Its good looks and major components have something in common. They’re easy to see.

Even when it’s not dressed up, Jacobsen’s new Tri-King™ triplex trim mower looks great. But don’t take our word for it. Tilt the top fender and grill out of the way, and lift off the air intake cover. When you do, you’ll see just how easy the Tri-King is to maintain. It’s also easy to operate with responsive power steering, automatic 3-wheel drive, powerful 18 hp gas or 19 hp diesel engines and the comfortable, new easy-on/easy-off operator’s area. You’ll get the highest quality of cut, and a choice of 72” or 84” cutting widths with 5-, 7- or 10-blade reels. For precise cutting around traps and flower beds, the 84” model features a generous 10” overhang.

A wide stance provides solid stability. Plus, you can switch from fixed to floating reels by removing a single bolt. Ask your Jacobsen distributor for a demonstration today, or call 1-800-727-JAKE.

Routine maintenance is easy. The top fender and grill tilt up and out of the way, and the air intake cover simply lifts off.

Improved cutting height and bedknife adjusters ensure the highest quality cut and trouble-free adjustments.

A full 21-percent increase in torque to the reels powers you through the toughest cutting conditions.

A comfortable steering wheel and responsive power steering make maneuvering easy, even in tight quarters.

The Professional’s Choice on Turf
What do Pebble Beach Golf Links®, Cypress Point Club, Muirfield Village, Shinnecock Hills Golf Course and La Quinta-Mountain Course have in common? Irrigation renovation by Rain Bird. In fact, five of the TOP TEN* golf courses in the United States have all upgraded their irrigation systems in recent years with state-of-the-art Rain Bird irrigation products.

Whether you have a nine-hole country club course or a world-class tournament course, you can achieve excellent results by choosing Rain Bird irrigation products for your renovation needs.

Each course presented unique challenges. That's why at Rain Bird, we offer a complete range of irrigation products: Irrigation Control Systems—MAXI® V, PAR, MSC satellites—and The Freedom System™, our newest wireless technology; remote control valves, both self cleaning and pressure regulating in brass or plastic; quick coupling valves; and your choice of DR impact drive or EAGLE™ gear drive rotors.

In addition, Rain Bird won't leave you high and dry after the sale. Rain Bird's Technical Service staff, along with our worldwide network of distributors, assures you immediate after-sales service and parts availability.

Before you choose an irrigation system, consider Rain Bird.

IT'S THE PRODUCT OF CHOICE.

SUMMER 1996

FOREWORDS
PRESIDENT'S MESSAGE ........................................ 6
In his farewell message President Greg Plotner, CGCS, urges the association to strengthen its ties with the Florida Turfgrass Association and he asks all superintendents to pick an issue and get involved with the appropriate committee on the FGCSA or FTGA.

SPOTLIGHT
POA & ENVIROTRON CLASSICS, USGA CONFERENCES .......... 10
Joel Jackson and Kevin Downing took part in the media day opening of the PGA Club at the Reserve on the way to the Poa, which offered lots of golf and education with its unbeatable sunsets. Seven Rivers Chapter raised $45,000 for the Envirotion at its annual one-day tournament. MetroWest GC joins Florida Tour.

HEADS UP
THE PURPOSE OF THIS ASSOCIATION SHALL BE .................. 30
Being able to call upon your peers for advice and consultation is one of the major benefits of belonging to the FGCSA. What do you think is important to your employees? Their answers might surprise you.

COVER STORY
IT TAKES A VILLAGE ............................................ 32
The Hamlet is a modern village on ancient sand dunes in western Delray Beach. Superintendent Robin Goodell and his Greens Committee spent a long time selecting the right turf and technique for replanting their 22-year-old greens.

HANDS ON
GROWTH REGULATORS AND OVERSEEDING .................... 45
Six superintendents reveal their plans and programs for 1996.

RESEARCH
DNA AND BERMUDAGRASS, BIOSTIMULANTS ....................... 50
Much work remains to be done, but DNA testing should prove useful in the battle against contaminated greens. Warm-season grasses do not respond to biostimulants as well as cool-season grasses.

