ON COURSE FOR EASTER OPENING

COLLINGTREE Park Golf Club, the UK's first five star combined golf and housing development with leisure resort, is on course for its scheduled Easter 1990 opening and is already inviting corporate business and private membership.

The Northamptonshire complex features a challenging course designed by former US and British Open champion Johnny Miller in consultation with the Jack Nicklaus Organisation. Centrepiece of the 18 holes is the innovative island green at the 18th, probably Britain’s first.

Designed for all levels of golfing ability, the main par 72 course is situated in 150 beautifully landscaped acres. There are over six miles of underground piping for drainage purposes and 14 miles of irrigation piping with 11 acres of lakes to control a floodplain area.

Included in the golf development is an exciting new training academy, claimed to offer the most sophisticated golf practice facility in Europe with a 16 bay covered range; two par four and one par three practice holes; an indoor video teaching room and a computerised custom fit club centre.

Unique to Collingtree will be free use of buggies for members. Paths have been laid throughout the course to enable buggies, to be used all year round.

In addition to the course itself, plans are being prepared for a luxurious 100 bedroomed country house hotel, due to open in autumn 1992. This will be constructed in the heart of the development.

And already nearing completion is the first phase in a series of prestige housing developments by some of Britain’s leading quality builders. More than 200 individually designed executive homes - priced between £230,000 and £400,000 each - are being built on 64 acres of land around the course. Most are being constructed alongside the fairways.

Collingtree Park has been developed by International Resort Holdings Ltd (IRH), a subsidiary company of the Property Company of London PLC.

EDITORS NOTE: Greenkeeping Management wishes to receive details from both the private and public sector about new course developments.

GREENKEEPING, GROUND MAINTENANCE, LANDSCAPING, GROWING, HYDRA-SEEDING, IMPROVING POOR SOIL AND CREATING A BETTER ENVIRONMENT

The Neptune range, developed and produced in Scotland, includes:

NEPTUNE Ground Calcified Seaweed
NEPTUNE Biostimulant
NEPTUNE Root Dip
NEPTUNE Soil Improver
NEPTUNE Special Mix
NEPTUNE Plus
NEPTUNE Clay Crumble
NEPTUNE Green
NEPTUNE Universal Organic Compost
NEPTUNE Sea Spray
NEPTUNE Wetting Agent

These are the ORGANIC SEAWEED soil conditioners and improvers. There is nothing better.

For complete information contact:
NEPTUNE SCOTLAND LIMITED, OLDHALL WEST INDUSTRIAL ESTATE, SHEWALTON, IRVINE. TEL: (0294) 311325.
Did wetting agents perform? Yes. Were there differences in performance? Yes. Both in practices and methods of use. Problems with several of these situations were experienced last summer.

The benefits for turfgrass management include prevention or alleviation of dry patch, penetration of water through thatch build up, penetration of water into hard, dry, compacted areas, more uniform turfgrass cover and quality and increased water efficiency because less water is wasted by run off and evaporation.

Problems with several of these situations were experienced last summer.

Did wetting agents perform? Yes. Were there differences in performance? Yes. Both in products and in methods of use. For example, trials conducted by STRI during the last two years have revealed significant difference in the effectiveness of wetting agents for increasing infiltration into turfgrass on golf courses.

Differences have also been observed in the amount of product required to achieve results, the actual cost of using different materials, the residual of applications, etc. Several wetting agents perform quite consistently well - some do not seem to work at all. STRI trials have also shown differences in the performance of preventative as compared to curative type application programmes.

Results from the recent "long, hot summer" showed that AquaGro used preventative, i.e. commencing applications in the Spring, BEFORE dry patch appears, was effective in keeping dry patch from forming. By contrast, a curative program, i.e. not beginning wetting agent applications until some dry patch is evident, eventually alleviated the dry patch problem - but not without stress occurring to the turfgrass. These results are consistent with findings in several other countries where the AquaGro is used for prevention or alleviation of dry patch.

Wetting agents did perform last summer. There are products on the market that work well and the better informed greenkeeper who uses them strategically will benefit from their use.

FARMURA ENTERS ZORBIT!

Following ten years of research and development Farmura Ltd have entered the turf wetting agent market with their new broad spectrum wetting agent, Zorbit. Zorbit contains a unique blend of non-ionic surfactants designed to assist water penetration and movement through a wide range of soil types.

In addition to improving water penetration, eliminating dry spots and relieving the effects of soil compaction Zorbit will maximise the benefits of fertiliser and top dressing applications and stimulate deeper root development.

