Wentworth
Club on Saturday May 22 and Sunday May 23, should
contact Clive on the above num-
bers. A limited number will also
be required as an emergency
squad for the opening two days
Thursday May 20 and Friday
May 21.
Clive Osgood

Surrey

Sunday, December 6. The
following should have appeared
in the December edition. I do
not know why it was missed as
it was emailed on time. Please
read on for belated news.

Saturday, November 7. I am
sure you will all be pleased to
read that since my Baltic cruise
I have not just been enjoying
myself driving around in my
van, visiting customers, I have
had to endure two further short
holidays. The first was a long
week-end at Studland Bay,
Kent

Happy New Year!

Now that silly season is over and hopefully all the extended families have left your respective domiciles relatively unscathed, you can start to concentrate on restoring some sanity to your daily lives. The psychological tolls taken by excessive Christmas celebrations. Will I see you in Harrogate?
Essex

We are into a new year and Essex has a slightly changed Committee, at the AGM and Winter Team event at Orsett Golf Club on Tuesday, December 1. Mark Stoppes, of Bentley Golf Club, was elected as your new Chairman. Dominic Rodgers, Warley Park Golf Club, as your Secretary, plus Andy Cracknell, Orsett Golf Club, to the position of Competition and Handicap Secretary. The following stay in their former positions of Treasurer Tom Smith, Paul O’Kane, Education and Arnold Phipps-Jones as your Press Officer. All contact details are on the committee page on the website.

We thank you all very much for your support over the past year. The Section also wishes to thank Clive Osgood our Regional Administrator for his support to the section over this last year.

Lastly, I must thank Martin Forrester, our long standing Secretary who has decided to stand down from the position after such along time. Martin was an instigator in the formation of the Essex Section some 13 years ago and he has put in a lot of hard work over his years on the committee. We will miss him as Secretary and wise man on the committee I’m sure, though he will still be joining us on our golf days over the coming months and years.

Also to Antony Kirwan, who has decided to have a year of rest from a major role on the committee? He will be missed, as he has a big contribution to the section in the way we have progressed forward on our golf days, bringing computerisation into results and handicapping.

Thank you to both of them for what they have done for the Section.

Next year’s events are also on the website, starting with our Seminar and then the first golf event, The Spring Trophy at South Essex Golf Club, Tuesday, April 27.

If you do have any news for the website or for GI, please contact me on 07764 862 337 or via email essexbigga@talktalk.net

Arnold Phipps-Jones
Press Officer

London

Firstly I would like to wish a Happy New Year to all of you in the Section.

I know it has been along time since the London Section has put anything in the ‘Around the Green’ but I am going to try and produce reminders of education days, golf days and any other news. I’ve got a lot to talk about for once this month.

I am writing this before the Turkey Trot which is being held at Sandy Lodge Golf Club so I will have the results in next months issue. I would like to thank Lee Cox for writing last year’s notes.

There has been a slight change to the London Section. Rob Phillips, from Sandy Lodge, has stepped down as our Chairman after eight years on the committee.

We have enjoyed some wonderful golf tournaments and really good education days over the years, so I would like to thank Rob for all his time and effort to keep the Section going.

Don’t worry, Rob will remain as Treasurer on the new committee, he won’t let the purse strings go just yet!

The new Chairman is Aaron Percival who has been Rob’s
