Lesco offers turf marking paint

Lesco, Inc has introduced Tournament Turf Marking Paint for golf courses, athletic fields, irrigation and landscape installation and other turf uses. The new, economical, 16-ounce paint is available in four vivid colors — white, yellow, red and fluorescent red — in a lead-free formula.

The can holds 33-1/3 percent more paint than competitive brand cans containing 12 ounces.

The Tournament Turf Marking Paint is available in four vivid colors for golf courses, athletic fields, containing 12 ounces.

Cushman adds water-cooled engine

Cushman has expanded its line of Cushman Front Line mower models with the addition of two new water-cooled gasoline engine tractors.

Available in both 3-wheel and 4-wheel models, the newest unit features a 4-cycle, 3-cylinder Teledyne-Wisconsin engine that develops 56 hp at 3,600 rpm. The engine has a displacement of 60.88 cubic inches, and develops 44.7 foot-pounds torque at 2,500 rpm.

The model "808" 4-wheel Front Line is equipped with hydraulic power steering and is capable of a zero turning radius, using the traction assist brake on the inside wheel.

Having trouble getting bentgrass?

Try Jamestown Chewings Fescue

It's no secret that bentgrasses are in short supply. It's hard to get enough creeping bentgrass. But there is a solution: Jamestown chewings fescue! After all, chewings fescue has been used on golf courses for over three centuries. And it's better than Jamestown. It's been proven in tests at the University of Rhode Island and on prominent courses for more than 20 years.

For new greens

Cut your bentgrass needs in half by using a mix which is 50% Jamestown and 50% bentgrass by seed weight. Not only will this match the performance of a solid bent, but will give some added benefits as well. Jamestown establishes quickly and puts the greens into play faster. It will perform as a companion grass for up to 10 years as the bentgrass matures and gradually dominates the turf.

For repairs

Use 3-4 pounds of Jamestown with ½ lb. of bentgrass per 1000 square feet. This mixture has proven very effective in emergency repair of damaged greens.

For winter overseeding

Consider Jamestown as part of a mix for overseeding southern Bermudagrass greens, tees and lawns. Jamestown will enhance turf performance during winter months. So whether it's to help out with a bentgrass shortage, or add benefits to your overseeding program, try Jamestown chewings fescue.

Moisture-Stat eliminates over-watering

The Moisture-Stat line from Griswold Controls adds moisture sensing and monitoring capability to any existing electro-mechanical or solid state controller to eliminate over-watering. Moisture-Stat allows watering to occur only when it's needed.

The system consists of a control panel with moisture level indication, adjustment and by-pass provisions along with four sets of special stainless steel probes. Each valve zone can be assigned to a set of probes.

Moisture-Stat II offers a convenient front-panel display that keeps track of the percentage of water saved. The system pays for itself in a few short months.

Course Cover controls erosion

Course Cover, a new line of erosion control/revegetation products for the professional turf manager has been introduced by North American Green.

Course Cover includes a line of four products designed to control erosion on both slopes and in drainage channels. The blankets reduce rainfall impact, reduce velocity of run-off water, and transportation of soil particles. Sown together or separately, the blankets stay in place until a vegetative cover is established.

**Golf 2000’s yard markers speed up play**

Visualize a course with the grass uninterrupted by concrete or asphalt, where play is faster because cart paths follow the fairway and where the yardages are clearly marked.

Golf 2000 Corp. of San Diego, Calif., offers two new products which help to speed up play. Their interlocking pavers protect turf and are used to construct cart paths in the fairway. Their 5-by 10-inch yardage markers lie flush with the fairway and are easily visible.

Placed at 10-yard intervals in the center or at the sides of the fairway, the markers allow golfers to quickly determine the yardage, hit fewer misclubbed shots and improve handling ease, they said.

Since golf balls bounce normally off of the pavers and yardage markers they do not materially alter the game.

The pavers and yardage markers do not violate the rules of golf and are covered under USGA Rule 24-2.

**Turbo Shredder said ‘revolutionary’**

Excel Industries has introduced what it calls a “revolutionary” new Turbo Shredder mower deck that chops grass clippings into fine particles that return to the soil surface and are used to construct cart paths in the fairway. Their 5-by 10-inch yardage markers lie flush with the fairway and are easily visible.

Placed at 10-yard intervals in the center or at the sides of the fairway, the markers allow golfers to quickly determine the yardage, hit fewer misclubbed shots and help realize when it is safe to shoot to an occupied green.

Since golf balls bounce normally off of the pavers and yardage markers they do not materially alter the game.

The pavers and yardage markers do not violate the rules of golf and are covered under USGA Rule 24-2.

**Toro's 224 enters gas-power market**

After introducing the company's Groundsmaster 220-O diesel trim mower, Toro found that some users preferred gas-powered mowers. The new 224 is Toro's response.

Customers had noted that groundkeepers' current key need was for a compact trim mower that combined maneuverability and high productivity with comfort and servicing ease.

The 224 features a three-cylinder, liquid-cooled Mitsubishi GL3C engine that delivers 24 horsepower. It is a gasoline conversion of the 220-O's L3C diesel engine. The 224 offers more horsepower than the diesel version's 20.5 because gasoline has a higher energy content than diesel fuel.

Groundsmaster mowers maintain operator comfort and improve handling ease by using a new power-assisted, four-link steering design.

**Clarke introduces trash pumps**

A new line of trash pumps with quick access to the impeller, volute and casing for cleaning and maintenance has been introduced by Clarke Power Products.

The self-priming, centrifugal trash pumps are available in 2-, 3- and 4-inch sizes.

Clarke says the pumps are ideal for water that contains compounds often found in agriculture and construction applications. The pumps have a steel frame and overall lightweight, compact design for easy handling and moving to and from job sites.

To achieve maximum fuel efficiency, the 2- and 3-inch pumps use Honda engines and the 4-inch pumps feature Robin engines.

**Why Dormant Feed Milorganite?**

**Reduce Operating Costs**

You'll save time and money. Apply Milorganite in late fall for efficient labor and nutrient use. More time is available for you and your staff in late fall, and spring time crunches will be avoided when you dormant feed Milorganite.

**The W.I.N. Factor**

Dormant applied Milorganite does not burn, leach, or lose its nutritive value due to a 90% Water Insoluble Nitrogen (W.I.N.) factor.

**Rich In Chelated Iron**

Your turf will look great. Milorganite provides 4% min. iron and a full package of nutrients. That means an early spring green-up without excessive growth, with the iron content carrying the rich color well into the heat of summer.
