

USGA LINKS ONLINE UPDATE

## Drought Strategy Can Mitigate Damage

*Editor's Note: The following information is excerpted from a USGA Links On Line Update. I edited out references to snowfall and mountains, which weren't pertinent. I found the remaining information useful and I hope you do to. The parentheses are mine.*

**D**rought conditions are again predicted for much of (our area). Below-average precipitation this spring has (us under) water restrictions. Developing a plan early could help mitigate widespread damage across the golf course if water will be a limiting factor.

1. Develop a traffic control program if one is not already in place. Drought-stressed turf will not tolerate traffic very well.

2. Evaluate your irrigation system. Inefficient operation wastes water.

3. Use water sparingly during spring. Deep and infrequent watering will promote strong root development, and deep roots will allow for water conservation later in the season.

4. Employ a judicious fertility program to avoid excess top growth in the early part of the season.

5. Consider plant growth regulator use if you are not using any already. PGR use can improve root development and conserve soil moisture through top growth reduction.

6. Evaluate irrigated areas and determine which portions of the course are most important to play, i.e. up the middle from tee to green.

7. Establishing more drought-tolerant species across the golf course may be an option for the long haul. (When regrassing in-play or out-of-play areas, check with the University of Florida for possible drought resistant alternatives)

These are but a few tips to keep in mind heading into this season. Trees and

other plantings also need attention during drought. Some species of trees require considerable amounts of water and may slowly go into decline during years of drought. Assess tree conditions regularly. Deep soaking periodically may be necessary to save desirable trees.

# ALMAR™

Quality Nutrients for TurfGrass

### Customized Foliar Programs...

BEAUTI-GREEN™, K-GREEN™,  
TURF TRACER-ULTRA™, PENETROL™ AND  
OTHER FINE FERTILIZERS AND ADJUVANTS.

Also Available:  
BULK LIQUID FERTILIZERS

**Almar Turf Products, Inc.**

P.O. Box 2224  
Palm City, Florida 34990

East (800) 900-6444 • West 1-800-340-3888

E-mail: [almarturf@aol.com](mailto:almarturf@aol.com)

# TifSport™

Certified Bermudagrass  
New Standard for Athletic Turf Grass

### Compared to Tifway (419):

- Superior Cold Hardiness
- Genetically Ensured Purity
- High Density, High Tensile Strength
- Improved Traffic Tolerance
- Mole Cricket Non-Preference
- Tees and Fairways Easily Maintained to 1/2 inch or Higher for Roughs
- Sold Only as Certified

1487 Blackdirt Road • Whitesburg, Georgia 30185
