TURF PRODUCERS

Growing high-quality turf takes great skill, knowledge and LOTS OF TIME!

Now you can dramatically reduce that long growth period by using TURF-NET to speed up your turf production. Simply rolled out over newly-seeded ground, TURF-NET intertwines with the growing root system and enables lifting to take place months sooner.

Harvested turf is stronger, lighter and handles better than most non-reinforced turf. Wastage from breakages is virtually eliminated, much more turf can be produced from the same land and mowing costs are greatly reduced.

ORDER NOW FOR SPRING DELIVERY!

WEST MIDLAND TURF COMPANY,
STAPELEY FARM, BRIDGNORTH
SHROPSHIRE

Telephone (074-631) 247 and 397
The stimulation of root growth and shoot density are benefits of seaweed. Maxicrop Amenity pro-series has combined these benefits in everyday fertilisers and mosskillers.

Maxicrop
No.1-Triple Seaweed

This concentrated seaweed helps produce high quality sports turf with excellent wear and recovery characteristics. Used regularly the improved root growth will produce first class colour without vigorous top growth.

**Application Rates.** Three applications per season of 1.2 litres per 1000 m². First application on reseeded grass when 2-4 cm growth will ensure quicker root development and tillering.

Maxicrop
No.3-Iron Plus Seaweed

This easily applied liquid formulation of iron sulphate "greens" turf within hours of application, without the problems normally associated with applying solid iron sulphate.

**Application Rates.** Foliar applications of 1.2 litres per 1000 m² as required throughout the season. Especially useful for preparing turf for special events and the onset of winter.

Maxicrop
No.2-Moss Killer and Conditioner

This powerful iron based mosskiller gives a rapid kill of the moss and produces a dramatic improvement in turf colour. The added seaweed stimulates tough roots and strong stems to cover the thin, weak areas left by dead moss.

**Application Rates.** Apply 7.5 litres in 90 litres water per m². For persistent moss further applications may be required at two weekly intervals. Contains Ferrous Sulphate. READ CONTAINER LABEL BEFORE USE.

Maxicrop
No.4-Supergrass Fertiliser

The ideal foliar applied turf fertiliser, rich in NPK for a rapid response in top growth. The longer term action of the seaweed stimulates root development and shoot density, improving wear recovery growth and drought resistance.

**Application Rates.** Monthly applications of 12 litres per 1000 m². During dry weather apply in the early morning or evening at the higher dilution rate.
EMPLOYEES BUY TURFMASTER

The employees at grass machinery manufacturers Turfmaster, Gainsborough, Lincolnshire, have bought their company from the previous owners, Hanlow Agricultural Merchants (HAM).

Turfmaster is now an independent company with HAM retaining only a 20 per cent share. Funding arrangements are also in place. HAM, of Bishops Stortford, Essex, was keen to reduce its stake in Turfmaster because the fit with HAM’s, “corn, seed and feed” business was poor. Equally Turfmaster’s managers and employees felt they were ideally placed to move the company forward into the 1990’s.

John deGraft-Johnson, Turfmaster’s chairman, says: “Product performance, quality and service are the key issues in the professional market. So employee commitment is paramount. In many companies these words are truisms without teeth. But in Turfmaster’s case, the employees have backed their words with hard cash. The enthusiasm and dedication is therefore total.”

END OF AN ERA

WHEN George Small, Greenkeeper/Professional at Galashiels Golf Club in the Borders of Scotland, retires on the 29th March 1990, it will bring to an end 62 years of unbroken service by the Small family at this club.

George started as a greenkeeper at Galashiels Golf Club in 1928. His father, the late well known John Small, was the first of the family to become a Greenkeeper and Professional and finally back to George, George will stay in Galashiels after his retirement, where most of his family live and no doubt still have a regular game on the hill and may be ponder over all the changes that have taken place in greenkeeping in the last 62 years. Even though the break has been made with Galashiels Golf Club the family connection with greenkeeping lives on in the shape of Bob’s youngest son as a head greenkeeper and this son’s son has also entered the greenkeeping profession.

