DuCor International Corp.
Precision Small Engine Co.
Seven Rivers GCSA
Upstart Products
North Florida Chapter Says, 'Dwight Got It Right!'

In a career spanning 34 years so far, Dwight “Butch” Singo has been from Lake Placid to Jacksonville and a few stops in between. Singo began his career at the Sun ‘N Lake Executive Golf Course in 1973 in Lake Placid. A few years later his company opened the Sun ‘N Lake Resort of Sebring and Singo transferred to head up the new operation where he remained for four more years.

In 1979 Singo moved to Winter Springs to take over the Big Cypress Golf Club working with Dr. Harry Day. Big Cypress was originally the Devlin-Von Hagge course called Sheoah G.C.

Even in his early days Singo was volunteering and long before the Ridge Chapter was born, Singo commuted to the Orlando area to serve on the Central Florida GCSA Board of Directors beginning in 1975. Once in central Florida, Singo moved through the board and officer chairs to become chapter president in 1979.

In 1984 Singo went to work for Vigoro Industries. Who doesn’t remember Par Ex products? Well maybe not the young whipper snappers. After nine years with Vigoro, Singo accepted a sales representative position with Florida GCAs Board of Directors.

Singo previously has been awarded the Larry Kamphaus and Jack Harrell Sr. Awards for Lifetime Service reservations for at least the past 12 years.

Singo's service has not gone unnoticed by his peers in the industry. In August 2005 he was given the Central Florida Crowfoot Open Larry Kamphaus Award; in December 2006 he was presented the Jack Harrell Sr. Lifetime Achievement Award; and this year the North Florida Chapter has presented him with the FGCSA President’s Award for Lifetime Service.

A man's character and his actions tell the whole story. The quiet unassuming steady and dependable Butch Singo has been getting it right for a long time and his friends in the North Florida wanted to add their thanks and recognition for a job well done.

Everglades Recognizes Durand's 4 Decades

By Wayne Kappauf, CGCS

On July 12, the Everglades GCSA held its annual meeting at Twin Eagles Country Club in Naples. Long time FGCSA and Everglades member Steven Durand was given the FGCSA’s Presidents Award for Lifetime Service.

Outgoing Everglades President Billy Davidson made the presentation and gave an emotional account of Durand’s service to the industry and his own personal history with Steve. Steve Durand has been in the turf industry for over 30 years and has been a superintendent in four states and in four different decades. Originally from the Northeast,

Steve made his way to Florida in the 80’s and never looked back.

Steve has experience from both sides of the superintendent’s desk and is currently one of Harrell’s Inc. in 1993. He has been there 14 years and Singo says he hopefully expects to retire from Harrell’s.

Beside his tenure as an officer and board member of the Central Florida Chapter, Singo served on the Crowfoot Committee for approximately five years before becoming a commercial member and board member of the North Florida GCSA for the past 16 years. Singo has been handling chapter meeting

Now with Harrell's, Steve Durand has been a superintendent in four states over four different decades

Harrell Fertilizer’s top representatives. Prior to his Harrell’s position, Steve was superintendent at Quail

President Lon Chatfield proudly presents Dwight “Butch” Singo with a 2007 FGCSA President’s Award for Lifetime Service at the chapter’s annual meeting in Jacksonville for his 16 years of service to the North Florida GCSA.
Golfers will work around just about anything to play a well-conditioned course. It’s that commitment that motivates Syngenta to provide you with what you need to enhance play. Products like Heritage® fungicide ensure that turf is disease-free and best able to respond to your agronomic plan and course schedule. It controls a broad spectrum of diseases from the inside out so that neither weather nor mowing can hinder its effectiveness. Heritage is an important part of a preventive spray program, which you can find for your area at GreenCastOnline.com.

At Syngenta, we understand why golfers schedule their lives around ideal conditions. Our job is to create products that help make those conditions happen most often.

Important: Always read and follow label instructions before buying or using this product. ©2006 Syngenta. Syngenta Professional Products, Greensboro, NC 27419. GreenCast®, Heritage®, and the Syngenta logo are trademarks of a Syngenta Group Company.
Creek Country Club in Naples for 13 years. During this period he served on the Everglades Board of Directors and is a past president of the chapter. Steve’s wife Vicki attended the meeting and was thrilled to see her husband so warmly received by nearly a hundred of his peers and friends.

Steven Durand has made his mark on the golf course industry and we all know he had a great time doing it.

From all of us who have known and worked with Steve over the years we say, “Thank you for your service and friendship and congratulations on receiving the 2007 FGCSA’s Presidents Award.”

