so it stays put in the weed germination zone all season long.

A complete program to help with disease management.

- **Banner® MAXX®** controls Dollar Spot, Summer Patch, Anthracnose, and a broad spectrum of 18 other turf diseases.
- **Subdue® MAXX®** is a systemic fungicide that provides the most effective Pythium control at half the rate.
- **Sentinel®** is the longest-lasting, lowest rate systemic fungicide for control of Brown Patch and Dollar Spot, as well as 12 other turf diseases on fairways.
- **Alamo®** is a systemic fungicide that prevents and treats both Dutch Elm Disease and Oak Wilt.
- **Award®** is an insect growth regulator for long-lasting control of Fire Ants for up to six months with one application.

For more information on the Novartis Total Turf Program, call 800-395-TURF for the name of your Novartis Sales Representative. Or you can visit our website at www.cp.us.novartis.com.
Florida Green Celebrates 25th Anniversary

Florida GCSA History 101

This issue marks the 25th anniversary of the first appearance of the publication that eventually became The Florida Green. A look at the history of the magazine is meaningless without at least a quick look at the history of the association that decided to create such a publication.

The formation of an organized Florida superintendents association began April 22, 1939, when a group of South Florida superintendents met at the urging of then-GCSAA President Joe Ryan who happened to be visiting his daughter in Miami. After a series of informal meetings, an official organizational meeting was held May 13, 1939 at the Hollywood Country Club and the South Florida Golf Course Superintendents Association was formed.

The first officers were Jimmy Blackledge, president; Clyde Smith, vice president; and Mike Schuyler, secretary/treasurer. A committee was appointed to draft a set of bylaws and the annual dues of $5 was agreed upon. Regular monthly meetings continued after that and consisted of a business meeting, round table discussions and then lunch and golf. By the July 1939 meeting three directors were added to the board: R.F. Lawrence, B.A. Yoder and Mark Mahannah.

In early 1940 the board discussed expanding the association to a statewide organization. Responses to a letter sent to all the known superintendents at the time were so meager that the idea was abandoned except for some interest shown by the Tampa - St. Petersburg area superintendents, who founded the West Coast Association in 1949. The South Florida Golf Course Superintendents also discussed merging with the Florida State Florist Association which was the leading influential horticulture group in the state at the time, and made an application to join that umbrella group.

Attendance at subsequent meetings fluctuated for the fledgling group, especially during the winter seasons. Soon the war years were upon the world and regular meetings were not scheduled, but several meetings were held each year and those meetings got together to discuss mutual problems.

After the war, the association grew steadily with modifications to the structure of the organization and the membership. In 1961 a group organized as the Georgia-Florida Turfgrass Association which encompassed the North Florida area. The name changed to the Florida-Georgia Turfgrass Association and finally in 1977 to the North Florida GCSA.

In 1968 superintendents in southwest Florida could no longer tolerate the long drives on U. S. 41 to either Tampa or Miami to attend meetings, so they formed the Everglades GCSA and had a joint meeting with the South Florida GCSA in 1969. They played an informal golf match against each other, an event that blossomed into the Poa Annua Classic.

The 1970s saw the formation of four new local chapters. In 1973-74 the Central Florida GCSA formed in Orlando. The Suncoast GCSA formed in 1976 and the Tri-County GCSA split from the South Florida GCSA as the region’s golf courses number close to 300. After some discussions over logical boundaries, it was decided that the South Florida GCSA would reside in Monroe, Dade and Broward counties. By May of ‘79 the Tri-County changed its name to the Palm Beach GCSA, and the Treasure Coast Chapter formed in July 1980.

During 1978-80 a statewide effort was made to bring all the local associations together as chapters of the Florida Golf Course Superintendents Association. In October 1979 the first board of the FGCSA was elected. In the late ’80’s and early 90’s, the Ridge, Seven Rivers and Coastal Plains chapters have been formed for a total of eleven chapters.

Several FGCSA at-large members belong to the Gulf Coast GCSA which is affiliated with the GCSAA. While not currently an official chapter of the FGCSA, this chapter serves superintendents in the western Panhandle, Alabama and Georgia, and supports the IFAS WFREC in Milton.

The First Publication

Back in 1973 the South Florida GCSA decided to produce a magazine for its members, and in October 1973 the first issue of The South Florida Green went into circulation. Here are two excerpts from that inaugural issue:

Dedication

To the men who work "behind the scene" in all areas of research, we gratefully dedicate the first issue of The South Florida Green.

These men devote most of their time to solving all aspects of turf problems. For their dedicated devotion in making numerous contributions (for which they receive little public credit) The South Florida Superintendents Association members say, “Thank you, gentlemen.”

