Major changes expected in revisions of wetlands laws

Wetlands preservation regulations that have handcuffed golf course developers and created long, expensive waits for approvals are being rewritten — and loosened extensively — on two fronts.

A revision of the much-maligned federal wetlands delineation manual — used by the Army Corps of Engineers, Environmental Protection Agency, U.S. Fish and Wildlife Service, and Soil Conservation Service since 1989 — is under review and is said to more narrowly define what constitutes a wetland.

Further up Pennsylvania Avenue, congressmen have answered the call of waters and drafted legislation to correct deficiencies they see in the wetlands protection system.

Some conservationists are angry. Linda Winter, director of wetlands programs for the Izaak Walton League, said a scientifically sound definition is "being thrown out and ignored for political reasons."

One EPA ecologist, resigned and another asked that his name be dropped from the credits of the revision.

But others are looking forward to changes.

First facilities open for handicapped

Two golf facilities built especially for the physically challenged will open within the next month, marking milestones for major changes expected in revisions of wetlands laws

End of drought won't solve Calif. woes

"We are going to see changes in our landscapes and maybe in our lifestyles if the shortages are severe enough and long enough,"
