NEWS ROUNDUP  ENVIRONMENT FUSHERS BREAK GROUND .......................... 6
A year ago the turf industry was raising $350,000 to qualify for matching state funds to build an Envirotron turfgrass research center at the University of Florida. On March 11, they all gathered with UF dons to break ground.

A TIME FOR LEARNING  COURSES APLENTY AROUND THE STATE ............. 7
Several seminars for turfgrass managers are available and if you’re too busy to attend one, you’re too busy! Joel Jackson previews the heavy hitters.

A TIME FOR REAPING  GOLFWEEK RATES THE TOP COURSES ..................... 7
The top 50 golf courses in Florida according to those repsonding the weekly golf newspaper, GOLFWEEK, are listed for your amusement and comparison. Also listed are the 17 Florida courses listed among GOLFWEEK’s 50 most distinctive courses in the Southeast.

COVER STORY  THE PINES OF WINTER ....................................................... 10
Joe Ondo, CGCS, maintains Winter Pines GC in Orlando for 90,000 rounds of golf a year and doesn’t mind working hard. He loves being a superintendent at this privately-owned public golf course in Winter Park.

SPOTLIGHT  CECEL JOHNSTON RECEIVES HIS DSA .................................... 26
Now employed in Thailand, Cecil Johnston was not available to receive his 1991 Distinguished Service Award when he was honored at the annual aFPGA banquet in August. He received the award at a special reception in New Orleans, Feb. 14.

HANDS ON  INTEGRATED PLANT MANAGEMENT ........................................ 32
It’s not limited to pest control. It’s about everything you do to manage turfgrass. Joel Jackson, CGCS, reviews a presentation by Tim Hiers, CGCS, at a recent Treasure Coast GCSA meeting.

GREENWARD  WHAT HAPPENED IN TALLAHASSEE ..................................... 40
Dr. Tom Latta, chairman of the FTGA External Affairs Committee, reviews legislation considered, passed and hanging in limbo with the Florida Legislature’s recent regular session. For updates on new laws affecting you, check this report carefully.

GREEN SIDE UP  MYTHS ABOUT THE MASTERS ...................................... 32
Editor Joel Jackson tells how the masters of turf keep the Masters tournament at Augusta National in the lushest of conditions. If you’ve never been to Augusta National, you’ll get a few good reasons to make plans to go there.
Turfgrass industry, researchers break ground for Envirotron

March 11 was a better day for warm-season grasses than warm-season people.

Mid-morning temperatures in the mid-40s chased more than 100 turfgrass dignitaries into a Fifield Hall conference room on the University of Florida campus at Gainesville to "break ground" for the Envirotron. And after about 20 minutes of speeches, more than half the assembly walked outside and braved the bright, crystalline atmosphere to watch five men dig in the dirt.

The Envirotron is really going to happen.

UF President John Lombardi opened the ceremonies with a summary of the $700,000 research facility's scientific and educational mission.

"I'm reading this," he noted candidly, "because frankly I don't have a clue what an envirotron does. I'll wait until it's finished and I can look at it.

"But we all know that the scientific study of turfgrass is important to this state and its environment. Turfgrass in the state of Florida is a big-time industry and everyone will be very interested in the research that takes place here and all of us will share in the benefits."

Jim Davidson, UF interim vice president for agriculture and natural resources, brought down the house with the observation that "the University of Florida was not able to win an SEC football championship until we put turf back in our stadium."

He then recited the litany of the industry's economic importance ($5 billion in Florida), noting that Florida had only 125 golf courses in 1953, the year of the state's first turfgrass conference. "Now there are more than a thousand.

"Environmental factors dictate that we take a holistic approach to turfgrass maintenance. We must not only find ways to control and eliminate pests and diseases but we must come to solutions that are acceptable to our society while protecting our environment."

"The Envirotron will enable us to better serve the state and its citizens."

Science and education will be the major contributions of the Envirotron, said FTGA President Bob Rehberg in the main address.

"One thing this facility will allow us to do is recruit first-class graduate students. We have built living facilities within the Envirotron so that first-class students can live there as well as study there.

"The leaders of tomorrow are the students of today."

Living quarters and all the other bells and whistles in the original concept survived the design and budget process, although the final ver-
