the course as an ACSP Silver Sanctuary all in the same year.

Since then Bass has been busy getting the whole St. James project certified as a FireWise Community, which involved cutting fire breaks around the property and conducting a control-burn program on undeveloped lots and natural area on the course.

Bass hopes to get Bryce’s school into the Audubon Sanctuary program now that the FireWise project is established. For his own relaxation he enjoys fishing, surfing and golf.

TS Fay Dumps Lots of Water

Tropical Storm Fay dominated Florida’s weather and TV coverage for more than a week in late August. The GCSAA even called to remind everyone that they stood ready to offer financial assistance to any members suffering hardships from the storm.

Darren Davis shared a photo, reporting that his Olde Florida GC received 12-14 inches of rainfall, which caused some flooding. Davis also shared a video of crew members hosing silt and debris off fairways.

A few reports came from east Central Florida where Fay stalled for a day or so, dumping 24-33 inches of rain in Brevard County:

**Viera East GC**

Yes we were flooded; we took on just under 20 inches over here at Viera East GC. I had my guys work all Friday, Saturday and Sunday (Aug. 22-24) to make up for lost time. We only had two trees down, a lot of debris, mostly just a bunch of rain. The storm stalled right over us, I was able to open the front nine yesterday (Aug. 26) at noon, and the back will not be open till probably first of next week (Labor Day). I still have Three cart paths holding 4-8 inches of water on them. I also have about 100 pictures of the storm from start to finish. Some really good ideas for future plans down the road.

Scott Mosher, Superintendent

**Manatee Cove GC**

My course flooded. I’m at Manatee Cove GC on Patrick AFB. We had 26 inches of rain. We were closed from Tuesday, Aug. 19 through today, Aug. 27. We are reopening tomorrow.

Kevin Czerkies, CGCS

There was also a report that the DeBary G.C. had half of a green washed away. The Deltona – DeBary area of western Volusia County still has lots of standing flood water in residential areas as well.

Achieve Optimum Over-Seeding This Fall With:

- Quality Foliar Nutrients
- 28% Acidic Nitrogen
- Water Treatment Amendment

Enviro Phos 7-21-0 with organics, alone or in specialized mixed grades such as 6-10-10 and 4-4-12 are unmatched for quick over-seed establishment!

Call today and ask about our over-seeding products for better transition of greens, tees and fairways!

Keeping The Promise
The Ritz Carlton Golf Club, Orlando

Located less than two miles east of Orlando’s bustling International Drive and the Orange County Convention Center, The Ritz-Carlton Golf Club offers visitors and locals a round of golf on a Greg Norman-designed course that thoughtfully complements the natural landscape.

The gently rolling fairways wind through woods and wetlands that border Shingle Creek, which flows south from West Orlando to Lake Tohopekaliga, Lake Toho for short. The 16 lakes on the course capture storm runoff, protecting the ecology of the area. Other than a couple of holes near Central Florida Parkway to the north and John Young Parkway to the east, most of your golf round is spent on a virtual eco-tour of the natural surroundings.

Superintendent Andy Ragsdale has been on the course since construction and grow-in back in 2002. He worked his way up from assistant superintendent to superintendent in 2004, and he’s enjoying every minute of it. On our tour of the course for this story, Ragsdale’s enthusiasm for the layout, the wildlife, his golf maintenance team and the resort’s attention to customer service was infectious.

“This course is designed perfectly for this property,” he said, “with wide fairways and subtle movement in the greens. For group outings, golfers of all skill levels can have a great, enjoyable round which will challenge the low handicappers, but also won’t beat up the average golfer. In the summer time, we also create forward family tees, so even young golfers can play and the whole family can enjoy the experience.”

Several other features on the course speak to its uniqueness and playability. The Ritz-Carlton has large approaches and greens surrounds, about 14 acres’ worth. TifSport is used everywhere except the putting surfaces, which are TifEagle. The approach and runoff areas are mowed to 1/4 inch and offer unique chip and pitch shots reminiscent of some of the U.S. Open set ups at Pinehurst No. 2.

Eight crushed coquina “waste bunkers” double as natural cart paths. The placement of these bunkers/paths offer softer, playable landing areas for golf shots as opposed to paved surfaces.
that can bounce balls into the bordering woods and wetlands. Coquina paths are quite common in the Naples/Ft. Myers area, but not as prevalent on Central Florida courses.

Five sets of tees on each hole total six acres of teeing ground. This gives the staff plenty of room to move the tee blocks around to avoid severe wear and tear. Sometimes group golf outings must fit into tight time schedules. The generous teeing areas give the staff the ability to set up the course appropriately for the needs and abilities of the participants and prevailing weather conditions.