Zorbit is supplied in 6 litre packs which provides accurate, simple and economic dispensing of liquids.

For further information contact Farmura Ltd., Stone Hill, Egerton, Ashford, Kent, TN27 9DU. Tel: (023 376) 241/581.

NEW SYSTEM FOR APPLYING AQUA-GRO WETTING AGENT

Supaturf have introduced a new system for applying their leading wetting agent, Aqua-gro - the Aqua-gro Advantage System. This brand new system incorporates a ready-to use applicator which fits quickly and easily onto a standard hose, and an Aqua-Gro pellet container. By simply fitting the pellet container into the applicator, Aqua-gro can be applied through a hose pipe during normal irrigation, allowing water to move uniformly into root zones. The high volume of water used ensures complete turf safety under dry weather conditions providing temporary relief for localised dry spots, puddles, compaction or thatch.

The Advantage Applicator and fittings are able to handle the high pressures normally used to operate irrigation systems. The pellet will dissolve in about 1 hour at water pressures of 60 to 90 psi and one pellet should treat up to one acre or 6 to 7 average greens at a rate of 10 minutes per green.

In 1989 Farmura launched Zorbit, the new turf wetting agent formulated specifically for use on fine turf.

Result: Greenkeepers very pleased. Competitors not pleased at all!

Stone Hill, Egerton, Ashford, Kent, TN27 9DU. Telephone (023 376) 241/581.

Promotes a healthy green turf colour
Eliminates localized dry spots before they occur
Relieves soil compaction in heavy wear areas
Encourages a more uniform movement of water through the soil profile
Stimulates and maintains deeper rooting

GREENKEEPING MANAGEMENT

NEW HUXLEYS APPOINTMENT HIGHLIGHTS MAJOR EMPHASIS ON PRODUCT DEVELOPMENT AND PRODUCTION

Eddie Fox, a member of the Huxleys grass machinery team for 20 years, has been appointed a director of the company. He takes on overall responsibility for the new product development and production departments of the business, which is located at The Dean, New Alresford, Hants.

The appointment reflects the new level of importance acquired by equipment development and manufacture within Huxleys following the company's decision to concentrate its activities on the sales, service and hire of its own Huxley product range.

"Eddie's exceptional talents and experience of both the industry and the company will help ensure that these objectives will be met fully in coming years," commented Mr. Edward Huxley, the founder of the business. "He has made an immense contribution to the past development of the company, and his appointment as a director reflects the major emphasis now being placed on new product developments and production.

Married with two daughters, Eddie comes from a farming family and trained as an agricultural engineer at Rycotewood after leaving school. He spent some time in the automotive trade prior to joining Huxleys in 1969. His interests include photography, carpentry and golf - when time allows!

CLAYMORE GRASS MACHINERY NEW APPOINTMENT

Ian Rotherham has joined Claymore Grass Machinery as Northern Area Sales Representative. Ian will be responsible for the sales and marketing support to Claymore customers in Northern England up to the Scottish Borders.

Ian, who is 29, was previously general manager with a prominent horticultural machinery retail group and has previous experience as a retail sales representatives for professional grass machinery.

ROGER AT THE HELM

CHARTERHOUSE Turf Machinery, the specialist in turf management equipment, has appointed Roger Newman as its public relations officer.

Roger, 40, will be familiar to many people in the horticultural world for 19 years he was news editor of Horticulture Week magazine, leaving to work freelance in 1988.

A former council member of the Historic Gardens Trust, he is the author of several books on subjects ranging from the Vikings to English rural life.

Of his new appointment, he said: "I am delighted to join a young, vibrant and enthusiastic team. In the turf management field Charterhouse is already a force to be reckoned with, and I look forward to its continued expansion."

Roger lives in West Sussex and his hobbies include deep sea fishing and gardening.

VETERAN golf correspondent, Peter Dobereiner, has retired from The Observer in order to pursue a new career as a golf course designer and consultant. He intends to restrict his writing commitments to books and magazines and to specialise in creating low budget golf courses. Dobereiner's experience in farming and golf has convinced him that economic construction and maintenance charges need not mean a sacrifice in the quality of golfing values. His first course opens next year and he has a number of projects in the planning stages.
UNIQUE HERBICIDE LAUNCHED BY SYNCHENICALS

KNOT OUT, a completely new answer to the perennial problem of weed invasion in newly sown or oversown grass areas has been introduced by Synchemicals Sports & Amenity Division. Containing the tried and tested active ingredient Isoxaben, Knot Out’s residual action controls a wide range of germinating broad-leaved weeds, plus the time old enemy of the turf manager, knotgrass. The approved product MAFF No. is 04701.