The First President’s Message October 1973

The South Florida Green is the first publication of The South Florida Golf Course Superintendents Association. This Association was organized in July of 1939. Jimmy Blackledge was elected the first President and is still one of the 152 active members.

This newsletter will attempt to bring an exchange of ideas, of old and new methods of turf care. Members are encouraged to submit suggestions and...
Beautiful turf with a minimum of work... Karbonite makes it a reality.

Made from the ash of burned sunflower seed hulls, Karbonite is a naturally occurring slow release fertilizer high in potassium, phosphorus, calcium and magnesium. It allows turf cell walls to thicken, which helps to fortify turf against fungus, drought and insects.

Karbonite helps control leaching, along with subsequent run-off into waterways, because the nutrients are released over several months. A low salt and chlorine content helps to reduce harmful salts in the root zone for naturally beautiful turf.

Order Howard's Karbonite by the bag or let us spread it directly on your tees, greens and fairways.

Orlando, FL 32809
articles that will be of particular interest. Everyone is urged to participate so that we can all work together for the betterment of turf in Florida.

It is an honor for me to be President at the time of this first publication, which is the culmination of past efforts and interest of many officers and members. Hopefully The South Florida Green will be a successful venture and a benefit to all interested in the challenge of growing and maintaining fine quality turf.

Lou Oxnevad Riviera C. C.

Becoming The Florida Green

Finally with the organization of the FGCSA as a statewide association, on April 17, 1980, South Florida GCSA President Alan Weitzel made a motion to change the name of The South Florida Green to the Florida Green. After much debate and in the spirit of solidarity and unification, the South Florida Chapter's respected publication became the Florida Green, the official voice of the Florida GCSA. The Summer 1980 issue bore the new name.

Editors and Others

Mike Barger was the first editor of the South Florida Green and served until 1976. Dan Jones took over with the October 1976 issue and served as either the editor or publisher for nearly 14 years until the Spring 1990 issue. During that time Dan's wife Irene served as assistant editor as Dan and Irene turned their home into a print shop laying out the magazine. Dan's unparalleled work as editor and at the same time a full time superintendent has earned him the title Editor Emeritus.

Dan remained the publisher of the magazine while Tim Hiers took on the role as editor for one year in 1984-85. In 1990 Joel Jackson became the editor for two years and turned over the magazine to Tom Benefield from 1992 until 1994. With the fall 1994 issue, Jackson resumed the editorship and continues in that role as part of his duties as FGCSA director of communications.

Other people who have made the magazine so successful over the years: Daniel Zelazek, cover photographer since 1981. Dick Long, printer for most...
According to scientists, for every single destructive species of bacterium found on Earth, there are more than 30,000 species that are beneficial or neutral to plant and animal life. Through biotechnology, PHC scientists identify, isolate and commercially produce beneficial bacteria species to improve our environment and quality of life. A variety of bacteria species have been formulated into biological products that promote turf growth, prevent damaging foliar and soil pathogens and pests, and cleanse ponds and lakes.

**Rhizobacteria**

Soil bacteria decompose organic matter, including cellulose and lignin in wood, a process essential to all life on Earth. Primarily they are found in the upper 12 inches of soil where their carbon food source is most prevalent and where aerations, mineral elements, pH and temperature are more ideal. A half-thimble of productive soil may contain up to 3 billion bacteria from thousands of species that carry out different activities in soils.

Beneficial rhizobacteria are found in the root zone of all plants (and turfgrasses). Rhizobacteria have adapted themselves to plant's absorbing roots where they get nutrients from sloughed root cells, exudates and organic matter. In return, they provide plants with specific benefits and are largely responsible for soil health.

For its products, PHC, Inc. selects soil bacteria and rhizobacteria that produce specific responses:

- **Plant-Growth Promoting Rhizobacteria** produce a variety of chemicals and natural hormones that stimulate plant growth under stress.
- **Free-Living or Non-Symbiotic Nitrogen-Fixing Bacteria** increase plant growth by fixing atmospheric nitrogen for plant use.
- **Phosphate-Solubilizing Bacteria** solubilize phosphorus for plants from insoluble mineral sources.
- **Bacteria Antagonistic to Root Pathogens** produce antibiotics or are hyperparasitic to inhibit root pathogenic organisms, such as *Pythium*, *Phytophthora* and *Rhizoctonia*.
- **Mycorrhizosphere Bacteria** improve mycorrhizal development and their function.

