GOVERNMENT UPDATE

N.J. company saves course as open space

Hackensack Water Co. has been granted permission to lease 32 acres of its property to the prospective new owner of an adjoining tract, making possible the preservation of a 132-acre golf course.

The approval by the New Jersey Board of Public Utilities (BPU) of the 59-year lease was a key element leading to the Feb. 22 sale of the adjoining 100 acres by Winthrop Products, Inc., an Eastman Kodak Corp. subsidiary, to an undisclosed buyer willing to continue a country club at the site.

A previous plan to destroy the course and convert the site to a corporate office building will be abandoned.

Robert A. Gerber, chairman of Hackensack Water, applauded the BPU decision as the second in a series of positive steps this year for recreational open space preservation in northern New Jersey.

"This is a case of leveraging," where our 32 acres were the key to the preservation of the entire golf course. Since the first of this year four golf courses, totaling more than 500 acres, have been preserved through this kind of initiative," said Gerber.

The state watershed property review board ruled in February that the long-term lease could be exempted from a moratorium on watershed land transfers, because the golf course use of the property imposed no threat to the water supply.

In February the BPU approved a plan to permanently preserve three other courses nearby, when it allowed the water company to transfer 290 acres to a non-utility affiliate. As part of the company's Evergreen Formula, it agreed to place perpetual deed restrictions on that land so that it would never be developed.

The River Vale site was not considered for a similar transfer, since part of it overlaps the protective buffer zone that surrounds Lake Tappan Reservoir. Hackensack Water intends to retain permanent ownership of the acreage as part of the 2,500 acres of protective land that surround the company's water supplies in New Jersey and New York.

The company's 32 acres has been leased to River Vale Country Club for more than 40 years to extend its golf course. In 1985, when the country club sold its 100 acres to Sterling Drug Capital Corp. for a corporate office headquarters, the drug company leased the water company's land to acquire an unobstructed view of nearby Lake Tappan Reservoir.

The BPU reserved a decision on the Parisian, an adjoining tract to Winthrop. It is zoned for 1 million square feet of office space.

Hackensack Water hopes to contribute up to 50 percent of any proceeds realized from the lease to the approximately $7 million already available for distribution to Bergen and Hudson counties under the earlier land transfer.

The BPU ruled in late February that the Jan. 29, 1989, land transfer was a key to the Feb. 22 sale because the former golf club was part of the company's Evergreen Formula, which permits preservation of the entire golf course.

The three golf courses involved in the Jan. 29 transfer are Emerson Country Club in Oradell and Emerson; Pascack Golf and Country Club in River Vale and Harrington Park; and Haworth Golf and Country Club in Haworth. Only half of the Haworth club is on water company land.

GCSAA installs new leaders

Faubel assumes presidency; Cadenelli beats out Roberts

Gerald L. Faubel of Saginaw (Mich.) Country Club was elected president of the Golf Course Superintendents Association of America during the association's annual meeting in Orlando, Fla., on Feb. 26.

Faubel succeeds Dennis D. Lyon of Aurora, Colo., as immediate past president.

As immediate past president, Lyon will continue to serve for a year as director.

Stephen G. Cadenelli of Metedeconk National Golf Club in Jackson, N.J., was elected vice president.

"I'm very pleased and excited to be vice president," said Cadenelli, a superintendent and GCSAA member since 1973.

"I've been involved with the association for a long time. This is a great opportunity to work for the business and profession. I'm really looking forward to the next couple of years."

William R. Roberts of Lochmoor Club in Grosse Pointe Woods, Mich., lost the vice presidential race but was re-elected as a director and appointed secretary/treasurer.

Also re-elected as directors were Joseph G. Baldy of Acacia Country Club in Lyndhurst, Ohio, and Randall P. Zadik of Rolling Hills Country Club in McMurray, Pa.

Charles T. Passinos of Hyannisport (Mass.) Club was appointed to the board to fill Cadenelli's vacated director's post.

Gary T. Grigg of Shadow Glen Golf Course in Overland Park, Kan., and Randy Nichols of Cherokee Town & Country Club in Dunwoody Ga., continue to serve as directors.

W. Va. superintendents expand educational opportunities in turf

The West Virginia Golf Course Superintendents' Association has elected John C. Cummings of Berry Hills Country Club in Charleston, W.Va., as president for 1990.

Serving with Cummings are Charles A. Murray of Edgewood Country Club in Charleston as vice president; and Arthur Casto of the Kanawha County Parks Commission as secretary-treasurer.

Serving as directors are Carl Murphy of St. Mary's Golf Club, Thomas Coulson of Clarksburg Country Club, Charles R. Knight of Sistersville Country Club and Gary Roush of Riverside Golf Club in Masem, W.Va.

Recognizing their obligation to their profession, the directors have expanded their regular monthly meeting schedule to accommodate the diversity of education that the superintendent now requires.

In addition, the association will conduct its first annual turf conference at Cedar Lakes Conference Center near Ripley, W.Va. The three-day conference, Nov. 13-15, will include equipment and product demonstrations as well as 3-1/2 days of concurrent educational programming.

Fund-raising for turfgrass research and scholarships will also be a focus for the association. More than $23,000 has been raised and distributed over the past four years and this year's goal is $10,000.

Tournament Chairman Charles A. Murray will host the event at Edgewood Country Club on June 11 and plans are underway to expand it.

Murray said: "The WVGSAA board of directors recognizes that we have a very real need to be progressive in this area. Our distributors and membership have responded beautifully in support of this worthy endeavor.

"It is our hope that, with this program, we can contribute to the positive direction that golf is taking within our state."

EPA

tered and the right to produce them canceled. Eighty percent of those canceled hadn't been used in three years, Williams said.

"It's purely an economic decision whether to re-register or not," she said.

The net result has been the removal of many obsolete pesticides from the EPA's approved list, a move that should increase public confidence in pesticide use, she added.

"We've found that risk is a combination of real hazard and public fear. We're trying to reduce the fear component," Williams said.