ROUGH ON THE GRASS

It has come to our notice that the Marquess of Salisbury has a major problem with the turf at Hatfield House and the damage, perpetrated by the visiting hordes who pay handsomely to walk on the ancient sod.

In 1986 the Marquess decided gently to redirect people from the house by making more of the gardens maintained by a team of six gardeners. Last year over 60,000 people tramped round what was designed as a private pitch.

David Beaumont, the head gardener, explained that they have tried growing the grass through wire mesh, putting in four inches of easy draining sand and installing upturned cones with mesh tops at particularly susceptible points like gates and crossroads.

The current approach is to use a plastic variant on the concrete cone or simply putting in a few bricks to act as stepping stones. The topic is now standard at the quarterly meeting of the Professional Gardeners’ Guild but it seems no one has the answer.” There are some people,” he says, “who swear by some fancy method or other but most just re-turf. And to be honest, I think that’s all you can do.

Can those more inspired with their own answers please write to me. And if you go visiting, please step on the bricks!

Pictured during the ‘dig-up’ are Jamie Martin, above left from Ruskins and Peter Crowe of Castle Point District Council.
Turf Growers announced their course as part of their training programme and delegates attending will receive three days in the newly-launched Master Greenkeeper Certificate.

The course induces lectures and demonstrations by Brian D. Pierson, one of the country's leading golf course constructors and Robert Laycock, Rolawn's Technical Director and a turf scientist in his own right.

Also on the programme is a visit to Rolawn's turf production fields near York, to see the latest developments in the cultivated turf industry.

Rolawn's sponsorship of the course means delegates will only have to pay a nominal fee (£30 residential, £10 day) for the course because of the high production costs involved. With 700 courses required by the year 2000 to meet demand, the irony is that these landowners have ideal sites but feel limited by finance. Now Hawtree, the international golf course architects, have come up with a revolutionary idea for what in essence are do-it-yourself golf courses, in which they submit a simple design and then allow the farmer and his workforce to build it in their own time, while maintaining a supervisory role.

By this method the Oxford-based practice, responsible for more than 300 courses worldwide is making golf course ownership more attainable. The first example of this new concept is the Sandford Springs Golf Club near Kingsclere in Hampshire on the site of Sandford Farm owned by Raleigh Place. The complex was opened by Nick Faldo U.S. Masters champion earlier this year.

COME TOGETHER

A t the European Turf Management Exhibition in Haringey, Rolawn Turf Growers announced their sponsorship of the first in-house construction course to be held by the British and International Golf Greenkeepers' Association.

The course: "The Use of Cultivated Turf in the Construction of Tees and Greens", will be held on 29-30 at BIGGA's headquarters at Aldwark Manor near York.

As older or heavily used greens and tees require major renovation, greenkeepers are finding an increased need to know all about aspects of construction" says David Golding, BIGGA's Education Officer.

BIGGA has organised this course as part of their training programme and delegates attending will receive three credits towards the newly-launched Master Greenkeeper Certificate.

The course induces lectures and demonstrations by Brian D. Pierson, one of the country's leading golf course constructors and Robert Laycock, Rolawn's Technical Director and a turf scientist in his own right.

Also on the programme is a visit to Rolawn's turf production fields near York, to see the latest developments in the cultivated turf industry.

CUT COSTS
NOT QUALITY

LESCO 300D
For sheer value the LESCO 300D Greens Mower cannot be beaten. A combination of superior hydraulics with proven quality components, Lesco have engineered the tournament Greens Mower.

Powered by a 3 cylinder diesel engine or an 18hp petrol engine provides complete hydraulic operation, including power steering and hydraulic drive to the cutting cylinders.

Optional extras include turf groomers, verti-cut units and tees units.

The Greenkeepers dream — simplicity with quality.

HAS THE CUTTING EDGE

Hedges, verges, banks, playing fields, greens — whatever aspect of ‘green maintenance’ you’re dealing with, Turner has the edge.

Turner International (Engineering) Ltd., PO Box 16, Salford Priors, Evesham, Worcs, WR11 5SU. Telephone: (0789) 490666

Turner International is an Elswick plc company.
THE HOLDER M1000
-A TRULY PROFESSIONAL BANK MOWER

ANKS, verges and steep grassland slopes up to 45 degrees, some of the more problematic areas for mowing, can now be tended by the Holder M1000 professional bank mower.