**Insect-Toxic Bacteria**

Some beneficial bacteria contain toxins that are fatal to insects but harmless to plants, animals and humans. The best known, *Bacillus thuringiensis* (Bt), have produced some of our most reliable and potent biological control measures. Bt is a common soil bacteria that produces crystal proteins and spores with insecticidal properties. Formulated into Bt bioinsecticides and then foliar-applied, these proteins/spores control a broad spectrum of caterpillar pests. The targeted pest consumes the proteins/spores, becomes sick and unable to eat, and soon dies.

**Water-Cleansing Bacteria**

Cloudy water, pond odor, scum and algae blooms—the most common pond maintenance complaints—are caused by excessive levels of nutrients and from the leaching and inflow of fertilizers and buildup of organic matter. These elements are food nutrients that promote the growth of algae and anaerobic bacteria. Water-cleansing bacteria, contained in high concentrations in PHC, Inc. products, biologically clean, clarify and deodorize fresh water. These specialized bacteria digest ammonia, nitrates and phosphorous and degrade hydrocarbons and organic matter. Without food, algae and anaerobic bacteria are kept in check and water quality improves.

**Lepinox** WDG bioinsecticide: The only biological control product registered for control of Fall Armyworm on turf. Formulated in a dispersible granule, Lepinox contains multiple insecticidal proteins to control Lepidoptera worm pests that damage turf grasses including Armyworms and Sod Webworm.

**Flexx** Turf Premix: Dry water-soluble biofertilizer with fully chelated micronutrients; growth-promoting, Nitrogen fixing and Phosphorus solubilizing bacteria; and the wetting agent yacca extract. Promotes greener, denser, more consistent-play sports turf that stands up to heavy traffic by stimulating root growth and improving stress-and disease-resistance.

**PHC** Compete**: Dry, dispersable rhizosphere inoculant that contains 20 strains of microencapsulated bacteria antagonistic to root pathogens. Formulated with dry soluble yacca extract and organic biocatalysts to ensure rapid colonization of the plants’ rhizosphere to minimize turf diseases and improve nutrient availability.

**Crymax** WDG bioinsecticide: The only Bt insecticide available in the landscape market for control of diamondback moth, including those resistant to pesticides. Contains three different insecticidal proteins to provide broader spectrum control of caterpillar pests in fruit and nut trees, vines and small berries.

**PondSaver**: Contains more than 5 billion colony-forming units of 17 different proprietary strains of dry, live bacteria per gram. Reduces clouding, sludge and unpleasant pond and lake odors.

**PhC**, **BioPak**, **Flexx**, **Compete**, **A Natural Systems Approach**, and **PondSaver** are trademarks of PHC Royalty, Inc. *Crymax*, and *Lepinox* are trademarks of Ecogen, Inc.

**PHC**, **BioPak**, **Flexx**, **Compete**, **A Natural Systems Approach”, and **PondSaver”** are trademarks of PHC Royalty, Inc. *Crymax*, and *Lepinox* are trademarks of Ecogen, Inc.

**Plant Health Care, Inc.**

Plant Health Care, Inc. (PHC, Inc.) is a microbial biotechnology company specializing in the development of "plant health care" products and natural systems solutions for the commercial tree care, horticulture, turfgrass, forestry and land reclamation industries.

**Green for Life**

For more information about beneficial bacteria and turf health, call 1-800-421-9051 to order a Green for Life guidebook and catalogue of PHC, Inc. biological products.
of Dan’s tenure. Max Brown, Tom Mascaro, David Bailey and Mike Bailey who served as associate editors, staff writers and photographers for the magazine over the years. Marie Roberts who has managed the advertising and Paul Crawford who has served as the business manager since 1992.

In the summer of 1989, Larry Kieffer came on board and served as managing editor for several years and continues to help produce the Florida Green as president of Janlark Communications.

The magazine under both flags has won its share of awards and recognition over the years, but the greatest reward for the association has been the on-going success of the publication.

That success reflects the magazine’s dedication to the simple basic values and mission outlined in that first president’s message and dedication 25 years ago.

Today it remains a tribute to the pioneers who set the magazine in motion in 1973 and to those who have sustained it over the years.

To the advertisers, the readers and the contributors we say “Thank you, and may we serve you as well over the next 25 years.

“Happy Birthday, Florida Green!”

The 1998-99 FGCSA officers elected at the Annual Meeting in Orlando are (from left) Cary Lewis, CGCS, Secretary/Treasurer; Joe Ondo, CGCS, Past President; Darren Davis, GCS, Vice President; and Mike Perham, CGCS, President. Photo by Joel Jackson.

