Intelligent Watering

Intelligent Watering is an all-encompassing water resourcing service whose reputation for delivering a quality service at an economical price is steadily growing.

The company is headed by Adrian Handbury who has been in the irrigation industry since becoming the Irrigation Manager at the London Golf Club in 1992. Since then he has been an irrigation systems designer, a contracts manager for a major irrigation company and advisor to contractors and consultants for major irrigation manufacturers.

Intelligent Watering now has several associates, and so has the ability to deal with several contracts which will all receive their full attention.

Current clients of Intelligent Watering include several Premiership and High Profile Football Clubs, Festival Venues, Golf Courses and Religious Organisations. Current clients of Intelligent Watering include several Premiership and High Profile Football Clubs, Festival Venues, Golf Courses and Religious Organisations.

the science of water management. The use of automatic irrigation systems can be invoked to reduce or stop water use assessments such as an irrigation audit will create a much stronger position when explaining water use. trousers to schedule golf irrigation controllers to schedule golf irrigation management records and proof of appropriate standards. A reasoned argument based on applied water management records and proof of having carried out other analytical water use assessments such as an irrigation audit will create a much stronger position when explaining water use. The water restrictions of 2012 are another wake-up call for the golf industry. There’s no doubt that the constraints placed on golf in order to reduce water availability will increase. Now is the time to ensure every Course Manager and Head Greenkeeper has all the knowledge he or she needs to ensure both that they can get the water that is required and also can optimise its use. Compliment the art of greening up with the science of water management.

So here we are again. Water companies have put in place water use restrictions that include watering a “garden” using a hosepipe. The “garden” in question includes, amongst others “an area of grass used for sports or recreation,” and the term hosepipe appears to cover a plethora of irrigation equipment that can include static and pop-up sprinklers. If you are hosting a national or international event you are exempt, however all other golf courses supplied by the water companies imposing the restrictions, are probably subject to the hose ban. The course a good soak while you don’t need to be watered after 28 days of golf irrigation season. Already we have seen the finger pointing at the golf industry as an excessive user of water and some of the comments made about turf not needing to be watered after 28 days of golf irrigation season. The use of automatic irrigation systems can be invoked to reduce or stop water use assessments such as an irrigation audit will create a much stronger position when explaining water use. There are still some excellent courses being run by respected industry figures who can put forward a lack of understanding by bodies outside of the role of irrigation in the long term management of golf courses. You might be reading this and thinking that because you have access to a hydrological engineer or such that you could be unaffected by water shortage. Well maybe, however, at some point, restrictions could be placed on using any water for golf course management. Many abstraction licences contain a Hands Off Flow condition which can be invoked to reduce or stop water bringing licences and the Environment Agency can use The Water Resources Act 1991 to restrict abstraction if required. The use of automatic irrigation systems on golf courses in the UK goes back to the late 1960’s and for many years the turfgrass irrigation industry worked hard to raise design and installation standards by offering training courses focusing on new system provision. This was extremely successful and many of the industry’s key personnel benefited from the training. Since that time automatic irrigation has become considered an essential management tool by Course Managers. So is enough being done today to provide greenkeepers with the knowledge they need to use their systems to the optimum? There are still some excellent courses being run by respected industry figures who can put forward a lack of understanding by bodies outside of the role of irrigation in the long term management of golf courses.

JUNE 2012
So here we are again. Water companies have put in place many water use restrictions that include watering a "garden" using a hosepipe. The "garden" in question includes, amongst others, "an area of grass used for sports or recreation," and the term hosepipe appears to cover a plethora of irrigation equipment that can include static and pop-up sprinklers. If you are hosting a national or international event you are exempt, however; all other golf courses supplied by the water companies imposing the restrictions are probably subject to the hose ban.

If your course is irrigated using water from the potable supply and is fed into a storage tank you cannot irrigate. And at the moment there seems little chance that this will change during the 2012 golf course irrigation season.

Already we have seen the finger pointing at the golf industry as an excessive user of water and some of the comments made about turf not needing to be watered after 28 days or recommendations to give the course a good soak while you can, demonstrate a lack of understanding by outside bodies of the golf industry. There's no doubt in my mind that there is another wake-up call for the golf industry. There's no doubt that the constraints placed on golf in Ireland, and many of the industry's key personnel benefited from the long-term management personnel, however how many really understand the water use implications of poor uniformity of distribution of water, poor sprinkler spacing or worn nozzles? As far as plant available water, management records and proof of distribution of water, poor sprinkler spacing or worn nozzles? As far as plant available water, management records and proof of...
**Mytime Golf - Orpington Golf Course**

**Head Greenkeeper**

£30,000 - 35,000 per annum, plus benefits. 40 plus hours a week including weekends. Mytime Golf Centre is one of the largest golf facilities in England. The centre encompasses three 18 hole golf courses - Royal Park & Cot Valley and a par 39 hole course. It also has an 8 hole academy course along with a 28 bay driving range.

Four main responsibilities will include:
- To act as support to the General Manager andCaddy Department in ensuring the centre remains in top quality condition.
- To assist all greens maintenance staff employed by Mytime Golf in their professional development.

Happy days are back again

Some welcome relief has come for many regarding hosepipe bans with exemptions being made in several areas.

Thanks to everyone who contacted HQ to share their concerns and provide useful information to help us address the water issue. We are continuing to work on this, as it is not something that is going to go away. Access to this vital resource will ultimately be a significant issue for all of us.

At the opposite end of the spectrum, many in the North have seen some long awaited glorious sunshine and with it increased soil temperatures meaning we finally get some good growth and the ability to let the greens go. Happy days!

