The Miles Grant CC golf course opened in 1972, but the land on which it stands was part of a Spanish land grant from the King of Spain to settler Samuel Miles in 1813. Five square miles of land bordering the Santa Lucia River (now St. Lucie) was given as compensation for shipping and logistical support rendered by Miles to the Spanish territorial government.

When visiting the club back in October to interview superintendent Harry Hanson, CGCS for this cover story, I became intrigued with the name of the club from the logo at the clubhouse entrance. It was a large oval with the name Miles Grant, the picture of an old sailing ship and the date 1813. Originally I surmised that the club’s name was for a Mr. Miles Grant and a subsequent Google search didn’t bear much fruit. When checking out the club’s website and amenities, I noticed the Samuel Miles Tavern was included under dining options, and when I googled Samuel Miles and the year 1813 I hit paydirt. Miles originally established a sawmill on the property to produce building materials for the influx of settlers who soon followed and the colonization of the east central Florida coastal region was under way. Coincidentally, a sawmill was also a key factor in our story on the history of the Shingle Creek GC in the Fall Florida Green.

Nearly two centuries later, we find the established residential golf community of Miles Grant providing social and recreational activities to the folks living in the houses and condominiums bordering the golf course. There’s
the 18-hole, par-64 golf course sporting two legitimate par-fives, five par-fours, 10 par-threes and one hole that can play as a par-four or five. Having ridden the course with Hanson, I can tell you it is a very challenging walk in the park. The course is perhaps a little more forgiving of errant shots since 2004, when the multiple hurricane hits destroyed over 300 trees.

Since the course is bordered by residences, Hanson manages his maintenance programs judiciously to balance the aesthetics with the cultural needs of the turf. He uses a combination of organic and synthetic fertilizer blends applied lightly in more frequent applications, all dependent on soil-testing results. On average, greens are fed monthly and tees, fairways and roughs four-eight times a year. Total applied nitrogen and phosphorus fall well within the guidelines in the Golf BMPs and state fertilizer rules.

With an active golf program for the members, Hanson offsets the wear and compaction on the playing surfaces by hollow-tine aerifying the course three times a year. Hanson also lightly grooms and top-dresses the putting surfaces frequently for consistency. The putting surfaces are edged periodically and any Tifway 419 runners are pulled to control encroachment.

Since the golf course is located on a coastal sand ridge and susceptible to mole crickets and nematodes, Hanson ran a Curfew experiment to find an effective product he could rotate with Chipco Choice to control both pests. Keeping costs and the budget in mind, he now treats 10 acres per year with Curfew, alternating between front and back nine hot spots. He treats the remaining critical areas with Chipco Choice. Also, in side-by-side test-strip applications, Hanson reports that the new herbicide, Specticle, “worked quite well” in preventing goose grass infestations.
The course has only “two” lakes — actually one that wraps around the 18th hole and also borders the 17th hole. The banks are maintained as a buffer zone to filter any possible runoff and protect the lake’s water quality. Because of the surrounding residential neighborhoods, wildlife consists mainly of a diverse bird population and small mammals like squirrels, fox, raccoon and (ugh) armadillos. I did see a pair of Egyptian geese waddling along the shoreline buffer zone on No. 18.
Miles Grant Country Club

Location: Stuart
Ownership: Member owned
Playing policy: Private. Average rounds: 36,000/year, 18 holes, 4,446 yards, par 64
Slope & Rating: 101/62
Course designed by Charles M. Mahannah. Constructed by Mahannah & Howard Assoc.
Management Team: Club Manager Carmen Navy; Club President Jim Crosby; Green Chairman Dan Capper; Golf Course Superintendent Harry Hanson, CGCS

Major projects: Converted to TifEagle Greens in 2003 and 2005
Acreage under maintenance: 70; Total acreage: 88
Greens: 2.2 acres; Turf type: TifEagle; Avg. Size 4,700 sq. ft; HOC 1/8 inch. No overseeding. Green speed goals: 9.5
Tees: 1.3 acres; Turf type: Tifway 419; HOC .350 – .450 inches. Overseeded with ryegrass at 450 lbs/acre
Fairways: 18 acres Turf: Tifway 419. HOC .625 in . No overseeding.
Roughs: 34.5 acres; Turf: Tifway 419. HOC 1.0 to 1.5 in. No overseeding

Lakes/Ponds: One 3-acre, U-shaped lake bordering holes 17 & 18.
Irrigation: Water source: Storm water, Martin County Reuse and back-up wells. Pumping and Control Systems: Flowtronex Pump Station and Toro Site Pro. 800 heads on 70-ft. spacing.
Water Conservation: Water only in off-peak hours. Use wetting agents.
No. 18 during my visit. I had only seen that species once before down at The Falls CC in West Palm Beach a few years ago. Hanson accomplishes all this fairly typical-but-rigorous maintenance program with a total staff of nine including himself, his assistant, Paul Davidson, and turf equipment manager, Karl Marshall. Besides the golf course and clubhouse grounds, the crew must also tend to the common areas on the whole property including the tennis courts, and croquet and lawn bowling areas. The crew starts at 5 a.m. each day to get the course ready for play, and then does the perimeter work to minimize any disruption to the flow of play.

