We did it!

We're so proud of the fact that the LESCO 300 Greensmower is now in production that we wanted to show you the unit and give recognition to the many people who made it possible. Built at our greatly expanded Sebring, Florida manufacturing facility, the LESCO 300 Greensmower is engineered and designed with your needs in mind. This new triplex unit offers more power, better maneuverability, easier service, improved filtration and more convenient backlapping — all at a very substantial savings.

Consider the advantages . . .

- For added power, less vibration and longer life, features an 18-horsepower, twin-cylinder engine.
- For minimized downtime and increased life of hydraulic components, features 10-micron oil filtration system.
- For better maneuverability — without cables — equipped with power steering.
- For added convenience, specially engineered hydraulic system allows backlapping of individual reel units while on mower.
- For easier servicing, features access to valve spools without removing valve bank.

Put the advantages of the LESCO 300 Greensmower to work on your course. To arrange for a demonstration, call us toll free at (800) 321-3325 or return the coupon below and we'll call you to set up a convenient day and time.

[Blank] Yes, I'd like to see the LESCO 300 Greensmower demonstrated on my course. Give me a call so we can set up a day and time.

These Special Places Rate Special Fertilizers...
PAR EX® Professional Products.

The grass and grounds of these famous places are just as important as the structure or complex itself. That's why knowledgeable turf superintendents insist on specially formulated PAR EX Professional Products.

IBDU releases nitrogen slowly, earlier in the spring, evenly through the summer, and carries nitrogen response later into the fall.

Famous places like the park surrounding the St. Louis Arch, Deere & Company Corporate Headquarters and 53 of the nation's top 100 golf courses* are currently using PAR EX Professional Products. These include Muirfield Village Golf Club, Jack Nicklaus' home course, as well as most of the other courses he has designed.

Shouldn't you consider PAR EX with IBDU for your special place? Contact a PAR EX distributor and let him recommend a PAR EX program just for your grounds.

PAR EX and IBDU are products of Estech, Inc. Professional Products Division, P.O. Box 512, Winter Haven, FL 33882-0512.

President's Message

This year's GCSAA Conference and Show in Phoenix promises to be one of the best yet.

I have attended every one since I joined the National some 14-15 years ago. I have never failed to be able to justify the cost of attending. If you have a problem putting a dollar value on the knowledge gained at the Educational Sessions, see how much fertilizer, fungicide, or pesticide you can save by improved methods of application. Look over the new equipment — much of it saves time and labor. All the above translates into dollars. One wise, enlightened equipment purchase or chemical application would probably justify the costs of attending.

I would like to urge all Florida members to attend this year’s GCSAA Conference. If you’re not currently a member of the GCSAA, join up now and attend next year.

With all the golf courses we have in the state, we have the potential of almost being the National!
Look to Chipco for full-course protection against disease, insects and weeds.

When it comes to turf care, you look for products from companies you can count on, year in and year out. That's why more golf course superintendents look to Chipco professional turf products than any other brand.

Over the past 30 years, Chipco has developed outstanding turf products such as Chip Cal many superintendents will remember for its outstanding control of poa annua. More recently we introduced Chipco® Ronstar® preemergence herbicide, Chipco 26019 fungicide and Chipco Mocap® nematode insecticide.

But we're not standing still. Just last year, we ushered in a new era in pythium prevention with our new Chipco Aliette® fungicide—the first of a new generation of advanced chemistry to carry the Chipco name.

Naturally, products like these are only as good as the company that stands behind them. And nobody offers you more technical support than Chipco with our field force exclusive to turf and ornamentals.

In 1987, Chipco will introduce new formulations of three Chipco products. But we're not stopping. Exciting new products soon to earn the Chipco name are in various stages of development.

So when it's time to order your turf care products, remember Chipco, the company with the ongoing commitment to helping you care for your course.

Rhone-Poulenc Inc., CHIPCO Department, P.O. Box 125, Monmouth Junction, NJ 08852.

Please read labels carefully and use only as directed. Chipco 26019 FLO and Chipco Mocap 5G are not yet available for sale.

CHIPCO®, RONSTAR®, MOCAP®, and ALIETTE® are registered trademarks of Rhone-Poulenc Inc.
Letters to the Editor

Dear Editor:

I'm sure you are aware of the current practices taking place in the turf industry—that of harvesting and marketing patented varieties of turfgrass seed illegally.

The attached news release announces steps that two industry leaders are taking in efforts to put an end to such illegal practices.

If you have any questions concerning the contents, please do not hesitate to give me a call. Thank you for your attention and support.

Sincerely,

Karna L. Godridge
Executive Vice President
H. T. Fenton Associates, Inc.
Editors Note: See Article on Page 50

Dear Dan and Irene:

I have received many compliments since the last issue. We had to enlarge all the doors so the staff could get their heads through.

It is truly a privilege and a pleasure to be on the cover of the Florida Green.

Please stop by for a round of golf. Also, please thank Dan Zelazek for the excellent photographs of the course.

Sincerely,

J. Mark Black
Golf Course Superintendent

Dear Mr. Jones:

I just wanted to extend to you my personal thanks for your prompt and very encouraging response to my letter.

It is so gratifying to know that there are people like yourself who go the extra mile!

Again, many thanks and I am really looking forward to working with your staff in an effort to do a really great story.

Sincerely,

Sara J. Moniz
Public Relations Department
El Conquistador Country Club

Dear Dan,

We at The Plantation Golf & Country Club are very proud of our existing 18 holes of golf and with the addition of our new course, also designed by Ron Carl, we feel we will have the finest facility on the West Coast!

We would very much like to have a photograph of our golf course featured on one of the covers of the Florida Green in the future. We have quite a few breathtaking shots for the camera.

We will be grassing our new course, the Panther, sometime in October, so by April we should have one or two "green sprigs".

Your summer issue was great! Keep up the good work, you and your staff do an excellent job.

Sincerely,

Ed Faticia
Golf Course Superintendent
The Plantation Golf & Country Club
Venice, Florida

Gentlemen:

For several years, while managing properties with golf courses, I was privileged to be on your mailing list for complimentary copies of The Florida Green.

I changed positions and have been managing The Biltmore in Palm Beach since March. I sent you a change of address at that time and requested continuance. I have not received the magazine since.

The Biltmore has no golf course, but it does have large grounds with pool, dock, tennis courts, beach club, etc. all requiring extensive maintenance. Your magazine's editorial content not only touched directly on my problems of lawn and plant care, for example, but your advertisers were frequently contacted and retained. Indeed, I feel your magazine has as much value to me as to a golf course operator.

Thank you. I would hope to see The Florida Green in the future.

Very truly yours,

Robert G. McGarvey
General Manager
Palm Beach Biltmore
Condominium Association
