Industry Leading, Direct Sales of Fertilizers, Chemicals, Plant Protection Products, and Grass Seed.

As your one-stop supplier, Direct Solutions’ commitment to you is simple:

Our Promise. Provide a complete range of the most advanced turf-growth solutions on the market.

Our Partnership. Develop agronomic and economic solutions tailored to your specific turf conditions, budget and delivery schedules.

Our Performance. Deliver proven turf management programs with environmentally-responsible fertilizer technologies, micronutrients, seed and chemical products.

Our Products. We proudly offer all leading turf & ornamental products to meet your needs, and feature these fine fertilizer technologies along with the exciting new nematode product, MultiGuard Protect.

Proud to be a new Platinum Level sponsor of the FGCSA. We are Direct Solutions, and we are committed to growth.

Teal, Orange, Green, Ocean and Khaki Courses. Sometimes a tee location will share two different colored markers. The yardage total remains within designated handicap ranges so your stroke rating is not affected, just your enjoyment of the round.

During a tour of the maintenance facility, Brian explained that they use a combination of 60 percent leasing and 40 percent purchasing plans.

“We purchase equipment with extended-life uses like trap rakes and triplexes, which can be staged from use on greens to tees to Collins and first mowings after top dressing and aerification,” he said. “The same for walk mowers. The older mowers are used for those initial cuts after seasonal greens renovations."

This is a common practice superintendents use to extend the useful life of a club’s capital investment in turf maintenance equipment.

The key is for clubs to recognize that there comes a time when annual maintenance costs and meeting member expectations on course conditioning collide with the budget.

Speaking of capital investments, recently the clubhouse underwent a total renovation. Brian and Aberdeen’s Chief Operating Officer Michael DiPietro gave me a tour of the facility and over lunch, Michael explained the innovative concepts incorporated in the renovation and also the management philosophy and family atmosphere that prevails in all aspects of the club from the members to the employees.

DiPietro said, “Our goal was provide the ultimate country club experience at a tremendous value. The form and function of the final product accomplishes just that. In fact the new design has won awards and lots of inquiries from other clubs. We are proud of that, but we are more excited about the response and use by the members and the operational efficiencies that help the staff provide great experiences for our members.”

Two great examples were the outdoor, multi-pool activity area and the Cardio Stadium, a theatre-style exercise/fitness room.
Vehicle: 2007 Nissan Armada
I stay home to watch: NC State football
Last good movie I saw: I can't remember any recent movie I saw that didn't involve Disney princesses
Favorite meal: Filet mignon, baked potato and steamed vegetables
What I've been reading: Who has time to read?
Prized possessions: My family
Personal Heroes: Members of the U.S. Military
Nobody knows that I: I'll keep that one to myself
The one thing I can't stand: Irrational people
My most humbling experience: The birth of our twin daughters
My dream foursome: Jack Black, Will Ferrell, Adam Sandler and me
My best “fish” story: Still waiting for one
My most amazing golf shot: See the answer above

“We have three distinct pool areas: the Serenity Pool for people to read and relax, the Exercise pool with swimming lanes for doing laps, and an Activity Pool for the kids,” DiPietro said. “You will note how the landscaping helps to separate and frame each area. Brian and his grounds staff do a super job of doing the detail work necessary to keep the area looking great.

“We are also very excited about the fitness room. All of the equipment is recessed into the elevated flooring levels and each station is offset from the ones behind so that everyone has a view through the window wall overlooking the pool areas and the 18th green. The use volume of the fitness room has increased dramatically since the redesign makes the surroundings more conducive to achieving wellness goals.”

Another topic discussed at length was the work environment at the club. Expectations and opportunities were a major focus and DiPietro was proud of the retention, longevity, and 55 percent internal promotions rate for employees.

“It begins with the interview process,” DiPietro explained. “Not only is a club looking for the right person for the job, but the interviewee should be also looking for the right fit for their career growth and expectations. When we interviewed Brian, I told him that we expected his first year would be dedicated to making the improvements to the course that we desired and for him to learn our system and get to know his fellow department heads and employees. During his second year, which should be easier, we’d like to see him get more involved with his professional associations by volunteering and getting involved on committees. Thereafter we’d hope he would assume a leadership role and serve on the board(s) of his groups which would be good for his continuing education which would benefit the club and himself.

“I call this a system of deposits and withdrawals. In the beginning you make deposits of time and effort for learning the systems and accomplishing primary goals. Later, when you need personal time off for travel and education and for raising your family, you make withdrawals.”

Agronomy Management Solutions
Consultation Designed to Meet the Club’s Goals for Success

A full service consultation firm specializing in working with club managers and golf course superintendents to maximize operations and meet the needs and goals of the facility. Services include:

- Operational and Efficiency Audits
- Construction Planning and Oversight
- Nutritional Management Planning
- Integrated Pest Management Planning
- Capital Planning and Budgeting
- Labor Needs Evaluations
- Management Planning and Oversight
- Tournament Prep and Recovery
- Member Presentation Support
- Soil, Water, Tissue Analysis
- Cultural Practice Evaluations
- Budgeting

Carmen Magro MBA CGCS has extensive experience working with facilities around the world. He has served as golf course superintendent, professional consultant, advisor, university instructor and researcher.

“Bringing practical solutions to get the most out of your course”

the growth and effectiveness of the Club Managers Association in South Florida. He has learned to appreciate true professionals who serve their clubs well, but who also understand that it is a joint effort by everyone that makes a club ultimately successful over the long term. He also understands the importance of having a global view of the issues facing our industry and for all committed professionals—manager, pro, membership, food and beverage or superintendent—to participate in their associations to grow personally and professionally for the success of the golf industry.

