should be marked with red stakes or lines, thus enabling the golfer to drop the ball laterally within two club-lengths of the point where it last crossed, or if possible, on the opposite margin equidistant to the hole. If greenkeepers think about this when marking water hazards, they should always end up with a correctly marked hazard which will dramatically reduce the risk of a tricky ruling situation!

**The Putting Green – Pin Positions**

When setting a golf course up, pin positions on the green are one of the hottest debated topics at a tournament or a monthly medal at a golf club. Greenkeepers should be aware that when setting a pin position, there is no law as to how far on a green the pin should be or how far from the side of the green the pin should be. However, as a rule of thumb, it is recommended that a pin position should never be less than four paces on the green from the front edge and less than three paces from the side; i.e. a three on, two right pin would not be recommended as this would not only look strange on the eye but would also be deemed as being unfair to the competitor.

When setting pins, another area to consider is whether the area where the pin is to be put is close to a bunker and may be affected by the sand which lands on the putting green. Although in the Rules of Golf, sand and loose soil are only loose impediments on the putting green and thus, may only be moved on the putting green, it would look visually poor for visitors or members of the golf club to have a pin position covered with sand. If these guidelines are followed, then there should be less cause for debate in the clubhouse after play!

**Ground Under Repair (Gur)**

Finally, the subject of ground under repair (GUR) tends to cause much discussion in clubhouse bars. Normally the debate is what defines an area of a golf course to be GUR and is usually sparked off by an angry golfer who had the misfortune of experiencing a particularly nasty lie in the rough!

An area of GUR should only be marked by a greenkeeper if they are certain that this area is abnormal from anywhere else on the golf course. If during a tournament, relief is given for GUR, this area must be marked by a white line immediately so that any further balls within this area are given the same ruling as given previously. Consistency is the key in terms of the rules of golf.

However, it is worth noting that many areas of the course that are classed as GUR under the Rules of Golf need not be marked. It is often common for golf courses to be covered in white paint under the instruction of the Committee or simply just a paint happy greenkeeper... there is no need for this!

For example, casts, holes or runways made by burrowing animals or birds do not require white lines, nor does casual water, material piled for removal or any hole made by a greenkeeper. By remembering this, the greenkeeper will promote consistency in his marking of GUR and visually, the golf course will look a lot better to visitors.

In conclusion, under Rule 6-1, the player is responsible for knowing the Rules. However, if a greenkeeper pays special attention to the above pointers, his course will be presented to a highly professional standard and will fall into line with recommendations outlined in the Rules of Golf.

When playing tournament golf, a correctly marked golf course will also aid the competitor in applying the rules both fairly and consistently which at the end of the day is the desired effect for both a Committee and the player.

The Queen’s Club

**Question 1**

How have the demands on your playing surfaces increased over the last few years?

**Question 2**

What one thing (product, machine etc) has helped you meet those demands and how?

**Question 3**

What one area of your job has changed most markedly in recent times?
Sports turf comes in many forms and each requires a very special range of skills to maintain it at its best. Compiled by Jim Cook.