Since the crew must perform at such high productivity, I wanted to know Hanson’s secret to motivation and management. He said, “I believe in participatory management. Some of our best ideas have come from the crew. I believe in supervising by training, not just criticizing results. The most important aspect is to truly respect each person. You must make the workplace a pleasant place to live and work.”

Hanson means what he says. When walking through the crew’s break room, this message was at the top of the daily assignment board: “It’s all about Attitude!”

And speaking of attitude, Hanson is a walking testament to living life with a positive attitude considering he has had several highly successful careers in one lifetime.

When contemplating the title for this cover story, I was almost tempted to call it, “I Led Three Lives,” after the mid-century TV series starring Efrem Zimbalist, Jr, who played an FBI agent. That thought was based on the colorful careers of our host superintendent Paul Horn, President Phil Horn, President
11151 NW 70th Ave Chiefland, FL 32626 (352) 258-2695 philhorn@bellsouth.net

Over 20 years supplying and installing quality Bermudagrass.

COVER STORY

SOME OF OUR BEST IDEAS HAVE COME FROM THE CREW. I BELIEVE IN SUPERVISING BY TRAINING, NOT JUST CRITICIZING RESULTS.
Harry Hanson. During Hanson’s career he has been a successful teacher, comptroller and now certified golf course superintendent.

After high school graduation, he enlisted in the U.S. Navy. Following his service to Uncle Sam, Hanson attended the U. of Maine and graduated in 1962 with a B.S. in Education. He moved to Maryland and taught junior high school for two years before becoming a government employee in a career that lasted from 1964 to 1992. Hanson gravitated towards business administration and earned a master’s degree in Business Administration in 1977. Eventually he became a comptroller and instructor, teaching management principles and business administration systems. He and his growing family spent 19 years stationed in Germany.

In 1988, while in Germany, Hanson became interested in golf and volunteered to serve on the greens committee and eventually to work on the course on weekends. Hanson said that, since he was a civilian executive, he couldn’t be officially employed on the course, so he gladly learned the trade as a volunteer and joined the GCSAA and attained an Assistant Superintendent classification. As Hanson put it, “I was the weekend superintendent!”

Hanson left government civil service in 1992 and, having been bitten by the turf bug, he enrolled in the Golf and Landscape Operations program at Lake City Community College (now Florida Gateway College). What followed was a series of OJT and assistant superintendent positions with such well-known Treasure Coast superintendents as Tim Cann, View of the 5th green from Hole #6. Photo by Joel Jackson.
Originally from: Dixfield, Maine.

Family: Wife, Ann, 5 daughters: Carol, Rita, Rose, Mary and Rae Lee.
8 grandchildren and 3 great-grandchildren.

Education: 1995, A.S. Golf Course Operations, Lake City Community
College. 1977 Masters in Business from Webster College. 1962 B.S. in
Education, U. of Maine.

Employment: 1998 to present Superintendent Miles Grant C.C.;
Boynton Beach G.C.; 1995 A.S. PGA National; 1994 OJT Willoughby

FGCSA member since 1995. TCGCSA Board Member 2001-2009 serving as President 2006-08

Goals/Accomplishments: Become a Comptroller in my first career. Raising five wonderful daughters
with my wife, who is a saint. Become a CGCS. Become president of the TCGCSA. Rebuilding and

Memorable moments: Attending Mountain and Avalanche Rescue Training in Switzerland. Shooting a
75 on The Old Course at St. Andrews. Getting a job and living in Oberammergau, Germany for 19 years.
Attending my 50th wedding anniversary with all my children, grandchildren and great-grandchildren.

Hobbies & Interests: My job is my favorite hobby. Skiing, golfing and bowling. Being a member of a
golf committee and I was the “Volunteer of the Year” at a club in Germany which led to second career
as a superintendent. I am a member of the Community Patrol in our Sandpiper community. We attend
church weekly and I am member of the Knights of Columbus.

Frank Clark, Kevin Downing, Paul Bondesen, Jr., Dan Miller and Bill Lanthier.

Hanson praised all for their mentoring, but he singled out another assistant superintendent at the time, Roy McDonald, at Willoughby under Kevin Downing as being that hands-on, day-to-day guide. Hanson says MacDonald also was instrumental in getting his job as the number-one assistant to Bill Lanthier at Mariner Sands in 1997, which eventually led to his present position at Miles Grant in 1998.

Across the street and behind the 17th green is a small park for the members and residents to access the Intracoastal Waterway. There is dock for fishing and a place to launch one of the many kayaks on the rack along the shoreline. The spot is called, “Hanson’s Landing,” a fitting follow-up to the landing made by Samuel Miles almost two centuries ago.

A trio of sabal palms and a pair of bunkers guard the first hole.