Sport & Amenity have taken the opportunity to supply the product in a novel syringe applicator pack. Each premeasured dose is sufficient to treat 540 sq.m - equivalent in area to a football pitch goal mouths/centre circle or an average golf green. It couples easy handling with full compliance of the very latest safety requirements.

Synchemicals recommends application, either by knap-sack or mounted sprayer two days after seeding a well aerated, moist surface. Left undisturbed, the residual herbicide barrier will offer a season’s weed control. Once the sward is aerated, the green. It couples easy handling with full compliance of the very latest safety requirements.

Technical Manager, Charles Platt comments that Knot Out is completely safe to all grasses with no varietal restrictions. Application rates of ten times that advocated have still produced grass growth. Major turf producers have all expressed marked interest in the product, and independent trials at SRA are currently in progress.

Extensive trial work has confirmed that Knot Out is completely safe to all grasses with no varietal restrictions. Application rates of ten times that advocated have still produced grass growth. Major turf producers have all expressed marked interest in the product, and independent trials at SRA are currently in progress.

Other products on the market, he says either carry weed control and spray equipment restrictions or a recommendation not to re-seed within six weeks which is impracticable for a groundsman’s programme.

Local authorities are seen as a major customer with treatment of football pitches. The product is equally suitable for cricket squares, bowling greens, tennis courts and golf courses and also ornamental lawns.

He considers that the current weed species listed on the label do not reflect the true potential for Knot Out. "Apart from the listing for mayweeds, chickweed, speedwells, parseley-piert, common mouse-ear and knotgrass, excellent control of other broad leaved weeds such as plantains has also been achieved. It is envisaged that these will be added to the label in the near future."

INCREASED EFFICIENCY WINS TENDER FOR WARWICK SERVICES

G ROUNDS Maintenance Manager for the DSO, Warwick Services, Mr. Quentin Nichols together with Assistant Grounds Maintenance Manager, Terry Cripes examined traditional greenkeeping practices closely in their efforts to bid successfully for the first landscape maintenance package for Warwick District.

This initial package, some 33% of the total landscape maintenance, has a value of £375,000. The package consists of a wide variety of areas including many fine turf areas. Amongst them is the increasingly popular Newbold-Comyn Golf Club in Royal Leamington Spa and the prestigious Victoria Park Bowling Greens, home of the Ladies National Championships.

Together with Kevin Kibney, Head Greenkeeper at the golf club and Veronica Tabor, Greenkeeper at the Victoria Park site, the Warwick Services team decided to look at a range of machinery which could be used to increase efficiency and compliment the existing range. It was with this in mind that Warwick Services chose to look at the SISIS Hydrocore, a vertical action tining machine to add to their existing range of pedestrian operated fine turf machinery to speed up hollow coring and sitting operations on greens and cricket squares.

All the greenkeeping staff and management were impressed with the performance of the Hydrocore which was demonstrated extensively on the Victoria Park Bowling Greens only a couple of weeks prior to the Ladies National Finals! The machine was purchased a few weeks later and although based at Victoria Park it will also be used on the golf course and throughout the area covered by the contract.

In addition to the SISIS Hydrocore, SISIS Potorakes play an important part in the turf maintenance programme for spring and autumn renovation work and summer grooming on all greens. Greens are cut daily using Lloyds Paladins and rolled regularly during the playing season.

JUNIOR GROUNDSMAN & R (UK) LTD have introduced the Junior Groundsmen. This mini-version of the popular Groundsman Workbench has been specially designed for smaller workshops. The machine for repair is simply wheeled on to the 1m x 0.5m worktable, then raised to a comfortably working height by means of a foot operated hydraulic ram.

The Junior Groundsmen can lift up to 300 kg in weight. Its compact size and portability make it ideal for mobile units and workshops where space is limited. Paul English, R & R’s Managing Director, commented: "The health of staff is of absolute importance in today’s workplace. Time lost due to back injury through lifting heavy machinery creates major problems — especially for small businesses. The addition of a Junior Groundsman in a service department not only increases efficiency, but is a more professional approach to servicing."

The workbench is priced at £399 plus VAT.

Charles Platt: "Grass growth from ten times application rate."
Staverton Park Hotel and Golfing Complex

2nd Assistant Greenkeeper Required

To join existing team under the leadership of Course Manager, Howard Middlebrook. Applicants should be fully qualified, preferably members of BIGGA and be able to demonstrate a good all round knowledge of greenkeeping skills.