<table>
<thead>
<tr>
<th>Question 4</th>
<th>Question 5</th>
<th>Question 6</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>What one thing makes your particular job different from those of other sports turf professionals?</strong></td>
<td><strong>What has been the highlight of your career to date?</strong></td>
<td><strong>Have you found that those using your sports surface are becoming more critical and demanding?</strong></td>
</tr>
<tr>
<td>We have one of the most hostile conditions in the world in which to grow grass, due to the heights of the stands, the close proximity of stands to pitch and the fact that as a town centre stadium we are relatively 'boxed in'. This coupled with the fact that we have the only portable pitch in the UK.</td>
<td>Appointed at the tender age of 34, I have overseen four FA Cup finals, three Rugby Grandslams, and Rugby World Cup games. It’s a real privilege to have provided surfaces for such iconic sporting occasions. Being a proud Welshman, providing the surface in 2005 which saw the first Welsh grand slam in 27 years was a personal highlight.</td>
<td>There has always been, and should always be, a quality standard requirement and failure to reach this will ultimately end in criticism. It’s good to be able to have profitable conversations, with groundstaff, about how we can help the performance of all teams and ultimately give the paying public a more enjoyable experience.</td>
</tr>
<tr>
<td>The diversity of the role. Golf course management has evolved so much in recent years. Obviously greenkeepers need to have an in-depth knowledge of agronomy, but these days they also need to be well versed in ecology, arboriculture, wildlife and habitat management, best environmental practices, hydrology, golf course design and construction methods as well as people and business management.</td>
<td>There have been so many highlights in my career. Achieving the Golf Course Superintendent and Estate Managers position in 2008 at one of the finest golf clubs in the world has to be my greatest achievement and receiving accolades from PGA professionals, peers and members.</td>
<td>Yes, I think customers are more demanding in this competitive leisure industry. I would say that we welcome constructive criticism as it keeps us focused and inspires us to keep on improving. This does involve harder work and more hours, but together with drive and dedication this is crucial to ensure that we always have that special edge.</td>
</tr>
<tr>
<td>We have to work with clay and also have to work with a very fast draining outfield. I have to deal with the two extremes of soil, so water movement in the soil is most important. On two levels, one drains quickly and one holds the water. Both have their problems but that is what I have to work with.</td>
<td>It would be going to Buckingham Palace, when Nottinghamshire County Cricket Club received their championship winning medals in 2005. And also doing last year’s 20/20 World Cup was a highlight.</td>
<td>Yes, definitely, because there are more games broadcast on television and a lot of people tend to listen to the commentators when they discuss the ground.</td>
</tr>
<tr>
<td>We are a members club, which gets transformed into a venue for a world class event. Our centre court for example has our pavilion on one side and two hard courts on the other for ten months of the year. For the championships it becomes a bowl full of 7500 seats. Three weeks later it’s back to the usual layout.</td>
<td>The highlight of my career is probably passing the IOG National Diploma in Turf Culture and having Rafa Nadal come and shake my hand before he collected his trophy when he won the Aegon here at Queens.</td>
<td>Not sure if users have become more critical or demanding than in the past. I guess with so many less grass tennis courts around than in the past, the users, in particular the professionals, do not understand the idiosyncrasies of a grass court.</td>
</tr>
<tr>
<td>The one factor that separates horse racing from other sports is the extremes of damage following a race meeting in conditions that are not ideal. Imagine around 90, half-tonne horses running on heavy going in one day, then you repair it for the next and you have another one, two or even three days in the race meeting.</td>
<td>My first Grand National in 2000 as Head Groundsman was very special. Also being involved with the two-and-a-half million track project at York over the past three years. Winning the Neil Wyatt Flat Racecourse Groundstaff Awards for 2009 at York this year was incredible after winning the jumps division at Aintree earlier on in my career.</td>
<td>Most definitely, as more money becomes involved in any sport this ultimately brings more pressure to all involved within the sport. As with every sport, there seems to be a lot of experts who know a lot about our job and some love to air their views on television, without knowing the full facts.</td>
</tr>

Reducing Electricity Costs from your Irrigation System

Tim Hooper looks at how you can make savings to your electricity bills by cutting down on irrigation consumption

Electricity charges are soon to increase by 25%; it was recently announced by the BBC. So then, we should be looking at how to save on our electricity consumption on irrigation systems.

A Variable-Speed Drive Inverter (hereafter called an “inverter”) will reduce electricity consumption and can make significant savings to your electricity bill. Furthermore, if your system happens to have a leak, the inverter can be set up to help minimise bursts.

An inverter when linked to a pressure sensor, controls the speed of your pump which in turn enables the pump to keep the pressure in your system at a set point, as long as the flow’s required fall is within the pumps capability.

The pump or pumps in an irrigation system should be sized to operate the ‘station’ that has the highest flow rate (plus 10%) at a given pressure. A standard pump starter operates the pump at full speed, drawing maximum electricity, unnecessarily for most stations and either generates unrequired pressure or passes water back to the tank via the pressure relief; this correction is done using precious electricity which could be saved.

If an inverter is fitted, on stations that require less duty from the pump, it slows the pump down. The result is that the motor draws less electricity. For example, on a tee 12.5 metres wide and 40 metres long a pump with a 7.5kW motor can draw as little as 1.6kW. A saving of 6 kW!