The rugged design of the machine, with its low centre of gravity and wide track make it ideal for use on banks for mowing and shredding grass, weeds and scrub.

A unique design feature is the ability to use the centre drive with a double reciprocating knife cutter bar width of 48" or 54" or select the Holder side outrigger with working widths of 47 and 55 inches. A flail mower with a 39" working width can also be easily attached for high grass and wasteland use.

All cutter speeds are independent of forward speed with mechanical drive to the implements via a bevel gear-box and mechanical clutch. The side drive mower head is particularly safe on banks as the offset mowing unit allows the operator greater stability. Hydrostatic steering enables the operator to use the machine for long periods without fatigue.

NEW RANGE OF SACHS-DOLMAR LAWNMOWERS FOR 1990

FOLLOWING in-depth research into customer needs and EEC requirements, Sachs-Dolmar have launched a range of lawn mowers which meet their high safety and construction specifications, for the 1990 season.

Marketed in the British Isles only by Sachs-Dolmar (UK) and their country-wide dealer network, the lawnmowers are divided into two ranges. The standard range consists of economy models aimed mainly at the price conscious market. The premier range although more expensive have more features and are targeted at the more discerning buyer.

All are rotary mowers and are supplied complete with grass catcher. One model is equipped with petrol engines from respected and world famous manufacturers.

The standard range starts with the very low cost On-Davere, an electric powered 14" mower with a sturdy 700 watt motor. This lawnmower promises to effectively take on the mowers sold by the large DIY stores.

The other three models in the standard range all have Briggs and Stratton engines. They are the Max 35; the Model M40 - a 19" mower featuring an alloy deck and a 4hp Max 40 motor and the same model with power drive designated the Model Max 40SP.

The seven models in the premier range are all powered by the world renowned Kawasaki VK 4-stroke, 4.5hp petrol engine which is designed to run on lead free petrol.

THE COLUMBIA UTILITRUCK

NEW SHUTTLE SHIFT FROM SHIBAURA

HE new Shibaura S 445 incorporates a new forward/reverse change without use of the clutch using a hydraulic system which gives immediate forward-reverse change by use of the single change lever the system is hydro-shuttle.

The gearbox has 24 forward and 24 reverse with creep speeds as standard with steps from 180 metres per hour to top speed of 30 kph.

The Shibaura S 445 has a four cylinder Shibaura diesel engine producing 45 hp (DIN) with a cubic capacity of 2260cc.

Lift capacity at the three point linkage is 2175 kg. An extremely small turning circle of 2.72 metres is obtained by the world renowned Kawasaki VX 4-stroke, 4.5hp petrol engine which is equipped with the Honda "Slick Shift' hydrostatic stepless shift mechanism.

HONDA MAINTAIN LEAD IN TECHNOLOGY CONTEST

INOVATIVE technology takes the Honda range of garden machinery into the '90s with a new lawnmower and a ride-on mower both equipped with the Honda "Slick Shift' hydrostatic stepless shift mechanism to make mowing even easier and more enjoyable.

The new Shibaura S 445.

Golf Courses Supervisor

The Gleneagles Hotel, one of the foremost leisure resorts in Europe, wishes to appoint a Golf Courses Supervisor to join the team in Scotland.

Reporting to the Estates and Golf Courses Manager the position involves daily management of a team of Head Greenkeepers to ensure the courses are retained in excellent championship condition.

In the initial period, however, the successful applicant would be required to oversee the constructional phases of the new Jack Nicklaus designed golf course and development of an executive par 3 nine hole course.

The ideal candidate will have recognised college qualifications, and no less than two years' relevant experience with an American style golf course operation.

The position also demands an articulate communicator, an ability to use initiative and a high level of self motivation.

If you are interested in this challenging position and feel you have the experience, please send an up-to-date CV to:
Ann Bulleid, Personnel & Development Manager, The Gleneagles Hotel, Auchterarder, Perthshire PH3 1NF.
Telephone: (0764) 62231.