At the EGCSA Annual Meeting President Billy Davidson (left) paid tribute to veteran superintendent Steve Durand in his remarks and presented him with a 2007 FGCSA President’s Award for Lifetime Service.
See fungi lurking behind every tree? Under every leaf and between every blade of grass? We see them too — and we have just the tools you’ll need to defend yourself against them. Fight back with a programmed defense designed from the whole Regal arsenal of fungicides. From contact or systemic response or even both working together. You’ll have certain applications requirements and cost per acre concerns. The more weapons you have, the more ways you can fight back. It’s a jungle out there. It’s time you ruled it. For more information on a fungi program designed just for you, call Regal Chemical at: 1-800-621-5208. Or, visit regalchem.com.
What’s your handicap?
Fire ants? Mole crickets? Goosegrass? Fairy rings? No matter what challenges you face, Howard has solutions—including Ronstar® + fertilizer, which controls fire ants while nourishing turf. You can rely on Howard for all your fertilizer and chemical needs, and thanks to our proprietary ProFusion™ coating process, you can be assured our products are perfectly blended for maximum performance and economy. You can also rely on our expertise. With our longtime presence in the Southeast, we know the soil and climate dynamics better than anyone.

To learn how we can help you meet and defeat your challenges, call 888-668-5868 or visit howardfertilizer.com.

Kingsway CC
Photo by Daniel Zelazek
It is just a little over two years ago that Hurricane Charlie took dead aim on Punta Gorda and roared up Charlotte Harbor, gathering strength from the shallow warm waters of the Gulf of Mexico and the bay just before it slammed into the mainland.

Kingsway CC is located about a mile east of I-75 in Lake Suzy, off Kings Highway in Desoto County and only a couple of miles from where the Peace River flows into the upper bay. Many members live on the course, while others live in nearby communities like Punta Gorda, Port Charlotte, Arcadia, and North Port.

Superintendent Ryan Willis, CGCS says that Kingsway CC was on the western edge of the 20-mile-wide eye-wall of the storm as it roughly followed U.S. Highway 17 northward on its destructive path across Florida on Friday the 13th in August, 2005. Acting more like a large tornado, the storm destroyed the Kingsway clubhouse facilities and conservatively more than 2,000 large trees and many smaller ones as well.

The day after the storm, Willis couldn’t access the property. He came back the next day and made his way through the debris, fired up the front-end loader tractor and began clearing a path so people could get into the property to begin damage assessments and basic cleanup.

Those early days of shock and awe have finally been replaced by more normal operations on a newly redesigned and renovated golf course and clubhouse. Recovery, rebuilding and rejuvenation have
Restoration of the golf course to its original condition was not really an option. The pine woods that the course had been carved from by architect Ron Garl in 1976 were gone forever. The club could not afford to plant large tree specimens and neither did it make sense to install thousands of small caliber trees that would take decades to restore the course to its original character and appearance.

It was time for the club to assess its resources and create a vision for the future. It was time for decisive action in order to make lemonade out of the lemon that Mother Nature had just handed the members. A group of members led by Rocky Farhat, long-time resident and die-hard Kingsway booster, contacted Garl about coming back to renovate and redesign one of his early golf courses. Farhat said Garl was visibly emotional as he assessed the damage and discussed possible improvements to the course. After all, Kingsway was one of his babies.

Anyone who takes pride in his work and has labored long and hard on a piece of land and left his or her mark on it will always be tied to that property. It comes with the job. We all move on. It’s inevitable. But we always have soft spots in our hearts for those courses we built or maintained. Garl signed on and a new Kingsway began to rise from the jumble of shattered tree trunks and broken branches.

With no stands of trees to define the routing as before, Garl suggested that the committee consider adopting some design features of notable courses that also didn’t have many trees. The original Pine Valley golf course came to mind, so the addition of waste areas planted with native grasses became part of the new look to replace some of the former wooded areas left barren by the storm. Other improvements become a way of life. The members and employees can never go back completely to the way things were, but they can take pride in a new facility, better designed and equipped to prosper in the future growth of southwest Florida.

Work philosophy and advice: Lead by example. Don’t be afraid to get sweaty and dirty. Document or die.

Immediate goals: I want to get our Audubon Cooperative Sanctuary Program back up and running post hurricane recovery. We have been naturalizing areas and have a long-range plan to re-forest them.

Memorable moments: It has to be the birth of my children.

Hobbies: Golfing, fishing (I jumped my first tarpon recently. Pretty exciting) and the Gators.

From: Born in Newport News, Va. Grew up in Port Charlotte

Family: Wife Catrina. Son Taylor (5) and daughter Morgan (2)

Education: B.S. in Turf Management, University of Florida, 1995

Professional Affiliations: 13-year member of GCSAA. Certified in 2004. FGCSA member and 3 years on Calusa GCSA Board. Immediate Past President .

How did you get into the business? I went to UF to study architecture and building construction. After the intial classes I realized I didn’t like being inside all day hunched over a drafting table. I explored other options and discovered turf management and working on golf courses. After a few turf classes I got a job doing research project sampling at the horticulture unit. Soon after that I started working for Jeff Hayden and Buddy Keene at Gainesville G&CC. Jeff was a very big factor in getting me into the the business.