23rd Crowfoot Becomes First Larry Kamphaus Crowfoot Open

The 23rd anniversary of the Central Florida Chapter’s summer event took a new name this year. The Crowfoot Open was renamed the Larry Kamphaus Crowfoot Open in memory of the long-time chairman of the event. Kamphaus and his wife Vilma organized the Crowfoot for 13 years and Kamphaus was a superintendent at Walt
If It Was Only About Delivering Quality Products, We Wouldn't Have Turf Specialists On Board.

A good relationship between a superintendent and a supplier begins with quality products. But that's not where it ends. As a golf course turf professional, you have every right to expect and receive more. Convenience, selection, service, technical expertise and value should all be part of the package. And with LESCO they are.

We arrive at your door with a fully-stocked LESCO Stores-on-Wheels™ offering fertilizer, pest management products, golf course accessories, and seed. What could be more convenient?

Every LESCO Stores-on-Wheels is operated by a trained turf professional who has a vested interest in the success of your course. Our turf specialists and regional agronomists appreciate the challenges you face and are fully prepared to offer turf management and product use recommendations.

With turf experts on board and a highly qualified team of support personnel in-house, LESCO remains dedicated to providing superior customer service and delivering more than just quality products. Call us at 800-321-5325. We'll show you.
Disney World for 27 years before he passed away in June of 1997.

The committee also initiated an annual Larry Kamphaus Award to be presented to the Central Florida Chapter member who exemplified the characteristics of: loyalty and service to their employer, strong family values and service to church, community and profession. The first award went to Jim Ellison, CGCS, of the Arnold Palmer Management Company. Ellison was the long-time superintendent at the Bay Hill Club in Orlando and has remained connected to the Palmer organization for over 20 years. Ellison also served on the early Crowfoot Open committee and Central Florida Chapter Board of Directors.

Ellison was presented with an inscribed crystal bowl denoting the occasion. Vilma Kamphaus was also presented with a larger version of the bowl which will have the winners' names inscribed each year. Mrs. Kamphaus acknowledged the memento in a poignant acceptance speech. She remains active, serving on the committee to help the Central Florida Chapter with this major social and fund-raising event.

The weekend of activities kicked off with the summer board meeting of the Florida Golf Course Superintendents Association Aug. 1 at the Bay Hill Club in Orlando. Guests included Dr. John Cisar, turf coordinator for the University of Florida IFAS, and Mike Goldie, lobbyist for the FGCSA and FTGA.

Goldie gave an update on the past year's legislation which did not have any negative aspects for the turf industry. He previewed the upcoming elections, noting candidates that have an understanding of turf issues. He has asked for support of golf outings for legislators as a way of establishing relationships and discussing our issues.

Cisar talked about the results of the recent IFAS/Industry retreat and the continuing process of refining his job description. Meetings with the administration and a Turf Advisory Working Group will help clarify how the turf coordinator’s role will function within the university’s hierarchy.

The normal business meeting followed (see the summer board meeting minutes in the Sept./Oct. 1998 issue of the Green Sheet for details). After the summer board meeting adjourned at 4:30 p.m., the FGCSA annual meeting was called to order for the purpose of electing new officers. The nominated slate of Mike Perham, CGCS, president; Darren Davis, GCS, vice president; Cary Lewis, CGCS, secretary/treasurer was elected by a unanimous vote.

At 8:00 a.m. Sunday, 15

Support Those Who Support Us!
Dale Mitchell (left) and Richard Colyer (right) present Joe Ondo, CGCS with a check for $3,000 for turf research from the Golf Agronomics Supply and Handling (GASH) rebate program. The FGCSA is deeply appreciates the consistent support GASH has shown for our turf research programs. They too are “True Believers!” Photo by Joel Jackson.

superintendents attended a GCSAA Etonic Leadership Series seminar entitled, “Computers for Golf Course Maintenance.” The presentation by Gary Bueltel, CGCS, CTM of the Lost Creek Country Club in Austin, Texas focused on ways superintendents can use computer software to maximize their time, productivity, and demonstrate their value to their club.

Bueltel gave numerous examples of how investing the time to learn to use spreadsheets to provide various financial and operational scenarios to his management, increased his visibility and professionalism within his club. The theme of the presentation: Save Time. Save Money. Save Your Job! Bueltel has made computers a hobby and builds customized computer systems for superintendents. If you are interested in learning more about how computers can help you in your job in the high tech 90s, give Gary a call at (512) 899-1971. It’s never too late to learn more!

Dale Kuehner, CGCS, 1996-97 FGCSA president (left) performs his last official act for the FGCSA board by presenting Joe Ondo, CGCS with his plaque and gavel as Joe becomes the newest past president. Photo by Joel Jackson.

Later that same day, everyone gathered at the Bay Hill Club for the annual banquet. Good food and fun were the order of the evening as the crowd enjoyed with