If you multiply this saving of 6kW at £0.47, by eighteen tees, run each tee for an average of 15 minutes per night and 100 nights a year ; you would be looking at a saving of £1,250.00 per year on your tees alone. A saving certainly worthwhile.

Inverters have additional benefit. They can help prevent bursts on leaking systems and for those Clubs which have only single phase electrics, there are inverters that operate on single phase electricity, but run three phase motors. The impact of this is that you can run a pump with a 4kW motor instead of one with a 2.2kW motor. Some sites have three pumps, each with 4kW motors, robust enough for most irrigation systems that water greens, tees and approach. It is more costly than the standard three-phase inverter, but still far cheaper than any alternative.

There are three main styles of inverter. Each one can be installed as a single or multi-pump pumping station, but all have variable functionality.

Type 1: this inverter is an integrated part of the motor as on the Grundfos CRIE pump range. These inverters are manufactured by the pump manufacturer and as a stand alone unit, offer a reasonable level of functionality. You can also fit a single or multi-pump sets to a network. This gives full remote network monitoring, fault notification and integration to the larger types of controllers. Since the inverter is an integral part of the motor, this option is normally used when new pumps are installed.

Type 2 is a motor mounted inverter: an example would be the Lowara Hydrova. The inverter is simple to install on existing systems and has most of the functions you would want. They can also be linked together in multi-pump sets.

Type 3 is a dedicated wall mounted inverter. This option is slightly more expensive, but offers considerably more functionality and the added ability to integrate with even simple wall mounted controllers and larger PC controlled systems. The additional benefits such as the option for GSM (mobile phone) control and fault notification also offer cost benefits.

If your system has leaks, some inverters can be programmed so the ramp up (the speed the pump speeds up) on start up and the last ramp down (the speed the pump slows down) can be set to take a few minutes. This results in the mains being filled considerably slower than conventional pump starters and helps prevent water hammer.

Water hammer occurs when water travels down a pipe and then stops quickly. The energy in the water creates shock waves up and down the pipe and fittings. This results in pipe work being put under greater pressures than it was designed for and results in bursts.

Another area to consider is your controller. If your irrigation controller can only run one station at a time and your system has stations with low flows, such as tees, approaches etc. you can dramatically reduce the time the pump is run by upgrading your controller.

Modern controllers (even some wall mounted controllers) have the ability to run two or three stations at a time on the same cable path and so preventing the need for a rewire. This would obviously shorten your system run time and reduce running costs.

With electricity price hikes on the way again, and Clubs becoming increasing vigilant at curbing running and maintenance costs, you should look seriously at the inverter and controller options, if you haven’t done so already.

Fill in the grid so that every row, every column and every 9 box shape contains the numbers 1 to 9.
Superseding the ZD Series, is the new ZD326 zero turn mower from Kubota. The ZD326 zero turn commercial mower delivers all the power, productivity, durability and manoeuvrability demanded by professionals for day in, day out mowing applications.

Fitted with the 26hp Kubota E-TVCS (Triple Vortex Combustion System) D1005, 3 cylinder, liquid cooled diesel engine, the ZD326 has the power, torque and durability to take on the toughest mowing jobs. And it can work for longer, thanks to the 45 litre dual fuel tank and Kubota’s outstanding fuel economy with low emissions, noise and vibration. The large radiator improves cooling to prevent the engine from overheating, even in the most demanding conditions, and the duel element air cleaner ensures cool clean air is delivered at all times.

Ragwort will soon start to cover the countryside but by then it could be too late for effective and lasting control.

Attempts to dig out plants makes matters worse by generating a new plant for every fragment of the long and stubborn tap root left in the ground.

Spot-on and measured shots of herbicide applied when spring re-growth is set to start, but while plants are still sluggish and susceptible after low light and temperature conditions in winter, is required.

The Weedstick, from Micron Sprayers is easy to carry and use and allows operators to place herbicide exactly and precisely where needed, which is spot-on the flat ground-hugging rosettes of leaves.

The Weedstick is simply placed over the ragwort weed to be treated and pressed down to deliver the required dose of herbicide which is once for small plants and a second time for larger plants.

www.micron.co.uk

Campey Turfcare has introduced the Timan RC-750 Remote Control Brush Cutter/Slope Mower.