In the last few years I have watched with some interest the developments in some regions, where “consultants” have advised golf clubs that they can replace the need for a full time Course Manager or Head Greenkeeper. I’ve resisted the natural urge as a Course Manager to simply decry and criticise this development, but now wish to share some views and observations that I feel are relevant.

The golf course in most instances is the most valuable asset a club has. It is usually the most influential factor in attracting and retaining membership and visitor income to that facility. There are some exceptions but generally speaking the condition of the course, specifically the main playing areas; greens, fairways, tees, bunkers, all feature highly in the golfers mind when they evaluate their experience, how much they enjoy the game and decide where they will play again.

Most clubs employ or engage a team of people to manage the day-to-day business and to best satisfy the needs of the members and visitors. The Course Manager/Head Greenkeeper, the Golf Professional, the Secretary/Manager, and Food and Beverage Managers all apply particular skills and knowledge to their area.

The members are represented in most instances by their committees and appropriate sub-committees who seek to create the policies, strategies and general direction the club will take to best satisfy their membership.

We have all witnessed the increased expectations and standards required by golfers whilst the rise in the number of golf courses and the difficult economic climate have resulted in increased competition for custom. As clubs have struggeled to create the necessary income to sustain these increased standards they have started to look closely at how they can cut costs.

This has led many to consider the role of the “consultant” versus, as opposed to alongside, the dedicated Course Manager. They desire to emulate the success of those thriving golf businesses that are successfully drawing numbers and presenting excellent golfing experiences. Perhaps they should look more closely at how and by whom these facilities are managed.

It seems contradictory to me that the product that attracts sufficient business to financially sustain the business. They have access to Group Managers, employed for their expertise, and use consultants appropriately. Yet they recognise the need to have dedicated Course Managers/Head Greenkeepers to ensure that their asset is professionally managed. They recognise the benefit an educated, professionally trained person brings to that operation in ensuring they present that asset to its full potential, making the best use of all the resources available.

They benefit hugely from sharing knowledge, skills, and resources across their facilities, and perhaps this is the area clubs should be considering when looking to become more effective, get better returns on their investment, and manage their costs.

BIGGA is working hard to ensure you have the very best support, resources, education and training, and to enable you to share your achievements and difficulties with one another.

BIGGA is working hard to ensure that Greenkeepers have at their disposal the very best support, resources, education and training and to provide opportunities to share with one another their successful achievements and their difficulties. All this is of great benefit to golf clubs and ultimately the golfer. We receive and welcome the support of the other golfing bodies and they also recognise the significant role the Greenkeepers play in presenting the courses on which this great game is played.

I’d ask all golf clubs to consider very carefully how they can achieve their main asset’s full potential and in doing so give themselves the best chance of being successful.

Remember if you have any questions or suggestions please feel free to contact me.

My best regards, Andrew Mellon
Chairman 2012
07780 995002, amellon@elmwood.ac.uk

Happy days are back again

Some welcome relief has come for many regarding hosepipe bans with exemptions being made in several areas.

Thanks to everyone who contacted HQ to share their concerns and provide useful information to help us address the water issue. We are continuing to work on this, as it is not something that is going to go away. Access to this vital resource will ultimately be a significant issue for all of us.

At the opposite end of the spectrum, many in the North have seen some long awaited glorious sunshine and with it increased soil temperatures meaning we finally get some good growth and the ability to bong the greens on. Happy days!

In the last few years I have watched with some interest the developments in some regions, where “consultants” have advised golf clubs that they can replace the need for a full time Course Manager or Head Greenkeeper. I’ve resisted the natural urge for a full time Course Manager or Head Greenkeeper. I’ve resisted the natural urge to simply decry and criticise this development, but now wish to look more closely at how and by whom these facilities are managed.

BIGGA is working hard to ensure you have the very best support, resources, education and training, and to enable you to share your achievements and difficulties with one another.

We have all witnessed the increased expectations and standards required by golfers whilst the rise in the number of golf courses and the difficult economic climate have resulted in increased competition for custom. As clubs have struggled to create the necessary income to sustain these increased standards they have started to look closely at how they can cut costs.

This has led many to consider the role of the “consultant” versus, as opposed to alongside, the dedicated Course Manager. They desire to emulate the success of those thriving golf businesses that are successfully drawing numbers and presenting excellent golfing experiences. Perhaps they should look more closely at how and by whom these facilities are managed.

It seems contradictory to me that the ability to present the main asset at its very best should be an area that clubs consider compromising on. A “consultant” can be very useful in providing impartial and expert advice, helping to benchmark and objectively agreeing actions to maintain and improve standards at a facility. But with the best will in the world, they cannot be on site, with a close eye on the ball every day. They cannot take personal responsibility, understand the many nuances of that particular site, motivate staff and deal with matters that arise every day. Neither can they continually observe conditions as they evolve and take the most prompt and effective actions to achieve the best results.

Consider then the large commercial groups who own and manage many courses. They are very focussed on maximising income and minimising cost to satisfy the desires of their owners or shareholders to make a return on their investments. They must provide a product that attracts sufficient business to financially sustain the business. They have access to Group Managers, employed for their expertise, and use consultants appropriately. Yet they recognise the need to have dedicated Course Managers/Head Greenkeepers to ensure that their asset is professionally managed. They recognise the benefit an educated, professionally trained person brings to that operation in ensuring they present that asset to its full potential, making the best use of all the resources available.

They benefit hugely from sharing knowledge, skills, and resources across their facilities, and perhaps this is the area clubs should be considering when looking to become more effective, get better return on their investment, and manage their costs.

BIGGA is working hard to ensure that Greenkeepers have at their disposal the best results.
