Seed firms: Gov't cost us $1M

BY MARK LESLIE

Not satisfied with the mere "regrets" of the U.S. Department of Agriculture for a snafu that cost his company $200,000, Sonny Pennington of Pennington Enterprises Inc. is on the verge of suing the USDA.

Pennington's Madison, Ga., firm is one of seven seed companies that absorbed a total $1 million loss when 2 million pounds of tall fescue seed imported from Argentina were found to contain a noxious weed, serrated tussock, and the seed was ordered recalled.

Pennington says he will decide by early August whether he would sue the government, but first he would seek an audience with Secretary of Agriculture Clayton Yeutter.

"We're attempting to go through Congress rather than lawyers," Pennington said. "Congressmen work cheaper than lawyers."

Possible cure found for cricket

BY LARRY KIEFFER

After four years of testing in pastureland by researchers with the University of Florida's Institute of Food and Agricultural Sciences, "the most promising biological control agent for mole crickets we have ever had" is ready for field trials at 20 Florida golf courses.

"Everything looks extremely promising as far as finally having something we can brag about," said Bob Rehberg, chairman of the Florida Turfgrass Association's research awards committee.

What Rehberg and the FTGA are bragging about is a Uruguay nematode that carries a bacterium at least four times more virulent than the current mole cricket control in some of the other materials that have been pulled in from commercial organizations.

The microscopic nematode crawls in the mole cricket's mouth, infects it with the deadly bacteria, and then crawls out before the insect dies "within one to several days."

Eureka! Golf gold being mined

1989 is prime time for nation's builders

BY MARK LESLIE

This is the best of times for golf course builders.

A short while ago, Golf Course Builders Association Executive Director Don Rossi said, "There's no way to buy the land, build a golf course, and make money except to charge exhorbitant fees — unless the land is given to you — because the cost of the land is so, so expensive."

Poof! Suddenly real-estate developers are giving the land away to golf course builders because the developers want a golf course to attract home buyers but don't want to get involved in something they're not expert in.