STEWARDSHIP
HOLE IN THE WALL CASE STUDY, AUDUBON PROGRAMS 70
Hole in the Wall Golf Club in Naples is a classic case study in long-term commitment to environmental stewardship.

AFTERWORDS
DISASTER RECOVERY, WAHLIN, JARRELL, JACKSON .......... 78
Jeff Ball's journal describes the miraculous recovery of Panama Country Club from Hurricane Opal. Scott Wahlin talks about getting fired; Mark Jarrell discusses the University of Florida's turf program; Joel Jackson has some thoughts on delaying what Scott says is inevitable.

It is the responsibility of the user to determine that product use is consistent with the directions on the label.
Poisoning
The Queen is not
the answer.
Birth control is.
Every day, the queen gives birth to 200 turf-damaging, body-stinging, juvenile delinquents. That's 73,000 fire ants a year. And insecticides aren't guaranteed to stop her.

That's because conventional insecticides kill the worker ants before they can feed it to the queen, creating an alarm to relocate the mound.

But Award® is an insect growth regulator that sterilizes the queen. Like birth control. After workers feed Award to the queen, she can't give birth to new ants, and before long the mound collapses.

For more details, call 1-800-395-TURF.

And stop the fire ant lifecycle with Award. Before Her Royal Highness sends you 73,000 birth announcements.
By the time you read this article, my term as president of the Florida Golf Course Superintendents Association will have come to an end. I cannot begin to tell you how proud I am to have served this past year as the leader of what is truly a great organization. The correspondence throughout my term with other people in and out of industry sector proves that there is a great deal of respect for the FGCSA, and these relationships must continue to grow and nurture. I leave office knowing that Dale Kuehner, CGCS, will continue to enhance these relationships and do a fine job as President for this upcoming year. Dale, I wish you great success during your term.

There are a couple of thoughts that I would like to leave with all of you. First, the relationship between the FGCSA and the FTGA needs to be strengthened. A friendship exists between the two associations, and some common interests and strategies are in place, but overall our alliance can greatly improve. Too many times independent actions are being discussed and finalized without the other organization being actively involved in the decision process. Joint committee work will solve this problem. It has been discussed before between the two groups, and now it is time to implement this idea.

Also, there are currently some superintendents out there questioning the FTGA on actions the association has taken recently. I want to ask those superintendents who withhold their support for the FTGA if they really know and understand what happened in the past, why changes were made within their association, and what the mission of the FTGA is at this time. If you do not know these answers, ask an FTGA board member and stop criticizing their association. The “hearsay” stories on the street need to stop. Join an FTGA committee and air a voice instead of spreading ill-mannered comments that have no merit.

Along these same lines, our association needs more interaction on FGCSA committees. This past year participation in committee work was disappointing. As much talent as there is among the superintendents in this state, our committee work should net a lot of positive results. Decisions are to be made in committee with recommendations from the committee coming to the board for board approval. This is not happening, folks! The FGCSA needs more participation from its members.

The issues that the FGCSA is dealing with today sets the tone for our future as superintendents as well as others entering the field. These issues, such as water conservation, water quality, environmental regulations, product analysis, cultural practices, education, turf studies, scholastic awards and public relations are just a few of the many issues that the FGCSA is actively involved in. And there are more — many more — issues that demand our attention. To continue to be the leaders that we are, it is imperative that the FGCSA find a way to address these concerns. Proactive, not reactive, is the manner in which our association needs to operate. Increased participation from our membership will ensure that the FGCSA remains proactive. I would hope everyone agrees.

In closing, I will say one thing. What a year! Thanks go to everyone who supported me through a year that had some bizarre twists to it at times. I am a firm believer that everything happens for a reason, and this belief was definitely applied to a few situations that occurred during the year. One of those situations led to my new position with International Golf Management. The responsibilities that I have with IGM allow me to remain a Certified Golf Course Superintendent. They will also allow me to do something else that I will truly love doing, and that is assisting other superintendents in their professional development. My father was an educator for many years, and I guess a part of me has always wanted to be one, too. What a great world in which we live!
Graduated With Honors From Over 25 Prestigious Universities

Why do competitive fertilizers "go to school" on Par Ex® with IBDU® slow release nitrogen? Maybe it's because IBDU®'s been passing the test at major universities for more than 20 years.