Creating a guest-friendly atmosphere is a central theme at the Grande Lakes Orlando Resort, which is home to both the Ritz-Carlton and J. W. Marriott hotels that overlook the course. Ragsdale says that training in supe-

ior customer service and employee job
satisfaction are as important as job per-
formance. “At our daily crew meetings,”
he said, “not only do we go over main-
tenance assignments but we also review
principles of the Ritz Carlton Credo
and Employee Promise to ensure that
all of our ladies and gentlemen know
what is expected and to make sure they
are informed about all resort operations
and opportunities.” As Ragsdale dis-
cussed the resort’s attention to detail, I
flashed back to my Disney days and the
company’s emphasis on guest service
and team building.

THE RITZ-CARLTON GOLF CLUB, ORLANDO

Type: Resort and
Public Play
Length: 18 holes;
7,122 yards; Par 72;
Slope/Rating: 139 / 73.9
Design/Construction: designed by Greg
Norman; constructed by Southeastern Golf;
opened 2003
Management: Resort
Vice President Steve
Contos; General
Manager Mark
Ferland; Director of Golf Patrick Dill; Head Golf Professional
Kirk Baker, and Golf Course Superintendent Andy Ragsdale.
Ongoing projects: Drainage improvements, cart path
improvements and removal of scattered common bermudagrass
patches.
Total resort acreage: 497. Total acreage of turf under
maintenance: 116
Greens: TifEagle, 3.5 acres; HOC .125 – .135 in.; green speed
goal 10; no overseeding
Tees, Approaches, Fairways and Roughs: TifSport, no
overseeding; Tees 6.0 A, HOC .300 - .500 in.; Approaches
14 A, HOC .250-.350 in.; Fairways 40 A, HOC .400 - .650 in.;
Roughs 40 A, HOC 2.5 in.
Bunkers: 66 type 37M sand plus 8 crushed coquina waste
bunkers which also act as partial cart paths on certain holes.
Golfers may ground clubs on waste bunkers.

Waterways: 16 lakes
104.4 A, maintained by
Lake Masters
Irrigation systems: Reclaimed water:
Flowtronex pump
station for course.
Hoover pump stations
for resort grounds.
Rainbird Cirrus
System. 1,500 heads
on course, 10,500
on resort grounds;
fertigation system.

Water Management
and Conservation practices: Constant monitoring and
maintenance of reclaimed water system and adjusting run times
for efficient watering.
Staff: Total including superintendent – 33 budgeted 1,100
straight-time hours per week and 60 hours of overtime.
Key maintenance staff members: Assistant Sean O’Brien;
Equipment Technicians Mauro Ramirez, Hector Reyes and
Jair Sarria; Golf Course Supervisors/Pest Control Technicians
Larry Wheat and Dave Schmidt; Irrigation Technicians
Flaviano Chumbo and Angel Cruz; Administrative Assistant
Karen Nimetz.
Communication: Weekly golf meeting, weekly hotel
leadership meeting and daily meeting with grounds team.
Not only do we go over daily maintenance assignments, we
also review the resort’s 12 customer service values and the
employee promise in the Ritz Credo.

Andy Ragsdale, Class A Golf Course Superintendent

Originally from Tarpon Springs
Family: Wife Sylvia and 2-year old daughter Veronica
Education: A.S. Golf Operations, Lake City Community College, 1999
Goals: 1) best possible course conditions for our guests every day; 2) best possible working conditions for the ladies and gentlemen on our grounds staff.
Advice to new superintendents: Take care of your team – be consistent, firm and have fun. Clearly communicate your expectations to your team. Attention to detail is the key to success. Communicate to the leaders above you. You can’t teach what you don’t know and you can’t lead where you won’t go.
Memorable moments: The birth of my daughter and my wedding day.
Hobbies & community involvement: Hiking, camping, playing any sport including paintball. My wife is a terrific children’s pastor and I enjoy helping her in her ministry.

Back on the golf course, guests can also reserve guided fly fishing trips on the lake at No. 9. Ragsdale said they are planning to add spincast fishing also.

I didn’t get a chance to wet a line on the tour, but I did get a line on butterfly gardening and was inspired by what I learned to create a butterfly garden in my own back yard.

“We have several formal butterfly gardens on the property,” Ragsdale said. “One is on the course near the 13th tee and the others are near the hotels so guests can easily have access to watch the butterflies. The key is to have plants that will attract butterflies to include not only nectar plants for the adults but also food source plants like pipe vine, milkweed vine, parsley and passion vine to name just few for the caterpillar stage. Placement of the plants is critical since the caterpillar plants will get chewed on and can look a little beat up, so they should be near the rear of the garden."