Brian has certainly thrived in this positive atmosphere and he’s following the model magnificently. Like any new superintendent he spent long days getting the course into shape. He has served in all offices of the Palm Beach GCSA and is now on the Florida GCSA Board of Directors and he has a growing family he’s devoted to.

When I asked him what advice he might share with others to help with having a successful career, he responded, “Never close the lid on your ‘toolbox of knowledge.’ Be open to criticism as well as new ideas. Practice sound judgment and agronomic practices. Be a leader, a role model and an enabler for learning. Finally, be a member and get involved in your local chapter. Take advantage of the professional resources, educational sessions and networking opportunities they provide.”

My visit to Aberdeen was unique in the history of the cover stories I’ve written over the years. It’s often easy to convey the passion of the superintendent for his job at a club, but never before have I been treated to such a detailed discussion of the goals and mission of the entire facility. I called it “Team Aberdeen.”

“We call it the ‘Aberdeen Family,’” Michael DiPietro said.
Let the heavy hauling begin.

The new ProGator® 2020A.
Engineered for the long haul.

Put it to the test and experience:
- Up to 4,251 lbs. of payload capacity*
- The industry’s only 4-cylinder gas EFI engine
- 34 hp** (970cc) of power and torque
- Pick-up style suspension
- New, heavy-duty, hydraulic disc brakes
- A durable 7-gauge steel frame

To learn more, go to JohnDeere.com/Golf.

*Payload includes 200 lb (90.7 kg) operator, 200 lb (90.7) passenger and loaded attachment, 2WD with Heavy Duty Suspension, Wide Rear Tire
& 4-Post ROPS. Payload tested in accordance with ANSI / ITSDF B56.8 – 2006 standard. ROPS tested in accordance with ISO 21299-2009.

**@ 3600 rpm. Engine Manufacturer Gross Power. Tested in accordance with SAE J1349. Engine horsepower and torque information are provided by engine manufacturer for comparison purposes only. Actual operating horsepower and torque will be less. Refer to engine manufacturer’s website for additional information.

Introducing the all-new Greensmaster®
Setting a new standard by which all other

We gave our engineers the ultimate challenge – design the greensmower that will redefine precision cutting. With the new Greensmaster TriFlex, they exceeded all expectations.

Advanced cutting performance.
Imagine a rider that cuts with the precision of a walker. All Greensmaster TriFlex models give you superior contour following by combining industry-leading Flex™ technology with a double A-Arm Suspension System that keeps the cutting units floating freely. It prevents step cuts – particularly on the cleanup cut, with a unique “Lift-In-Turn” feature. Hybrid models also help to eliminate unsightly clip marks with an Energy Storage System that delivers instant power when you engage the reels.

TriFlex™ Hybrid Mowers.
riding greensmowers will be measured.

The ultimate in versatility.
The new TriFlex isn’t just the best cutting greensmower, it’s the most versatile. It has a new Flip-Up Footrest to enable easy access to the center cutting unit. The exclusive combination of open cutting unit access and Tool-Free, Quick-Change Cutting Units allows you to switch from mowing greens one minute to tees or surrounds the next—with the same tractor!

Time is money.
By raising the bar on productivity, we lowered your total cost of ownership. Each TriFlex rider offers faster travel time between greens. The machine has no daily maintenance requirements. Fast cutting unit change-out, fluid tank level “windows”, and easy access to routine service areas are just a few features that will help save you time and money.

EnergySmart™
What’s good for your greens is also good for the environment. The Greensmaster TriFlex Hybrid riding mowers are the first “EnergySmart™” labeled products offered by The Toro Company. EnergySmart is about efficiency balanced with environmental and financial sustainability, a visible sign of Toro’s ongoing commitment to customer-valued innovation.

The right choice.
Experience the future of greensmowers today. To arrange for a demonstration of the new Greensmaster TriFlex mower, call your Toro Distributor at 800-803-8676.

TORO. Count on it.
Because of a warmer-than-normal winter and spring, insect life cycles and your treatment programs probably began a tad earlier than usual this year; of course the drier-than-normal conditions may also have had an effect on program timing as well. That’s why it pays to monitor and visit your traditional hot spots for signs of activity. We asked superintendents to respond to an Insect Control Survey for tips and ideas on what they’re doing to manage pest pressures. Here are comments by three superintendents: Darren Davis, Bill Tyde and Joe Ondo. There may be a few weed control comments thrown in for good measure.

Survey Responses and Comments

1. Do you make any truly wall-to-wall insecticide applications on your course?

- **Davis:** For the first time in over 10 years, I did a wall-to-wall for mole cricket control. I used a product from DuPont — Provaunt®. I also made my first “almost” wall-to-wall preemergent application in over 10 years this year using Specticle®.
- **Tyde:** No wall-to-wall applications this year. Only treating where hot spots are active.
- **Ondo:** The insect control program that worked for us the last few years is to apply Bifentrin® and Imidacloprid® with a wetting agent around the end of May through the full moon in June on our greens, tees, slopes and clubhouse area. Most of our roughs are treated with fertilizer plus Talstar® during that same time frame.

2. Do you primarily do spot treatments including selective greens only in treating outbreaks (as opposed to treating all greens if you see signs on a couple of greens?)

- **Davis:** Yes I do primarily, but I will do preventive fungicide application on greens mid-November to mid-February.
- **Tyde:** Yes, but depending on the pest and time of year, aerification schedule determines if we treat all greens or other