Where the grass is too long and the ground slopes heavily, and conventional mowers are not a safe option the Timan is the ideal alternative. Characterised by its low working height, self propelled tracks and remote control system which enables this heavy-duty flail mower to cut very long grass safely even on steep banks. With its 750mm working width and low centre of gravity the Timan RC-750 is the ultimate machine for working safely on difficult terrain and slopes of up to 58 degrees.

New Golf Irrigation Software

V3.00 aims to make programming and operating GTI irrigation systems simpler, quicker and more cost-effective and efficient, plus is Windows Vista and 7 compatible.

Bailoy Products launched its next-generation Gemini-Trident Irrigation (GTI) software at Harrogate Week.

Boasting an array of new features and a fresh new look, the designer and manufacturer of this golf irrigation system says that GTI V3.00 is the first stepping-stone in a series of upgrades to keep GTI software up to date and give greenkeepers greater control and flexibility.

The software is compatibility with Windows Vista and Windows 7. Current users, however, can rest assured that V3.00 and its successors will be fully back-compatible with existing GTI controllers and decoders, in keeping with Bailoy’s commitment to providing customers with a cost-effective product.

The two systems – Gemini and Trident – couple a computerised central control system with decoder field hardware for effective and economic irrigation. Suitable for both new-build and retrofit golf projects as well as sports and amenity turf applications, GTI’s state-of-the-art management and maintenance system ensures today’s greenkeepers and groundsman can make optimum use of every last drop of this precious and costly resource.

Soil Conditioner from Inturf

Designed especially for golf and sports turf applications, TerraCottem Turf harnesses a unique combination of over-20 hydroabsorbent and nutritive components to significantly improve soil quality and water retention for healthier, more vigorous turf.

Central to this new formulation’s is the addition of zeolite, a natural volcanic mineral that helps increase soil fertility and water retention. Zeolite is renowned for its high Cation Exchange Capacity, the ion exchange between the soil and soil solution that represents the soil’s ability to hold onto nutrients and prevent them from leaching beyond the roots. The inclusion of 42% zeolite with a CEC range of 150 to 180meq/100g, together with 31% high-CEC hydroabsorbent copolymers, ensures the CEC levels of soil treated with TerraCottem Turf are far higher than normal.

It also includes humic acid, an addition that has a positive affect on soil structure, water retention capacity, drought-stress resistance, plant element-absorption and microbiological activity.

BTME LAUNCH FOR NEW 25HP COMPACT TRACTOR FROM MASSEY FERGUSON

Rated at 25hp, the new MF 1525H compact tractor made its European debut on the Massey Ferguson stand (no. A27 at Harrogate Week.

Replacing the 22hp MF 1523H in Massey Ferguson’s 1500 Series compact tractor line-up, the MF 1525H features a number of key enhancements over its predecessor. These include important upgrades to the engine, transmission, hydraulics and driver platform, all designed to make the MF 1525H a formidable contender in the sub-30hp compact tractor class.

Powered by a new three-cylinder diesel engine developing 25hp at 2,600 rpm, the MF 1525H has been given a larger 28 litre fuel tank, enabling operations to continue for longer without having to refuel.

Drivers of the MF 1525H will find a spacious, semi-flat operating platform offering enhanced comfort and control layout for improved efficiency and performance.

What a difference a month
makes or at least I’m hoping
that’s the case as in the months
of December, January and early
February when I prepare this
we’ve had only three weeks of
weather and ground conditions
which would allow course work
to be tackled. At least the trees
are all trimmed and wooded
areas are looking the best they’ve
ever been but pity help the guys
with no tree work, those sheds
must be so well organised by
now and the machines in tip top
condition.

Well what’s been happening
over the peace other than my
home club burning down I
would say not a lot, I would
extend my regards to East Kil-
bridge Golf Club at this time with
all the hassle and problems a
situation like this could cause.
East Kilbridge have over recent
years held various events for the
and we hope everything
runs as smoothly as it can in
these circumstances.

Just to let members know
the Spring outing will be held
at Lanark Golf Club on April 29
and the Autumn venue will be
Helensburgh on September 2,
both of which we have played
in the past, but are excellent
venues and should be a joy to
play if past experience is any-
thing to go by.

