Most all golf course superintendents puzzle over the right combination of disease control products for their turfgrass management program. Put an end to this dilemma with HERITAGE and DACONIL, the two broad-spectrum fungicides that fit your program perfectly. Together, HERITAGE and DACONIL bring just the right complement of advantages to your tees, greens, and fairways.

HERITAGE FUNGICIDE
• Exhibits both preventative and curative activity
• Only strobilurin chemistry with systemic activity
• Controls most turfgrass diseases, including Pythium, take-all patch, summer patch, anthracnose, and snow mold
• Reduced risk to environmental resources
• Extended spray intervals with low use rates
• Improves turf quality with no stunting or growth regulator effect

DACONIL FUNGICIDE
• Multi-site mode of action
• Sticks and stays for maximum protection against fungal diseases
• Controls 14 diseases, including dollar spot, leaf spot, melting out, rust, and red thread
• Three flexible formulations—Ultrex®, Weather Stik®, and Zn

When putting your turfgrass disease management program together, pick up HERITAGE and DACONIL fungicides—they're the perfect fit.

channeling the golf course superintendents' fund-raising abilities into a local community charity. The National Center was formerly known as the Adam Walsh Center, which was formed in Hollywood when Adam Walsh was abducted and killed in the early 1980s.

Lottes and Entwistle have stepped down from this event that they founded, and turned it over to the very capable hands of Bill's son, Billy Jr., the golf course superintendent at Flamingo Lakes, in Pembroke Pines. He has become the driving force for this event during the past eight years. The joke among former tournament board members is that the only way to escape Billy and this golf tournament is to move away like Mark Richard CGCS, and Ron Wright CGCS.

Each June, former tournament board members receive that fateful phone call from Billy, “Yo, Bob, we need to get going on this golf tournament!” We all try to hide from him, but his persistence pays off. We gather for our first meeting, and the ball starts rolling again.

Many of our Eagle ($250) and Birdie ($100) Sponsors have supported this event for all 14 years. These sponsors are so enthusiastic about supporting this event that their checks arrive only several days after we mail out our preliminary tournament information. This type of cooperation from our sponsors, and the sincere care and concern that they express for this cause, are key components for the outstanding success that occurs with this event each year.

On Oct. 2, Entwistle presented Nancy McBride, the Center’s director, with a check for $13,000. Every year our fund-raising goal increases, every year our sponsors respond.

More than $106,000 in 14 years! I don’t believe David Lottes and Bill Entwistle Sr. ever dreamed about this type of success, or that this event would continue for so long.

This year Colony West provided an excellent site for an event of such complex planning and last-minute adjustments. Dale Kuehner, CGCS and his staff again provided outstanding course conditions after another tough September of growing grass under water.

South Florida had just sloshed through 22 inches of rain prior to this event and, after reviewing course conditions, Dale’s course appeared unaffected from the challenging grass-growing environment.

The intricacies of hosting this event — including grill placement for cooking 400 hot dogs, installing 45 tee and green sponsor signs, 144 very critical players, and an overbearing tournament director (Billy) — can be a challenging experience for most superintendents. Dale and his staff have done an excellent job in making this event such a success.

The 1998 SFGCSA Tournament Committee included Bill Entwistle Jr., Dale Kuehner CGCS, Bob Klitz CGCS, Bill McKee, and Bryan Singleton. All of the SFGCSA Board members, would like to thank the tournament participants and our volunteers for making this tournament a consistent success. See you all next year.

Volunteers: Angela McCommon; Erik Thor, Rayside Truck and Trailer; Tom McCulley; and Richard Levy. Special thanks to: Bill Rittberger, Rayside Truck and Trailer for the Hot Dog (400 Hot Dogs, and then we go eat lunch!) Eagle One Golf Products for donating all the sponsor signs.

Hurricane Georges Wipes Out Majority of Tourney Field

Hurricane Georges threw a kink in the plans to hold the Third Annual FGCSA Chapter Team Championship at Southern Dunes GC in

Joining Entwhistle on the 1998 tournament committee were, from left, Bob Klitz, CGCS; Bryan Singleton, Bill McKee and tournament host Dale Kuehner. Photo by Mike Bailey.
Haines City in September.

With the event rescheduled for Oct. 17, only five chapters were able to field teams as many courses began their overseeding preparations. A cloudy, blustery day greeted the field of diehard golfers, but the weather held off and the event is in the record books.

For the record, the West Coast Team, led by low gross winner Jim Torba of the University of South Florida GC, edged the Treasure Coast team by one shot.

Joining Torba on the West Coast team were Cary Lewis, CGCS, Renaissance Vinoy Resort; Mike Wisher, Bloomingdale GC; and Duane Van Etten, Lansbrook GC.

Torba’s score of par 72 earned him a spot on FGCSA’s No.1 Team along with Mark Hopkins, winner of the Poa Annua Classic in May and Chris Cartin who won the Crowfoot Open in August. The fourth spot on the team went to Buck Buckner who had the lowest average score in 2 out of 3 of the qualifying events. The team will vie for national honors during the GCSAA Golf Championship to be held in February.

Special thanks to host superintendent Bayne Calliavet and the pro shop and food and beverage staffs for another great event on a great golf course. Thanks also to Tom Benefield of Eco Soil Systems for sponsoring the beverages on the course and after golf.

Mark your calendars now for the last Saturday next September and I hope to see more chapters send teams next year. Hopefully we won’t have to dodge another hurricane!

JOE ONDO, CGCS
A good turf care supplier is resourceful, trustworthy and always there to keep you out of trouble with the right kind of support.

That's why more and more turf care professionals make Terra their supplier of choice. Terra has the people, the products and the resources to meet all your turf care needs.