Not just in controlled laboratory experiments. In actual field testing. On all types of turf. Under every conceivable combination of soil and weather conditions.

Par Ex® earns straight A's when it comes to performance:
- Steady, continuous feeding to the root zone
- Extra staying power for fewer applications
- Primarily unfazed by temperature, moisture extremes
- Uniform turf growth for reduced mowing, labor costs
- Unmatched for late season applications

To study up on Par Ex®, call us at 1-800-282-9588.
We'll show you how to get an advanced degree of IBDU® slow release nitrogen for your turf.

PAR EX® GIVES YOUR TURF AN ADVANCED DEGREE OF SLOW-RELEASE NITROGEN
Here. There. Everywhere.

How's that for application guidelines?
On greens. On tees. On fairways, roughs, flower beds, transplants — even in your divot mix. Milorganite delivers outstanding results for a uniform playing surface. No other fertilizer is easier on plants or simpler to use. Milorganite's slow release, organic nutrients won't burn or cause a flush of growth. Plus, it's high in micronutrients such as iron to promote dense, vigorous turf. And Milorganite resists leaching, for a sound environmental profile. So call your distributor today, or call Milorganite’s turf professionals direct at 1-800-304-6204. It’s easy.
A funny thing happened on the way to The Poa

BY JOEL D. JACKSON, CGCS

Two weeks before the Poa Annua Classic, I received a call from Sherry Major, Public Relations Manager for the PGA of America. A copy of the latest Florida Green had just crossed her desk, and she called to see if The Florida Green would like to send a couple of folks to participate in the media day being held for the grand opening of the South Course of the new PGA Club at the Reserve. I had read an article in Golf Course News about this new venture and how the superintendent, Rick Wise, CGCS wore three logos on his golf shirt (GCSAA, PGA of America and The PGA Club) signifying the unity of purpose of this new operation. I was very interested in talking to him and seeing the new course.

I found that sleepy, laid back St. Lucie, Florida has just been put on the golf map for good! The PGA of America has moved into town, purchased the St. Lucie West course and has just developed a 36 hole complex at the Reserve based on the Fazio Design Group's imagination. Tom, Jan Beljan and Steve Masiak have dreamed up a Carolina/Florida one-two punch that will test your skill and please your eye. The rolling, piney Carolina-look North Course with undulating greens stresses the short game while the coastal, marshy, wetland South Course requires more attention to driving and approach strategies.

The goal of PGA Properties, Inc. is to develop a chain of courses across the country that will provide public access golf to top notch golf courses at affordable prices. The PGA Club's rates for this year were $49 during the winter and $25 for the summer with even more specials for late afternoon and junior golfers. This first venture has been challenging and rewarding for all concerned, and especially from our perspective for Rick Wise, CGCS Turf Operations Manager.

Wise has been busy sprucing up the recently acquired St. Lucie West course just one mile east of the new PGA Club and overseeing construction and grow-in of the new 36 hole complex. Wise was assisted in this monumental task by: Superintendents, Barry Lezark at The PGA Club and Mike Vannoy at St. Lucie West; Assistant Superintendent Clay Marshall at The PGA Club; Shop Manager Brian Layle, Irrigation Tech Stephan Deek, IPM Tech Mike Adams and Administrative Assistant Jackie Harris.

Wise said, "People have been looking at me this past year and a half, shaking their heads and asking if I was crazy! We started construction on the North Course in late '94 and got shutdown by bad weather in January 1995. We finally started planting in June of '95 and we replanted and we replanted while trying to start construction on the South Course. You know what kind of summer we had! We finished planting the South Course in November of '95 and there was much discussion of the pro's and con's about trying to overseed so we could open this winter. Realizing we would likely have to deal with a rough first year grow-in transition and keep explaining why the condition of the South Course was so far behind the North, the PGA agreed it was better to complete the bermuda grow-in and postpone opening till now. They bit the bullet and it has paid off in a much