As I am writing this month’s
article the snow seems to have
relened and we can all get on
with our respective winter
programmes. If you do have a
sizeable workload to complete
then hopefully you won’t be held
up any more.

I feel sorry though for Muir
Ross, at Ballindalloch Golf Club.
The first time the snow made an
appearance, there was so much
snow lying on his machinery
shed roof that it brought down
the whole lot. Luckily there was
nobody in there at the time it
happened. That’s little consola-
tion to him and the club. I hope
that everything works out for
you and that you get back on
your feet again and that there’s
not too much damage.

On the staffing side of the Sec-
tion, David Stephen has made
the step up to Deputy Head over
at Kintore Golf Club. He has
moved from Meldrum House
Golf Club. Kenny has assured
me that you will be sorely missed
by him and the rest of the lads,
there.

By the time you read this
article the Scottish Conference
in Dunfermline will of passed
us by and a report will follow in
next months edition. It is very
well supported so hopefully
the North Section had a good
attendance.

Not a lot else to report in these
Winter months so hopefully I’ll
some more news for you next
month.

Ben Brookes
07813889374
equipment exhibited and a variety of other distributors showing their wares. I thought the exhibition was first class and was able to obtain all the information I needed, even seeing a few things never viewed before. Can I extend my thanks to those people who helped make my trip enjoyable Scott, Jim, Mark, Neil, Stuart, Gerry, Brian, David, and, finally, Suz. Looking forward to that bowls exhibition game from you and Scott though.

Can I extend my congratulations from the Section to Chris Yeamen the newly appointed Course manager at Royal Burgess Golf Club who started on March 1. I hope he enjoys his new challenge. Chris moves from West Linton Golf Club, a course which was always in good condition, so best of luck.

It is with great regret that I announce the death of Ian Mackay who died last month. A great supporter of the Section over the years. Ian was known as Mr Sisas and attended all the outings for more years than I can remember. Our thoughts are with his family at this time.

The fixture list for 2010 will soon be on your doors allowing you plenty of time to plan for the continued support. You can remember. Our thoughts are with his family at this time. The fixture list for 2010 will soon be on your doors allowing you plenty of time to plan for the continued support. You can remember. Our thoughts are with his family at this time.

Hello everyone, hope you are all fit and well. I can’t believe how fast time goes by, it doesn’t seem a month ago since I was last writing the newsletter. We will all have our fertiliser spreaders and mowers at the ready before we know it. Or is that just wishful thinking.

Harrogate has been and gone, hope you all had a good time and enjoyed the show. I thought the show was fairly quiet compared to previous years, maybe a sign of the current economic climate with golf clubs expenditure limited, and the fact that the snow just cleared perhaps meant staff were staying on their courses getting work under way.

None the less, it was yet again extremely well run by the staff at BIGGA. I am pleased that Mr Graham, of Bishop, managed to stay conscious this year after a few beers. Well done Phil! Once again, Terry Charlton put on his bus, so thanks Terry for your continued support.

On January 21, Ian Pemberton, Ian Holoran, Bob Lawton and I attended the funeral of the late John Gregory. The service was a fitting tribute and also very moving. There were others in attendance from the turf profession.

Other news as follows. Dave Cuthbertson, and the lads at Rockcliffe Hall Golf Club, would like to thank, and wish all the best, to Adam McFarlane, who is leaving the team to join his lady in Canada at the end of the month. This leaves a position for a trainee at Rockcliffe starting in March.

Before I forget, the autumn golf tournament will be held at Rockcliffe Hall on Wednesday, October 13. The fee will be £20 for golf and a meal. Although this is more expensive than the usual £15, let’s not forget that Rockcliffe Hall is one of Europe’s longest courses and is a championship standard golf venue, that normally costs £95 per round. I predict this to be a highly demanded day so book early. Further details will follow in the coming months.

Hello everyone, hope you are all finally getting over those winter blues and are getting ready for the challenges of a new season. As some of you may know Andy Bunting has had a career change and has bought the Rockcliffe Hall Golf Club, would like to thank, and wish all the best, to Adam McFarlane, who is leaving the team to join his lady in Canada at the end of the month. This leaves a position for a trainee at Rockcliffe starting in March.

I thought the show was fairly quiet compared to previous years, maybe a sign of the current economic climate with golf clubs expenditure limited, and the fact that the snow just cleared perhaps meant staff were staying on their courses getting work under way.

