

Go to seed

The growth and dissolution of the forage and turf seed giant AgriBioTech Inc. have altered the face of the turf seed industry over the past few years. Since the demise of ABT, new companies have arisen from the ashes of the former colossus, and some that had managed to avoid acquisition have expanded. As a service to its readers, *GCM* is presenting a list of some of the turf seed and other seed products offered for golf course superintendents. This list includes products of companies that responded to *GCM* on or before a March 23 deadline. It is by no means complete, but it may allay some of the confusion about which companies are offering which products.
