**2008 PLANTS OF THE YEAR**

**Sabal minor**  
**Common Name:** Dwarf Palmetto  
**Zones:** North, Central and South  
**Mature Height and Spread:** 4’-6’ tall and 4’-6’ wide  
**Classification:** Shrub, palm  
**Landscape Use:** Mass, specimen, under planting  
**Characteristics:** A durable, cold-tolerant, Southeast native, this palm is small and drought tolerant with fan shaped fronds. The foliage is green to blue-green. Long stalks of fragrant white flowers grow in late spring or early summer, producing small black fruits enjoyed by wildlife. It grows well in a wide range of soil types and light conditions. The dwarf palmetto usually appears trunkless due to its subterranean trunk, and adds a great native touch when a small-scale plant is needed.  
**Propagation:** By seed

**Quercus geminata**  
**Common Name:** Sand Live Oak  
**Zones:** North, Central & Northern areas of the South zone  
**Mature Height and Spread:** Typically 20’-30’ tall and 15’-20’ wide; can reach 50’–60’ inland.  
**Classification:** Tree  
**Landscape Use:** Street tree, specimen, dune restoration  
**Characteristics:** Similar to southern live oak but smaller in stature, this salt-tolerant and drought-tolerant, Florida native tree has an irregular growth habit and spreading canopy. Some forms are tree-like and some may form a thicket. The dark green cupped leaves are distinctly boat-shaped with a whitish grey underside. The acorns are sought by wildlife. The Sand Live Oak has proven severe storm durability, making it an ideal tree for Florida’s sometimes stormy environment.  
**Propagation:** By seed