None the less, it was yet again extremely well run by the staff at BIGGA. I am pleased that Mr Graham, of Bishop, managed to stay conscious this year after a few beers. Well done Phil! Once again, Terry Charlton put on his bus, so thanks Terry for your continued support.

On January 21, Ian Pemberton, Ian Holoran, Bob Lawton and I attended the funeral of the late John Gregory. The service was a fitting tribute and also very moving. There were others in attendance from the turf profession.

Other news as follows. Dave Cuthbertson, and the lads at Rockcliffe Hall Golf Club, would like to thank, and wish all the best, to Adam McFarlane, who is leaving the team to join his lady in Canada at the end of the month. This leaves a position for a trainee at Rockcliffe starting in March.

Before I forget, the autumn golf tournament will be held at Rockcliffe Hall on Wednesday, October 13. The fee will be £20 for golf and a meal. Although this is more expensive than the usual £15, let’s not forget that Rockcliffe Hall is one of Europe’s longest courses and is a championship standard golf venue, that normally costs £95 per round. I predict this to be a highly demanded day so book early. Further details will follow in the coming months.

The fixture list for 2010 will soon be on your doors allowing you plenty of time to plan for the continued support. You can remember. Our thoughts are with his family at this time.

Hello everyone, hope you are all finally getting over those winter blues and are getting ready for the challenges of a new season. As some of you may know Andy Bunting has had a career change and has bought the Rockcliffe Hall Golf Club, would like to thank, and wish all the best, to Adam McFarlane, who is leaving the team to join his lady in Canada at the end of the month. This leaves a position for a trainee at Rockcliffe starting in March.

Cleveland

Hello everyone, hope you are all fit and well. I can’t believe how fast time goes by, it doesn’t seem a month ago since I was last writing the newsletter. We will all have our fertiliser spreaders and mowers at the ready before we know it. Or is that just wishful thinking.

Harrogate has been and gone, hope you all had a good time and enjoyed the show. I thought the show was fairly quiet compared to previous years, maybe a sign of the current economic climate with golf clubs expenditure limited, and the fact that the snow just cleared perhaps meant staff were staying on their courses getting work under way.

None the less, it was yet again extremely well run by the staff at BIGGA. I am pleased that Mr Graham, of Bishop, managed to stay conscious this year after a few beers. Well done Phil! Once again, Terry Charlton put on his bus, so thanks Terry for your continued support.

lease on Popa’s bar, in Anderby Creek, which is near Mablethorpe. If any of you are in the area Andy would love to see you for a drink or two. Good luck Andy from everyone in the Sheffield Section.

Our Spring lecture will be held at Rotherham GC on March 11. The speaker will be Eddie Seaward, Head Groundsman at the All England Lawn Tennis Club (Wimbledon). I hope that many of you will attend what will be a very interesting afternoon listening to how Eddie goes about preparing Championship tennis courts.

We have also organised a Machine Maintenance-Workshop Management Aay in association with Golf and Turf Machinery. This will be held at Hallamshire GC. You will all receive more information about this day closer to the time.

We are in the process of producing a Section polo shirt. It was discussed at the AGM that we haven’t got a team uniform when playing in golf matches against other Sections. The committee has decided that it would be best if we made these shirts available to all members for a small fee which will be decided when we have been given a full quotation. We are in the process of getting a shirt printed for members to look at and give their views.

It was discussed at our last committee meeting at the possibility of having a Dinner dance/ Presentation evening. Many of you should have received a letter giving more details on this. If you could please let me, or Ian Whitehead, know if you are interested so we can decide whether or not we should press forward with the idea.

I look forward to seeing many of you at these upcoming events. If you require any more information on the above events or have any other issues please don’t hesitate to contact me.

**East of England**

Belated Happy New Year to all.

Apologies for the lack of writings in the last couple of months, a lack of things to say in December and then the general craziness of Christmas and the weather subsequently meant I didn’t get things written on time. Did I also mention I was having new windows put in my house!

At the time of writing this all the snow seems to have disappeared, the temperatures have returned to around about normal and regular winter service has been resumed. While the snow is always nice to look at, the novelty wears off after a while and the reality of the problems it is causing to the course and the finances of the club become stronger.