Ragsdale goes the extra mile so guests can fully appreciate the butterfly circle of life. After the adults have laid their eggs and the caterpillars have emerged, he will begin to scour the gardens to look for the chrysalis stage which leads to a new generation of adults. Ragsdale carefully transfers several of the chrysalises to a clear-sided shelter box and mounts them along a strip of wood in the center of the box. The transparent case is located near a sidewalk so guests can stop and watch in fascination as the new adults emerge and let their wings dry in safety before they fly off to create a

1. Vehicle: GMC Yukon
2. Last good movie I saw: Bourne Ultimatum
3. I stay home to watch: UFC Pay per view
5. Favorite performer: Steven Tyler
6. Prized possessions: Family
7. Personal Heroes: Men & women in the U. S. Military
8. Nobody knows that I: Once kicked a 50-yard field goal
9. If I could do it over: I’d do it all the same
10. I’m better than anyone when it comes to: Keeping secrets
11. I’d give anything to meet: and spend two weeks on the road with Jesus.
12. My fantasy is: To travel the world with my family
13. The one thing that I can’t stand: Cleaning the house
14. If I could change one thing about myself: Wish I liked cleaning the house
15. Words that best describe me: Kind, reliable, easy going
16. My dream foursome would be: Any of my brothers and/or nephews playing Pebble Beach
17. My best fish story: Once caught an 8 lb. largemouth bass at Fox Hollow, while on lunch break.
Ragsdale says there are usually 10-12 species of butterfly on the property at any given time. The butterfly gardens are also a great food source for a wide range of pollinator insects that are critical for survival of our plant life and crops. Several varieties of bees and small wasps could be seen foraging among the flowers.

Ragsdale’s enthusiasm for the wildlife on the property isn’t accidental. The Ritz-Carlton Golf Club Orlando is a certified Audubon Cooperative Sanctuary that also supports a population of turkey, deer, bobcat, gopher tortoise and all the species of birds we have come to expect on Florida golf courses. The course became fully certified in December and, as reported in Summer Florida Green, the Marriott Corporation has pledged that all 34 of its golf properties will become certified cooperative sanctuaries. Two other Marriott properties in Orlando – Grande Pines and Grande Vista – already have reached certified status.

Every golf course has its built-in challenges and the Ritz Carlton is no exception. Soil can sometimes be a challenge if it doesn’t drain well. Fortunately a sandy-loam soil profile here drains just fine. But once an open, grassy, pastureland, the site supported common bermudagrass growth, which Ragsdale says has become his number-one continuing management project.

The common bermuda itself is virtually invisible to golfers during the
warmer seasons, but left unchecked it is an aggressive variety that spreads, so there is a progressive management plan in place annually to select and remove patches identified in the fairways.

The program has generally consisted of an alternating series of glyphosate and fertilizer applications to eradicate the rogue patches of unwanted common bermudagrass. Once a patch has been identified, the sod is cut out in a square pattern and fertilizer applied to encourage and stolons and rhizomes to grow. Any new emergent growth is then treated with glyphosate. The process is repeated three times to maximize control. After a few weeks, the area is resodded and monitored.

While the course drains well overall, there are a few places along some cart paths where settling has either cracked the path or prevented water from draining. The crew installs “smile” drains and PVC catch basin boxes to remove any possible standing water and then re-pours the concrete.

Finding time to do necessary routine cultural practices on a golf resort that is open 365 days a year takes creative planning and cooperation from everyone from convention sales staff to Director of Golf Patrick Dill to Ragsdale and the maintenance staff. Dill and Ragsdale try to ride the course together every Monday to discuss conditions, maintenance projects and upcoming golf outings. Communication on a more formal and larger scale takes place in weekly golf meetings and weekly hotel leadership meetings so everyone knows what going on and coming up.

Generally Ragsdale says he gets to aerify greens, tees and fairways three times a year; the approaches once a year and the roughs twice a year. Light greens topdressing is done approximately every two weeks. During the summer, when play slows down a little, the pro shop blocks a.m. or p.m. start times (depending on play) to provide access for topdressing.

Fertility on the TifEagle greens is done primarily with weekly light liquid applications, which the turf takes up quickly. Maybe 2 to 3 pounds of granular nitrogen is applied annually. Tees, approaches, fairways and roughs receive a maximum of 8-10 pounds of nitrogen per year, which is on target for bermudagrass recommendations in the Central Florida zone.

Pest control is not a major issue. Known hot spots for mole cricket and grub activity are monitored and, if needed, spot-treated with Top Choice and Merit and Meridian. The rest of the course is scouted and monitored for pest activity as part of the integrated pest management plan.