Terra® brand seed offers you an extensive selection of blends developed to keep your course beautiful and strong from tee to green. Each is backed by in-depth research trials and agronomic expertise to ensure the quality and the performance you expect.

Terra® brand professional fertilizers will help seed grow into healthy, resilient turf that's better able to withstand disease, pests, and everyday wear and tear. The Terra fertilizer line includes primary, secondary, micronutrient and pesticide packages plus Terra's exclusive GoldCote™ controlled-release technology that delivers consistent, high-quality nutrition at a predictable, dependable rate.

The Terra turf protection line has the products you need to control insect, weed and disease pressures on your course. Terra offers a wide selection of trusted national brands including Terra® Professional Products and Riverside®.

You can count on Terra for reliable service, too. From soil and tissue testing to problem identification, from application services to complete program recommendations — whatever you need, the experts at Terra are there for you with exactly the right support.

Working with you.

Pablo Creek Club...
Where Club is spelled G-O-L-F!

BY JOEL JACKSON, CGCS

It has to be motivating and fun for a superintendent to take a position with a club that is first and foremost dedicated to the game of golf. Pablo Creek is just such a club, and Glen Klauk is the superintendent who gets to enjoy helping to make it a reality.

At the end of a winding, crushed-coquina road just minutes away from the metal and glass business centers of Jack-

North Florida Chapter

History: Serving the northeast Florida area or “First Coast” region, the North Florida Chapter began in 1961 as the Georgia-Florida Turf Grass Association. In 1967 the name was changed to the Florida-Georgia Turf Grass Association. In 1977 the chapter assumed its current North Florida GCSA Chapter status. Founding members were Buddy Clark, Bauny Baumgartner, Bob Willis, Crash Hall, Lou Chaff, Ed Dyer, Ed Matson, Amos Deathridge, Tom Svigel and Ron Hill.

Activities: Besides holding traditional monthly meetings, the chapter hosts two annual events: the Mike Richards Memorial Golf Tournament, which funds turf student scholarships; and the North Florida Transition Tournament, which is a weekend-long event that marks the change of officers and is a getaway for members and their families.

Mission: The North Florida Chapter supports the 4-H Club, The Ag Council, and the Jacksonville Area Golf Association. In 1998 the NFGCSA participated in the mayor’s city beautification plan by donating 1,000 crepe myrtles to the community.

Beneficial Microbes®
The Natural Solution

"The benefit we have noticed the most since using the Green-Relief programs is the improvement in the overall uniformity and consistency of the quality, density and color of our turf. In my opinion, in the golf business, consistency is the key. Our golf course gets a lot of traffic each year, upwards of 60,000 rounds, and not with a lot of area for the carts to disperse as they play each hole. We still have very few bare areas from traffic or stress. To me, that is a big improvement. Another strong benefit we've seen since using the Green-Relief organic programs has been the ability to cut down on our chemical use. We have cut our fungicide applications to almost nil, we might have to use them once or twice a year, while at the same time, cutting our chemical fertilizer use in half. I would have to say, I'm a firm believer in the use of 'Beneficial Microbial Products.'

Superintendent Garth Boline of the Chi Chi Rodriguez Golf Club-Home of the Chi Chi Rodriguez Youth Foundation in Clearwater, Florida.

Garth's experience illustrates why more superintendents around the world now specify GREEN-RELEAF® Beneficial Microbes® as the leading non-toxic course-conditioning product.

Hearty deep root growth is essential for turf that consistently handles heavy wear and seasonal stress while maintaining overall plant health.

Upon application, GREEN-RELEAF® Beneficial Microbes® move rapidly into the root zone forming a symbiotic relationship with plant roots. The resulting microbial network improves plant performance by facilitating the uptake of nutrients and water, while simultaneously aiding in pathogen defense.

GREEN-RELEAF® products increase your turf's natural microbial activity for a vigorous hearty soil ecology which lessens the need for chemical controls. Since our Beneficial Microbes® also amplify nutrient uptake, you can apply less fertilizer and still produce higher quality turf.

Other advantages include:
- 50% faster seed germination
- Fast, full overseeding and grow-in
- Higher tolerance for heat, cold and physical stress
- Reduce seed rates by 25%
- Deeper root growth

Take our no-risk 90-day challenge: Test the GREEN-RELEAF® program on your course and see the results of higher beneficial microbial populations within 90 days! If agreed that there were no quantitative results after 90 days, GREEN-RELEAF® will donate the entire cost of your program to your local chapters research & development or scholarship fund. To accept this challenge or for more information, please call:

from an old golf book with foursomes walking down the fairways with their caddies. A rare sight indeed, but inspirational and indicative of the "golf only" atmosphere that permeates Pablo Creek.

The club encourages its members to bring family and guests to use the course and about half of the 14,000 rounds last year was guest play. Superintendent Glen Klauk, who sports a six handicap, says, "Shooting par is a very good score and birdies are hard to come by. The course isn't tricked up. If you make a double bogey, it's because you didn't hit the ball." Klauk's own game has been on hold the last two years as he dedicated himself to growing in the new course.

Growing in a new course was one of the reasons Klauk made the move to Jacksonville after a long, successful career in Palm Beach County.

"I had lived and worked exclusively in Palm Beach County since I was in the first grade," said Klauk. "I had 18 good years at Delray Dunes, my last position, but my mom and dad moved to St. Augustine and my brother Fred is the superintendent at the Tournament Players Club in Ponte Vedra Beach. It was time for me to make a change.

"Fred told me about this new project starting up so I came up to take a look. I came out here to the site in 1996 when just a few acres had been cleared. It was just so different from what I had been doing that I knew I wanted to put in my bid for the job.

"We hit the decks running. The project started in March and the last grass was