The beginning of the recent cold spell came way back on December 17, the day the East of England Section hosted its annual Christmas Event at Seacroft, in sunny Skegness. The sight of two of their greenkeepers working near the 1st tee dressed as arctic explorers set the tone for the day. However, 30 brave players donned as many layers as possible and set off on the downwind front 9. The sight of a LMS support wagon sporting a steaming hot vat of tomato soup behind the 9th green is something that most of us will never forget. Manned by LMS guys, Dave Hampshire and Steve Canner, a good 15 minutes was spent there by everybody before they turned into the wind to attack the back 9. It was then that the hail showers arrived! These showers made it impossible to look up and see where you were walking let alone leave you any ability to hit a golf ball. It is also a hindrance to putting when your ball collects so much hail on it that it arrives at the hole bigger than the hole itself! Bravely everyone struggled on and no-one walked in and “no man was left behind”! I would like to add that the showers in the clubhouse felt like they had liquid magma coming out of them which certainly helped everybody thaw out.

Many thanks go to Seacroft for being an excellent host and providing a great meal for us, also to Tim and his staff for the excellent condition of the golf course. Thanks also to our sponsors, Lawn Mower Services Hansomes Jacobson dealers, of Lincoln, for providing the soup along with a generous prize table. Your continued support is much appreciated.

The golf on the day was won by Ian Collett, of Rigby Taylor, and Gordon Street, from Selby Golf Club, with an amazing score. Second place went to Gary Salaby, Burghley Park GC, and Steve Smedley, Mansfield Sands, and third place were Matt Smith, Cleethorpes GC, and Ian Benn, Greensman. Longest walk went to Bruce Hicks and R. Giller, Boston GC, who both received a leftover tin of soup!

The end of January also signals the passing of a regular on the January calendar, BTME at Harrogate. Despite the best efforts of the weather to scupper this years event, congratulations need to go to all involved at BIGGA and beyond for putting on another excellent show and education opportunity, and for all the companies who attended this years show. There was a buzz around all the Halls as, for the first time, every greenkeeper had something to say about the big topic of the moment, and I am not talking about 2mm, or anything to do with that, but how much snow they had had, how they had coped with it and how long places had been closed for.

As far as our Section goes, many thanks to all our sponsors who turned up to our drinks reception as a thank you for all their efforts and continued support. At our committee meeting, Graeme Macdonald was voted in as the new Vice Chairman, with all other committee positions remaining the same. A final thank you goes to Gary Cooper, STG Amenity Supplies, for his continued sponsorship of the two night stay for the two greenkeepers contributing to the Section throughout the year.

In an effort to attract more members to our golf days this year, we have reduced the number of fixtures and changed the calendar round slightly. The first two events combined will be National Championship qualifiers, so attendance is a must for anyone interested in playing in this event this year. They will be held at Grimbsy Golf Club and Tydd St Giles Golf Club, in May and July, respectively. Our big match vs the Trade section will be held at the start of September at Torksey. Hopefully a better date and a central venue will encourage more players to come as that is always an entertaining day out. Our AGM will again be in October, this year at Louth Golf Club and that will be followed by our ever popular Christmas Kids and Win fixture, this year at Sleaford Golf Club. All dates and times are still to be finalised and a fixture card will be sent out to everyone in due course. Many thanks to all golf clubs for allowing us courtesy of their courses and to all our sponsors for the upcoming season. If you have never been before please come along and support us, you will be made to feel very welcome and an enjoyable day is guaranteed.

Our Winter Seminar is being put together for March this year to be held at Newark Golf Club. An exact date will be sent out by letter in due course. Full details are yet to be confirmed, however there will be presentations on irrigation; construction materials, topdressing and where it comes from; and greens construction in warmer climes!

Your support for this event will be much appreciated.

Roll on the spring! Steve Beverly, Immingham Golf Club. steveimmingham@aol.com

**East Midlands**

Hello Everyone. I hope you are all enjoying the unpredictable English weather. For those of you who attended Harrogate Week I hope you all had a good time and saw as much of the show as possible before the sweet whisperings of Wetherspoon’s and Charlie’s lured you away!

Shows like Harrogate are of great importance to our industry, it gives many aspiring green-
